The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at http://www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Iowa State's Points of Pride

*The world’s first electronic digital computer was developed at Iowa State by math and physics professor John V. Atanasoff and engineering graduate student Clifford Berry, in the late 1930s. Their invention, the ABC computer, has been called the most important technological innovation of the 20th century.

*The university is a leader in virtual reality research and its most advanced virtual reality theater, the C6, is the nation’s first six-sided theater that totally immerses the user in images and sound.

*Iowa State’s faculty includes a Nobel Prize winner in chemistry and members of the National Academy of Engineering and the National Academy of Sciences.

*Iowa State’s faculty members are recognized for their scholarly efforts. They serve as editors and on editorial and advisory boards of national and international academic professional journals.

*Iowa State’s faculty includes two professors who have been recognized among the top 100 young technology innovators in the world.

*Iowa State is a member of the prestigious Association of American Universities that has a membership of only 62 major research universities in the United States and Canada.

*Iowa State is one of the top three U.S. universities in the development of patentable biotechnology.

*With more than 100 majors, 1700 faculty and 800 clubs and organizations, Iowa State has built a reputation for almost unlimited academic and social opportunities in a personal and welcoming environment.

*Iowa State’s undergraduate programs for future entrepreneurs are ranked among the top 25 in the country.

*Iowa State’s interior design, architecture and landscape architecture programs are ranked among the best in the nation.

*Iowa State’s learning communities program for undergraduate students is rated among the nation’s best.

*Every state and more than 100 countries are represented in Iowa State’s student body.

*Iowa State students have a reputation for winning national and international awards. They win contests for apparel design, NASA food technology, news writing for print and broadcast, computer software, vocal music, music composition and many more.

*Iowa State is nationally ranked for its beautiful campus and its central campus has been honored by the Association of Landscape Architects as one of only three university Centennial Medallion sites in the nation.

*Iowa State’s 600 works of art on campus make its public art collection the largest of any university in the nation.

*Iowa State’s Reiman Gardens has been recognized for having the nation’s most outstanding public rose garden.

*Iowa State’s wrestling program boasts 6 Olympic gold medalists – the latest being graduate Jake Varner at the 2012 Olympic Games in London. Another Cyclone Olympic winning wrestler, Cael Sanderson, had a perfect collegiate wrestling record at Iowa State of 159 wins that has been recognized by Sports Illustrated as the second most impressive feat in college sports history.

*Iowa State's faculty includes a Nobel Prize winner in chemistry and members of the National Academy of Engineering and the National Academy of Sciences. *The Wall Street Journal ranks the College of Engineering among the top 15 in the nation for the most well-trained and educated students and who are best able to succeed once hired.

*The College of Veterinary Medicine has educated over 7,000 veterinarians serving the public and animals worldwide since 1879.

*The College of Human Sciences is home of the world’s most effective drug prevention program for youth, the fastest method of detecting salmonella in contaminated foods, U.S. President-recognized teachers, and performance-boosting swimsuits worn by Olympic gold medalists.

*The university is a leader in virtual reality research and its most advanced virtual reality theater, the C6, is the nation’s first six-sided theater that totally immerses the user in images and sound.

*Iowa State’s faculty includes a Nobel Prize winner in chemistry and members of the National Academy of Engineering and the National Academy of Sciences.

*Iowa State’s faculty members are recognized for their scholarly efforts. They serve as editors and on editorial and advisory boards of national and international academic professional journals.

*Iowa State’s faculty includes two professors who have been recognized among the top 100 young technology innovators in the world.

*Iowa State is a member of the prestigious Association of American Universities that has a membership of only 62 major research universities in the United States and Canada.

*Iowa State is one of the top three U.S. universities in the development of patentable biotechnology.

*With more than 100 majors, 1700 faculty and 800 clubs and organizations, Iowa State has built a reputation for almost unlimited academic and social opportunities in a personal and welcoming environment.

*Iowa State’s undergraduate programs for future entrepreneurs are ranked among the top 25 in the country.

*Iowa State’s interior design, architecture and landscape architecture programs are ranked among the best in the nation.

*Iowa State’s learning communities program for undergraduate students is rated among the nation’s best.

*Every state and more than 100 countries are represented in Iowa State’s student body.

*Iowa State students have a reputation for winning national and international awards. They win contests for apparel design, NASA food technology, news writing for print and broadcast, computer software, vocal music, music composition and many more.

*Iowa State is nationally ranked for its beautiful campus and its central campus has been honored by the Association of Landscape Architects as one of only three university Centennial Medallion sites in the nation.

*Iowa State’s 600 works of art on campus make its public art collection the largest of any university in the nation.

*Iowa State’s Reiman Gardens has been recognized for having the nation’s most outstanding public rose garden.

*Iowa State’s wrestling program boasts 6 Olympic gold medalists – the latest being graduate Jake Varner at the 2012 Olympic Games in London. Another Cyclone Olympic winning wrestler, Cael Sanderson, had a perfect collegiate wrestling record at Iowa State of 159 wins that has been recognized by Sports Illustrated as the second most impressive feat in college sports history.

*Iowa State holds a world record certified by the Guinness Book of World Records for growing the tallest amaranth plant in the world.

*The College of Veterinary Medicine has educated over 7,000 veterinarians serving the public and animals worldwide since 1879.

*The College of Human Sciences is home of the world’s most effective drug prevention program for youth, the fastest method of detecting salmonella in contaminated foods, U.S. President-recognized teachers, and performance-boosting swimsuits worn by Olympic gold medalists.

*Iowa State’s faculty includes a Nobel Prize winner in chemistry and members of the National Academy of Engineering and the National Academy of Sciences. *The Wall Street Journal ranks the College of Engineering among the top 15 in the nation for the most well-trained and educated students and who are best able to succeed once hired.

*The College of Business undergraduate program ranks among the top 20% and the MBA program ranks among the top 15% of all U.S. programs accredited by the Association to Advance Collegiate Schools of Business.

*Supported by its agricultural career fair, the largest in the nation, the College of Agriculture and Life Sciences’ placement rate for its graduates has been more than 97% annually for more than a decade.

*The College of Design is one of the most comprehensive design colleges in the United States, with an exceptional range of design disciplines and programs that regularly rank in the nation’s top 10.

*The faculty in the College of Liberal Arts and Sciences lead seven of Iowa State’s top 10 nationally ranked academic programs.
About the Catalog

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses and programs take effect in the fall term. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program. The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/Faculty Handbook Curriculum Approvals – Section 10.8. See the Office of the Provost (http://www.provost.iastate.edu) web site for more information.

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum) representatives. Editing begins in late February with course changes due to the Office of the Registrar by June 1. Curriculum and other general information is due to the Office of the Registrar by December 1. Publication is the following February.

See the catalog editing web site (http://www.registrar.iastate.edu/catalog-editing) for more details on how to make changes to the catalog.

Credits and Contact Hours

The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

(2-2) Cr. 3.
Prereq: Satisfactory scores in math placement assessments; credit or enrollment in MATH 142.
Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A M D 165. Dress and Diversity in Society.
(3-0) Cr. 3.
Examination of diversity among consumers and forecasting future trends in consumer behavior. Introduction to social justice and responsibility issues.

AF AM 201. Introduction to African American Studies.
(3-0) Cr. 3.
An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

AFAS 101. Introductory Leadership Laboratory I.
(0-2) Cr. 1.
Prereq: Membership as a cadet in AFROTC
Instruction on Air Force customs and courtesies; drill and ceremonies, issuing of assigned readings.

(1-0) Cr. 1.

(0-2) Cr. 1.
Prereq: Membership as a cadet in AFROTC
Use of basic military training skills and instruction to develop confidence, leadership, communication skills and physical fitness. The team approach is utilized in the instruction and application of Air Force physical fitness requirements. Students will learn various Air Force physical fitness techniques as well as how to conduct physical fitness sessions. Full participation in all events will be determined based on student’s physical and medical eligibility. Offered on a satisfactory-fail basis only.

AGEDS 110B. Agricultural Studies (Fall only).
(1-0) Cr. 1.
Orientation to the department. Careers in agriculture.

AGRON 110. Professional Development in Agronomy: Orientation.
Cr. 0.5-1.
Orientation to college life, the profession of agronomy, and the agronomy curriculum.

(2-3) Cr. 3.
A foundation course in agronomy applying crop, soil, and environmental sciences in understanding agricultural systems in the world. Includes introductory concepts of plant, soil, tillage, pest, environmental, and sustainable aspects of crop production. Off-campus version offered through internet by interactive computer courseware.

AGRON 120. Introduction to Renewable Resources.
(Cross-listed with ENV S, NREM).
(3-0) Cr. 3.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

(2-2) Cr. 3.
Prereq: CHEM 163
Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer databank information in balancing agronomic, economic, and environmental concerns in soil management. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

AGRON 206. Introduction to Weather and Climate.
(Cross-listed with MTEOR).
(3-0) Cr. 3.
Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

AM IN 210. Introduction to American Indian Studies.
(3-0) Cr. 3.
Introduction to the multidisciplinary aspects of American Indian studies. Topics include literature, the arts, history, anthropology, sociology, education, and contemporary Indian politics. Guest lectures, media presentations, and discussion of assigned readings.

AN S 101. Working with Animals.
(1-2) Cr. 2.
A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

AN S 110. Orientation in Animal Science and ISU.
(2-0) Cr. 1.
Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

(2-0) Cr. 2.
Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

ANTHR 201. Introduction to Cultural Anthropology.
(3-0) Cr. 3.
Comparative study of culture as key to understanding human behaviors in different societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.

Meets International Perspectives Requirement.

ANTHR 202. Introduction to Biological Anthropology and Archaeology.
(3-0) Cr. 3.
Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology.

(3-0) Cr. 3.
An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific.

Meets International Perspectives Requirement.
ARCH 221. History of Architecture I.
(3-0) Cr. 3. F.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750.
Meets International Perspectives Requirement.

ART H 280. History of Art I.
(3-0) Cr. 3. F.
Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic period.
Meets International Perspectives Requirement.

ART H 292. Introduction to Visual Culture Studies.
(3-0) Cr. 3.
An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.
Meets U.S. Diversity Requirement

ASTRO 103. Evening Star.
Cr. 1. F.S.
An entirely web-based course covering topics in celestial mechanics ("Rocket science") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Blackboard Learn. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 120. The Sky and the Solar System.
(3-0) Cr. 3. F.S.SS.
For the nonscientist. The sky: constellations; motions of the sun, moon, and planets; the solar system; origin and evolution; characteristics of the sun, planets, satellites, comets, meteorites, and asteroids. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 190. Stars, Galaxies, and Cosmology.
(3-0) Cr. 3. F.S.
For the nonscientist. Observational aspects of stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The Milky Way Galaxy: clouds of matter in space, the structure and evolution of our galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe.

BBMB 101. Introduction to Biochemistry.
(1-0) Cr. 1. F.
Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BIOL 101. Introductory Biology.
(3-0) Cr. 3. F.S.SS.
Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

BIOL 110. Introduction to Biology.
Cr. 1. F.
Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

BIOL 155. Human Biology.
(3-0) Cr. 3. F.S.
A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173. Environmental Biology.
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 211. Principles of Biology I.
(3-0) Cr. 3. F.S. Prereq: High school biology
Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L. Principles of Biology Laboratory I.
(0-3) Cr. 1. F. Prereq: Credit or enrollment in BIOL 211 Laboratory to accompany 211.

BIOL 212. Principles of Biology II.
(3-0) Cr. 3. F.S. Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177
Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L. Principles of Biology Laboratory II.
(0-3) Cr. 1. F. Prereq: credit or enrollment in BIOL 212 Laboratory to accompany 212.

BIOL 255. Fundamentals of Human Anatomy.
(3-0) Cr. 3. F. Prereq: High School Biology and Chemistry, or BIOL 101
An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 255L. Fundamentals of Human Anatomy Laboratory.
(0-3) Cr. 1. F. Prereq: Credit or enrollment in BIOL 255
Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BUSAD 103. Orientation.
(1-0) Cr. 1. F.S.
A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Only one of BUSAD 101, 102, or 103 may be counted toward graduation.

C E 160. Engineering Problems with Computational Laboratory.
(2-2) Cr. 3. F.S. Prereq: MATH 141, MATH 142 or satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 165
Formulation of engineering problems using spreadsheets and Visual Basic for Application for solution. Presenting results using word processing, tables, and graphs. Introduction to engineering economics and statics. Civil engineering examples.

C E 170. Graphics for Civil Engineering.
(0-4) Cr. 2. F.S. Prereq: MATH 165, credit or enrollment in C E 105
Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

(3-0) Cr. 3. F.S.SS.
Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis is placed on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning in public schools. Designed for prospective teachers.

CHEM 050. Preparation for College Chemistry.
(3-0) Cr. 0. F.S. Prereq: 1 year high school algebra
An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. Credit for Chem 50 does not count toward graduation.
CHEM 160. Chemistry in Modern Society. (3-0) Cr. 3. F.S.
Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

CHEM 163L. Laboratory in College Chemistry. (0-3) Cr. 1. F.S.SS. Prereq: Credit or enrollment for credit in CHEM 163 Laboratory to accompany CHEM 163. Must be taken with CHEM 163. Only one of Chem 163L, CHEM 167L, and CHEM 177L may count toward graduation.

CHEM 167. General Chemistry for Engineering Students. (4-0) Cr. 4. F.S. Prereq: MATH 140 or high school equivalent and 1 year of high school chemistry or CHEM 50 Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177. General Chemistry I. (4-0) Cr. 4. F.S.SS. Prereq: MATH 140 or high school equivalent, and CHEM 50 or 1 year of high school chemistry, and credit or enrollment in CHEM 177L. Chemistry and biochemistry majors may consider taking CHEM 201 The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermodynamics, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177L. Laboratory in General Chemistry I. (0-3) Cr. 1. F.S.SS. Prereq: Credit or enrollment for credit in CHEM 177 Laboratory to accompany CHEM 177, 177L must be taken with 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177N. Laboratory in General Chemistry I. (0-3) Cr. 1. F. Prereq: Credit or enrollment for credit in CHEM 177. For chemistry and biochemistry majors Laboratory to accompany CHEM 177. CHEM 177N must be taken with CHEM 177. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 178. General Chemistry II. (3-0) Cr. 3. F.S.SS. Prereq: CHEM 177, CHEM 177L Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses.

CHEM 201. Advanced General Chemistry. (5-0) Cr. 5. F. Prereq: Co-enrollment in MATH 165 or credit, one year of high school chemistry, and one year high school physics or advanced chemistry. Co-enrollment in CHEM 201L A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends and new developments. An introduction to the use of computers in chemical research. Meets International Perspectives Requirement.

CHIN 101. Elementary Mandarin Chinese I. (5-0) Cr. 5. F. Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters.

CJ ST 240. Introduction to the U.S. Criminal Justice System. (3-0) Cr. 3. F. Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

CJ ST 241. Youth and Crime. (Cross-listed with SOC) (3-0) Cr. 3. F. Prereq: SOC 134 An examination of delinquency that focuses on the relationship between youth as victims and as offenders, and social and etiological features of delinquency, the role of the criminal justice system, delinquents’ rights, and traditional and alternative ways of dealing with juvenile crime.

CL PS 122. Leading with Purpose. (1-0) Cr. 1. F.S. Designed for emerging student leaders, this course will provide students with basic leadership skills covering strengths identification, personal skills development, goal achievement, values-based behaviors, and mission statement development.

CL PS 270. Campus Leadership Development. (3-0) Cr. 3. F.S. Theory and practice of effective leadership in a campus context. Study of effective leadership models and leadership in complex systems. Expectation of engagement in campus activities.

CL ST 201. Technical Terminologies in the Professions. (3-0) Cr. 3. F.S. Essential vocabulary and concepts in English that are derived from Latin and Ancient Greek. Formation and usage of technical terminology. Cultural influence for a variety of languages. Analysis of technical writing.

CL ST 273. Greek and Roman Mythology. (3-0) Cr. 3. F.S. Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices. Some attention may be given to important modern theories. Meets International Perspectives Requirement.

COM S 101. Orientation. Cr. R. F.S. Introduction to the procedures and policies of Iowa State University and the Department of Computer Science, test-outs, honorary societies, etc. Issues relevant to student adjustment to college life will also be discussed. Offered on a satisfactory-fail basis only.

COM S 103. Computer Applications. Cr. 4. F.S.SS. Introduction to computer literacy and applications. Applications: Windows, Internet browser/HTML, word processing, spreadsheets, database management and presentation software. Literacy: history of computing, structure of computers, telecommunications, computer ethics, computer crime, and history of programming languages. No prior computer experience necessary. Course is offered online only. Students must attend an orientation session the first week of class.

COM S 104. Introduction to Programming. (1.5-1) Cr. 2. F.S. Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.

COM S 107. Applied Computer Programming. (3-0) Cr. 3. F.S. Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

COM S 207. Fundamentals of Computer Programming. (Cross-listed with MIS) (3-1) Cr. 3. S.F. Prereq: MATH 150 or placement into MATH 140/MATH 141/MATH 142 or higher An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/error-handling. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/MIS 207 and Com S 227.
COM S 227. Introduction to Object-oriented Programming. (3-2) Cr. 4. F.S. Prereq: Placement into MATH 143, 165, or higher; recommended: a previous high school or college course in programming or equivalent experience.
Introduction to object-oriented design and programming techniques. Symbolic and numerical computation, recursion and iteration, modularity procedural and data abstraction, and specifications and subtyping. Object-oriented techniques including encapsulation, inheritance and polymorphism. Imperative programming. Emphasis on principles of programming and object-oriented design through extensive practice in design, writing, running, debugging, and reasoning. Course intended for Com S majors. Credit may not be applied toward graduation for both Com S 207 and 227.

COM S 228. Introduction to Data Structures. (3-1) Cr. 3. F.S. Prereq: Minimum of C- in 227, credit or enrollment in MATH 165
An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism. Abstract data type specification and correctness. Collections and associated algorithms, such as stacks, queues, lists, trees, searching and sorting algorithms. Graphs. Data on secondary storage. Analysis of algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

COMST 101. Introduction to Communication Studies. (3-0) Cr. 3.
An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

CPR E 131. Introduction to Computer Security Literacy. (Cross-listed with INFAS) (1-0) Cr. 1.
Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 185. Introduction to Computer Engineering and Problem Solving I. (2-2) Cr. 3. Prereq: Credit or enrollment in MATH 141

DANCE 270. Dance Appreciation. (3-0) Cr. 3. F.S.SS.
Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.

DES 230. Design Thinking. (3-0) Cr. 3. F.S.
Introduction to the phenomenon of design thinking as it appears in various design fields, including methodologies of reasoning and problem solving; patterns of creativity and individual style; and the interaction of art, science, and technology.

DSN S 102. Design Studio I. (1-6) Cr. 4.
A core design studio course exploring the interaction of two-and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, contemporary design practices and disciplines in their cultural contexts.

DSN S 131. Design Representation. (1-6) Cr. 4.
An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

DSN S 183. Design Cultures. (3-0) Cr. 3.
A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary society. Design processes and design works are presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

DSN S 232. Digital Design Communications. (3-0) Cr. 3.
Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

E CON 101. Principles of Microeconomics. (3-0) Cr. 3. F.S.SS.

ECON 101L. Laboratory in Principles of Microeconomics. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in the appropriate section of ECON 101
Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

ECON 102. Principles of Macroeconomics. (3-0) Cr. 3. F.S.SS. Prereq: ECON 101 recommended

ECON 235. Introduction to Agricultural Markets. (3-0) Cr. 3. F.S. Prereq: ECON 101
Basic economic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level.

ENGL 099L. Strategies for Nonnative Speakers of English: Strategies for Listening. Cr. 0. F.S. Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department’s option

ENGL 099R. Strategies for Nonnative Speakers of English: Strategies for Reading. Cr. 0. F.S. Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department’s option

ENGL 101B. English for Native Speakers of Other Languages: Academic English. (3-0) Cr. 3. F.S. Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)
For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are native speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101C. English for Native Speakers of Other Languages: Academic English II—Undergraduates. (3-0) Cr. 3. F.S. Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)
For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.
ENGL 150. Critical Thinking and Communication. (3-0) Cr. 3. F.S.SS. Prereq: Concurrent enrollment in LIB 160 is recommended. Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio.

ENGL 201. Introduction to Literature. (3-0) Cr. 3. Prereq: Credit in or exemption from 150

Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

ENGL 225. Survey of British Literature to 1800. (3-0) Cr. 3. Prereq: ENGL 250

Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 226. Survey of British Literature since 1800. (3-0) Cr. 3. Prereq: ENGL 250

Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres and may include texts that reflect and/or critique the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

ENGL 237. Survey of Film History. (3-0) Cr. 3. F. Prereq: Credit in or exemption from 150

A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present.

ENGL 240. Introduction to American Indian Literature. (Cross-listed with AM IN). (3-0) Cr. 3. F. Prereq: Credit in or exemption from ENGL 150

Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, written and visual texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.

Meets U.S. Diversity Requirement

ENGL 250. Written, Oral, Visual, and Electronic Composition. (3-0) Cr. 3. F.S.SS. Prereq: ENGL 150 or exemption from ENGL 150; sophomore classification or exemption from ENGL 150; credit for or concurrent enrollment in LIB 160

ENGL 275. Analysis of Popular Culture Texts. (Cross-listed with SP CM). (3-0) Cr. 3. F.S. Prereq: Credit in or equivalent of 250

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

ENGR 160. Engineering Problems with Computer Applications Laboratory. (2-2) Cr. 3. F.S.SS. Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

ENT 201. Introduction to Insects. (1-0) Cr. 1. F.S.SS.

5 weeks. Classroom section spring only. World Wide Web section of course offered summer and fall semesters. Biological and ecological aspects of insects.

ENT 211. Insects and Society. (2-0) Cr. 2. F.S. Prereq: ENT 201

ENV S 101. Environmental Geology: Earth in Crisis. (Cross-listed with GEOL). (3-0) Cr. 3. F.S.

An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism.

ENV S 120. Introduction to Renewable Resources. (Cross-listed with AGRON, NREMI). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

ENV S 173. Environmental Biology. (Cross-listed with BIOL). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

ENV S 201. Introduction to Environmental Issues. (Cross-listed with BIOL, ENSECI). (2-0) Cr. 2. F.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

FRNCH 101. Elementary French I. (4-0) Cr. 4. F.S.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

FRNCH 201. Intermediate French I. (4-0) Cr. 4. F. Prereq: FRNCH 102

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Meets International Perspectives Requirement

FS HN 101. Food and the Consumer. (3-0) Cr. 3. F.S. Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Introduction of foods into the marketplace.

FS HN 110. Professional and Educational Preparation. (1-0) Cr. 1. F.S.

Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation, enhancement of communication skills, and portfolio development. Offered on a satisfactory-fail basis only.

FS HN 167. Introduction to Human Nutrition. (3-0) Cr. 3. F.S.SS. Prereq: High school biology or 3 credits of biology

Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

GEOL 100. The Earth. (3-0) Cr. 3. F.S.SS.

How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, landforms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in Geol 100L.

GEOL 100L. The Earth: Laboratory. (0-2) Cr. 1. F.S. Prereq: Credit or enrollment in GEOL 100

Students will gain understanding of how Earth processes affect their lives and how they affect the Earth, and of the complex nature of the Earth and its processes. They will gain a deep knowledge of the methods used to understand the time scales and rates of Earth processes also through an applied research experience on groundwater and surface water.

GEOL 101. Environmental Geology: Earth in Crisis. (Cross-listed with ENV S). (3-0) Cr. 3. F.S.

An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism.
HD FS 183. Personal Finance in Early Adulthood.
(1-0) Cr. 1. F.S.SS.
Introduction to basic concepts and budgeting practices for management of resources and prevention of financial problems commonly associated with college, including credit and student loans. Offered on a satisfactory-fail basis only.

(3-0) Cr. 3. F.S.
Typical and atypical development of children prenatal through middle childhood. Examination of healthy development and potential impact of health issues in children. Discussion of influence of the family and society on development.

HD FS 239. Housing and Consumer Issues.
(3-0) Cr. 3. F.S.
Introduction to factors affecting consumer and housing decisions of individuals and families, including housing issues such as housing quality, accessibility and affordability, neighborhood/housing contexts for families; and consumer issues such as consumer protection, legislation and regulation, and consumer fraud. Meets U.S. Diversity Requirement

HD FS 240. Literature for Children.
(3-0) Cr. 3. F.S.
Evaluation of literature for children, including an emphasis on cultural, racial, ethnic, and social diversity. Roles of literature in the overall development of children. Literature selection and use.

HIST 221. Survey of United States History I.
(3-0) Cr. 3-5. F.
Colonial foundations: revolution, confederation, and constitution; nationalism and democracy; sectional disunity, Civil War, and reunion.

HIST 280. Introduction to History of Science I.
(3-0) Cr. 3.
Ideas of nature from ancient Greece to the seventeenth-century scientific revolution.

HIS SCI 110. Orientation and Human Sciences Career Exploration.
(2-0) Cr. 2. F.S.
Orientation and adjustment to the university and college; policies and procedures; academic resources; and development of a long-term curriculum plan. Comprehensive approach to career development; intensive self-analysis; and in-depth examination of majors in Human Sciences. Required for all students declared as Open Option in the College of Human Sciences.

HIS SCI 150. Dialogues on Diversity.
(1-0) Cr. 1. F.S.
An exploration of diversity within the context of the Iowa State University community through understanding human relations issues.

HD FS 102. Individual and Family Life Development.
(3-0) Cr. 3. F.S.SS.
Development of individuals, families, and their reciprocal relationships as affected by external factors; examined within a framework of life-span developmental tasks (physical, cognitive, language, social, emotional).
JL MC 101. Mass Media and Society. (3-0) Cr. 3. F.S.SS.
Communication theory models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media literacy process.

JL MC 110. Orientation to Journalism and Communication. (1-0) Cr. 1. F.S. Alt. SS., offered irregularly.
Orientation to professional and pre-professional opportunities, writing for the mass media and curriculum requirements in the Greenlee School. Basic media writing preparation. Offered on a satisfactory-fail basis only.

KIN 252. Disciplines and Professions in Kinesiology and Health. (1-0) Cr. 1. F.S.
Overview of the various disciplines and professions that comprise the field of Kinesiology (the study of human movement) and help students determine the career option that best fits their interests.

KIN 253. Orientation in Kinesiology and Health. (1-0) Cr. 1. F.S. Prereq: Concurrent enrollment or credit in KIN 252
Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Kinesiology and Health majors only. Offered on a satisfactory-fail basis only.

LAS 101. Orientation for Open Option and Preprofessional Students. (1-0) Cr. 1. F.S.
Introduction to all undergraduate colleges. Provides information about university resources and services, assists with a successful academic transition to the university, and helps initiate the process of identifying academic major(s) and eventual career paths. Required of all first-year students in Open Option and Preprofessional Programs. Offered on a satisfactory-fail basis only.

LAS 225. Introduction to Asian American Studies. (3-0) Cr. 3.
An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constructions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice. Meets U.S. Diversity Requirement

LATIN 101. Elementary Latin I. (4-0) Cr. 4. F.
Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

LIB 160. Information Literacy. (1-0) Cr. 1. F.S.SS. Prereq: For students whose native language is not English: Completion of ENGL 101 requirement.
Eight-week course required for undergraduate degree. Provides a solid understanding of information literacy and the research process with emphases on finding, evaluating, and using scholarly information; the ethical and legal framework related to information use; and utilization of library discovery tools. To be taken as early as possible in the student’s undergraduate career. See course descriptions of ENGL 150 and ENGL 250 for requirements related to LIB 160. Offered on a satisfactory-fail basis only.

LING 119. Introduction to World Languages. (Cross-listed with WLC). (3-0) Cr. 3.
Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy. Meets International Perspectives Requirement.

LING 120. Computers and Language. (Cross-listed with ENGL). (3-0) Cr. 3.
Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

M E 160. Mechanical Engineering Problem Solving with Computer Applications. (2-2) Cr. 3. F.S. Prereq: M E majors only. MATH 142 or satisfactory scores on Mathematics placement examinations; credit or enrollment in MATH 165.
Introduction to the field of Mechanical Engineering through problem-solving in a range of topics including statics, mechanics of materials and thermo-fluids. Techniques to professionally present and communicate solutions. Use of MATLAB computer programming to aid problem solving, including curve fitting and graphing. Only one of M E 160, ENGR 160, Aer E 160, C E 160, CPR E 185, E E 185, S E 185 and I E 148 may count towards graduation.

M E 170. Engineering Graphics and Introductory Design. (2-2) Cr. 3. F.S. Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142
Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods.

M S 101. Introduction to Military Science. (1-0) Cr. 1. F. Prereq: Concurrent enrollment in M S 101L required
Examines the role of a Cadet in the Army Reserve Officer Training Corps and a lieutenant in the United States Army. The course explores a military culture whose ultimate success is determined by the character and proficiency of its leaders. Instruction introduces students to the cultural heritage and history of the U.S. Army. Students will begin to understand the structure of the U.S. Army and how it functions as an organization and institution. The curriculum promotes the development of students' communication skills to enhance their ability to transmit ideas. The class examines how the Army's cultural values drive the development of leadership in the Officer Corps. Hands-on activities enable students to gain insight on the skills and abilities required of cadets and officers interacting with civilians and soldiers.

M S 101L. Basic Leadership Laboratory I. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in M S 101 required
Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level in the Army command structure. This concept provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Marching, rifle firing, and tactical patrolling; students gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students' physical and medical eligibility.

M S 150. Army Physical Readiness. (0-3) Cr. 1. F.S.
This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical fitness techniques as well as how to conduct physical fitness sessions. Teaching locations include the ISU Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students physical and medical eligibility.

MATH 106. High School Algebra. (4-0) Cr. 1. F.S.
For students who do not have adequate facility with topics from high school algebra or do not meet the algebra admission requirement. The course is divided into tracks of one- and two-semester lengths. For most students a diagnostic exam will determine which track must be taken. Students will receive a grade in MATH 25 or MATH 30 respectively depending on the level of material covered. Satisfactory completion of MATH 30 is recommended for students planning to take MATH 140, MATH 143, MATH 145, MATH 150, or MATH 151, while MATH 25 is sufficient for MATH 104, MATH 105, MATH 195, STAT 101 or STAT 105. Students must complete MATH 30 to remove a deficiency in the algebra admission requirement. Topics include signed numbers, polynomials, rational and radical expressions, exponential and logarithmic expressions, and equations. Offered on a satisfactory-fail basis only.

MATH 104. Introduction to Probability. (3-0) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry
Permutations, combinations, probability, expected value, and applications. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 105. Introduction to Mathematical Ideas. (3-0) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry
Topics from mathematics and mathematical applications with emphasis on their non-technical content.

MATH 140. College Algebra. (3-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra; 1 year of high school geometry
Coordinate geometry, quadratic and polynomial equations, functions, graphing, rational functions, exponential and logarithmic functions, inverse functions, quadratic inequalities. Students in the College of Liberal Arts and Sciences may not count MATH 140 toward the General Education Requirements.
MATH 143. Preparation for Calculus. 
(4-0) Cr. 4. F.S. Prereq: Satisfactory performance on placement exam. Preparation for MATH 160, 165, and 181. Functions, graphing, basic trigonometry, logarithms, exponentials. Emphasis on co-variational reasoning. Students in the College of Liberal Arts and Sciences may not count MATH 143 toward General Education Requirements. Only one of MATH 143 and 145 may count toward graduation.

MATH 145. Applied Trigonometry. 
(3-0) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry; or minimum of C- in MATH 140. Mathematical ideas regarding the conception of space. General trigonometry, with an emphasis on the calculation of lengths, areas, and angles. The Law of Sines and the Law of Cosines. Polar, cylindrical, and spherical coordinate systems. Conic sections and quadric surfaces. Students in the College of Liberal Arts and Sciences may not count MATH 145 toward the General Education Requirements. Only one of MATH 143 and 145 may count toward graduation.

MATH 150. Discrete Mathematics for Business and Social Sciences. 
(2-1) Cr. 4. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 151. Calculus for Business and Social Sciences. 
(2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Differential calculus, applications to max-min problems, integral calculus and applications. Will not serve as prerequisite for MATH 265 or MATH 266. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 160. Survey of Calculus. 
(4-0) Cr. 4. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry; or MATH 143. Analytic geometry, derivatives and integrals of elementary functions, simple differential equations, and applications. Will not serve as a prerequisite for MATH 265 or MATH 266. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 165. Calculus I. 
(4-0) Cr. 4. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry; or MATH 143. Differential calculus, applications of the derivative, introduction to integral calculus. Only one of Math 151 or 160 or the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 166. Calculus II. 
(4-0) Cr. 4. F.S.SS. Prereq: Minimum of C- in MATH 165 or high math placement scores. Integral calculus, applications of the integral, infinite series, parametric curves and polar coordinates. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 181. Calculus and Mathematical Modeling for the Life Sciences I. 
(4-0) Cr. 4. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry, 1 semester of trigonometry; or MATH 143. Exponential and logarithm functions, difference equations, derivatives, and applications of the derivative. Examples taken from biology. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 195. Mathematics for Elementary Education I. 
(2-2) Cr. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years high school algebra, 1 year of high school geometry, enrollment in elementary education or early childhood education. Theoretical and hands-on models, mathematical analysis of: elementary students’ thinking, standard and non-standard algorithms, and properties related to whole number operations; structure of the decimal system; linear measurement, and two- and three-dimensional geometric shapes and spatial sense; algebra as it relates to elementary curricula. Students in the College of Liberal Arts and Sciences may not count MATH 195 toward General Education Requirements.

MATH 265. Calculus III. 
(4-0) Cr. 4. F.S.SS. Prereq: Minimum of C- in MATH 166 or MATH 166H. Analytic geometry and vectors, differential calculus of functions of several variables, multiple integrals, vector calculus.

(4-0) Cr. 4. F.S.SS. Prereq: Minimum of C- in MATH 166 or MATH 166H. Same as MATH 266 but also including Laplace transforms and series solutions to ordinary differential equations.

MICRO 101. Microbial World. 
(3-0) Cr. 3. F. Prereq: High school biology or equivalent. Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

MICRO 201. Introduction to Microbiology. 
(2-0) Cr. 2. F. Prereq: One semester of college-level biology. Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for Micro 302 in advanced courses.

MTEOR 107. Severe and Hazardous Weather. 
(2-0) Cr. 1. F. Understanding of atmospheric processes that play a role in creating severe and hazardous weather. Focus on thunderstorms, tornadoes, hurricanes, floods, blizzards, ice storms, and temperature extremes. Impacts on lives and property.

MTEOR 206. Introduction to Weather and Climate. 
(Cross-listed with AGRON.) (3-0) Cr. 3. F.S. Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

(1-2) Cr. 2. F. Prereq: Ability to read elementary musical notation. Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Open to non-majors only.

MUSIC 102. Introduction to Music Listening. 
(3-0) Cr. 3. F.S. Expansion of the music listening experiences for the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, harmony, form, and style, and how these elements are used in musics of different cultures and time periods. Ability to read or perform music not required. Meets International Perspectives Requirement.

MUSIC 111. Wind Ensemble. 
(0-3) Cr. 1. F.S. Prereq: Open to all students by audition. Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour.

MUSIC 112. Concert Band. 
(0-2) Cr. 1. F.S. Prereq: Open to all students who have performed on a wind or percussion instrument in high school band or orchestra. Repertoire includes the broad spectrum of band music. Two concerts are presented each semester.

MUSIC 113. Jazz Ensemble. 
(0-2) Cr. 1. F.S. Prereq: Open to all students by audition. Designed to explore various styles and trends in contemporary jazz.

MUSIC 114A. Marching and Pep Bands: Marching Band. 
(0-5) Cr. 1. Repeatable. F. Membership determined by audition and band application. Auditions held for woodwind, brass, percussion, flag, and twirler positions. Presentation of pre-game and half time shows at each home football game; additional performances are also scheduled on and off campus. Audition information is listed on the band website (www.music.iastate.edu/org/marching).

MUSIC 115. Symphonic Band. 
(0-3) Cr. 1. F.S. Prereq: Open to all students by audition. Stresses high quality wind literature. Performances include formal concerts on campus.

(0-5) Cr. 1-2. Repeatable. F.S. Prereq: Audition, permission of instructor. Applied music for the general student.
PHIL 201. Introduction to Philosophy.  
(3-0) Cr. 3. F.S.  
Basic principles of critical reasoning and argument evaluation. A consideration of fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Linguistics majors should take Ling/Phil 207 as early as possible.

(3-0) Cr. 3. F.S.S.  
Investigation of moral issues in the context of major ethical theories of value and obligation; e.g., punishment, abortion, economic justice, job discrimination, world hunger, and sexual morality. Emphasis on critical reasoning and argument analysis.

PHIL 235. Ethical Issues in A Diverse Society.  
(3-0) Cr. 3. S.  
This course will examine a range of arguments on diversity issues. Topics will include: the social status of women, the moral status of sexuality and homosexuality, the nature and role of racism in contemporary society, the relationship between biology, gender roles and social status, and various proposals for change from a variety of political perspectives. Meets U.S. Diversity Requirement

(3-0) Cr. 3. F.S.  
Survey of the principal areas of both classical and modern physics. Emphasis on the nature of the physical universe and the application of physical principles to life in the modern world. Not suitable to meet a general physics requirement for natural science majors.

PHYS 111. General Physics.  
(4-2) Cr. 5. F.S.S.S.  
Prereq: 1 1/2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry  
General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Mechanics, fluids, heat and thermodynamics, vibrations, waves, sound.

PHYS 112. General Physics.  
(4-2) Cr. 5. F.S.S.S.  
Prereq: PHYS 111  
General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Electricity and magnetism, ray and wave optics, topics in modern physics.

PHYS 115. Physics for the Life Sciences.  
(4-0) Cr. 4. F.S.  
Prereq: high school: 1 1/2 yr. algebra, 1 yr. geometry, 1 semester trigonometry  
Emphasis on basic physics principles applied to biological problems. Topics include mechanisms, fluids, thermodynamics, heat, light, sound, electricity and magnetism. A coordinated laboratory, Physics 115 laboratory is available.

(2-2) Cr. 3. F.  
Introductory level course on sound for nonphysics majors. Properties of pure tones and harmonics; human perception of sound; room acoustics; scales; production, and analysis of musical by voice, string, woodwind, brass, and percussion instruments. Not suitable to meet a general physics requirement for natural science majors

PHYS 221. Introduction to Classical Physics I.  
(4-5) Cr. 5. F.S.S.S.  
Prereq: Proficiency in algebra, trigonometry, vector manipulation, and topics covered in Math 165, and credit or enrollment in MATH 166  
For engineering and science majors. 3 hours of lecture each week plus 3 recitations and 1 laboratory every 2 weeks. Elementary mechanics including kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation. Heat, thermodynamics, kinetic theory of gases; waves and sound.

PHYS 222. Introduction to Classical Physics II.  
(4-2) Cr. 5. F.S.S.S.  
Prereq: PHYS 221 OR PHYS 241, MATH 166  
3 hours of lecture each week plus 1 recitation and 1 laboratory each week. Electric forces and fields. Electrical currents; DC circuits. Magnetic forces and fields: LR, LC, LCR circuits; Maxwell’s equations; ray optics and image formation; wave optics; topics in modern physics.

(3-0) Cr. 3. F.S.S.S.  
Fundamentals of American democracy; constitutionalism; federalism; rights and duties of citizens; executive, legislative, and judicial branches of government; elections, public opinion, interest groups, and political parties.

POL S 241. Introduction to Comparative Government and Politics.  
(3-0) Cr. 3. F.S.  
Basic concepts and major theories; application to selected political systems, including non-western political systems. Meets International Perspectives Requirement.

PSYCH 101. Introduction to Psychology.  
(3-0) Cr. 3. F.S.S.S.  
Fundamental psychological concepts derived from the application of the scientific method to the study of behavior and mental processes. Applications of psychology.

PSYCH 102. Laboratory in Introductory Psychology.  
(0-2) Cr. 1. F.S.  
Prereq: Credit or enrollment in PSYCH 101  
Laboratory to accompany 101.
PSYCH 111. Orientation to Psychology.  
Cr. 0.5. F.S.  
Program requirements and degree/career options. Required of psychology majors. Offered on a satisfactory-fail basis only.

(0-2) Cr. 1. F.S.  
Efficient methods of time management, goal setting and motivation, and other learning strategies such as note-taking, reading, and test preparation. Offered on a satisfactory-fail basis only.

PSYCH 230. Developmental Psychology.  
(3-0) Cr. 3. F.S.SS.  
Life-span development of physical traits, cognition, intelligence, language, social and emotional behavior, personality, and adjustment.

PSYCH 250. Psychology of the Workplace.  
(3-0) Cr. 3.  
Survey of theories and research methods of psychology applied to the workplace. Consideration of employee selection, training, performance evaluation, leadership, work groups, employee motivation, job attitudes and behaviors, organizational culture, organizational development, human factors, and job design from the scientist-practitioner approach.

PSYCH 280. Social Psychology.  
(3-0) Cr. 3. F.S.SS.  
Individual human behavior in social contexts. Emphasis on social judgments and decisions, attitudes, perceptions of others, social influence, aggression, stereotypes, and helping.

RELIG 205. Introduction to World Religions.  
(3-0) Cr. 3. F.S.SS.  
An introduction to the academic study of religions, including myths, beliefs, rituals, values, social forms. Examples chosen from oral cultures and major religions of the world. Meets International Perspectives Requirement.

(3-0) Cr. 3. F.S.SS.  
Introductory study of the major beliefs, practices, and institutions of American Judaism, Catholicism, Protestantism, and Islam with emphasis on the diversity of religion in America, and attention to issues of gender, race, and class. Meets U.S. Diversity Requirement

RELIG 220. Introduction to the Bible.  
(3-0) Cr. 3. F.S.  
Basic overview of the contents of the Old and New Testament in light of their ancient socio-historical background, and with attention to a variety of interpretations and relevance to modern American society.

RELIG 280. Introduction to Catholicism.  
(3-0) Cr. 3. F.  
An explanation of the beliefs, spirit, and practices of Roman Catholicism, including its understanding of God, sacramentality, the human person, and community, and its relationship to other forms of Christianity and other world religions.

RUS 101. Elementary Russian I.  
(4-0) Cr. 4. F.  
Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

RUS 201. Intermediate Russian I.  
(4-0) Cr. 4. F. Prereq: RUS 102  
Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills. Meets International Perspectives Requirement.

Cr. R.  
Introduction to the procedures, policies, and resources of Iowa State University and the department of Computer Science and Electrical and Computer Engineering. Information on engineering and computer-based professions.

SOC 115. Orientation to Sociology.  
(1-0) Cr. 1. F.S.  
Orientation to sociology. A familiarization with University and LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during first semester of freshman year, or as soon as possible after transfer into the department. Offered on a satisfactory-fail basis only.

SOC 134. Introduction to Sociology.  
(3-0) Cr. 3. F.S.SS.  
Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure.

(3-0) Cr. 3. F.S.SS. Prereq: SOC 134  
Analysis of intimate relationships among couples using a sociological perspective. Attention is given to singleness; dating and courtship; sexuality; mate selection, cohabitation, and marriage. Relationship quality, communication, conflict and dissolution of these types of relationship will also be explored.

SOC 235. Social Problems and American Values.  
(3-0) Cr. 3. F.S. Prereq: SOC 134  
Sociological concepts, theories and methods to analyze the causes and consequences of social problems. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy. Meets U.S. Diversity Requirement.

(Cross-listed with CJ ST). (3-0) Cr. 3. F. Prereq: SOC 134  
An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents’ rights, and traditional and alternative ways of dealing with juvenile crime.

SP CM 110. Listening.  
(3-0) Cr. 3. F.S.  
Theory, principles, and competency development in comprehensive, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships.

SP CM 212. Fundamentals of Public Speaking.  
(3-0) Cr. 3. F.S.SS.  
Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches.

SP CM 216. Great Speakers and Speeches.  
Cr. 3.  
Survey of great speeches examined within their political and cultural contexts. Analysis of the rhetorical strategies of diverse speakers with an emphasis on texts from social movements in the United States. Meets U.S. Diversity Requirement.

SP CM 275. Analysis of Popular Culture Texts.  
(Cross-listed with ENGL). (3-0) Cr. 3. F.S. Prereq: Credit in or equivalent of 250  
Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

SP ED 250. Education of the Exceptional Learner in a Diverse Society.  
(3-0) Cr. 3. F.S. Prereq: C I 204  
An overview of students with diverse learning needs, including legal foundations. Emphasis on early identification; educational programming, services and strategies; and preparation for community living in a heterogeneous society. Meets U.S. Diversity Requirement.

SPAN 101. Elementary Spanish I.  
(4-0) Cr. 4. F.  
A communicative approach to grammar and vocabulary within the context of Hispanic culture.

SPAN 201. Intermediate Spanish I.  
(4-0) Cr. 4. F. Prereq: SPAN 102 or placement by departmental exam  
An overview of students with diverse learning needs, including legal foundations. Emphasis on early identification; educational programming, services and strategies; and preparation for community living in a heterogeneous society. Meets U.S. Diversity Requirement.

(4-0) Cr. 4. F.S. Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement  
Bridge course between 200- and 300-level Spanish courses to prepare students for 300 level courses. Focus on application of advanced grammatical concepts within the context of Hispanic culture. Designed for students who want to continue at the 300 level. Taught in Spanish. Meets International Perspectives Requirement.
(3-2) Cr. 4. F.S.SS.  
Prereq: 1 1/2 years of high school algebra  
Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection (sampling and designing experiments); elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

STAT 104. Introduction to Statistics.  
(2-2) Cr. 3. F.S.SS.  
Prereq: 1 1/2 years of high school algebra  
Statistical concepts and their use in science; collecting, organizing and drawing conclusions from data; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

STAT 105. Introduction to Statistics for Engineers.  
(3-0) Cr. 3. F.S.  
Prereq: MATH 165 (or MATH 165H)  
Statistical concepts with emphasis on engineering applications. Data collection; descriptive statistics; probability distributions and their properties; elements of statistical inference; regression; statistical quality control charts; use of statistical software; team project involving data collection, description and analysis. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226. Credit for both STAT 105 and STAT 305 may not be applied for graduation.

THTRE 106. Introduction to the Performing Arts.  
(3-0) Cr. 3. F.S.SS.  
An audience oriented, broad-based, team-taught survey of the performing arts which emphasizes theatre and includes segments on television, radio, film, dance, and music.

THTRE 110. Theatre and Society.  
(3-0) Cr. 3. F.S.  
An introduction to Theatre focusing on its relationship with society throughout history.

THTRE 251. Acting I.  
(3-0) Cr. 3. F.S.  
Theory and practice in fundamentals of acting.

TSM 115. Solving Technology Problems.  
(2-2) Cr. 3. F.S.  
Prereq: MATH 140 or higher (can be taken concurrently)  
Solving technology problems and presenting solutions through technical reports. Unit conversions, unit factor method, SI units, significant digits, graphing and curve fitting. Use of spreadsheet programs to solve and present technology problems. Solution of technology problems using computer programming languages.

TSM 116. Introduction to Design in Technology.  
(2-2) Cr. 3. F.S.  
Use of parametric solid modeling software to model, and document, parts and assemblies. Includes national and international standards for documentation, design projects, and teamwork. Free-hand sketching techniques will be covered.

U ST 104. Personal Career Development.  
(2-0) Cr. 2. F.S.  
Comprehensive approach to personal career development providing students with the skills and structure to make informed choices about their major and career path. Self-exploration of interests, skills, values, and personality as related to the world of work using a variety of techniques; exploration of majors and occupations; model for major and career decision-making and career goal implementation; exposure to effective job search and interviewing skills and resources.

US LS 211. Introduction to U.S. Latino/a Studies.  
(3-0) Cr. 3. F.S.  
History and current lives of the Latino/a peoples in the United States, including Mexican, Cuban, Puerto Rican, Dominican, and South and Central Americans, as well as information specific to Iowa Latino/as, will be covered. Through readings, class discussions, writing assignments, and guest speakers, students will acquire accurate information and a solid understanding of the US Latino/a population and cultural perspectives. Elements of Latino/a culture to be covered include historical, sociological, educational, psychological, economic, and political facets. Meets U.S. Diversity Requirement

WS 160. Gender Justice.  
(2-0) Cr. 1. F.S.  
Half semester course. Examines the socialization process in the United States and how our perspectives are formed. An introduction to patriarchy, sexism, and ally development are explored. Skills to enhance communication and understanding among women and men will be developed. Offered on a satisfactory-fail basis only. Meets U.S. Diversity Requirement

WS 201. Introduction to Women’s Studies.  
(3-0) Cr. 3.  
Introduction to the interdisciplinary field of Women’s Studies. Contemporary status of women in the U.S. and worldwide from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Subject matter includes work, health, sexuality, and violence. Foundation for the other courses in the program. Meets U.S. Diversity Requirement
Accreditation

Iowa State University is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

Higher Learning Commission of the North Central Association of Colleges and Schools
230 South LaSalle St., Suite 7-500
Chicago, IL 60604-1411
(800) 621-7440; (312) 263-0456

Board of Regents, State of Iowa
www.regents.iowa.gov

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale, Iowa.

Officers of Administration

Steven Leath, Ph.D.
President of the University

Jonathan A. Wickert, Ph.D.
Senior Vice President and Provost

Warren R. Madden, M.B.A.
Senior Vice President for Business and Finance

Thomas L. Hill, Ph.D.
Senior Vice President for Student Affairs

Michael R. Crum, DBA
Vice President for Economic Development and Business Engagement

Wendy K. Wintersteen, Ph.D.
Dean of the College of Agriculture and Life Sciences

David P. Spalding, M.B.A.
Dean of the College of Business

Luis Rico-Gutierrez, M.S.
Dean of the College of Design

Sarah Rajala, Ph.D.
Dean of the College of Engineering

Pamela J. White, Ph.D.
Dean of the College of Human Sciences

Beate Schmittmann, Ph.D.
Dean of the College of Liberal Arts and Sciences

Lisa Nolan, D.V.M., Ph.D.
Dean of the College of Veterinary Medicine

Cathann A. Kress, Ph.D.
Vice President for Extension and Outreach

Sarah M. Nusser, Ph.D.
Vice President for Research

David K. Holger, Ph.D.
Dean of the Graduate College

Joyce Garnett, M.S.
Interim, Dean of the Library

Pamela Anthony, Ph.D.
Dean of Students
**Academics**

**Progressing Toward a Degree**

**Classification**

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school.

Classification in all colleges except Veterinary Medicine is as follows:

- **Sophomore:** 30 credit hours earned
- **Junior:** 60 credit hours earned
- **Senior:** 90 credit hours earned

Students who have a bachelor’s degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special (nondegree) student. Admission requirements and academic standards regulations are the same as those for regular students. Credits taken as a special (nondegree) student are applicable toward the student’s cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I grade, which becomes part of the student’s cumulative, but not term, grade-point average but may be applied toward meeting degree requirements. A student, who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special (nondegree) student.

**Grading**

**Grading System Details**

The following provides quality points assigned for each letter grades:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Passing mark obtained under the Pass-Not Pass system.*</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (required-credit) courses, and in courses numbered 290, 490, 590, and 690.</td>
</tr>
</tbody>
</table>

**Policy Information**

Grades represent the permanent official record of a student’s academic performance. The grading system at Iowa State operates according to the following regulations:

1. **Student performance or status** is recorded by the grades and marks described below. A student’s grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor’s degree.

2. Students who want to protest a grade submitted by an instructor should follow the procedures described in the section, Appeal of Academic Grievances.

3. **Incomplete Marks** - If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (downloadable from the Office of the Registrar forms web site) to document the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year or the student’s graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete by communicating directly with the student by e-mail or postal mail. A copy of this communication must be retained by the instructor until after the I is resolved or in case there are any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter the Incomplete (I) electronically as part of the end of term final grade submission.

**Resolving an Incomplete:** When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade, which becomes part of the student’s cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term. A final course grade, once submitted to the registrar, may not be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor’s department head and the dean of the instructor’s college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above. The Grade Report to the Registrar form should be used to initiate the request to change the grade to an Incomplete. The Grade Report form should be completed and forwarded by the instructor to his/her Dean for
approval. The Dean will forward the Grade Report form to the Office of the Registrar if approved.

Incompletes in all courses must be resolved by the middle of the student’s term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

4. To change a grade or mark already reported to the registrar, the instructor submits the Grade Report to the Registrar form. This form is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

5. Midterm Grades. The registrar will collect C-, D, and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisers using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of midterm grades is to provide the student and adviser with a timely warning that the student’s academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

6. Grades in all courses attempted remain on each student’s record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

7. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average. If a course is repeated, the cumulative grade point average is calculated according to the process described in item 6(a) below.

8. Repeating Courses.

a. The most recent grade for a course a student repeats will be used in computing the student’s cumulative grade point average rather than the previous grade(s) up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student’s record.

b. Students may repeat any course for which an F grade, an NP grade, or any passing grade was received.

c. Beyond 15 credits of repeats, both grades will be included in computing the cumulative grade point average.

d. Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.

e. Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student’s adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.

f. Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.

g. A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.

h. Repeated courses may affect any federal financial aid. See the Financial Aid web site (http://www.financialaid.iastate.edu) for further information.

Pass-Not Pass Grading

Students may choose to take a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who are not on academic probation (P) at the beginning of the semester are eligible. A special (nondegree) student must obtain approval from their academic adviser and college dean.

2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.

3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.

4. Courses offered on a satisfactory-fail basis may not be taken P-NP.

5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser’s signature in the P-NP approval section of the form.

6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.

7. Changes to or from a P-NP basis must be made before the last day to drop (usually the Friday of week 10 of the term).

8. Registration on a P-NP basis is not indicated on the instructor’s class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.

9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student’s grade point average (GPA).

10. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.

11. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student’s degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student’s degree program.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.

2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:

a. The course is multi-sectioned.

b. A common departmentally developed examination will be administered to all students in all sections at the same time.

c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.

Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
The university recognizes those students who are doing exceptionally well in
Scholastic Recognition

3. Graduation with Distinction. Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits.

1. Dean’s List. Each semester the university issues a dean’s list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean’s list is issued for summer school. The list can be viewed from the Office of the Registrar web site (http://www.registrar.iastate.edu).

2. Top 2 Percent. Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student’s permanent record.

4. Honors Program. Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student’s official transcript and diploma and in the commencement program. Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Academic Appeals

Appeal of Academic Grievances

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an appeal more than one year following completion of the course, and may not initiate the appeal of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal appeal, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor’s department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal in writing to the dean of the instructor’s college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair’s decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor’s college.) The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within ten class days of receipt of the written notice of the appeal.

Within five class days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost’s decision may be made to the president of the university.
The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Government of the Student Body. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

Degree Planning

Degree Planning - ISU Degree Audit

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp). The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student's curriculum.

Students should use the degree audit information to help them review progress towards their degrees(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will meet all degree requirements upon successful completion of the courses on the student's schedule that term.

In addition, through AccessPlus, students may request a degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress course work applies toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

Two Bachelor's Degrees

Students may receive two bachelor’s degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form, Request for Double Major/Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will have access to the student’s information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor’s Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

Double Major/Curriculum

A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, “Request for a Double Major/Curriculum or Two Degrees.” This form, available from advisers and classification offices, should be completed at least one term prior to graduation. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student’s rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student’s registration adviser, but both advisers will have access to the student’s information. Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

Second Major (Curriculum) Completed after the Bachelor’s Degree

After receiving a bachelor's degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean’s office.

Changing Curriculum or Major

A student’s freedom to change their major, and the procedure that should be followed, depend on the student’s academic standing and on policies of individual colleges as approved by the provost.

1. If students are not on academic probation (P) and have never been dismissed and reinstated, they may change their major by consulting first with their adviser. If, however, they have been on academic probation in the past, students are subject to regulation 4 below. Procedures for changing curriculum or major are as follows:
   a. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
   b. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and their file from their adviser, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.

2. Students on academic probation (P) must first obtain permission to enter the new major. Permission comes from the dean of the college responsible for that major in consultation with the department head. If permission is granted, students should then follow the procedures described above. If they are on academic probation and want to transfer to another college in the university, they must do so before the last day to drop a course in period 2 (see Making Schedule Changes).

3. Students who have been reinstated may not transfer to another college within the university during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

4. Students who transferred from one college to another while on academic probation, (P) may not transfer back unless they have the permission of the academic standards committee of the college from which they originally transferred.

Declaring a Minor

Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students' transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. See collegescurriculum/#minors for additional information regarding policies which govern minors. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements.
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above.
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.
4. A student may not receive both an undergraduate major and a certificate of the same name.
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.
6. A certificate is not awarded if the baccalaureate requirements are not finished.
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.
8. Courses taken for a certificate may not be taken on a pass-not pass basis.
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate.
10. A notation of a completed certificate will be made on a student's transcript and a printed certificate will be awarded.

Graduation
Seniors must file a graduation application with the Graduation Office, 214 Enrollment Services Center. Students will be notified of their graduation status approximately mid-semester of their graduation term. For graduation application instructions and deadlines, go to the Graduation and Commencement website (http://www.graduation.iastate.edu). Iowa State University commencement ceremonies are held at the end of fall and spring semesters. Undergraduate students expected to graduate at the end of summer semester are invited to participate in the spring ceremony preceding their graduation term or the fall ceremony following their graduation term. In addition to the formal University commencement ceremony, the undergraduate colleges host graduation activities take place at the end of fall and spring semesters. For more information see www.registrar.iastate.edu/graduation/Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:
1. Registration for the term has been completed and the date of graduation is correct on the degree audit printout.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State and the student has met all special grade point average requirements established by their college, department, or program in specified courses.
   a. Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.
   b. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.
5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.
7. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their diploma or transcript. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.

Progress and Probation
Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate.
Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval.
The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

Additional Academic Standards Regulations
Changing colleges: A student on academic probation (P) may transfer to another college within the university only with the permission of the department chair of the new department and the dean of the new college. For students on academic probation (P), transfer during period 3 (i.e., after the last day to drop a course) may be approved by the department chair of the new department and the dean of the new college only under exceptional circumstances.
A student who has transferred from a college while on academic probation (P) cannot transfer back unless permission is granted by the academic standards committee of the original college.
A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.
Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.
Reinstated students: Reinstated students should also see the section on Reinstatement.
Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.
Special (nondegree) students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

Questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university’s academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee’s judgment, the student’s academic performance or progress toward a degree is exceptionally deficient.
Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student’s ISU cumulative grade point average, are subject to Iowa State University’s academic standards.

Maintaining Satisfactory Progress
Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.
Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student’s semester grade point average (GPA), the student’s cumulative ISU GPA, and the student’s transfer GPA (if below 2.00.)
Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student’s permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

- Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or
- They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university. Academic probation is an indication of very serious academic difficulty. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both. Academic probation status is not a part of the student’s permanent academic record.

Students on academic probation and warning are required to meet with their adviser and to complete the Academic Intervention Self Assessment form, which can be accessed here: http://www.dso.iastate.edu/asc/al/students/

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the semester due to summer term GPA only.

2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

- Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA. At the end of any spring semester, students in dismissal status may enroll for summer term. (See Summer Option for Students in Dismissal Status in the Summer Academic Standards Regulations section.)

- Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).

- Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Academic Dismissal for dismissal policy.

Summer Academic Standards Regulations

Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:

All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student’s grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Satisfactory Academic Progress for Financial Aid Recipients

Federal regulations require the Office of Student Financial Aid to monitor the satisfactory academic progress of students (SAP). SAP is strictly a financial aid policy. Your academic adviser and/or college are monitoring your academic progress under the University’s Academic Probation Policy (http://catalog.iastate.edu/academiclife/#academicprobationpolicy).

SAP standards apply to undergraduate and graduate students who wish to establish or maintain financial aid eligibility. These standards apply to a student’s entire academic record at Iowa State University, whether or not financial aid was received for prior terms of enrollment.

College of Veterinary Medicine: Academic progress is monitored by the College of Veterinary Medicine (http://www.vetmed.iastate.edu).

Undergraduate Students

The Registrar’s records are reviewed at the completion of every semester of enrollment to determine compliance with the SAP policy. There are three components to the SAP policy:

Minimum GPA

Students must maintain a cumulative GPA of a 2.0 or higher to remain eligible for financial aid. Academic records are reviewed at the completion of every term of enrollment (Fall, Spring, Summer) to determine SAP.

Minimum Pace of Progression

Students must complete coursework at a cumulative rate of 67%. Completed coursework is defined as any course for which the student receives a passing
grade. Attempted coursework is defined as any course in which the student receives a passing grade, and all credit hours with a non-passing grade on a student’s academic record, according to the Office of the Registrar. Academic records are reviewed at the completion of every term of enrollment (Fall, Spring, Summer) to determine pace of progression. Use the formula below to determine your pace. The minimum pace requirement is 67%.

**Completed Semester Hours** (all passing grades) divided by **Attempted Semester Hours**

(completed hours, hours enrolled in as of the 11th day of the semester, and hours with non-passing grades or incompletes)

**Example 1:**

<table>
<thead>
<tr>
<th>Progress</th>
<th>Fall Semester</th>
<th>Spring Semester (Cumulative Total)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours Completed</td>
<td>6</td>
<td>10 (16)</td>
</tr>
<tr>
<td>Hours Attempted</td>
<td>12</td>
<td>12 (24)</td>
</tr>
<tr>
<td>Pace of Progression</td>
<td>50%</td>
<td>83% (16/24 = 67% rounded)</td>
</tr>
<tr>
<td>Financial aid status after semester</td>
<td>Warning</td>
<td>Met SAP and remains eligible for aid</td>
</tr>
</tbody>
</table>

**Example 2:**

<table>
<thead>
<tr>
<th>Progress</th>
<th>Fall Semester</th>
<th>Spring Semester (Cumulative Total)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours Completed</td>
<td>6</td>
<td>8 (6 + 8 = 14)</td>
</tr>
<tr>
<td>Hours Attempted</td>
<td>12</td>
<td>12 (12 + 12 = 24)</td>
</tr>
<tr>
<td>Pace of Progression</td>
<td>50%</td>
<td>67% (14/24 = 58% rounded)</td>
</tr>
<tr>
<td>Financial aid status after semester</td>
<td>Warning</td>
<td>Suspension. Did not meet SAP. Not eligible for aid</td>
</tr>
</tbody>
</table>

**Maximum Time Frame (Duration of Eligibility)**

Federal regulations limit financial aid eligibility to 150% of the published length of the education program, as measured in credit hours. Transfer credit hours are counted in the calculation of duration of eligibility. When the student has completed 125% of their education program a letter is mailed to the student and a targeted message is posted to the student’s AccessPlus account as notification that they are approaching the maximum time frame.

The following are counted towards pace of progression and maximum time frame:

- **Transfer, Remedial, English as Second Language, IEP, and Early credit hours (taken in high school):** All of these credit hours accepted by Iowa State University are counted as both attempted and completed hours in determining Minimum Pace-of-Progression and Maximum Time Frame requirements.

- **Repeating a course:** The credit hours from a repeated course are counted as attempted hours every time the course is repeated. Once the course is passed, then the credit hours are counted as both attempted and completed credit hours.

- **Incompletes:** Counted the same as non-passing grades.

- **Academic Renewals:** All academic renewal credit hours are counted in the Minimum Pace-of-Progression and Maximum Time Frame requirements.

- **Receive a non-passing grade in ALL semester credit hours:** Placed on Financial Aid Warning for the following semester. See policy on Unofficial Withdrawal from Classes/Last Date of Attendance.

- **Withdrawal from all semester courses:** Placed on Financial Aid Warning for the following semester. See policy on Withdrawal from Classes.

**Financial Aid Warning**

Students are placed on Financial Aid Warning for one semester if they do not meet the Minimum GPA and/or Minimum credit hours. A letter is mailed to the student and a targeted message is posted to the student’s AccessPlus account as notification of being placed on Financial Aid Warning.

**Financial Aid Suspension**

Students are placed on Financial Aid Suspension for one of the following reasons:

1. Do not meet the SAP requirements after one semester on Financial Aid Warning.
2. Do not meet the requirements of their Academic Plan.
3. Meet or exceed the Maximum Time Frame requirement to obtain a degree.
4. Withdrawal from ALL semester credit hours or receive a non-passing grade or incomplete in ALL semester credit hours in back-to-back semesters.

Students are not eligible for financial aid while on Financial Aid Suspension. A letter is mailed to the student and a targeted message is posted to the student’s AccessPlus account as notification of being placed on Financial Aid Suspension. To regain financial aid eligibility students may: 1) Meet minimum SAP requirements while not receiving financial aid, or 2) Submit the Academic Intervention Self-Assessment to appeal for reinstatement of financial aid and receive appeal approval from the Office of Student Financial Aid. (See Appealing Financial Aid Suspension).

**Academic Plan**

Students are placed on an Academic Plan upon SAP appeal approval. The maximum length of an Academic Plan cannot exceed one calendar year (e.g., Fall/Spring/Summer, Spring/Summer/Fall, Summer/Fall/Spring) to meet the Minimum Cumulative GPA and/or the Minimum Pace-of-Progression requirements.

While on an Academic Plan, the student must maintain at least a 2.0 semester GPA, 67% semester pace of progression, not withdraw, or receive all incomplete and/or non-passing grades. If any of those requirements are not met, the student will go back on financial aid suspension.

**Graduate Students (Maximum Time Frame)**

The Registrar's records are reviewed at the completion of every semester of enrollment to determine compliance with the SAP policy. Graduate students must review the Graduate College Handbook regarding minimum grade point average requirements. Federal financial aid eligibility for graduate students ends when the total semesters enrolled equal the limits outlined below (Graduate College Handbook, Chapter 4).

- **Master's:** 10 semesters
- **Ph.D. (Ph.D. started at ISU with Master's earned):** 10 semesters
- **Ph.D. (Ph.D. started at ISU without Master's earned):** 14 semesters

**Approaching the Maximum Time Frame**

Graduate students approaching the maximum time frame of their degree will be notified by the Office of Student Financial Aid and will remain eligible for financial aid until the limit outlined above is met.

**Financial Aid Suspension**

Graduate students are placed on Financial Aid Suspension when they meet or exceed the Maximum Time Frame requirement to obtain a degree.

Students are not eligible for financial aid while on Financial Aid Suspension. A targeted message is posted to the student’s AccessPlus account as notification of being placed on Financial Aid Suspension. The SAP Appeal for Graduate Students can be accessed at financialaid.iastate.edu/forms/other/sap_grad.pdf

**Appealing Financial Aid Suspension**

Students on Financial Aid Suspension may submit an appeal to the Office of Student Financial Aid if extenuating circumstances prevented them from meeting the SAP requirements.

- **Basis for SAP Appeal:** The death of a relative, an injury or illness of the student, or other special circumstances. Attach documentation to support the basis of appeal.

- **SAP Appeal process:** Completed SAP appeals will be reviewed within 5 business days. Students will be notified by ISU e-mail if the appeal is approved or denied. The deadline to submit an appeal for consideration of reinstatement of aid eligibility for a semester is the midterm of that semester. SAP Appeal Form.

**Reinstatement and Renewal**

**Reinstatement**

The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean’s office in the college they wish to enter for instructions specific to that college.
The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.

2. Students can only be reinstated after at least one academic semester has elapsed since they were academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.

3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academic dismissal.

4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student's academic standing when the transfer is requested.

5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 12 or more months or who are international students must also file a reentry form prior to their return. For more information see the Reentry web site at http://www.registrar.iastate.edu/info/reentry.html. (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)

6. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal

Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon notification of notification of the committee's action and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee's action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee's action. The dean must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal Policy

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:
   a. Students must not have enrolled at Iowa State University for five or more consecutive years.
   b. Students must not have graduated from Iowa State University.
   c. Students must currently be in good academic standing. (If the student was previously dismissed, he or she must be reinstated.)

2. Conditions. Academic renewal is based on the following conditions:
   a. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements.
   b. Renewal may be applied only to academic terms completed prior to the students' extended absence.
   c. All courses and grades for the chosen terms will remain on the students' academic record.
   d. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
   e. Students who have used all of their drop options will be given one extra drop.
   f. Students may be granted only one academic renewal. To be eligible for a degree after academic renewal is granted, students must complete a minimum of 24 credit hours after re-enrolling at Iowa State University.

3. Procedures.
   a. Students should discuss their desire to pursue academic renewal with an advisor in the college they wish to enter.
   b. The student must complete the Academic Renewal Petition form available from www.registrar.iastate.edu/forms.
   c. After the form is signed by the student and academic advisor, it is submitted to the Records area in the Office of the Registrar, 214 Enrollment Services Center.

Academic Conduct

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validation of Enrollment for regulations concerning attendance to validate students' enrollment in a class.

Students are expected to attend class meetings as scheduled. Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course.

Field Trips/Curricular-Related Activities

Trips away from campus as part of a course are often appropriate educational experiences. They may not, however, take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday - Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should consult with instructors whose classes will be missed. If a mutually satisfactory agreement between the instructors and the student cannot be reached, the student cannot be required to attend the curricular-related activity or be penalized by the instructor for missing the curricular-related activity.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (http://classes.iastate.edu).

Excusable Absences for Non-Curricular Reasons

Students who miss class for non-curricular reasons are responsible for completing all assigned course requirements in a timely manner. Instructors should provide timely opportunities for students to make-up or replace missed scheduled examinations and/or assignments resulting from an excusable absence.

While instructors are free to change the format of make-up examinations or assignments, students will be evaluated by the same standards as other members of the class.

In all cases, the person responsible for the event or activity should provide participants with a letter explaining the proposed absence and its duration including travel times for off-campus events and activities. Students must provide this documentation to instructors at least 10 days in advance of the activity or event, except when such notice is not possible.

Course instructors retain final authority regarding student absences and how they impact course grades and the acceptability of a student's work toward passing their course. If a student must miss, for any reason, a portion of a course that, in
the considered opinion of the course instructor, is critical to the student’s ability to meet the course objectives, the instructor must recommend alternative actions to the student, which may include dropping the class.

Extra-Curricular Activities as a Representative of the University

Students may seek to or be asked to participate as an Iowa State University representative in non-credit events (competitions, conferences, presentations, programs, and performances) scheduled by academic or athletic units of the university at times that conflict with scheduled classes.

Instructors shall excuse students who miss class while representing Iowa State University in official department-or university-sponsored activities, including:
- academic or professional conferences and workshops
- intercollegiate athletic, academic, and judging competitions
- musical, theatrical, dance and other artistic performances
- presentations or programs given to external audiences

Other Extra-Curricular Activities

Instructors will determine whether other absences not officially sponsored by a unit of the University (e.g., conference attendance, job interviews), will be treated as excused.

Military Service

Instructors shall excuse absences due to performing required National Guard or other United States military service obligations (other than annual training). When a student is called to active duty for more than two weeks, instructors should meet with the student and the student’s adviser to discuss the situation and academic options. University procedures are in place for such situations and should be followed.

Court Appearances

Instructors shall excuse absences due to officially mandated court appearances including jury duty.

Academic Dishonesty

Academic dishonesty occurs when a student uses or attempts to use unauthorized information in the taking of an exam; or submits as his or her own work themes, reports, drawings, laboratory notes, or other products prepared by another person; or knowingly assists another student in such acts or plagiarism. Such behavior is abhorrent to the university, and students found responsible for academic dishonesty face expulsion, suspension, conduct probation, or reprimand.

Instances of academic dishonesty ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.

Examples of specific acts of academic dishonesty include but are not limited to:

1. Obtaining unauthorized information. Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, or by looking at your notes or other written work during an examination when not specifically permitted to do so.

2. Tendering of information. Students may not give or sell their work to another person who plans to submit it as his or her own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, or giving or selling a term paper to another student.

3. Misrepresentation. Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing a paper from a term paper service; reproducing another person’s paper (even with modifications) and submitting it as their own; having another student do their computer program or having someone else take their exam.

4. Bribery. Offering money or any item or service to a faculty member or any other person to gain academic advantage for yourself or another is dishonest.

5. Plagiarism. Unacknowledged use of the information, ideas, or phrasing of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws. Literary offenses of this kind are known as plagiarism.

Plagiarism occurs when a person does not credit the sources from which they borrow ideas, whether these ideas are reproduced exactly or summarized. The method of documentation will differ depending on whether the sources are written, oral, or visual. Ethically, communicators are responsible for providing accurate, detailed information about their sources. Practically, audiences need this information to comprehend and evaluate a message’s content. The Student Guide: English 150 and 250, available for purchase at the University Book Store, describes the process of documenting source materials as do many other reference guides.

Academic dishonesty is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic dishonesty or academic misconduct is therefore subject to appropriate academic penalty; to be determined by the instructor of the course, as well as sanctions under the university Student Disciplinary Regulations. If an instructor believes that a student has behaved dishonestly in a course, the following steps are to be followed:

1. The instructor should confront the student with the charge of dishonesty and arrange a meeting with the student to discuss the charge and to hear the student’s explanation.

2. If the student admits responsibility for academic misconduct, the instructor shall inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade.

3. Because academic dishonesty is also a student conduct violation under Section 4.2.1 of the Student Disciplinary Regulations, the instructor must report the incident in writing to the Dean of Students. After investigating the incident and discussing it with the instructor, the Dean of Students, or his/her designee, will meet with the student and depending on the severity of the offense as well as on the student’s past conduct record, may handle the matter through an administrative hearing or schedule a hearing before the All University Judiciary (AUJ).

4. This hearing, conducted according to the procedures outlined in the Student Disciplinary Regulations, is to determine the disciplinary action to be taken. In any case, the student’s academic adviser will be informed of the incident but may not insert any record of it in the student’s academic file.

5. If the student claims to be not responsible for the alleged violation of academic misconduct, the instructor may not assign the student a grade for the work in question until the question of responsibility is resolved, unless circumstances require that an interim grade be assigned. The instructor shall consult with his or her department chair and report the incident in writing to the Dean of Students.

6. The Dean of Students will refer the case to the Office of Judicial Affairs for investigation. After reviewing the report and completing an investigation, the Office of Judicial Affairs will file a formal complaint against the student if it is determined that there is cause to believe academic misconduct occurred. The case may be adjudicated through an administrative hearing or referred to an AUJ hearing before the All University Judiciary. Such an AUJ hearing will determine the nature and severity of the violation as set forth in the Student Disciplinary Regulations.

7. If the case is referred to the AUJ both the student and instructor will be invited to attend an AUJ hearing and present pertinent information. If the Administrative Hearing Officer (in a minor case) or the AUJ (in a major case) finds the student responsible for the charge of academic misconduct, the instructor will inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade. The Administrative Hearing Officer or AUJ will determine the appropriate disciplinary action with respect to the nature of the violation.

8. If the Administrative Hearing Officer or AUJ finds the student “not responsible” for academic misconduct, the instructor will grade the student accordingly on the work in question and the student’s grade in the course will not be adversely affected. If the student is found responsible, the student’s adviser will be informed of the decision but shall not insert any record of the action in the student’s academic file.

9. If a student either admits dishonest behavior or is found responsible for academic misconduct by the AUJ, the Office of Judicial Affairs (OJA) or AUJ may impose any of the following sanctions:

a. Disciplinary Reprimand: An official written notice to the student that his/her conduct is in violation of university rules and regulations.

b. Conduct Probation: A more severe sanction than a disciplinary reprimand, to include a period of review and observation during which the student must demonstrate the ability to comply with university rules, regulations, and other requirements stipulated for the probation period.

c. Suspension/Deferred Suspension: The suspension is deferred subject to a definite or indefinite period of observation and review. If a student is found responsible for a further violation of the university
A student accused of academic misconduct has the option to stay in the class or to drop the class if the drop is made within the approved time periods and according to the regulations established by the university. If the student chooses to drop the class, the student will be required to sign a statement of understanding that if the student is later found responsible for academic misconduct, then the student will receive an "F" for the course.

In instances in which the student admits responsibility or is judged to be responsible by OJA or the AUJ, a staff member of the Dean of Students Office will counsel with the student in an effort to deter any further such incidents.

Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of seven years, after which the file records are purged. These student records are confidential; nothing from them appears on a student's academic transcript. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the Dean of Students is available at any time to provide advice and assistance to the instructor in deciding a proper course of action to be taken.

Response to Classroom Disruption

Should any student officially enrolled for credit or audit in a class disrupt the instructor’s ability to ensure a safe environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom disruption, the instructor may, if she or he finds it necessary, explain to the student and the class why the particular action is deemed disruptive. The instructor should also take into consideration complaints of disruptive behavior brought to their attention by students. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention, including suspension from class, use of student disciplinary regulations, or police intervention, as discussed in more detail in the Faculty Handbook. (http://www.provost.iastate.edu)

Although most situations are best resolved without resorting to requests for police intervention, the Department of Public Safety should be called when the disruptive behavior prohibits the continuation of the class. The Department of Public Safety may also be called if any person enters or remains in the classroom after being asked by the instructor to leave.

Other violations related to academic misconduct may include subsection 4.1.11 Misuse of Computers and subsection 4.2.20 Unauthorized Sale of Others Intellectual Works. These subsections are located in the Iowa State University Student Disciplinary Regulations under section 4 of the Conduct Code.

Ownership of Course-related Presentations

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell the notes or recordings must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Conduct Code as published on the Policy Library web site at http://policy.iastate.edu/policy/SDR#a4222.

Recording and Transmission of Classes

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on his or her classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases the recordings may be preserved and used for other classes as well.

Credit Involving a Paid Activity

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department. The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student’s learning will be assessed.
Admissions
Office of Admissions
Interim Director
Darin Wohlgemuth, Ph.D.

Admission
When to Apply
Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu.

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply
Applications for admission are available online at www.admissions.iastate.edu.

Applicants may also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who are not English must meet university communication proficiency requirements.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). In addition applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based on the following equation:

\[
\text{RAI Score} = \frac{2 \times \text{ACT composite score}}{2} + (1 \times \text{percentile class rank}) + (20 \times \text{high school GPA}) + (5 \times \text{number of years of high school core courses completed})
\]

Note: For purposes of calculating the RAI, SAT scores will be converted to ACT composite equivalents; high school rank is expressed as a percentile with 99% as the top value; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Those applicants who are not offered unconditional admission will either be given the opportunity to enroll for a trial period during the preceding summer session or be denied admission.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications for admission may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation
Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts
Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics
Three years, including one year each of algebra, geometry, and advanced algebra

Science
Three years, including one year each of courses from two of the following fields: biology, chemistry, and physics

Social Studies
Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering
In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission - Nondegree Undergraduate

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree should not enroll in graduate credits. To take courses listed as available for graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

Nondegree applicants are held to the same standards of admission as degree-seeking applicants, including English language proficiency.
Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree undergraduate students in the College of Liberal Arts and Sciences. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students - Undergraduate and Graduate

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Reentry Students.

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry Students for more information.

Undergraduate Admission by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university’s English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point average required by Iowa State for specific programs, will be admitted. A 2.00 grade point average (on a 4.00 grading scale) is the minimum transfer grade point average requirement. Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.
Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State’s College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree. Iowa State University will accept up to 16 semester (24 quarter) credits earned in programs intended for transfer students with an associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements), and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements. Iowa State University will not be used in calculating a transfer student's Iowa State cumulative grade point average. A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency. This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses at an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will enroll at Iowa State University in both the last 32 semester credits before receiving a degree from Iowa State University.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student’s college, based on relevance to the students' program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student’s Iowa State cumulative grade point average.

A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency. This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of Credit By Examination Programs (CBE)

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State’s policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe.

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology, and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Correspondence concerning the Advanced Placement Program should be addressed to the College Board Advanced Placement Examinations,
International Baccalaureate Examinations
The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Correspondence concerning the IB Program should be addressed to IB Americas Global Centre, 7501 Wisconsin Ave., Suite 200 West, Bethesda, MD 20814, iba@ibo.org, or visit their website at http://ibo.org/iba/.

Departmental Examinations
Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examination should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. Grades are not used in computing students’ grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements. For a listing of common departmental test-out exams, refer to http://counseling.iastate.edu/testing-services/test-outs. Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program
CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section, and does not accept College Mathematics, College Algebra, Precalculus, College Composition, College Composition Modular, American Literature, Analyzing and Interpreting Literature, or English Literature. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students’ degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acc 284); engineering majors should consult with their academic adviser before registering for this examination); Biology (Biol 101, not for biology or engineering majors); Calculus (Math 165); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); and Principles of Microeconomics (Econ 101).

In addition, Iowa State University will award up to 16 semester credit hours for CLEP French language, up to 16 semester credit hours for CLEP German language, and up to 16 semester credit hours for CLEP Spanish language. Please note that native or near native speakers of French, German, or Spanish may not test out of the beginning or intermediate levels in these languages.

A nonrefundable fee is charged for each CLEP test requested, and all requests should be made one week prior to the test date. CLEP tests are administered by the Student Counseling Service Testing Office Monday through Friday. For information on whether to take any of the CLEP tests, contact your academic adviser. To obtain information on any of the CLEP tests, contact the SCS Testing Office, Rm. 2062 Student Services Building, Iowa State University, Ames, Iowa 50011, or send e-mail to scsclp@iastate.edu. To print a copy of the institutional CLEP registration form, go to http://www.counseling.iastate.edu/testing-services.

Policies and Procedures Governing CBE Tests
1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Credit by examination will not be granted if it duplicates courses previously passed or failed.

5. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

6. There is a nonrefundable fee for all departmental and CLEP tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

7. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

8. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.

9. Listed below are policies for transferring CBE from another college or university to Iowa State University:

a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accomplished by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at another college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State’s AP and CLEP policies.

b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State’s IB policies.

c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accomplished by at least 12 semester credits earned in residence at the sending institution.

10. Credit earned from CBE will be posted to the student’s academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

11. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

12. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Below is detailed information concerning Iowa State University admission policies and procedures. Prospective students are also encouraged to visit the following websites for additional information:

Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission of the North Central Association.

Bachelor's Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer from another college or university is normally required to have a 2.00 cumulative average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, but will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor's degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student’s major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor’s degrees if he or she meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Undergraduate Certificates

All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass-not-pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index or individual colleges for information).

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student’s entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student’s major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student’s progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student’s communication practices.

Iowa State University’s communication curriculum, based on these five principles, seeks to enrich the student’s understanding of the various subjects studied as well as to prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses

To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Upper-Level Curricula

Continuing development of communication skills will be directed by the student’s major department. Using the university’s basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student’s major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course-specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions.

The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.
Library Study

Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

For undergraduate students, LIB 160 Information Literacy is a one-credit graduation requirement course that provides a foundation of information literacy and library research skills and concepts. Librarians also work each semester with ISU course instructors to teach course-related instruction sessions for undergraduate students in the effective use of library resources in course-relevant fields of study.

Each semester librarians work with ISU course instructors to teach course-related instruction sessions for graduate students in library research skills, information literacy concepts, and the effective use of library resources and research tools in course-relevant fields of study. For more information, call the Library at 515-294-4527.

U.S. Diversity and International Perspective Requirements

One of Iowa State University’s goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students’ fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student’s college or requirements of the student’s major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

• articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicate how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
• analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
• analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
• analyze the perspectives of groups and individuals affected by discrimination
• analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students’ understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives. So Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are “studying abroad” from their home country’s perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

• describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
• analyze and evaluate the influence of global issues in their own lives.

• describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
• communicate competently in a second language.

Curriculum Requirements

The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and his or her adviser in planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

Catalog in Effect

A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous five years, provided it covers a period of his or her enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Special Programs

Honors Program

The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The program enables honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet them. An honors program may include substitutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.

Other benefits. Members of the Honors Program have 24-hour access to the Jischke Honors Building as a quiet place to study, use the computers, and visit with other honors students. Students also have off-campus opportunities such as attending honors seminars and conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

First-Year Honors Program

Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an honors education, consists of honors sections of English 250 and Library 160, an FHP seminar, and honors advisers. Students may also choose to participate in the Honors Mentor Program, which introduces students to scholarship and research. Participants are matched with faculty members conducting research in an area of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or www.honors.iastate.edu.

Dual-degree Programs

Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor’s degree from Iowa State. (See Index, Preprofessional Study.)

Iowa Lakeside Laboratory

Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa.

It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All
Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, www.continuetolearn.uiowa.edu/lakesidelab (http://www.continuetolearn.uiowa.edu/lakesidelab).

Regent Universities Student Exchange Program
Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)
Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student’s academic adviser in advance of the NSE student’s program. Detailed information and application forms are available from:
National Student Exchange
1080 Hixson-Lied Student Success Center
(515) 294-6479
nse@iastate.edu
www.dso.iastate.edu/nse

Study Abroad
Our planet is in a constant state of change, and occurrences in remote corners of the globe can profoundly impact our lives. It is clear from the effects of global warming, international trade, terrorism, and pandemics of one nature or the other that we cannot ignore what is happening beyond our shores and borders. Students who graduate without an understanding of other cultures, languages, business practices, and political systems are disadvantaged both educationally and professionally. Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. Further, study abroad is an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, work, volunteer opportunities, and service-learning, and scholarships. The Center’s library has a fine selection of travel books, information on international careers, cross-cultural orientation, social and business customs around the world, and travel bargains. The International Student Identity Card and passport photographs can also be obtained at the Center.

With over 250 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition.

Semester in Australia, Canada, Greece, Ireland, Italy, New Zealand, or the UK offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, and in some cases summer.

Intensive Language Programs offer students a total immersion experience in French, German, Russian, or Spanish by studying in Quebec, Canada (French), France, Germany, Russia, Mexico, Peru, or Spain. Summer and semester programs are available.

Group Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctic to England and to more than 40 other destinations.

For additional information, contact:
Study Abroad
3224 Memorial Union
(515) 294-6792
www.studyabroad.iastate.edu

The main undergraduate academic programs of each college are listed below, together with the degrees awarded upon completion. In many cases certain majors, minors, options, or electives allow for increased specialization within the programs. Programs which are administered jointly by two colleges are listed within both colleges.

College of Agriculture and Life Sciences
• Agricultural Biochemistry, B.S.
• Agricultural Business, B.S.
• Agricultural and Life Sciences Education, B.S.
• Agricultural Studies, B.S.
• Agricultural Systems Technology, B.S.
• Agronomy, B.S.
• Animal Ecology, B.S.
• Animal Science, B.S.
• Biology, B.S.
• Culinary Science, B.S.
• Dairy Science, B.S.
• Diet and Exercise, B.S./M.S.
• Dietetics, B.S.
• Environmental Science, B.S.
• Environmental Studies, B.S.*
• Food Science, B.S.

College of Veterinary Medicine
• Veterinary Medicine, D.V.M.

Minors
1. All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
2. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.
3. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.
4. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.
5. Courses taken for a minor may not be taken on a pass-not pass basis.

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student’s transcript. Lists of undergraduate minors offered by each college appear in the college description. Specific requirements and/or restrictions are available from the department or program offering the minor.

Minors by College
This list may not be inclusive. Check the college web sites for more information.

Agriculture and Life Sciences
• Agricultural Biochemistry
• Agricultural Business
• Agricultural Education and Studies
• Agricultural Systems Technology

Engineering

For Engineering Majors:

- Bioengineering (http://www.eng.iastate.edu/bioengineering)
- Energy Systems
- Engineering Sales
- Nondestructive Evaluation
- Sustainability* (http://www.las.iastate.edu/sustainability)
- Wind Energy*

*The College of Engineering participates in these interdisciplinary minors.

Human Sciences

- Apparel Merchandising, Design, and Production
- Athletic Coaching (http://www.kin.hs.iastate.edu/programs/minors)
- Child, Adult, and Family Services
- Culinary Science
- Dance (http://www.kin.hs.iastate.edu/programs/dance/Minor)
- Family and Consumer Sciences Education
- Family Finance, Housing, and Policy
- Food Science
- Food Safety (interdepartmental minor)
- Gerontology (interdisciplinary minor)
- Hotel, Restaurant, and Institution Management
- Nutrition

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not-pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student’s transcript and a printed certificate will be awarded.
Iowa State University also offers certificates from the Graduate College and certificates via distance education.

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring two years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the preveterinary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor’s degree in specific ISU majors, by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in preprofessional CLS/MT school can be used to partially fulfill the requirements for the bachelor’s degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT program is affiliated with Iowa State University:

St. Luke’s Methodist Hospital, Cedar Rapids, Iowa. Program Director: Carol Collingsworth. Medical Director: Lileah Harris, MD

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree.

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor’s degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor’s degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master’s degree or a bachelor’s degree, depending upon the size of the institution and whether an upper or middle entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor’s degree in health administration, or they may spend four years earning a bachelor’s degree in any department before entering a master’s degree program at the University of Iowa or other university. Courses required for admission to master’s degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.

Human Medicine

Physicians study, diagnoses, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree in doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student’s interests and provide appropriate preparation for an alternative career.

Law

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D) degree. A bachelor’s degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor’s degree should reflect a student’s passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student’s development of critical thinking skills, including analytical written and oral skills. An understanding of business, social studies, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should include accounting, management, political science, psychology, criminal justice, economics, philosophy, English literature, and history. The completion of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

Library and Information Science

Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master’s degree programs in library and information science provide the professional preparation. Iowa State students may earn a bachelor’s degree in any department before entering a professional master’s degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field.

Occupational Therapy

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may
complete a bachelor's degree in any major at Iowa State University, and then enter a master's or doctoral degree program at another university.

**Optometry**
Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor's degree. Students wishing to earn the bachelor's degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

**Pharmacy**
Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceutical. Students may complete prepharmacy courses at Iowa State University. Many schools do not require a bachelor's degree for admission, however most students complete at least 3 years of college before admission to pharmacy schools. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail four years of study.

**Physical Therapy**
Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Usually, students earn a bachelor's degree at ISU before entering professional school to earn a doctoral degree. The bachelor's degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

**Physician Assistant**
A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, take diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master's degree level. Applicants must have had health-care experience with direct patient contact experience. Students must have earned a bachelor's degree before entering a PA program. The degree can be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, physics, psychology, and statistics.

**Podiatry**
Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor's degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor's degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor's degree.

**Theology or Religious Studies**
The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor's degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

**Veterinary Medicine**
About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine). The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu.) Students may pursue their preprofessional preparation in any college at Iowa State University. A major (pre veterinary medicine is not a major) should be selected that is allied to each student’s vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree; the most effective progress toward a bachelor’s degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preprofessional program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preprofessional course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor’s degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

**College of Agriculture and Life Sciences**
Wendy Wintersteen, Dean
Joe Colletti, Senior Associate Dean
David Acker, Associate Dean
John Lawrence, Associate Dean
www.cals.iastate.edu

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter. Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates of the College of Agriculture and Life Sciences include: agribusiness and industry, production agriculture, biological and environmental sciences, value-added processing, natural resource management, rural development, public agencies, education, animal and human health professions, and graduate studies.

**High School Preparation**
Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.
Leadership
• Organize, facilitate, and participate effectively in a group, team, or organization.
• Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

Entrepreneurship
• Demonstrate innovativeness and creativity regardless of context.
• Identify and pursue opportunities that produce value.
• Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning
• Articulate how continued learning after graduation will enrich their lives.
• Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics
• Define and assess their ethical perspective, moral responsibility, and values.
• Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness
• Explain the physical and biological interactions within ecosystems.
• Explain how human activities impact the environment and how societies are affected by environmental change.

International/Multi-Cultural Awareness
• U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
  • Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
  • Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,
  • Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
  • Analyze the perspectives of groups and individuals affected by discrimination.
  • Analyze how cultural diversity and cooperation among social groups affect U.S. society.
• International Perspectives – Students should achieve two of the following outcomes. They should be able to:
  • Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
  • Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve,
  • Analyze and evaluate the influence of global issues in their own lives,
  • Describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
  • Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

Electives
Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements. No more than 9 credits of 490 coursework from any Iowa State University curriculum may be applied toward graduation, although some individual curricula may establish a more restrictive use of 490 credits toward fulfillment of graduation requirements.

Advising
Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information
on career choices. Advisers make a special effort to adjust course schedules in accordance with students' interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

**Graduate Study**

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

- Biorenewable Resources and Technology
- Ecology and Evolutionary Biology
- Environmental Science
- Genetics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

For details, consult the Graduate College section of this catalog.

**Departments of the College**

- Agricultural Education and Studies
- Agricultural and Biosystems Engineering
- Agronomy
- Animal Science
- Biochemistry, Biophysics, and Molecular Biology
- Ecology, Evolution, and Organismal Biology
- Economics
- Entomology
- Food Science and Human Nutrition
- Genetics, Development and Cell Biology
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology and Microbiology
- Sociology

**Majors in the College of Agriculture and Life Sciences**

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

**Primary Majors**

- Agricultural Biochemistry
- Agricultural Business
- Agricultural and Life Sciences Education
- Agricultural Studies
- Agricultural Systems Technology
- Agronomy
- Animal Ecology
- Animal Science
- Biochemistry
- Biology
- Culinary Science
- Dairy Science
- Dietetics
- Diet and Exercise
- Environmental Science
- Food Science
- Forestry
- Genetics
- Global Resource Systems
- Horticulture
- Industrial Technology
- Insect Science
- Microbiology
- Nutritional Science
- Public Service and Administration in Agriculture

**Secondary Majors***

- Environmental Studies
- International Agriculture
- Seed Science

*A secondary major must be taken in conjunction with a primary major.

**Minors**

- Agricultural Biochemistry
- Agricultural Business
- Agricultural Education and Studies
- Agricultural Systems Technology
- Agronomy
- Animal Ecology
- Animal Science
- Biology
- Culinary Science
- Emerging Global Diseases*
- Entrepreneurial Studies*
- Environmental Studies
- Food and Society
- Food Safety*
- Food Science
- Forestry
- Genetics
- Horticulture
- Industrial Technology
- Insect Science
- International Agriculture
- Meat Science
- Microbiology
- Nutrition
- Sustainability* (http://www.las.iastate.edu/sustainability)

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

**Certificate**

- Occupational Safety

See statement on minors in the Colleges and Curricula section of this catalog.

**Special Programs**

**Agriculture Exploration**

Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

**Preventerinary Medicine**

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preventerinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements).

Students who are undecided about choice of major may enroll in general preventerinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preventerinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission.
Agricultural Biochemistry program of study

biochemistry, chemistry, physics, and mathematics, or in preparation for the study see College of Agriculture, Curricula. Agricultural biochemistry is recommended College of Agriculture and Life Sciences.

Agricultural Biochemistry

Internships or cooperative education programs. For additional information, contact the Chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs

Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.

Study Abroad and International Travel Opportunities

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities in more than 25 countries around the world. For additional information, contact the Office of Global Agriculture Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

Agricultural Biochemistry

Agricultural Biochemistry Major in the College of Agriculture and Life Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Curricula. Agricultural biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in biochemistry, chemistry, physics, and mathematics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and animal and plant biotechnology.

Agricultural Biochemistry program of study

Take one of the following:

BBMB 101 Introduction to Biochemistry 1
BBMB 102 Introduction to Biochemistry Laboratory 1
BBMB 201 Chemical Principles in Biological Systems 2
BBMB 404 Biochemistry I 3
or (4 credits)
BBMB 504 Amino Acids and Proteins
BBMB 505 Bioenergetics and Metabolism
BBMB 405 Biochemistry II 3
or (4 credits)
BBMB 506 Membrane Biochemistry
BBMB 507 Biochemistry of Nucleic Acids
BBMB 411 Techniques in Biochemical Research 4
BBMB 490 Independent Study (Not required) 1-3
BBMB 499 Undergraduate Research (Not required but strongly encouraged) 1-5

Take one of the following:

CHEM 201 Advanced General Chemistry
CHEM 177 General Chemistry I
& CHEM 178 and General Chemistry II

Agricultural Biochemistry

Take one of the following:

CHEM 499 Undergraduate Research (Not required but strongly encouraged) 1-5

Take one of the following:

CHEM 324 Introductory Quantum Mechanics 3
CHEM 325 Chemical Thermodynamics 3
CHEM 331 Organic Chemistry I
& CHEM 332 Organic Chemistry II 6
CHEM 333L Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors) 1-2
or CHEM 331L Laboratory in Organic Chemistry I

MATH 165 Calculus I 4
MATH 166 Calculus II 4
MATH 265 Calculus III 3-4
or MATH 266 Elementary Differential Equations
or MATH 267 Elementary Differential Equations and Laplace Transforms 10

PHYS 221 Introduction to Classical Physics I & PHYS 222 and Introduction to Classical Physics II 6
BIOL 211 Principles of Biology I
& BIOL 212 Principles of Biology II 6
BIOL 211L Principles of Biology Laboratory I 1
or BIOL 212L Principles of Biology Laboratory II
or BIOL 313L Genetics Laboratory 3
BIOL 314 Principles of Genetics 3
BIOL 313 Principles of Molecular Cell Biology 3

Agricultural Sciences from approved list 9
Total Credits 76-84

The College of Agriculture and Life Sciences requires the following:

Communications Proficiency (with a C or better)

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
LIB 160 Information Literacy 1
Total Credits 10

Ethics

Courses from an approved list. 3

Humanities and Social Sciences

 Humanities course 3
 Social Science course 3
 Total Credits 6

Agricultural Sciences

Courses from an approved list 9

Curriculum in Agricultural Biochemistry

Administered by the Department of Biochemistry, Biophysics and Molecular Biology.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
**SP CM 212** Fundamentals of Public Speaking 3
**Lib 160** Information Literacy 1

Total Credits 10

**Ethics: 3 cr.**

3 cr. from approved list.

**Humanities and Social Sciences: 6 cr.**

3 cr. from approved humanities list; 3 cr. from approved social science list.

**Mathematical Sciences: 12 cr.**

- **MATH 165** Calculus I 4
- **MATH 166** Calculus II 4
- **MATH 265** Calculus III 4
- or **MATH 266** Elementary Differential Equations 4

Total Credits 12

**Physical Sciences: 38 cr.**

- **CHEM 177** General Chemistry I 4
- or **CHEM 201** Advanced General Chemistry 4
- **CHEM 177L** Laboratory in General Chemistry I 1
- or **CHEM 201L** Laboratory in Advanced General Chemistry 1
- **CHEM 178** General Chemistry II 3
- **CHEM 211** Quantitative and Environmental Analysis Laboratory 4
- & **211L** Quantitative and Environmental Analysis Laboratory 1
- **CHEM 324** Introductory Quantum Mechanics 3
- **CHEM 325** Chemical Thermodynamics 3
- **CHEM 322L** Laboratory in Physical Chemistry 3
- or **BBMB 461** Molecular Biophysics and Laboratory in Molecular Biophysics 4
- **CHEM 331** Organic Chemistry I 3
- **CHEM 331L** Laboratory in Organic Chemistry I 1
- **CHEM 332** Organic Chemistry II 3
- **PHYS 221** Introduction to Classical Physics I 5
- **PHYS 222** Introduction to Classical Physics II 5

Total Credits 38

**Life Sciences: 13 cr.**

- **BIOL 211** Principles of Biology I 3
- **BIOL 212** Principles of Biology II 3
- **BIOL 211L** Principles of Biology Laboratory I 1
- or **BIOL 212L** Principles of Biology Laboratory II 1
- **BIOL 313** Principles of Genetics 3
- **BIOL 314** Principles of Molecular Cell Biology 3

Total Credits 13

**Agricultural Biochemistry: 13 cr.**

- **BBMB 101** Introduction to Biochemistry 1
- **BBMB 102** Introduction to Biochemistry Laboratory 1
- **BBMB 201** Chemical Principles in Biological Systems 2
- **BBMB 404** Biochemistry I 3
- or (4 credits)
  - **BBMB 504** Amino Acids and Proteins 3
  - **BBMB 505** Bioenergetics and Metabolism 4
  - **BBMB 405** Biochemistry II 3
  - or (4 credits)
  - **BBMB 506** Membrane Biochemistry 3
  - **BBMB 507** Biochemistry of Nucleic Acids 4
  - **BBMB 411** Techniques in Biochemical Research 4

Total Credits 14

**Agricultural Sciences: 9 cr.**

Complete 9 cr. from approved list.

See also the B.S./M.S. program under Graduate Study.

---

**Graduate Study**

The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), plant physiology, and toxicology. Minor work is offered to students taking major work in other departments.

Prerequisite to graduate work is a sound undergraduate background in biology, chemistry, mathematics, and physics.

All graduate students are required by the department to teach as part of their training for an advanced degree.

The department offers a B.S./M.S. program in biochemistry that allows students to obtain both the B.S. and M.S. degrees in five years. The program is open to students in the College of Liberal Arts and Sciences and in the College of Agriculture. Students interested in this program should contact the department office for details. Application for admission to the Graduate College should be made near the end of the junior undergraduate (third) year. Students would begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships.

**Undergraduate Study**

The department of Biochemistry, Biophysics & Molecular Biology (http://www.bbmb.iastate.edu) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biotechnical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

**Agricultural Business**

Administered by the Department of Economics. The major in agricultural business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

**Curriculum in Agricultural Business**

The major in agricultural business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 15 credits must be earned from courses taught by the Department of Economics at ISU.
General Economics: 6 cr. from approved list.

Agricultural, Food, or Natural Resources Sciences: 6 cr.

Physical Sciences: 3 cr. from approved list.

Ethics (http://www.agstudent.iastate.edu/agriculturestudentservices/ethicslist.html): 3 cr.

Communication/Library: 13 cr.

Humanities and Social Sciences (http://www.agstudent.iastate.edu/agriculturestudentservices/humanities.htm): 6 cr.

Life Sciences (http://www.agstudent.iastate.edu/agriculturestudentservices/life_science.htm): 6 cr.

Mathematics: 12-14 cr.

Physical Sciences: 5 cr.

Agricultural, Food, or Natural Resources Sciences: 6 cr.

General Economics: 9-10 cr.

Electives: 22-24 cr.

Business and Agricultural Business: 29 cr.

Agricultural and Life Sciences Education

Undergraduate Study

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula. The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decisionmaking, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness

Minor - Agricultural Business

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.
8. U.S. diversity

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/.

Curriculum in Agricultural and Life Sciences Education

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

Teacher Certification Option

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and a minimum grade of C- in selected courses.

International Perspective: 3 cr. from approved list

U.S. Diversity: 3 cr. from approved list

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 10 cr.:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
LIB 160 Information Literacy 1

Total Credits 10

Humanities and Social Sciences: 6 cr.

PSYCH 230 Developmental Psychology 3
3 credits from approved American history list 3

Ethics: 3 cr. from approved list

Math, Physical and Life Sciences: 19 cr.

CHEM 163 College Chemistry 4
or CHEM 177 General Chemistry I 4
CHEM 163L Laboratory in College Chemistry 1
or CHEM 177L Laboratory in General Chemistry I 1
MATH 104 Introduction to Probability 3
or MATH 150 Discrete Mathematics for Business and Social Sciences 3
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
STAT 104 Introduction to Statistics 3

Total Credits 19

Agricultural Sciences and Economics: 31 cr.

All courses minimum grade C- is required.

ACCT 284 Financial Accounting 3
AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
AGEDS 488 Methods of Teaching Agricultural Mechanics 3
AGRON 114 Principles of Agronomy 3
AGRON 154 Fundamentals of Soil Science 3
AN S 101 Working with Animals 2
AN S 114 Survey of the Animal Industry 2
ECON 101 Principles of Microeconomics 3
ECON 230 Farm Business Management 3
HORT 221 Principles of Horticulture Science 3

Total Credits 31

Professional Credits - Teacher Certification option: 41 cr.

All courses minimum grade C is required.

AGEDS 110A Agriculture and Life Sciences Education (Fall only) 1
AGEDS 211A High School Agriculture Programs 1
AGEDS 310 Foundations of Agricultural Education Programs 3
AGEDS 401 Planning Agriculture and Life Sciences Education Programs 3

and ethics, program planning, learning theory, instructional methods, program degree may do so by completing either a thesis or nonthesis program of study. Earned a bachelor’s degree in an agricultural discipline may plan a course of study with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and

Visit the departmental website at www.AgEds.iastate.edu/.

Courses that can be taken for a minor are:

- 10 credits in a selected area of agricultural sciences and economics including 6 credits at the 300-400 level; 6 credits each in two additional areas of agricultural sciences and economics; 10 credits agricultural sciences and economics electives.

**Professional Communications: 33 cr.**

- AGEDS 110A: Agriculture and Life Sciences Education (Fall only) 1
- AGEDS 211: Early Field Based Experience 1
- AGEDS 215: Career Seminar 1
- AGEDS 315: Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
- AGEDS 412: Internship in Agricultural Education and Studies 2-6
- 21 credits from approved electives 21

Total Credits 29-33

**Electives: 12-13 cr.**

**Minor - Agriculture and Life Sciences Education**

The department offers a minor in agriculture and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. A minor will not meet state licensure requirements for teaching high school agriculture. Courses that can be taken for a minor are:

- AGEDS 211: Early Field Based Experience 1
- AGEDS 310: Foundations of Agricultural Education Programs 3
- AGEDS 311: Presentation and Sales Strategies for Agricultural Audiences 3
- AGEDS 312: Science With Practice 3
- AGEDS 315: Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
- AGEDS 412: Internship in Agricultural Education and Studies 2-6
- AGEDS 388: Agricultural Mechanics Applications 3
- AGEDS 414: Developing Agricultural Education Programs in Non-Formal Settings 2
- AGEDS 450: Farm Management and Operation 3
- AGEDS 451: Agricultural Law 4
- AGEDS 461: Technology Transfer and the Role of Agricultural and Extension Education 3
- AGEDS 488: Methods of Teaching Agricultural Mechanics 3
- AGEDS 490: Independent Study in Agricultural Education and Studies 1
- AGEDS 496: Agricultural Travel Course 1
- AGEDS 499: Undergraduate Research arr
- AGEDS 327: Advanced Communications for Agriculture and Life Sciences 3
- AGEDS 402: Methods of Teaching in Agriculture and Life Sciences 3

Total Credits 41-45

† Arranged with instructor.

Visit the departmental website at www.AgEds.iastate.edu/.

**Graduate Study**

The department offers the degrees of master of science and doctor of philosophy, with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor’s degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

**Agricultural Studies**

**Undergraduate Study**

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decisionmaking, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/.

**Curriculum in Agricultural Studies**

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective:**

- 3 cr. from approved list.

**U.S. Diversity:**

- 3 cr. from approved list.

**Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

No more than 4 cr. of or 397 may count toward graduation.

Preveterinary Studies
Preparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.

Agriculture and Society
College of Agriculture—Agriculture & Society

This undergraduate degree emphasizes the application of social science knowledge to issues related to agriculture and society. The interdisciplinary major draws largely on courses from sociology, political science and economics. Its goal is to prepare students to become leaders in addressing complex issues related to the social and human dimensions of agriculture at both the local and global level. Students will learn social science concepts and skills to understand, analyze and communicate complex ideas, information and data related to agricultural systems. Internships are an important part of the Agriculture & Society major. The curriculum offers the flexibility needed to accommodate the special interests and needs of each student.

The curriculum is designed to provide students with the following skills and competencies:
1. Recognize, analyze and evaluate the critical human and social factors (e.g. practices, policies, laws, institutions) impacting agriculture.
2. Understand the social dimensions of agriculture and its connections with food and environmental systems.
3. Develop problem solving, critical thinking, and leadership skills to positively influence human impacts on agriculture.
4. Understand the perspectives of diverse stakeholders and develop strategies to communicate clearly and effectively to a range of audiences.

Students will develop the necessary skills to become effective leaders with companies, local, national and international non-governmental organizations (NGOs), and government agencies that work on agricultural, food and environmental related issues. Graduates can work as public policy analysts, government relations, public relations, program analyst, program specialists, marketing, sales, agriculture, educators, and executive directors.

Curriculum in Agriculture & Society
Administered by the Department of Sociology

Total Degree Requirement: 128 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.
Communications Proficiency (C or better):
6 credits of English Composition 6
Three credits of Speech Fundamentals 3

Communication/Library:
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
P R 305 Publicity Methods 3
LIB 160 Information Literacy 1

Humanities and Social Sciences: 6 cr.
3 credits from approved humanities list 3
3 credits from approved social science list 3

Ethics: 3 cr.
3 cr. from approved list.

Life Sciences: 6 cr.
BIOL 101 Introductory Biology 3
or BIOL 211 Principles of Biology I 3
Three credits from approved life sciences list 3
Total Credits 6

Mathematical and Physical Sciences: 12 cr.
MATH 150 Discrete Mathematics for Business and Social Sciences 3
STAT 101 Principles of Statistics 4
Five credit hours from:
MTEOR 206 Introduction to Weather and Climate 5
AGRON 206 Introduction to Weather and Climate 5
or ASTRO, CHEM, GEOL, PHYS 5
Total Credits 12

Sociology 15 cr.
SOC 110 Orientation to Public Service and Administration in Agriculture 3
SOC 230 Rural Society in Transition 3
SOC 325 Transition in Agriculture 3
or SOC 382 Environmental Sociology 3
SOC 415 Dynamics of Social Change 3
SOC 420 Complex Organizations 3
or SOC 380 Sociology of Work 3
SOP 464  Strategies for Community Engagement  3
Total Credits  15

Economics and Agricultural Education and Studies: 16 cr.
ECON 101  Principles of Microeconomics  3
ECON 102  Principles of Macroeconomics  3
ECON 235  Introduction to Agricultural Markets  3
or ECON 360  Environmental and Resource Economics  3
ECON 344  Public Finance  3
AGEDS 451  Agricultural Law  4
Total Credits  16

Political Sciences: 15 cr.
POL S 215  Introduction to American Government  3
POL S 310  State and Local Government  3
POL S 371  Introduction to Public Administration  3
POL S 475  Management in the Public Sector  3
C R P 436  Community Economic Development  3
Total Credits  15

Additional Pol S, Econ, or Soc at 300 level or above.

Agricultural Sciences: 9 cs.
Complete 9 cr. from MTEOR 206 Introduction to Weather and Climate or Agron,
An S, AST, Ent, FS HH, Hort, or NREM.

Area of Concentration: 15 cr.
Complete 15 cr. from approved specialization area.

Graduate Study
The department offers work for the degrees master of science and doctor of
philosophy with majors in sociology and rural sociology and minor work for
students majoring in other departments. For M.S. and Ph.D. departmental
requirements, see Program of Graduate Study for Degrees in Sociology and
Rural Sociology, available from the department office. The department offers
concentrations in a number of areas, e.g., community studies and development;
sociology of families, inequality, food systems, agriculture and environment;
methodology; social change and development; criminology; the economy,
organizations and work; and social psychology. The Department of Sociology
does not offer a nonthesis master’s program.

Graduates have a broad understanding of sociology, address complex societal
problems, and communicate effectively with scientific colleagues and the general
public in both formal and informal settings. They understand sociological theory,
conduct research, and are prepared to educate college students and contribute
to public policy. Although the department stipulates no language requirement for
either the degree master of science or the degree doctor of philosophy, specifying
competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in
interdepartmental majors in sustainable agriculture, transportation and water
resources, and interdepartmental minors in gerontology (see Index).

Agricultural Systems Technology
Curriculum in Agricultural Systems Technology
Administered by the Department of Agricultural and Biosystems Engineering.
Students majoring in Agricultural Systems Technology choose between two
options: Agricultural and Biosystems Management or Machine Systems.

Total Degree Requirement: 120 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16
technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals
with a C or better.

Communication/Library: 13 cr.
ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
One of the following:
ENGL 302  Business Communication  3
ENGL 309  Report and Proposal Writing  3
ENGL 314  Technical Communication  3
AGEDS 327  Advanced Communications for Agriculture and Life Sciences  3
One of the following:
SP CM 212  Fundamentals of Public Speaking  3
COMST 214  Professional Communication  3
AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences  3
Lib 160  Information Literacy  1
Total Credits  13

Mathematical, Physical, and Life Sciences: 26 cr.
MATH 151  Calculus for Business and Social Sciences  3
MATH 145  Applied Trigonometry  3
STAT 104  Introduction to Statistics  3
PHYS 111  General Physics  5
CHEM 163  College Chemistry  4
CHEM 163L  Laboratory in College Chemistry  1
BIOL 101  Introductory Biology  3
or BIOL 211  Principles of Biology I  3
Plus 3 life sciences credits from approved College of Agriculture and Life
Sciences list
Total Credits  25

Business, Humanities, Ethics, and Social Sciences: 18 cr.
ACCT 284  Financial Accounting  3
ECON 101  Principles of Microeconomics  3
Ethics Course  3
TSM 370  Occupational Safety  3
Humanities course from College of Agriculture and Life Sciences list  3
International Perspectives course from University list  3
U.S. Diversity course from University list  3
Total Credits  18

Technical Core: 30 cr.
TSM 110  Introduction to Technology  1
TSM 115  Solving Technology Problems  3
TSM 116  Introduction to Design in Technology  3
TSM 201  Preparing for Workplace Seminar  1
TSM 210  Fundamentals of Technology  3
TSM 270  Principles of Injury Prevention  3
TSM 310  Total Quality Improvement  3
TSM 363  Electric Power and Electronics for Agriculture and Industry  4
TSM 397  Internship in Technology  1
TSM 399  Work Experience in Technology  2
TSM 415  Technology Capstone I  1
TSM 416  Technology Capstone II  5
Total Credits  30

No more than 4 cr. of TSM 397 may count toward graduation.

Agricultural and Biosystems Management Option: 33 cr.
TSM 322  Preservation of Grain Quality  2
TSM 322L  Preservation of Grain Quality Laboratory  1
TSM 324  Soil and Water Conservation Management  3
TSM 325  Biorenewable Systems  3
TSM 327  Animal Production Systems  3
TSM 330  Agricultural Machinery and Power Management  3
TSM 333  Precision Farming Systems  3
ENCON 230  Farm Business Management  3
13 credits of free electives 13

Total Credits 34

**Machine Systems option: 33 cr.**

TSM 216 Advanced Technical Graphics, Interpretation, and CAD 3
TSM 240 Introduction to Manufacturing Processes 3
TSM 330 Agricultural Machinery and Power Management 3
TSM 333 Precision Farming Systems 3
TSM 335 Tractor Power 4
TSM 337 Fluid Power Systems Technology 3
TSM 443 Statics and Strength of Materials for Technology 3
TSM 465 Automation Systems 3
9 credits of free electives 9

Total Credits 34

**Minor in agricultural systems technology**

The Department of Agricultural and Biosystems Engineering offers a minor in agricultural systems technology which may be earned by completing a minimum of 15 credits of technology systems management courses, which includes:

TSM 115 Solving Technology Problems 3
TSM 210 Fundamentals of Technology 3
9 credits from:
- TSM 310 Total Quality Improvement 3
- TSM 322 Preservation of Grain Quality 3
- TSM 322L Preservation of Grain Quality Laboratory 3
- TSM 324 Soil and Water Conservation Management 3
- TSM 325 Biorenewable Systems 3
- TSM 327 Animal Production Systems 3
- TSM 330 Agricultural Machinery and Power Management 3
- TSM 333 Precision Farming Systems 3
- TSM 335 Tractor Power 4
- TSM 337 Fluid Power Systems Technology 3
- TSM 363 Electric Power and Electronics for Agriculture and Industry 3
- TSM 393E Topics in Technology: Chemical Application Systems 3
- TSM 393F Topics in Technology: Agricultural Safety and Health 3
- At least six (6) credits of 300-level or higher TSM classes (from the classes listed above)
- At least nine (9) credits that are not used to meet any other department, college, or university requirement.

Total Credits 15

**Curriculum in Agronomy**

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. A minimum of 15 credits of agronomy courses must be earned at Iowa State and not transferred from other institutions.

**International Perspective: 3 cr.**

3 cr. [http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current](http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current)

**U.S. Diversity: 3 cr.**

3 cr. [http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses](http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses)

**Communication/Library: 13 cr.**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- LIB 160 Information Literacy 1
- SP CM 212 Fundamentals of Public Speaking 3
- or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3

One of the following:

- ENGL 302 Business Communication 3
- ENGL 309 Report and Proposal Writing 3
- ENGL 314 Technical Communication 3

**Humanities and Social Sciences: 6 cr.**

3 cr. from approved humanities list [http://www.agstudent.iastate.edu/agriculturestudentservices/humanities.html](http://www.agstudent.iastate.edu/agriculturestudentservices/humanities.html)

- ECON 101 Principles of Microeconomics 3

**Ethics: 3 cr.**

3 cr. from approved list [http://www.agstudent.iastate.edu/agriculturestudentservices/ethicslist.html](http://www.agstudent.iastate.edu/agriculturestudentservices/ethicslist.html)

**Mathematical Sciences: 6-7 cr.**

- STAT 104 Introduction to Statistics 3
- One of the following:
  - MATH 140 College Algebra 3
  - MATH 150 Discrete Mathematics for Business and Social Sciences 3
  - MATH 160 Survey of Calculus 4
  - MATH 165 Calculus I 4
  - MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 4

**Physical Sciences: 15-17 cr.**

- CHEM 163 & 163L College Chemistry and Laboratory in College Chemistry 5
- or CHEM 177 General Chemistry I & 177L and Laboratory in General Chemistry I 5
- GEOL 100 The Earth 3
- PHYS 111 General Physics 4.5
- or PHYS 115 Physics for the Life Sciences 4.5

One of the following:

- AGRON 259 Organic Compounds in Plant and Soils 3
- BBMB 221 Structure and Reactions in Biochemical Processes 3

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in critical thinking, problem solving, and communicating and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, regulatory agencies as plant, food, and grain inspectors, science-based professional positions, graduate study, or research careers. Additional areas of work open to agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a credentialed title of “Agronomy International Scholar” for agronomy majors who have distinguished themselves in global understanding and international experience. Contact the department for requirements.

Department of Agronomy website - [http://www.agron.iastate.edu/index.aspx](http://www.agron.iastate.edu/index.aspx)

4-year plan

**Undergraduate Study**

The Department of Agronomy offers a degree of Bachelor of Science (B.S.) degree in agronomy. The curriculum is designed to provide a strong foundation in crop science, soil science, agricultural meteorology, and plant breeding.

The curriculum provides both flexibility and direction for students by offering four options: agroecology, crop management and business, plant breeding and biotechnology, and soil and environmental quality. There are many opportunities for undergraduates to be involved in research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in critical thinking, problem solving, and communicating and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, regulatory agencies as plant, food, and grain inspectors, science-based professional positions, graduate study, or research careers. Additional areas of work open to agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a credentialed title of “Agronomy International Scholar” for agronomy majors who have distinguished themselves in global understanding and international experience. Contact the department for requirements.

Minor - Agronomy

The department offers a minor in Agronomy that may be earned by taking 18 credits in these agronomy courses: AGRON 114, AGRON 154, AGRON 212 & AGRON 354 and 6 credits from approved agronomy courses, with a minimum of 3 of the 6 credits from courses at the 300 level or higher. At least 9 credits must be taken at Iowa State University with 6 credits numbered 300 or above. At least 9 credits must be unique to the requirements for the minor and not used to fulfill specified requirements from the student’s major.

Courses Required For a Minor:
AGRON 114 Principles of Agronomy 3
AGRON 154 Fundamentals of Soil Science 3
AGRON 212 Crop Growth, Productivity and Management 3
AGRON 354 Soils and Plant Growth 3
Approved Elective Courses for Minor Credit (6 credits minimum, 3 credits at 300+ level)
CROP SCIENCE
AGRON 212L Field Application and Problem Solving in Crop Production 1
AGRON 217 Weed Identification 1
AGRON 330 Crop and Seed Identification Laboratory 2
AGRON 316 Crop Structure-Function Relationships 3
AGRON 321 Principles of Weed Science 3
AGRON 330 Genetics, Agriculture and Biotechnology 3
AGRON 334 Forage Crop Management 3
AGRON 338 Seed Science and Technology 3
AGRON 351 Turfgrass Establishment and Management 3
AGRON 421 Introduction to Plant Breeding 3
SOIL SCIENCE
AGRON 260 Soils and Environmental Quality 3
AGRON 354L Soils and Plant Growth Laboratory 1
AGRON 360 Environmental Soil Science 3
ENSCI 402 Watershed Hydrology 4
AGRON 452 GIS for Geoscientists 3
AGRON 459 Environmental Soil and Water Chemistry 4
AGRON 463 Soil Formation and Landscape Relationships 4
AGRON 477 Soil Physics 3
AGRON 485 Soil and Environmental Microbiology 3
AGRICULTURAL METEOROLOGY
AGRON 206 Introduction to Weather and Climate 3
AGRON 404 Global Change 3
AGRON 405 Environmental Biophysics 3
AGRON 406 World Climates 3
AGRON 407 Mesoscale Meteorology 3
GENERAL AGRONOMY COURSES
AGRON 342 World Food Issues: Past and Present 3

AGRON 392 Systems Analysis in Crop and Soil Management 3
AGRON 450 Issues in Sustainable Agriculture 3
AGRON 497 Agroecology Field Course 3

Students minorig in agronomy can take the following courses: AGRON 331, AGRON 370, AGRON 490, AGRON 491, and AGRON 496; but only one (1) credit from these courses can be used in the minor program.

"Substitution of AGRON 155 may be allowed for students in horticulture and AGRON 156 for students in landscape architecture.

Graduate Study

The department offers programs degrees that lead to master of science (M.S.) and doctor of philosophy (Ph.D.), with majors in agricultural meteorology; crop production and physiology with optional specialization in seed science or weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. A dissertation is required for the Ph.D., and a thesis is normally required for the M.S. An M.S. nonthesis option is available for students desiring a general degree program, with additional coursework and a written creative component substituting for thesis research.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

The department offers an M.S. in agronomy that is designed for students who are currently employed full-time. This program is taught at a distance using computer-based instructional media. The M.S. in agronomy is nonthesis only. The M.S. degree in plant breeding is offered both on-campus or at a distance.

The department cooperates in interdepartmental majors in bioinformatics and computational biology; ecology and evolutionary biology; environmental science; genetics; microbiology; molecular, cellular, and developmental biology; plant biology; and sustainable agriculture.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on agronomic, biological, and physical sciences.

Animal Ecology

Animal Ecology

The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Pre-veterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology major understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Four specific options prepare students for careers in interpretation of natural resources, fisheries and aquatic sciences, pre-veterinary and wildlife care, and wildlife. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university’s affiliate field stations: Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department’s Student Services Center.

Pre-veterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology.
Students preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Index, Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Index, Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies).

Curriculum in Animal Ecology

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

6 cr. of English composition

3 cr. of speech fundamentals

Communication/Library 16 cr.

Wildlife option

Three credits from the following:

- A ECL 321 Fish Biology
- A ECL 366 Natural History of Iowa Vertebrates
- A ECL 457 Herpetology
- A ECL 458 Ornithology
- A ECL 458L Ornithology Laboratory
- A ECL 459 Mammalogy
- A ECL 459L Mammalogy Laboratory

One of the following:

- B M S 415 Anatomy of Laboratory Animals
- B M S 416 Avian Anatomy
- BIOL 335 Principles of Human and Other Animal Physiology
- BIOL 351 Comparative Chordate Anatomy
- BIOL 352 Vertebrate Histology
- BIOL 434 Endocrinology

One of the following:

- AN S 331 Domestic Animal Reproduction
- BIOL 313 Principles of Genetics
- BIOL 423 Developmental Biology
- GEN 320 Genetics, Agriculture and Biotechnology
- NREM 315 Genetics for Natural Resource Managers.

One of the following:

- A ECL 401 Intro to Aquatic Animal Medicine
- A ECL 442 Aquaculture
- A ECL 454 Principles of Wildlife Disease
- AN S 319 Animal Nutrition
- AN S 493 Workshop in Animal Science
- BIOL 353 Introductory Parasitology
- MICRO 201 Introduction to Microbiology Laboratory
- MICRO 201L Introductory Microbiology Laboratory

3 or from course level 300-500 from A ECL or NREM

Plus additional credits from approved list to total 33 credit hours.

Total Credits 33

Wildlife Ecology

- A ECL 371 Ecological Methods
- A ECL 451 Wildlife Ecology and Management
- BIOL 313 Principles of Genetics
- or GEN 320 Genetics, Agriculture and Biotechnology
- or NREM 315 Genetics for Natural Resource Managers.
- BIOL 366 Plant Systematics

One of the following:

- MATH 160 Survey of Calculus
- MATH 165 Calculus I
- MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

Six hours from the following:

- A ECL 457 Herpetology
- A ECL 458 Ornithology
- A ECL 458L Ornithology Laboratory
- A ECL 459 Mammalogy
- A ECL 459L Mammalogy Laboratory

Six hours from the following:

- A ECL 455 International Wildlife Issues
- ENV S 293 Environmental Planning
- ENV S 383 Environmental Politics and Policies
- NREM 270 Foundations in Natural Resource Policy and History
- NREM 385 Natural Resource Policy
- NREM 452 Ecosystem Management
- NREM 460 Controversies in Natural Resource Management

Three hours from the following:

- A ECL 415 Ecology of Freshwater Invertebrates, Plants, and Algae
- A ECL 454 Principles of Wildlife Disease
- A ECL 456 Principles of Ecology
- A ECL 458L Laboratory in Animal Behavior

Five hours from the following:

- A ECL 415 Ecology of Freshwater Invertebrates, Plants, and Algae
- AGRON 317 Principles of Weed Science
- BIOL 355 Plants and People
- BIOL 454 Plant Anatomy
- BIOL 456 Principles of Mycology
- BIOL 474 Plant Ecology
- EEOB 564 Wetland Ecology
- FOR 356 Dendrology

Plus additional credits from approved list to total 42 credit hours.

Total Credits 38

Minor - Animal Ecology

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including:

- A ECL 312 Ecology
- A ECL 365 Vertebrate Biology
- NREM 120 Introduction to Renewable Resources

Plus four additional credits of Animal Ecology or NREM courses at the 300 level or above.

Animal Science

Undergraduate Study

The Department of Animal Science Undergraduate Program intends for its graduates to be able to explain the symbiotic relationship of animals and humans, to contribute to the solution of complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding field. Graduates of our program will be knowledgeable about sustainable animal production practices that also ensure animal health and well-being and stewardship of natural resources.

To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The overarching goals of the degree program are to provide a comprehensive animal science education in: science, animal management, and agribusiness. Faculty in our program strive to create an environment for students to develop effective communication skills, develop skills that enable students to gather and integrate information to solve problems, become self-learners, become leaders and team builders, and to become aware of domestic and global issues driving changes in the animal industries. Learner outcomes for these goals, for each of our courses, and other information defining the program can be found at our web site: http://www.ans.iastate.edu/stud/grad/. Our program is designed to provide career skills appropriate to job market needs. Our faculty goals include providing superior academic advising to enable students to fulfill their objectives.

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science. A double major in animal and dairy science is not permitted. However, combining either the animal science or dairy science majors with other curricula is permitted. A limit of 6 credits each in Intercollegiate Judging (Animal Science 475), or Undergraduate Teaching Experience (Animal Science 497), or any independent study course (490 courses) can be applied toward a degree.

Within the animal science major, specialized options in animal products, companion animal management, equine management, livestock management, pre-professional studies, and pre-veterinary medicine are available. The department offers a minor in Animal Science and a minor in Meat Science. Both the animal science curricula and dairy science curricula allow complementary work toward admission to veterinary medical school and other professional schools, which may be done while satisfying requirements for the bachelor of science degree. A program that combines bachelor of science and master of science
in animal science is offered. In addition, a program that combines a bachelor of science and master of business administration is offered. The Department facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

See Also: A 4-year plan of study grid showing course template by semester.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspectives

Approved International Perspectives course 3

Mathematical Sciences

Note: The Pre-Graduate/Pre-Professional Studies Option requires MATH 160, MATH 165, or MATH 181
One course from the following: 3-4

MATH 140 College Algebra
MATH 150 Discrete Mathematics for Business and Social Sciences
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
One course from the following: 3-4

STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics

STAT 226 Introduction to Business Statistics I

Total Credits 6-8

Physical Sciences

A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Biological Sciences

BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 313 Principles of Genetics 3
or GEN 320 Genetics, Agriculture and Biotechnology
MICRO 201 Introduction to Microbiology 3-4
& 201L and Introductory Microbiology Laboratory
or MICRO 302 Introduction to Microorganism Laboratory
& 302L and Microbiology Laboratory

Total Credits 14-15

Business

One course from the following: 3

Note: The Livestock Management Option requires ACCT 284
ACCT 284 Financial Accounting
ECON 101 Principles of Microeconomics
ECON 102 Principles of Macroeconomics

Total Credits 3

Animal Science Core (required in every option)

AN S 101 Working with Animals 2
AN S 110 Orientation in Animal Science and ISU 1
AN S 114 Survey of the Animal Industry 2
AN S 210 Career Preparation in Animal Science 1
AN S 211 Issues Facing Animal Science 1
AN S 214 Domestic Animal Physiology 3
AN S 214L Domestic Animal Anatomy and Physiology Lab 1
AN S 319 Animal Nutrition 3
AN S 320 Animal Feeds and Feeding 3
AN S 331 Domestic Animal Reproduction 3
AN S 352 Genetic Improvement of Domestic Animals 3

**Total Credits:** 6-16

**Additional free electives required for the Companion Animal Management Option**
Two courses from the following: 6
- AN S 216  Equine Science
- AN S 223  Poultry Science
- AN S 225  Swine Science
- AN S 226  Beef Cattle Science
- AN S 229  Sheep Science
- AN S 235  Dairy Cattle Science
- AN S 270  Foods of Animal Origin & 270L and Foods of Animal Origin Laboratory

One course from the following: 3-4
- AN S 313  Exercise Physiology of Animals
- AN S 336  Domestic Animal Behavior and Well-Being
- AN S 337  Lactation
- AN S 345  Growth and Development of Domestic Animals
- AN S 360  Fresh Meats
- BIOL 314  Principles of Molecular Cell Biology
- BIOL 352  Vertebrate Histology
- BIOL 353  Introductory Parasitology
- ENT 374  Insects and Our Health
- MICRO 310  Medical Microbiology

One course from the following: 2-3
- AN S 415  Equine Systems Management
- AN S 419  Advanced Animal Nutrition
- AN S 425  Swine Systems Management
- AN S 426  Beef Cattle Systems Management
- AN S 429  Dairy Systems Management
- AN S 460  Processed Meats
- FS HN 405  Food Quality Assurance
- FS HN 410  Food Analysis
- FS HN 420  Food Microbiology
- MICRO 407  Microbiological Safety of Foods of Animal Origins

Total Credits: 31-32

Additional free electives for the Companion Animal Management Option 17-22

Equine Management Option

AN S 216  Equine Science 3
AN S 415  Equine Systems Management 3
CHEM 163  General Chemistry I or CHEM 177L & 177L or CHEM 331  Organic Chemistry I or BBMB 221  Structure and Reactions in Biochemical Processes 5
AN S 116  Practicum in Safe Equine Handling and Welfare 2
AN S 217  Equine Farm Practicum 5
AN S 306  Equine Evaluation 3
AN S 313  Exercise Physiology of Animals
AN S 332  Exercise Physiology of Animals
AN S 335  Laboratory Methods in Animal Reproduction & 335L
AN S 399A  Animal Science Internship: Graded Internship Experience & 399A
AN S 475E  Intercollegiate Judging Training and Competition: Horses
AN S 490E  Independent Study: Equine Science
AN S 493  Workshop in Animal Science & 493

Four credits from: 4
- AGEDS 451  Agricultural Law
- AGRON 217  Weed Identification
- AGRON 317  Principles of Weed Science
- AGRON 334  Forage Crop Management
- AN S 116  Practicum in Safe Equine Handling and Welfare
- AN S 217  Equine Farm Practicum

AN S 306  Equine Evaluation
AN S 313  Exercise Physiology of Animals
AN S 332  Laboratory Methods in Animal Reproduction Section 2: Horses
AN S 399A  Animal Science Internship: Graded Internship Experience & 399A
AN S 475E  Intercollegiate Judging Training and Competition: Horses
AN S 490E  Independent Study: Equine Science
AN S 493  Workshop in Animal Science & 493

Total Credits: 31-32

Additional free electives required for the Equine Management Option 18-22

Undergraduate Minor

The department offers a minor in Animal Science. The minor requires:

AN S 101  Working with Animals 2
AN S 114  Survey of the Animal Industry 2
AN S 214  Domestic Animal Physiology 3
AN S 214L  Domestic Animal Anatomy and Physiology Lab 1

One course from the following: 3

AN S 216  Equine Science
AN S 223  Poultry Science
AN S 224  Companion Animal Science
AN S 225  Swine Science
AN S 226  Beef Cattle Science
AN S 229  Sheep Science
AN S 235  Dairy Cattle Science
AN S 270  Foods of Animal Origin & 270L and Foods of Animal Origin Laboratory

One course from the following: 3

AN S 313  Exercise Physiology of Animals
AN S 319  Animal Nutrition
AN S 331  Domestic Animal Reproduction
AN S 345  Growth and Development of Domestic Animals
AN S 352  Genetic Improvement of Domestic Animals

One course from the following: 2-3

AN S 319  Animal Nutrition
AN S 320  Animal Feeds and Feeding
AN S 324X  Food Processing for Companion Animals
AN S 331  Domestic Animal Reproduction
to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution and Organismal Biology and the Department of Genetics, Development and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, geography, psychology, sociology, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology. The major’s curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student’s career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

- Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.
- Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or large animal medicine, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.
- Pre-veterinary science—A major in Animal Science will not be allowed to count the 9 required credits (270, 270L, 360, 460) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science adviser.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal health sciences; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor work is offered in these areas to students majoring in one or more of these disciplines.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCD (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Biology

(Interdepartmental Undergraduate Program)

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and...
Students transfering into the Biology major take BIOL 112 in place of BIOL 110.

Students then explore concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of biological science at the 300 level, or above, from an approved list of courses. Of these, at least 9 credits must be taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program’s web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

**General requirements**

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements—Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of courses in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212.

**Minor**

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology and includes the completion of the specific courses listed below and 7 credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must apply only to the minor. For more information, see the Biology Program web site or contact the Student Services Office in 103 Bessey Hall.

**Graduate Study**

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master’s degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.
Curriculum in Biology

College of Liberal Arts and Sciences

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better)

Advanced Biology: 21 cr.

All graded courses minimum C-; 2.00 GPA average required. See the Biology Program web site for list of approved Advanced Biology courses, or consult an adviser in the Biology Student Services office, 103 Bessey Hall.

Two Advanced BIOL courses with lab or field components (from approved list)

| Biology advanced courses (from approved list) | 9 |
| **Additional approved biology advanced courses** | 12 |
| **Total Credits**         | 21 |

Community Development

Interinstitutional Graduate Program

http://www.gpidea.org/

Participating Institutions:

- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development deals with challenges faced by communities in the United States and other countries, particularly those in rural areas. Global economic restructuring and the devolution of government services have produced an environment in which Community Developers are called on to think and act in innovative ways.

Community Development is a progressive field, actively promoting positive social, economic, cultural and environmental change. It encourages people to see the "whole picture," engaging citizens in democratic decision making and action.

Community Development is an inter-institutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the six institutions: Iowa State University, Kansas State University,
University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an optional area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, and an email address are required for completing the program.

**Registration**

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

### Culinary Science (AGLS)

**Curriculum in Culinary Science**

Administered by the Department of Food Science and Human Nutrition

**Total Degree Requirement: 128 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications and Library: 10 cr.**

### Dairy Science

**Curriculum in Dairy Science**

Students majoring in Dairy Science will complete the degree requirements listed below. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

See Also: A 4-year plan of study grid showing course template by semester

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.
### International Perspectives
Approved International Perspectives course 3

### U.S. Diversity
Approved U.S. Diversity course 3

### Communications Proficiency
English composition 6
Speech fundamentals 3
Total Credits 9

### Communication/Library
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
One course from the following: 3
- AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
- COMST 214 Professional Communication
- SP CM 212 Fundamentals of Public Speaking
Total Credits 10

### Humanities and Social Sciences
Approved Humanities course 3
Approved Social Science course 3
Total Credits 6

### Ethics
Approved Ethics course 3

### Mathematics and Business
ECON 101 Principles of Microeconomics 3
One course from the following: 3-4
- STAT 101 Principles of Statistics
- STAT 104 Introduction to Statistics
- STAT 226 Introduction to Business Statistics I
One course from the following: 3-4
- MATH 140 College Algebra
- MATH 150 Discrete Mathematics for Business and Social Sciences
- MATH 160 Survey of Calculus
- MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
Total Credits 9-11

### Biological Sciences
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 313 Principles of Genetics 3
or GEN 320 Genetics, Agriculture and Biotechnology
or MICRO 201 Introduction to Microbiology 3-4
& 201L and Introductory Microbiology Laboratory
or MICRO 302 & 302L Biology of Microorganisms and Microbiology Laboratory
Total Credits 14-15

### Physical Sciences
A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

### Dairy Sciences Option
- AN S 101 Working with Animals 2
- AN S 110 Orientation in Animal Science and ISU 1
- AN S 114 Survey of the Animal Industry 2
- AN S 210 Career Preparation in Animal Science 1
- AN S 211 Issues Facing Animal Science 1
- AN S 214 Domestic Animal Physiology 3
- AN S 214L Domestic Animal Anatomy and Physiology Lab 1
- AN S 235 Dairy Cattle Science 3
- AN S 270 Foods of Animal Origin 3
& 270L and Foods of Animal Origin Laboratory
or FS HN 101 Food and the Consumer 1

### Pre-Veterinary Medicine Option
- AN S 101 Working with Animals 2
- AN S 110 Orientation in Animal Science and ISU 1
- AN S 114 Survey of the Animal Industry 2
- AN S 210 Career Preparation in Animal Science 1
- AN S 211 Issues Facing Animal Science 1
- AN S 214 Domestic Animal Physiology 3
- AN S 214L Domestic Animal Anatomy and Physiology Lab 1
- AN S 235 Dairy Cattle Science 3
- AN S 270 Foods of Animal Origin 3
& 270L and Foods of Animal Origin Laboratory
or FS HN 101 Food and the Consumer 1
AN S 319  Animal Nutrition 3
AN S 320  Animal Feeds and Feeding 3
AN S 331  Domestic Animal Reproduction 3
AN S 337  Lactation 3
AN S 352  Genetic Improvement of Domestic Animals 3
AN S 411  Addressing Issues in Animal Science 1
AN S 434  Dairy Systems Management 3
AN S 435  Applied Dairy Farm Evaluation 3
CHEM 177  General Chemistry I 4
CHEM 177L  Laboratory in General Chemistry I 1
CHEM 178  General Chemistry II 3
CHEM 331  Organic Chemistry I 3
CHEM 331L  Laboratory in Organic Chemistry I 1
CHEM 332  Organic Chemistry II 3
BBMB 301  Survey of Biochemistry 3
PHYS 111  General Physics 5

Four credits (minimum) from the following: 4
AGRON 334  Forage Crop Management
AN S 332  Laboratory Methods in Animal Reproduction
or AN S 333  Embryo Transfer and Related Technologies
AN S 336  Domestic Animal Behavior and Well-Being
AN S 345  Growth and Development of Domestic Animals
AN S 360  Fresh Meats
AN S 415  Equine Systems Management
AN S 419  Advanced Animal Nutrition
AN S 424  Companion Animal Systems Management
AN S 425  Swine Systems Management
AN S 426  Beef Cattle Systems Management
AN S 429  Sheep Systems Management
AN S 460  Processed Meats
ECON 332  Cooperatives
ECON 336  Agricultural Selling
FS HN 308  Dairy Products: Current Issues and Controversies
FS HN 403  Food Laws, Regulations, and the Regulatory Process
FS HN 405  Food Quality Assurance
FS HN 410  Food Analysis
MICRO 310  Medical Microbiology
MICRO 353  Introductory Parasitology
MICRO 374  Insects and Our Health
MICRO 402  Microbial Genetics and Genomics
MICRO 407  Microbiological Safety of Foods of Animal Origins
MICRO 419  Foodborne Hazards
MICRO 421  Food Microbiology Laboratory

Total Credits 66

Additional free electives for the Pre-Veterinary Medicine Option 11-14

* The Iowa State University College of Veterinary Medicine academic requirements are met by completion of this option (http://vetmed.iastate.edu/academics/prospective-students/admissions/academic-requirements).

**Diet and Exercise (AGLS)**

**Curriculum in Diet and Exercise B.S./M.S.**

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Health Fitness Instructor.

**Total Degree Requirements: 124 cr. for bachelor’s degree and 34-41 cr. for master’s degree**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications and Library: 10 cr.**

ENGL 150  Critical Thinking and Communication 3
ENGL 250  Written, Oral, Visual, and Electronic Communication 3
LIB 160  Information Literacy 1
SP CM 212  Fundamentals of Public Speaking 3

Total Credits 10

**Social Sciences: 6 cr.**

PSYCH 101  Introduction to Psychology 3
PSYCH 230  Developmental Psychology 3

Total Credits 6

**Mathematical Sciences: 6-8 cr.**

Select at least 3 credits from:

MATH 140  College Algebra 3
MATH 143  Preparation for Calculus 3
MATH 160  Survey of Calculus 3
MATH 165  Calculus I 3
MATH 181  Calculus and Mathematical Modeling for the Life Sciences I

Select at least 3 credits from:

STAT 101  Principles of Statistics 3
STAT 104  Introduction to Statistics 3
STAT 226  Introduction to Business Statistics I 3

Total Credits 6-8

**Physical Sciences: 13-17 cr.**

Select from:

CHEM 163 & 163L  College Chemistry and Laboratory in College Chemistry 5
CHEM 177 & 177L  General Chemistry I and Laboratory in General Chemistry I 4
CHEM 231  Elementary Organic Chemistry 3
CHEM 231L  Laboratory in Elementary Organic Chemistry 1
PHYS 115  Physics for the Life Sciences 4.5
PHYS 111  General Physics 1

Total Credits 13-17

**Biological Sciences: 19 cr.**

Select from:

BBMB 301  Survey of Biochemistry 3
BIOL 211  Principles of Biology I 3
BIOL 212  Principles of Biology II 3
BIOL 255  Fundamentals of Human Anatomy 3
BIOL 255L  Fundamentals of Human Anatomy Laboratory 3
BIOL 256  Fundamentals of Human Physiology 3
BIOL 256L  Fundamentals of Human Physiology Laboratory 3
MICRO 201  Introduction to Microbiology 2

Total Credits 19

**Diet and Exercise undergraduate courses to be completed or in progress when applying for admission to the program: 20-22 cr.**

Select from:

FS HN 110  Professional and Educational Preparation 3
Acceptance into the BS/MS PROGRAM is required BEFORE spring semester of the THIRD year.

Dietetics - Undergraduate Program (AGLS)

Curriculum in Dietsetics

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietsetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetic internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

English 150 Critical Thinking and Communication 3
English 250 Written, Oral, Visual, and Electronic Composition 3
Library 160 Information Literacy 1
SPCM 212 Fundamentals of Public Speaking 3

Total Credits: 10

Humanities and Social Sciences: 6-12 cr.

Select Humanities course from approved list 3
PSYC 101 Introduction to Psychology 3
If H Sci student, select: 6
Additional Humanities course
Additional Humanities or Social Science course

Ethics and Environmental: 3-6 cr.

If AgLS student, select from: 2-3
ENVS 120 Introduction to Renewable Resources
ENVS 201 Introduction to Environmental Issues

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from: 3-4
MATH 140 College Algebra
MATH 143 Preparation for Calculus
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

Select at least 3 credits from: 3-4
STAT 101 Principles of Statistics
Accredited dietetics internship. Students interested in becoming a registered dietitian may apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Admission to the dietetics program:

**Physical Sciences: 9-12 cr.**
Select from:
- CHEM 163 & 163L College Chemistry and Laboratory in College Chemistry 5-8
- CHEM 177 & 177L General Chemistry I and Laboratory in General Chemistry I 5-8
- CHEM 231 Elementary Organic Chemistry 3
- CHEM 231L Laboratory in Elementary Organic Chemistry 1

**Total Credits:** 9-12

**Biological Sciences: 20-21 cr.**
Select from:
- BBMB 301 Survey of Biochemistry 3
- BIOL 211 Principles of Biology I 3
- BIOL 212 Principles of Biology II 3
- BIOL 212L Principles of Biology Laboratory II 1
- BIOL 255 Fundamentals of Human Anatomy 3
- BIOL 255L Fundamentals of Human Anatomy Laboratory 1
- BIOL 256 Fundamentals of Human Physiology and Fundamentals of Human Physiology Laboratory 3-4
- BIOL 306 Metabolic Physiology of Mammals 3
- BIOL 335 Principles of Human and Other Animal Physiology 3
- MICRO 201 Introduction to Microbiology 2
- MICRO 201L Introductory Microbiology Laboratory 1

**Total Credits:** 20-21

**Food Science and Human Nutrition: 40-41 cr.**
- FS HN 110 Professional and Educational Preparation 1
- FS HN 167 Introduction to Human Nutrition 1
- FS HN 203 Contemporary Issues in Food Science and Human Nutrition 1
- FS HN 214 Scientific Study of Food 3
- FS HN 215 Advanced Food Preparation Laboratory 2
- FS HN 115 Food Preparation Laboratory 2
- FS HN 265 Nutrition for Active and Healthy Lifestyles 3
- FS HN 340 Foundations of Dietetic Practice 1
- FS HN 360 Advanced Human Nutrition and Metabolism 3
- FS HN 361 Nutrition and Health Assessment 2
- FS HN 362 Nutrition in Growth and Development 3
- FS HN 367 Medical Terminology for Health Professionals 1
- FS HN 403 Food Laws, Regulations, and the Regulatory Process 2
- FS HN 411 Food Ingredient Interactions and Formulations 2
- FS HN 461 Medical Nutrition and Disease I 4
- FS HN 463 Community Nutrition 3
- FS HN 464 Medical Nutrition and Disease II 3
- FS HN 466 Nutrition Counseling and Education Methods 3
- FS HN 480 Professional Communication in Food Science and Human Nutrition 1

**Total Credits:** 41

**Management: 11 cr.**

**Total Credits:** 0

**Electives: 0-13 cr. Select from any university coursework to earn at least 120 total credits.**

Go to FS HN Courses.

### Entomology

#### Undergraduate Study

An undergraduate degree in Insect Science will no longer be offered.

#### Minor - Insect Science

The department offers a minor in Insect Science that may be earned by completing ENT 370 Insect Biology and 12 credits in courses selected from an approved list supplied by the department.

#### Minor - Emerging Global Diseases

Entomology administers the Emerging Global Diseases minor (see http://www.ent.iastate.edu/egd). Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and socioeconomics. One course must be taken from each of three core areas:

- **Pathogens and Disease**
  - MICRO 310 Medical Microbiology
  - MICRO 353 Introductory Parasitology

- **Sociology and Economics**
  - SOC 411 Social Change in Developing Countries
  - SOC 345 Population and Society
  - FS HN 342 World Food Issues: Past and Present

- **Arthropod-borne Diseases**
  - EN 374 Insects and Our Health
  - EN 574 Medical Entomology
  - MICRO 353 Introductory Parasitology

The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

### Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellar levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 590 Special Topics (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of ENT 600 Seminar. At least one 590 must be taken from each of three subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, H, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 590K Special Topics: Teaching Experience. Both semesters or ENT 590K Special Topics: Teaching Experience. Both semesters or ENT 590K Special Topics: Teaching Experience.
Experience. One semester and ENT 590L Special Topics: Extension Internship, the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (500 level and above) for a total of 9 credits to be determined by the student’s POS committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:

- ENT 555 Insect Physiology 4
- ENT 590G Special Topics: Molecular Entomology 1-3
- Plus one other course of 590 selected from topics A-D, F, H, I, M, N
- Plus one additional course in molecular entomology
- ENT 600 Seminar 1
- BBMB 404 Biochemistry I 3
- BBMB 542A Introduction to Molecular Biology Techniques: DNA Techniques 1

And one course from the following:

- ENT 576 Systematic Entomology
- ENT 525 Aquatic Insects
- ENT 568 Advanced Systematics

Any student receiving the Ph.D. in entomology with an emphasis in molecular entomology is required to take:

- ENT 555 Insect Physiology 4
- ENT 590G Special Topics: Molecular Entomology 1-3
- Plus three other courses of 590 selected from topics A-D, F, H, I, M, N 9
- One additional course in molecular entomology 3
- ENT 600 Seminar 1
- BBMB 542A Introduction to Molecular Biology Techniques: DNA Techniques 1
- Plus two other workshops selected from:
  - BBMB 542C Introduction to Molecular Biology Techniques: Cell Techniques
  - BBMB 542D Introduction to Molecular Biology Techniques: Plant Transformation
  - BBMB 542E Introduction to Molecular Biology Techniques: Proteomics
- An additional course with a molecular component 3
- Plus one from each of the following:
  - Systematics 3
    - ENT 576 Systematic Entomology
    - ENT 525 Aquatic Insects
    - ENT 568 Advanced Systematics
  - Biochemistry 3
    - BBMB 404 Biochemistry I
    - BBMB 405 Biochemistry II
    - BBMB 504 Amino Acids and Proteins
    - BBMB 505 Bioenergetics and Metabolism

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; Microbiology; and molecular, cellular and developmental biology; and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit and the North Central Plant Introduction Station are available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate students can be viewed on the department’s website at www.ent.iastate.edu. Curriculum assessment for the department can be viewed here: http://www.ent.iastate.edu/assessment.

Environmental Science

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.
2. 30 credits of course work in the major, including a required core of 15 credits.
3. A combined average grade of C or higher is required in courses applied in the major.

Environmental Science offers an interdisciplinary graduate program leading to
the M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from
the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and
Sciences cooperate to offer courses and research opportunities covering a broad
array of environmental topics.

The Environmental Science graduate program emphasizes fundamental concepts
and research, which at the same time address major environmental issues.
The curriculum is designed to provide the interdisciplinary approach needed in
Environmental Science education and research. In addition to work in their chosen
area of specialization, students are afforded a broad exposure to the biological,
chemical and physical aspects of environmental systems and the specialized
training necessary for integrated analysis of these systems.

Environmental Studies

Interdepartmental Undergraduate Program

Environmental Studies deals with the relationship and interactions between
humans and the environment. Students in any college at ISU may elect to take a
secondary major or minor in Environmental Studies. The curriculum is designed
to give students an understanding of current and emerging environmental issues
and an appreciation of different perspectives regarding these issues. Courses are
provided for students pursuing careers related to the environment and for others
who simply want to know more about environmental issues.

Secondary Major

The Environmental Studies secondary major is taken in addition to a first major
and provides the breadth of preparation and integrated perspective necessary
to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of ENV S coursework including:

At least one general survey course chosen from:
- ENV S 101 Environmental Geology: Earth in Crisis
- ENV S 120 Introduction to Renewable Resources
- ENV S 173 Environmental Biology
- ENV S 201 Introduction to Environmental Issues

At least one integrative/issues course chosen from:
- ENV S 160 Water Resources of the World
- ENV S 204 Biodiversity
- ENV S 324 Energy and the Environment
- ENV S 342 World Food Issues: Past and Present
- ENV S 404 Global Change
- ENV S 424 Sustainable and Environmental Horticulture Systems
- ENV S 450 Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:
- ENV S 293 Environmental Planning
- ENV S 320 Ecofeminism
- ENV S 334 Environmental Ethics
- ENV S 345 Population and Society
- ENV S 355 Literature and the Environment
- ENV S 380 Environmental and Resource Economics
- ENV S 382 Environmental Sociology
- ENV S 383 Environmental Politics and Policies
- ENV S 384 Religion and Ecology
- ENV S 442 The Policy and Politics of Coastal Areas
- ENV S 472 U. S. Environmental History
- ENV S 484 Sustainable Communities
- ENV S 491 Environmental Law and Planning

Beyond these three requirements, any Environmental Studies course and up
to six credits of approved environmental coursework outside of Environmental Studies may be applied toward the 24 credit total for the major. Regardless of their
home college, Environmental Studies majors must complete at least 9 credits of
approved coursework in natural science. Unless prohibited by program or college
rules, courses used to fulfill requirements of the Environmental Studies major may
also be used to satisfy general education and other requirements of departments
and colleges. A combined average grade of C or higher is required in courses
applied to the major.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of
approved Environmental Studies coursework including:

At least one general survey course chosen from:
- ENV S 101 Environmental Geology: Earth in Crisis
- ENV S 120 Introduction to Renewable Resources
- ENV S 173 Environmental Biology
- ENV S 201 Introduction to Environmental Issues

At least one integrative/issues course chosen from:
- ENV S 160 Water Resources of the World
- ENV S 204 Biodiversity
- ENV S 324 Energy and the Environment
- ENV S 342 World Food Issues: Past and Present
- ENV S 404 Global Change
- ENV S 424 Sustainable and Environmental Horticulture Systems
- ENV S 450 Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:
- ENV S 293 Environmental Planning
- ENV S 320 Ecofeminism
- ENV S 334 Environmental Ethics
Food Science (AGLS)

Curriculum in Food Science

Administered by the Department of Food Science and Human Nutrition

Students select one of the following options and complete all requirements for that option: food science and technology option or food science and industry option. Courses listed below are required for all of the options, except where specified by option below.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications and Library: 10 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
SP CM 212 Fundamentals of Public Speaking 3

Total Credits 10

Humanities and Social Sciences: 6-12 cr.
Select Humanities course from approved list 3
ECON 101 Principles of Microeconomics 3
If H Sci student, select: 6
Additional Humanities course
Additional Humanities or Social Science course

Ethics and Environmental: 3-6 cr.
If AgLS student, select from: 2-3
ENV S 120 Introduction to Renewable Resources
ENV S 201 Introduction to Environmental Issues

Mathematical Sciences: 7-12 cr.
Food science and technology option:
Select from: 8
MATH 165 Calculus I
MATH 166 Calculus II
or
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
MATH 182 Calculus and Mathematical Modeling for the Life Sciences II
Select at least 3 credits from: 3-4
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics
STAT 105 Introduction to Statistics for Engineers

Total Credits 11-12

Food science and industry option:
Select at least 4 credits from:
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
Select at least 3 credits from:
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics
STAT 105 Introduction to Statistics for Engineers

Total Credits 7-8

Physical Sciences: 13-25 cr.

Food science and technology option:

CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
PHYS 111 General Physics 5
PHYS 112 General Physics 5

Total Credits 25

Food science and industry option:
Select from: 5-8
CHEM 163 College Chemistry
& 163L and Laboratory in College Chemistry
CHEM 177 General Chemistry I & 177L and Laboratory in General Chemistry I
& CHEM 178 General Chemistry II
CHEM 231 Elementary Organic Chemistry 3
CHEM 231L Laboratory in Elementary Organic Chemistry 1
PHYS 115 Physics for the Life Sciences 4-5
or PHYS 111 General Physics

Total Credits 13-17

Biological Sciences: 12-13 cr.

Food science and technology option:

BBMB 301 Survey of Biochemistry 3
BIOL 211 Principles of Biology I 3
BIOL 212 Principles of Biology II 3
MICRO 302 Biology of Microorganisms 3
MICRO 302L Microbiology Laboratory 1

Total Credits 13

Food science and industry option:

BBMB 301 Survey of Biochemistry 3
BIOL 211 Principles of Biology I 3
BIOL 212 Principles of Biology II 3
MICRO 201 Introduction to Microbiology 2-3
or MICRO 302 Microbiology of Microorganisms
MICRO 201L Introductory Microbiology Laboratory 1
or MICRO 302L Microbiology Laboratory

Total Credits 12-13

Food Science and Human Nutrition: 44 cr.

FS HN 101 Food and the Consumer 3
FS HN 110 Professional and Educational Preparation 1
FS HN 167 Introduction to Human Nutrition 3
FS HN 203 Contemporary Issues in Food Science and Human Nutrition 1
FS HN 311 Food Chemistry 3
FS HN 311L Food Chemistry Laboratory 1
FS HN 351 Introduction to Food Engineering Concepts 3

Total Credits 44
Graduates of the forest ecosystem management option are skilled at interpretations, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

Elective courses in the interpretation of natural resources option can be selected to help students understand the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus field camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

- FOR 302 Silviculture 3
- FOR 356 Dendrology 4
- FOR 451 Forest Resource Economics and Quantitative Methods 4
- FOR 452 Ecosystem Management 3

For more information, please refer to the department's integrated forestry modules consisting of:

- FOR 201 Forest Biology 2
- FOR 202 Wood Utilization 2
- FOR 203 Resource Measurements/Evaluation 2
- FOR 204 Forest Ecosystem Decision-Making 2
- FOR 205 Integrated Forestry Laboratory 3
- FOR 206 Fall Forestry Camp 4

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

- FOR 302 Silviculture 3
- FOR 356 Dendrology 4
- FOR 451 Forest Resource Economics and Quantitative Methods 4
- FOR 452 Ecosystem Management 3
A grade of C– or better is required in all Genetics and Life Science courses.

A maximum of 65 cr. from a two-year institution can be applied that may include

Total Degree Requirement: 120 cr.

Curriculum in Genetics - Requirements

A grade of C– or better is required in all Genetics and Life Science courses.

Genetics

Alan M. Myers, Chair, Genetics Major Committee

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements. (See Preprofessional Study.)

Curriculum in Genetics - Requirements

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation.

1. Genetics and Life Sciences

A grade of C– or better is required in all Genetics and Life Science courses.

Graduate Study

Graduate study in genetics leading to the Master of Science and Doctor of Philosophy degrees is offered at ISU. Graduate study is organized as a separate interdepartmental graduate major from the undergraduate program. For more information on graduate study in genetics see: Genetics - Interdisciplinary.

Global Resource Systems

Global Resource Systems is an interdisciplinary, College of Agriculture and Life Sciences major that prepares students to make a difference in the world. The major emphasizes global engagement while equipping students with a strong technical competency in a resource area of their choice. The interdisciplinary program prepares students to work with complex global resource issues through leadership positions in global businesses, governmental agencies engaged in international trade and development, non-governmental organizations and globally engaged foundations, educational institutions, and volunteer organizations. It produces systemic thinkers and problem solvers with a global perspective who are trained in resource issues and able to function effectively in teams representing high levels of cultural diversity. Students interested in this major are encouraged to contact the Faculty Coordinator at globe@iastate.edu.

Undergraduate Study

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global resource issues. Students develop a core set of technical competencies in a resource area selected from among the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural immersion experience. They carry out a senior project related to their resource specialization within the context of the world region.

Multidisciplinary themes are developed in the context of the physical, biological and sociological factors affecting global resource systems. In this context, resource systems include agricultural (including crops, livestock and aquaculture), food, fuel, natural, environmental, biological, financial, governmental, institutional, human, knowledge, and other resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team. They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing a minor or certificate program in the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 credits of GLOBE 211

GLOBE 211 Issues in Global Resource Systems (Each offering is 1 cr., must be repeated for 3 cr.)

GLOBE 110 Orientation 1

3 credits of GLOBE 211 3

GLOBE 201 Global Resource Systems 3

GLOBE 301 Resource Systems of Industrialized Nations 3

GLOBE 302 Resource Systems of Developing Nations 3

GLOBE 320 Global Resource Systems Internship Preparation 1

GLOBE 401 Senior Project 3

GLOBE 321 Internship - Global 3-6

GLOBE 322 Internship - United States 3-6

Total Credits 23-26

Technical Concentration: 15-18 cr.

Satisfied by any of the College of Agriculture and Life Sciences minors or a certificate offered in the College of Agriculture and Life Sciences.

Electives:

Sufficient coursework to ensure a total of not less than 129 credits

Horticulture

Undergraduate Study

To meet the educational needs of a student population with interests ranging from the biology of plants to landscape design/installation to fruit and vegetable production to golf course construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses.

The Department of Horticulture offers six options within the horticulture major:

1. Greenhouse Plant Production
2. Horticultural Food Crop Production and Management
3. Landscape Design, Installation, and Management
4. Public Horticulture
5. Science
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management principles for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication.

Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Options.

A horticulture minor is available. The requirements appear under Horticulture, Courses and Programs.

Total Degree Requirement: 129 credits (cr.)

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA

International Perspective: 3 cr.

3 cr. from approved list 3

Total Credits 3

U.S. Diversity: 3 cr.

3 cr. from approved list 3

Total Credits 3

Communications Proficiency (with a grade of C or better)

6 credits of English composition (see approved courses below) 6

6 credits of speech fundamentals (see approved courses below) 6

Communication/Library: 13 cr.
ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
ENGL 302  Business Communication  3
or ENGL 314  Technical Communication
LIB 160  Information Literacy  1

Approved Humanities course  3
Approved Social Science course  3

Total Credits  6

Ethics:  3 cr.

3 cr. from approved list  3

Total Credits  3

Life Sciences:  6 cr.

BIOL 211  Principles of Biology I  3
Approved Life Sciences course  3

Total Credits  6

Mathematical Sciences:  6 cr.

Select one course from the following:  3

- MATH 140  College Algebra
- MATH 150  Discrete Mathematics for Business and Social Sciences
- MATH 165  Calculus I
- MATH 181  Calculus and Mathematical Modeling for the Life Sciences I

AND select one of the following:  3

- STAT 101  Principles of Statistics
- STAT 104  Introduction to Statistics
- STAT 226  Introduction to Business Statistics I
- STAT 401  Statistical Methods for Research Workers

Total Credits  6

Physical Sciences: Minimum of 11 cr.

Complete one of the following:  5

- CHEM 163  College Chemistry and Laboratory in College Chemistry
  & 163L or CHEM 177  General Chemistry I and Laboratory in General Chemistry I

AND complete one course from the following:  3-4

- BBMB 221  Structure and Reactions in Biochemical Processes
- CHEM 231  Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry
  & 231L or CHEM 331  Organic Chemistry I and Laboratory in Organic Chemistry I

AND complete one course from the following:  3-5

- AGRON 259  Organic Compounds in Plant and Soils (AND complete one course from the following)
- BBMB 221  Structure and Reactions in Biochemical Processes
- CHEM 178  General Chemistry II and Laboratory in College Chemistry II
  & 178L or CHEM 231  Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry
  & 231L or CHEM 331  Organic Chemistry I and Laboratory in Organic Chemistry I
- PHYS 101  Physics for the Nonscientist
- PHYS 111  General Physics
- PHYS 115  Physics for the Life Sciences

Total Credits  11-14

Biological Sciences:  18 cr.

- BIOL 211  Principles of Biology I  3
- BIOL 211L  Principles of Biology Laboratory I  1

Select 14 credit hours from the following:  14

- AGRON 260  Soils and Environmental Quality
- AGRON 316  Crop Structure-Function Relationships
- AGRON 317  Principles of Weed Science
- AGRON 354  Soils and Plant Growth
- AGRON 354L  Soils and Plant Growth Laboratory
- BIOL 312  Ecology
- BIOL 313 & 313L  Principles of Genetics and Genetics Laboratory
- BIOL 314  Principles of Molecular Cell Biology
- BIOL 330  Principles of Plant Physiology
- BIOL 355  Plants and People
- BIOL 366  Plant Systematics
- BIOL 454  Plant Anatomy
- BIOL 474  Plant Ecology
- ENT 201  Introduction to Insects
- ENT 211  Insects and Society
- ENT 370  Insect Biology
- ENT 375  Plant Protection Using Natural Enemies
- ENT 376  Fundamentals of Entomology and Pest Management
- FOR 475  Urban Forestry
- PL P 391  Practical Plant Health
- PL P 408  Principles of Plant Pathology

Total Credits  18

Horticultural Sciences: Minimum of 30 cr.

- HORT 110  Professional and Educational Development in Horticulture  1
- HORT 221  Principles of Horticulture Science  3
- HORT 321  Horticulture Physiology  3
- HORT 445  Horticulture Management and Administration  2

Select 21 cr. hours from courses within selected option.  21

Total Credits  Minimum of 30

Soil Sciences:  3 cr.

- AGRON 154  Fundamentals of Soil Science  3
  or AGRON 155  Soils for Horticultural Scientists

Total Credits  3

Electives

No more than 4 cr. of Hort 490 may count toward graduation.

Options

Greenhouse Plant Production

The following core courses must be taken to meet Horticulture requirements:

- HORT 240  Trees, Shrubs, and Woody Vines for Landscaping  3
- HORT 322  Plant Propagation  3
- HORT 330  Herbaceous Ornamental Plants  3
- HORT 331X  Hydroponic Food Crop Production  3
- HORT 332  Greenhouse Operation and Management  4
- HORT 434  Fall Greenhouse Crop Production  3
- HORT 435  Spring Greenhouse Crop Production  3

Other recommended courses are:

- HORT 424  Sustainable and Environmental Horticulture Systems
- HORT 442  Nursery Production and Garden Center Management

Required for option:

- ACCT 284  Financial Accounting  3

And select 9 cr. hours from the following:  9
Horticultural Food Crop Production and Management

The following courses are required to meet the Horticulture requirement:

- ACCT 284 Managerial Accounting
- ACCT 215 Legal Environment of Business
- Ag 206 Introduction to Weather and Climate
- COM 103 Computer Applications
- ECON 101 Principles of Microeconomics
- ECON 102 Principles of Macroeconomics
- ECON 230 Farm Business Management
- ECON 234 Small Business Management
- ECON 334 Entrepreneurship in Agriculture
- ENV S 461 Introduction to GIS
- MGMT 310 Entrepreneurship and Innovation
- MGMT 313 Feasibility Analysis and Business Planning
- MGMT 370 Management of Organizations
- MGMT 371 Organizational Behavior
- MKT 442 Sales Management
- MKT 446 Retailing
- MKT 447 Consumer Behavior
- TSM 270 Principles of Injury Prevention

Required for option:

- HORT 461 Fruit Crop Production and Management 3
- HORT 471 Vegetable Production and Management 2
- HORT 471L Vegetable Production and Management Lab 1

And select 9 cr. hours from the following:

- ACCT 284 Financial Accounting
- ACCT 215 Legal Environment of Business
- ACCT 285 Managerial Accounting
- ACCT 316 Business Law
- Agr 260 Soils and Environmental Quality
- Com S 103 Computer Applications
- Econ 101 Principles of Microeconomics
- Econ 102 Principles of Macroeconomics
- Econ 230 Farm Business Management
- Econ 234 Small Business Management
- Econ 334 Entrepreneurship in Agriculture
- Env S 293 Environmental Planning
- Env S 324 Energy and the Environment
- Env S 382 Environmental Sociology
- Env S 491 Environmental Law and Planning
- Fs Hn 403 Food Laws, Regulations, and the Regulatory Process
- Fs Hn 405 Food Quality Assurance
- Fs Hn 471 Food Processing I
- Fs Hn 472 Food Processing II
- Mgmt 310 Entrepreneurship and Innovation
- Mgmt 313 Feasibility Analysis and Business Planning
- Mgmt 370 Management of Organizations
- Mgmt 371 Organizational Behavior
- Mk 442 Sales Management
- Mk 446 Retailing
- Mk 447 Consumer Behavior
- Tsm 270 Principles of Injury Prevention

Landscape Design, Installation and Management

The following courses are required to meet the Horticulture requirement:

- HORT 240 Trees, Shrubs, and Woody Vines for Landscaping 3
- HORT 281 Landscape Graphics
- HORT 330 Herbaceous Ornamental Plants 3
- HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs 2
- HORT 342 Landscape Plant Installation, Establishment, and Maintenance 3
- HORT 351 Turfgrass Establishment and Management 3
- HORT 380 Principles of Garden Composition 2
- HORT 381 Beginning Garden Composition Studio 2
- HORT 444 Landscape Construction Management 3
- HORT 481 Advanced Garden Composition 2

Other recommended courses:

- HORT 322 Plant Propagation
- HORT 332 Greenhouse Operation and Management
- HORT 442 Nursery Production and Garden Center Management

Public Horticulture

The following courses are required to meet the Horticulture requirement:

- HORT 240 Trees, Shrubs, and Woody Vines for Landscaping 3
- HORT 282 Educating Youth Through Horticulture 3
- HORT 283 Pesticide Application Certification 2
- HORT 322 Plant Propagation 3
- HORT 330 Herbaceous Ornamental Plants 3

Other recommended courses:

- HORT 281 Landscape Graphics
- HORT 332 Greenhouse Operation and Management
- HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs
- HORT 342 Landscape Plant Installation, Establishment, and Maintenance
- HORT 351 Turfgrass Establishment and Management
- HORT 351L Turfgrass Establishment and Management Laboratory
- HORT 380 Principles of Garden Composition
- HORT 381 Beginning Garden Composition Studio

And select 12 cr. hours from the following:

- ACCT 215 Legal Environment of Business
- ACCT 284 Financial Accounting
- ACCT 285 Managerial Accounting

**Minors**

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. Both minors are earned by taking HORT 221 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above.

The Horticulture minor is a broad-based minor that does not focus within a specific area of horticulture. The 12 additional credits for this minor can be selected from the full list of Horticulture courses.

The Landscape Management minor focuses on landscape management including plant selection, landscape installation and management, and turfgrass management. The 12 additional credits for this minor can be selected from the following courses: HORT 240 Trees, Shrubs, and Woody Vines for Landscaping, HORT 281 Landscape Graphics, HORT 330 Herbaceous Ornamental Plants, HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs, HORT 342 Landscape Plant Installation, Establishment, and Maintenance, HORT 351 Turfgrass Establishment and Management or HORT 444 Landscape Construction Management.

Visit our departmental website at www.hort.iastate.edu.
Graduate Study

The graduate major in horticulture leads to the M.S. (thesis and non-thesis option) and Ph.D. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics and genomics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Industrial Technology

Curriculum in Industrial Technology

Administered by the Department of Agricultural and Biosystems Engineering. An undergraduate certificate in occupational safety is available; the requirements appear under Technology Systems Management courses and programs. A minor in Industrial Technology is available; the requirements appear under Technology Systems Management courses and programs.

Students majoring in Industrial Technology choose between two options: Manufacturing or Occupational Safety.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

- At least six (6) credits of 300-level or higher TSM classes (from the courses listed above)
- At least nine (9) credits that are not used to meet any other department, college, or university requirement.

Total Credits: 15

For the undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science or for the undergraduate curriculum in industrial technology leading to the degree of bachelor of science.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering.

### International Agriculture

#### Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution, and utilization worldwide.

The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national, and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program: governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

### Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

### Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences.

Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor cannot be used for meeting requirements for the major.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

### Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.

### Microbiology

#### Interdepartmental Undergraduate Major

Undergraduate study for the bachelor of science degree with a major in microbiology. In the Microbiology curriculum, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture, and industry, and the study of fundamental life processes as exemplified by microorganisms. Areas of emphasis include: medical microbiology; environmental and industrial microbiology; and food microbiology.

Graduates of the Interdepartmental Undergraduate Microbiology Program will learn about the diversity and complexity of microbial life represented by procaryotes, eucaryotes, and viruses in addition to being able to explain fundamental principles of microbial growth, physiology, genetics, biochemistry, and ecology, students will be able to evaluate the impact that the microbial world has on human, animal and plant health, as well as on environmental quality, industry, and biotechnology. Graduates are able to design and implement experimental approaches to address specific questions. In addition, graduates are able to communicate scientifically, using a variety of media.

Students graduating in microbiology find career opportunities in a wide variety of areas including: hospital and clinical laboratories; federal, state, and local government agencies; research and development; dairy and food processing industries; and the pharmaceutical and fermentation industries. Some fields of microbiology, especially advanced research, may require further training.

Undergraduate work in the program is designed to provide sound preparation for graduate study, training for bachelors-level employment, and admission to professional programs such as medicine, veterinary medicine, and dentistry.

Pre-veterinary preparation may be accomplished through the curriculum major in this program (see College of Veterinary Medicine, Admission Requirements).

### Curriculum in Microbiology

www.micro.iastate.edu

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

---

**Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences.** Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.
International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Electives: 7-12

**Communications Proficiency:**
- English composition - with a C or better: 6 cr.
- Speech fundamentals - with a C or better: 3 cr.

**Communication/Library:**
- ENGL 150 Critical Thinking and Communication: 3 cr.
- ENGL 250 Written, Oral, Visual, and Electronic Composition: 3 cr.
- SP CM 212 Fundamentals of Public Speaking: 3 cr.
- One course from the following: 3 cr.
  - ENGL 302 Business Communication
  - ENGL 309 Report and Proposal Writing
  - ENGL 312 Biological Communication
  - ENGL 314 Technical Communication
- LIB 160 Information Literacy: 1 cr.

Total Credits: 13

**Humanities and Social Sciences:**
- Approved Humanities list: 3 cr.
- Approved Social Science list: 3 cr.

**Ethics: 3 cr.**
- 3 cr. from approved list.

**Mathematical Sciences:**
- One of the following: 7-8 cr.
  - MATH 145 Applied Trigonometry and Survey of Calculus
  - MATH 165 Calculus I and Calculus II
  - MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
  - MATH 182 Calculus and Mathematical Modeling for the Life Sciences II
- One of the following: 3-4 cr.
  - STAT 101 Principles of Statistics
  - STAT 104 Introduction to Statistics

Total Credits: 10-12

**Physical Sciences:**
- CHEM 177 General Chemistry I: 4 cr.
- CHEM 177L Laboratory in General Chemistry I: 1 cr.
- CHEM 178 General Chemistry II: 3 cr.
- PHYS 111 General Physics: 5 cr.
- PHYS 112 General Physics: 5 cr.
- CHEM 331 Organic Chemistry I: 3 cr.
- CHEM 331L Laboratory in Organic Chemistry I: 1 cr.
- CHEM 332 Organic Chemistry II: 3 cr.
- One of the following: 3-6 cr.
  - BBMB 404 Biochemistry I
  - BBMB 405 and Biochemistry II
  - or BBMB 301 Survey of Biochemistry

Total Credits: 28-31

**Biological Sciences:**
- BIOL 211 Principles of Biology I: 3 cr.
- BIOL 211L Principles of Biology Laboratory I: 1 cr.
- BIOL 212 Principles of Biology II: 3 cr.
- BIOL 212L Principles of Biology Laboratory II: 1 cr.
- BIOL 313 Principles of Genetics: 3 cr.
- BIOL 313L Genetics Laboratory: 1 cr.
- BIOL 314 Principles of Molecular Cell Biology: 3 cr.

Total Credits: 15

---

**Microbiology:**

**Core courses:**
- MICRO 110 Professional and Educational Preparation in Microbiology: 1 cr.
- MICRO 302 Biology of Microorganisms: 3 cr.
- MICRO 302L Microbiology Laboratory: 1 cr.
- MICRO 310 Medical Microbiology: 3 cr.
- MICRO 310L Medical Microbiology Laboratory: 1 cr.
- MICRO 320 Molecular and Cellular Bacteriology: 4 cr.
- MICRO 440 Laboratory in Microbial Physiology, Diversity, and Genetics: 4 cr.
- MICRO 450 Undergraduate Capstone Colloquium: 2 cr.
- MICRO 451 Senior Survey in Microbiology: R cr.

One of the following:
- MICRO 430 Procaroytic Diversity and Ecology
- MICRO 456 Principles of Mycology
- MICRO 477 Bacterial-Plant Interactions

Nine credit hours from the following:
- MICRO 374 Insects and Our Health
- MICRO 402 Microbial Genetics and Genomics
- MICRO 407 MicrobialEcological and Environmental Microbiology
- MICRO 408 Virology
- MICRO 419 Foodborne Hazards
- MICRO 420 Food Microbiology
- MICRO 421 Food Microbiology Laboratory
- MICRO 456 Principles of Mycology
- MICRO 475 Immunology
- MICRO 475L Immunology Laboratory
- MICRO 485 Soil and Environmental Microbiology
- MICRO 487 MicrobialEcology
- MICRO 490 Independent Study

Microbiology elective - only 3 cr. lab courses allowed

Total Credits: 31

**Minor**

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

---

**Graduate Study**

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micrograd.iastate.edu.

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

**Nutritional Science Undergraduate Program (AGLS)**
**Curriculum in Nutritional Science**

Administered by the Department of Food Science and Human Nutrition

**Pre-Health Professional and Research Option**

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives:** 3 cr.

**U.S. Diversity:** 3 cr.

**Communications and Library:** 13 cr.

ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
ENGL 314  Technical Communication  3
LIB 160  Information Literacy  1
SP CM 212  Fundamentals of Public Speaking  3

**Total Credits**  13

**Humanities and Social Sciences:** 6-12 cr.

Select Humanities courses from approved list  3
Select Social Science course from approved list  3
If H Sci student, select:  6
Additional Humanities course
Additional Humanities or Social Science course

**Ethics and Environmental:** 3-6 cr.

If AgLS student, select from:  2-3
FS HN 342  World Food Issues: Past and Present  3
ENV S 120  Introduction to Renewable Resources
ENV S 201  Introduction to Environmental Issues

**Mathematical Sciences:** 6-12 cr.

Select at least 3 credits from:  3-8
MATH 140  College Algebra  
MATH 143  Preparation for Calculus  
MATH 160  Survey of Calculus  
MATH 165  Calculus I  
MATH 165 & MATH 166  Calculus I and Calculus II  
MATH 181  Calculus and Mathematical Modeling for the Life Sciences I  
MATH 181 & MATH 182  Calculus and Mathematical Modeling for the Life Sciences I and Calculus and Mathematical Modeling for the Life Sciences II  
Select at least 3 credits from:  3-4
STAT 101  Principles of Statistics  
STAT 104  Introduction to Statistics

**Total Credits**  6-12

**Physical Sciences:** 17 cr.

CHEM 177  General Chemistry I  4
CHEM 177L  Laboratory in General Chemistry I  1
CHEM 178  General Chemistry II  3
CHEM 178L  Laboratory in College Chemistry II  1
CHEM 331  Organic Chemistry I  3
CHEM 331L  Laboratory in Organic Chemistry I  1
CHEM 332  Organic Chemistry II  3
CHEM 332L  Laboratory in Organic Chemistry II  1

**Total Credits**  17

**Biological Sciences:** 24-29 cr.

BIOL 211  Principles of Biology I  3
BIOL 211L  Principles of Biology Laboratory I  1
BIOL 212  Principles of Biology II  3
BIOL 212L  Principles of Biology Laboratory II  1
BIOL 255  Fundamentals of Human Anatomy  3
BIOL 255L  Fundamentals of Human Anatomy Laboratory  1
Select at least 3 credits from:  3-4
BIOL 256  Fundamentals of Human Physiology and Fundamentals of Human Physiology Laboratory  
BIOL 306  Metabolic Physiology of Mammals  
BIOL 335  Principles of Human and Other Animal Physiology  
BIOL 313  Principles of Genetics  3
Select at least 3 credits from:  3-6
BBMB 301  Survey of Biochemistry  
BBMB 316  Principles of Biochemistry  
BBMB 404  Biochemistry I  
BBMB 405  Biochemistry II  
MICRO 201  Introduction to Microbiology  2-3
or MICRO 302  Biology of Microorganisms  
MICRO 201L  Introductory Microbiology Laboratory  1
or MICRO 302L  Microbiology Laboratory

**Total Credits**  24-29

**Food Science and Human Nutrition:** 37 cr.

FS HN 110  Professional and Educational Preparation  1
FS HN 167  Introduction to Human Nutrition  3
FS HN 203  Contemporary Issues in Food Science and Human Nutrition  1
FS HN 265  Nutrition for Active and Healthy Lifestyles  3
FS HN 360  Advanced Human Nutrition and Metabolism  3
FS HN 361  Nutrition and Health Assessment  2
FS HN 362  Nutrition in Growth and Development  3
FS HN 467  Molecular Basis of Nutrition in Disease Prevention  3
FS HN 480  Professional Communication in Food Science and Human Nutrition  1
FS HN 492  Research Concepts in Human Nutrition  2
Select at least 15 additional credits from:  15
BIOL 314  Principles of Molecular Cell Biology  
FS HN 214 & FS HN 215  Scientific Study of Food and Advanced Food Preparation Laboratory (or FS HN 115 lab  
FS HN 242  Societal Impacts on Food Systems  
FS HN 311  Food Chemistry  
FS HN 365  Obesity and Weight Management  
FS HN 367  Medical Terminology for Health Professionals  
FS HN 403  Food Laws, Regulations, and the Regulatory Process

FS HN 403 Food Laws, Regulations, and the Regulatory Process 2
FS HN 463 Community Nutrition 3
FS HN 480 Professional Communication in Food Science and Human Nutrition 3
FS HN 495 Practicum 1

Total Credits 36

Electives: 9-18 cr. At least 9 credits of electives must be 300-400 level courses. Select from any university coursework to earn at least 120 total credits.

Go to FS HN courses.

Seed Science

Curriculum in Seed Science

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study include: seed production, conditioning, pathology, physiology, quality control, and marketing, as well as seed plant designs.

Communication and Library: 9 cr.

ENGL 302 Business Communication 3
ENGL 309 Report and Proposal Writing 3
**Biology Sciences: 20 cr.**

- **BIOL 211** Principles of Biology I 3
- **BIOL 211L** Principles of Biology Laboratory I 1
- **BIOL 212** Principles of Biology II 3
- **BIOL 212L** Principles of Biology Laboratory II 1
- **BIOL 313** Principles of Genetics 3
- or **GEN 320** Genetics, Agriculture and Biotechnology 3
- **ENT 376** Fundamentals of Entomology and Pest Management 3
- **PL P 408** Principles of Plant Pathology 3
- **AGR 317** Principles of Weed Science 3

**Physical Sciences: 12-14 cr.**

- **CHEM 163** College Chemistry 5
  & 163L and Laboratory in College Chemistry 5
- **CHEM 177** General Chemistry I 5
  & 177L and Laboratory in General Chemistry I 5
- One of the following:
  - **AGR 259** Organic Compounds in Plant and Soils 3
  - **BBMB 221** Structure and Reactions in Biochemical Processes 3
  - **CHEM 231** Elementary Organic Chemistry 4
  & 231L and Laboratory in Elementary Organic Chemistry 4
- One of the following:
  - **CHEM 178** General Chemistry II 4
  & 178L and Laboratory in College Chemistry II 4
  - **PHYS 111** General Physics 5
  - **PHYS 115** Physics for the Life Sciences 4

**Mathematical Sciences 6-8 cr.**

- **MATH 140** College Algebra 3
- **STAT 101** Principles of Statistics 4
  or **STAT 104** Introduction to Statistics 4

Demonstration of computer proficiency or course in Computer Science.

**Agricultural Sciences: 21 cr.**

- **AGR 114** Principles of Agronomy 3
  or **HORT 221** Principles of Horticulture Science 3
- **AGR 154** Fundamentals of Soil Science 3
- **AGR 206** Introduction to Weather and Climate 3
- **AGR 354** Soils and Plant Growth 3
- 6 credits from AGRON or HORT 6
- 3 credits from TSM 3

**Economics and Business: 9 cr.**

- **ECON 101** Principles of Microeconomics 3
- **ECON 235** Introduction to Agricultural Markets 3

Three credit hours from the following:

- **ACCT 284** Financial Accounting 3
- **ECON 102** Principles of Macroeconomics 3
- **ECON 230** Farm Business Management 3
- **ECON 336** Agricultural Selling 3
- **MGMT 370** Management of Organizations 3
- **MKT 340** Principles of Marketing 3

**Seed Science: 9-10 cr.**

- **AGR 338** Seed Science and Technology 3
- **AGR 421** Introduction to Plant Breeding 3
- **AGR 491** Seed Science Internship Experience 1-2

2 credits from 300-400 level from AGRON, PL P, TSM, or HORT 2

**Typical Program for the First Year**

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).
Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the concurrent program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

Two options are available in food science: food science and technology and food science and industry. Both options are approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. Students who have an interest in graduate study or research are encouraged to select the food science and technology option. Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year.

Students in food science have the opportunity to pursue a Master of Business Administration (http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.

Nutritional Science

Nutritional science offers two options: pre-health professional & research and nutrition & wellness. The pre-health professional & research option can serve as a pre-professional program for medicine, dentistry, veterinary medicine, or for graduate study in nutrition or other biological sciences. Students in the pre-health professional & research option gain a strong basic science education along with human nutrition expertise that enables them to attain the knowledge and skills necessary to work in research laboratories of colleges and universities, government agencies, industries, and foundations. Students in the nutrition & wellness option will learn about the role of nutrition and healthy eating for disease prevention and wellness with an emphasis on nutrition education for the public and community agencies as well as effective program planning and evaluation. Graduates will be prepared for employment opportunities in community and state agencies, nonprofit organizations and health promotion enterprises, or public health and related programs.

Departmental Learning Outcomes

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers coursework for a variety of minors (http://www.fshn.hs.iastate.edu/undergraduate-programs/minors). Minors available include:

- culinary science
- food safety (interdepartmental minor)
- food science
- nutrition
- food and society

All minors have the following requirements:

- At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
- The minor must include at least 9 credits that are not used to meet any other college or university requirement.
- The same courses may not be applied to two different minors.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Graduate Study

The Food Science and Human Nutrition (FS HN) Department offers coursework for the degrees master of science and doctor of philosophy. Degree options include:

- food science and technology (http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology) (MS and PhD)
- meat science (http://www.ans.iastate.edu/section/meat/?pg=degree) (MS and PhD; co-major in animal science)
- nutritional sciences (http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences) (MS and PhD); interdepartmental graduate program
- family and consumer sciences/dietetics (http://www.fshn.hs.iastate.edu/graduate-program/mfcs-dietetics) (MS only)
- diet and exercise (http://www.hs.iastate.edu/academics/majors-list/diet-and-exercise) (BS/MS)
- nutritional sciences (BS/MS)

Prerequisite to major work is a baccalaureate degree in food science, nutrition, other physical/biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry; Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State
University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master’s degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate
The department offers coursework for graduate minors in:

- food science/technology (http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology/#minor-in-food-science-and-technology)
- nutritional sciences (http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences/#minor-in-nutritional-sciences)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTR 501

Certificates - Graduate
Food Safety and Defense (http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense)
The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master’s degree program.

Dietetics Internship (http://www.dietetics.iastate.edu)
The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a “Graduate Certificate in Dietetics Internship” which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) credential. There is a nonrefundable application fee of $75.

Natural Resource Ecology and Management
The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields. Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study
The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Graduate Study
The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in biorenewable resources technology, ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology
Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey’s Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa
Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry

The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Plant Pathology and Microbiology

Undergraduate Study

The department participates in the interdepartmental undergraduate Microbiology major.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

College of Business

David Spalding, Dean
Qing Hu, Associate Dean
Danny J. Johnson, Associate Dean
www.business.iastate.edu

Objectives of the Curriculum in Business

The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the workplace; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

Organization of Curriculum

The undergraduate curriculum in business is divided into three areas: a general education program, a pre-professional business program, and a professional business program. The general education program provides a broad spectrum of liberal arts coursework. The pre-professional business requirements provide a foundation in pre-business coursework. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The seven majors offered for the degree bachelor of science (B.S.) are accounting; finance; management; management information systems; marketing; supply chain management; and business economics. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Required High School Preparation

Students entering the pre-business curriculum must present evidence of the following high school preparation:

a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.

b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.

c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics;

d. Two (2) years of social studies.

Admission Standards to Professional Programs

All new entering students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, and the following foundation courses or their approved substitutions:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>

</tbody>
</table>

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses listed above. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.50 in at least 12 credits, or full member of the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of ACCT 285 Managerial Accounting, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.
Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at https://apps.bus.iastate.edu/ProfessionalProgram/ or from the Undergraduate Programs Office in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business. Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2014-2015 catalog:

1. A minimum of 122 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.
3. A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.
4. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
5. Students must achieve communication proficiency by earning a grade of C or better in two of the three required English courses.
6. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
7. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
8. Business majors may not take business courses Pass-Not Pass (P/NP).
9. General education courses may not be taken P/NP.
10. No more than 9 elective credits may be taken P/NP.
11. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

Advising System

Each student in the College of Business has an assigned academic adviser who helps facilitate student progress toward graduation while supporting the academic standards of the College. Students enter as Pre-Business majors and are guided toward their entrance to the Professional Program (business major) with assistance from professional advisers who continue to work with them through graduation.

Advisers, as part of the Undergraduate Programs Office staff, provide academic services to Business students including development of academic plans, study abroad planning, accessing pertinent University services and resources, and meeting their overall educational objectives.

The College encourages students to attend an orientation program prior to their entry, where information is shared and evaluated in order to help set the student out on the academic path appropriate to their goals, preparation, interests, and capabilities.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalista. Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.50 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation. Designated advisers will assist honors students in developing an appropriate program of study.

Internships

Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Career Services Center will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Curriculum Changes

Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

International Business Secondary Major

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor for Business Students

Students with a major in the College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared minors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Minor for Non-Business Students

The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 284</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 285</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>or ACCT 215</td>
<td>Legal Environment of Business</td>
<td></td>
</tr>
<tr>
<td>or BUSAD 250</td>
<td>Introduction to Business</td>
<td></td>
</tr>
</tbody>
</table>

Three courses chosen from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 301</td>
<td>Principles of Finance</td>
</tr>
<tr>
<td>MGMT 370</td>
<td>Management of Organizations</td>
</tr>
<tr>
<td>MIS 301</td>
<td>Management Information Systems</td>
</tr>
<tr>
<td>MKT 340</td>
<td>Principles of Marketing</td>
</tr>
<tr>
<td>SCM 301</td>
<td>Supply Chain Management</td>
</tr>
</tbody>
</table>

The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A C average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Non-Business students may not take more than 9 cr. Of 300 or 400 level Business courses.
Non-degree Seeking Students

Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements.

Upper Division Courses for Students Outside the College

Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college’s admission requirements to the professional program, as long as they meet course prerequisites.

Graduate Study

Four programs are offered at the master’s level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), a master of finance (M.Fin.), and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (M.B.A.) is the professional management education program for those pursuing careers in business. The goal of the M.B.A. program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, finance, marketing, information systems, or supply chain management. The College of Business also offers a business administration minor to students with majors outside the college.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in aerospace, agricultural biosystems, civil, computer, electrical, industrial, or mechanical engineering. A concurrent B.S. or B.A./M.B.A. is available to eligible Chemistry undergraduate students. A concurrent B.S./M.B.A. degree is also available to eligible undergraduate students majoring in Animal Science and Food Science. A concurrent D.V.M./M.B.A. degree is available to eligible Veterinary Medicine students.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.), and statistics (M.B.A./M.S.-Statistics).

The master of accounting (M.Acc.) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making. Additionally, the M.Acc. program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa. The 30 hour program requires 15 hours of graduate accounting courses, an international topics course, and 12 hours of non-accounting graduate credits, including a communications course.

The master of finance (M.Fin.) is designed to provide students with in-depth coverage of financial topics and a strong quantitative skill set. Students will learn financial analysis, valuation, modeling, and risk management techniques. The 40-credit program requires 22 core credits, of which 7 are in economics. 18 credits of electives are required, of which 9 must be in finance.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-42 credits depending upon the student’s background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Technology and Business, and Transportation.

Ph.D in Business and Technology

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of four specializations—information systems (IS), management (MGT), marketing (MKT), or supply chain management (SCM); Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by a 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master's degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.

Departments of the College

- Accounting
- Finance
- Management
- Marketing
- Supply Chain and Information Systems

Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting; finance; management; management information systems; marketing; supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

See also: A 4-year (8 semester) plan of study for each business degree.

Business Curriculum

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication:

Proficiency met with grade of C or better in 2 of 3 English courses

Supporting Courses:
BUSAD 203 Business Careers and Employment Preparation 1
MATH 151 Calculus for Business and Social Sciences 3
ACCT 215 Legal Environment of Business 3

Business Core: 21 cr.
ACCT 285 Managerial Accounting 3
FIN 301 Principles of Finance 3
Mgmt 370 Management of Organizations 3
MIS 301 Management Information Systems 3
MKT 340 Principles of Marketing 3
SCM 301 Supply Chain Management 3
Mgmt 478 Strategic Management 3
Total Credits 21

Electives:
61 cr. must be non-business courses.
1. Acct, Fin, and Bus Econ majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Bus Econ majors will take MATH 160 Survey of Calculus instead of 150, and ECON 207. Applied Economic Optimization instead of MATH 151 Calculus for Business and Social Sciences. See the Undergraduate Programs Office in the College of Business. Acct majors will take ACCT 301 The Accounting Cycle concurrent with as part of the Supporting Courses. Mgmt majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.
2. Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curriculum.
3. Students may satisfy the Global Perspectives requirement either by taking six credit hours from the University International Perspectives list, or three credit hours from the International Perspectives list and three credit hours from the College of Business Global Perspectives list. Approved list of courses is available on the web at http://www.business.iastate.edu/undergraduate/majors or from the Undergraduate Programs Office in the College of Business.
4. Courses used for the International Perspectives and U.S. Diversity requirements may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.

Professional Programs
The curriculum in accounting is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

Accounting major: 23 cr.
ACCT 383 Intermediate Managerial Accounting 3
ACCT 384 Accounting Information Systems 3
ACCT 386 Intermediate Accounting I 3
ACCT 387 Intermediate Accounting II 3
ACCT 485 Principles of Federal Income Tax 3
ACCT 497 Introduction to Auditing 3
ACCT 498 Capstone in Accounting 2
One additional course from department approved list 3
Total Credits 23

Business Economics major: 19 cr.
ECON 301 Intermediate Microeconomics 4
ECON 353 Money, Banking, and Financial Institutions 3
ECON 431 Managerial Economics 3
ECON 492 Graduating Senior Survey R
One 300-level ECON course 3
Two 400-level ECON courses 6
Total Credits 19

Fin major: 21 cr.
FIN 310 Corporate Finance 3
FIN 320 Investments 3
Two 400-level Finance courses from the following: 6
FIN 415 Business Financing Decisions
FIN 424 Financial Futures and Options
FIN 425 Security Analysis and Portfolio Management
FIN 428 Advanced Fixed Income Analysis and Portfolio Management
FIN 435 Venture Capital, Private Equity, and Mergers and Acquisitions
FIN 445 Bank Management Decisions
FIN 462 Corporate Risk Management and Insurance
FIN 472 Real Estate Finance
FIN 480 International Finance
Plus two additional finance courses (300 or 400 level) from the department approved list.
One additional course from the department approved list. 3
Total Credits 21

Management major: 18 cr.
Mgmt 371 Organizational Behavior 3
Mgmt 377 Competitive Strategy 3
Mgmt 414 International Management 3
Mgmt 471 Personnel and Human Resource Management 3
Select two management elective courses from the department approved list. 6
Total Credits 18

Management Information Systems major: 18 cr.
MIS 307 Intermediate Business Programming 3
MIS 310 Information Systems Analysis 3
MIS 320 Database Management Systems 3
MIS 340 Project Management 3
Select two courses from Department list that complete an Elective Cluster. 6
Elective Clusters are Application Development, Business Analytics, IT Infrastructure and Security, and Supply Chain Management.
Total Credits 18

Marketing major: 18 cr.
MKT 444 Marketing Research 3
MKT 447 Consumer Behavior 3
MKT 443 Strategic Marketing Management 3
Select two additional marketing courses from the department approved list. 6
One additional major elective course from the department list. 3
Total Credits 18

Supply Chain Management major: 18 cr.
SCM 485 Demand Planning and Management 3
SCM 486 Principles of Purchasing and Supply Management 3
SCM 487 Strategic Supply Chain Management 3
Select one of the following two-course concentrations: 6
Logistics Concentration
SCM 460 Decision Tools for Logistics and Operations Management
SCM 461 Principles of Transportation
Operations Concentration
SCM 422 Manufacturing Planning and Control
SCM 424 Process Management, Analysis, and Improvement
One additional course from department approved list. 3
Total Credits 18

Total Credits

* Excluding 397 and 398.
† Excluding ECON 490.
Bachelor of Science
The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting; finance; management; management information systems; marketing; supply chain management; or business economics.

 Majors
Accounting
Business Economics
Finance
International Business (second major only)
Management
Management Information Systems
Marketing
Supply Chain Management

Accounting
Undergraduate Study
For undergraduate curriculum in business, major in accounting.
The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.
The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, controlling, and reporting the activities of the firm. Accounting is needed by external users in order to make investment decisions, to grant or withhold credit, and in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.
The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to think critically and creatively about accounting problems
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.
The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession.

Graduate Study
The department offers a graduate degree, the masters of accounting (M.Acc.). This is a 30-hour degree. The program requires 15 hours of graduate accounting courses, ENGL 507 Writing and Analyzing Professional Documents or its equivalent, at least 9 hours of non-accounting graduate electives, and an international course from an approved list. Included in the 15 required hours of graduate accounting courses are two 3-credit required courses, ACCT 583 Advanced Managerial Accounting, and ACCT 598 Financial Accounting: Theory and Contemporary Issues.
The M.Acc. is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The M.Acc. program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the M.Acc. Contact the coordinator of M.Acc. program for details.
The department participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.
The requirements for the accounting major are met by successful completion of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tbody>
</table>

See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 316 Business Law. The Department of Accounting should be consulted for information on specific alternative plans of study.
The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to stand alone.

CPA Note: The accounting major requires 24 credits of accounting beyond principles. This satisfies the State of Iowa CPA exam requirement. ACCT 316 Business Law is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. While students may sit for the CPA exam in Iowa after completing the required accounting course work and earning a bachelor's degree, CPA candidates must complete a total of 150 credits in order to be certified or licensed to practice in Iowa. Qualified students should consider taking the Masters of Accounting to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the M.Acc. Program as early as possible to complete their graduate degree in an efficient manner. Students planning certification outside Iowa must check local rules, as each state determines its own exam qualification and licensing requirements.

Business Administration
Undergraduate Study
The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Management, Marketing, and Supply Chain and Information Systems, by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study
The College of Business offers a professional graduate degree program in business administration, the master of business administration (MBA), which is described below. The college also has three specialized master degree programs: the master of accounting (M.Acc.), which is described under the Department of Accounting, the master of finance (M.Fin.), which is described under the Department of Finance, and the master of science in information systems (M.S.I.S.) which is described under Management Information Systems. The college also offers a Ph.D. in business and technology, with specializations in information systems, management, marketing, and supply chain management. Finally, the College of Business is a participating member of the following interdepartmental programs: master of science in transportation, master of science in seed technology and business, master of science and Ph.D. in human computer interaction, and master of science in information assurance.

Master of Business Administration (M.B.A.)
The College of Business offers a 48 credit program leading to a nonthesis master of business administration degree with a specialization in accounting, finance, information systems, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success
and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business.

Students may enroll in the M.B.A. on either a full-time or part-time basis. The part-time M.B.A. is designed for employed professionals. Part-time MBA classes are held in the evenings in downtown Des Moines.

Students working toward the M.B.A. are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, professional responsibilities, and strategic management), as well as advanced elective coursework. Two courses on professional skills development are also required for full-time M.B.A. students.

Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Management, Marketing, and Supply Chain and Information Systems. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./M.B.A. is available to eligible undergraduate students majoring in aerospace, agricultural biosystems, civil, computer, electrical, industrial, or mechanical engineering. A concurrent B.S./M.B.A. is available to eligible Chemistry undergraduate students and to eligible undergraduate students majoring in Animal Science and Food Science. The College of Business and the College of Veterinary Medicine offer a concurrent M.B.A./D.V.M. degree.

Double master’s degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.), finance (M.B.A./M.Fin.), and statistics (M.B.A./M.S. - Statistics). The College of Business also offers a business administration minor to students with majors outside the college.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work. Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time M.B.A. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 1 (March 1 for international students). Part-time M.B.A. applications are considered for fall, spring, or summer entry.

**Ph.D. in Business and Technology**

The College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of four specializations—information technology (IS), management (MGT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These may include:

- Financial or managerial accounting (min. 3 Cr)
- Corporate finance (min. 3 Cr)
- Management information systems (min. 3 Cr)
- Marketing (min. 3 Cr)
- Supply chain management (min. 3 Cr)
- Economics – micro and macro (min. 6 Cr)

Students can choose one of four areas of specialization—IS, MGT, MKT, or SCM. The information systems (IS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the IS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

The management (MGT) specialization applies a broad range of theoretical perspectives from the social sciences and diverse research methods to the study of organizational behavior, human resources, strategy, and entrepreneurship. The curriculum takes a multidisciplinary approach to analyze individuals and teams, the formulation and implementation of strategy, the effective use of human resources, social responsibility and ethics, entrepreneurship, innovation and technology, and the challenges of the global business environment. The program emphasizes personalized attention and the development of scholars who can contribute with high-quality theoretical and empirical research in these and related areas.

The marketing (MKT) area focuses on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a business’s customer base.

The supply chain management (SCM) specialization focuses on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today’s world, where competition occurs across supply chain networks, SCM also involves integrating business processes across firms.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student’s PhD committee. Each student must complete advanced courses in his/her area of specialization, a minor area that supports the major area, and research methods courses. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

**Business Economics**

**Business Economics Major**

(Uniform Major between the College of Business and the Department of Economics)

The objective of the Business Economics major is to provide a high quality education with a balanced emphasis in both business and economics. Such an education should equip graduates with a unique set of skills distinguishing them from other graduates. In particular, they will have the ability to use both business and economic reasoning to think critically and address complex issues using tools and decision making models of economics, business, mathematics, statistics, as well as concepts from the biological, physical, and social sciences; to make decisions and to communicate effectively.

**Required courses (10 credits)**

- ECON 301 Intermediate Microeconomics 3-4
- ECON 353 Money, Banking, and Financial Institutions 3
- ECON 431 Managerial Economics 3
- ECON 492 Graduating Senior Survey R

**Elective courses (9 credits)**

Three credits of ECON 230-289, 300-389, 400-489.

Select two additional 400 through 489 level ECON courses

**Notes:**

Business Economics majors must take STAT 326

Business Economics majors take MATH 160 and ECON 207 instead of MATH 150 and 151

**Finance**
Undergraduate Study

For undergraduate curriculum in business, major in finance.

In addition to the basic business requirements, finance majors must also complete:

<table>
<thead>
<tr>

</tbody>
</table>

Select one from the following:

- ACCT 383 Intermediate Managerial Accounting
- ACCT 386 Intermediate Accounting I
- ACCT 387 Intermediate Accounting II
- or any 400 level course listed above.

* STAT 326 Introduction to Business Statistics II is highly recommended to be taken as a prerequisite

The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include corporate financial management, investments, portfolio management, insurance, real estate, banking, and risk management. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as the finance member of a team
4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a minor for non-finance majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand-alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Finance department offers a Master of Finance (M.Fin.) degree. The M.Fin. is a non-thesis, non-creative component curriculum designed to provide students with in-depth coverage of finance topics and a strong quantitative skill set. Students will learn financial analysis and valuation, advanced regression techniques and programming approaches for data analysis, time series analysis and forecasting, optimization techniques, modelling of financial and risk variables, simulation techniques, and tools for effective risk management. The 40 credit program requires 22 core credits, seven of which are taught in the economics department. Another 18 credits of electives are required, nine of which must be in finance courses.

The department also participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance.

Management

Undergraduate Study

For undergraduate curriculum in business, major in management.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses) and business core requirements for the Bachelor of Science (B.S.) degree and 18 additional credits in the major. The instructional objective of the Management Department is to provide students with the knowledge of organizations, leadership activities within organizations, and entrepreneurial ideal and activities. Management majors will have an understanding of (1) employee work-related attitudes and behaviors, (2) challenges and strategies in international business, and (3) human resource management practices within firms. Students will demonstrate an awareness for the role of diversity, ethics and technology in business decision making, the impact of external forces and global issues on organizations, and an ability to think critically, communicate effectively and work as an effective member of a team.

Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management concepts, theories, techniques, and skills are applicable to business functional areas and are essential for successful organizations regardless of whether the venture thrives in character as large or small, well-established or an entrepreneurial start-up. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. In addition to the basic business foundation and core courses, a management student has the option of participating in an organizational leadership or entrepreneurship track. Management majors are required to complete 18 credit hours of management or department-approved courses. Included in these 18 credits are three required courses:

- MGMT 310 Entrepreneurship and Innovation 3
- MGMT 371 Organizational Behavior 3
- MGMT 414 International Management 3

Students choosing the Organizational Leadership Track will also complete 3 of the following courses:

- MGMT 471 Personnel and Human Resource Management 3
- MGMT 472 Management of Diversity 3
- PSYCH 450 Industrial Psychology 3

Students choosing the Entrepreneurship Track will also complete 3 of the following courses:

- MGMT 313 Feasibility Analysis and Business Planning 3
- MGMT 410 Social Entrepreneurship 3

Select 2 from the following:

- MGMT 377 Competitive Strategy 3
- MGMT 419 Social Responsibility of Business 3
- MGMT 471 Personnel and Human Resource Management 3
- MGMT 472 Management of Diversity 3
- MGMT 387 International Entrepreneurship 3

The department also offers a minor for non-Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Management participates in the full-time and part-time Master of Business Administration (M.B.A.) and in the Ph.D. in Business and Technology. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives.

The Ph.D. in Business and Technology with a Management (MGT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus
of the specialization is on management issues relating to organizational behavior, human resources, strategy, and entrepreneurship.

Management Information Systems

Undergraduate Study

For undergraduate curriculum in business, major in management information systems (MIS).

The MIS major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives. The required core courses are:

- MIS 307 Intermediate Business Programming 3
- MIS 310 Information Systems Analysis 3
- MIS 320 Database Management Systems 3
- MIS 340 Project Management 3

The remaining 6 credits can be taken from the department approved electives, preferably with the specified clusters that focus on specific IT job related knowledge and skills (application development, IT infrastructure and security, business analytics, and supply chain technology). Students are encouraged to take electives that cover multiple clusters to enhance marketability and career flexibility.

The department also offers a minor for non-MIS majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. The 15 credits must include MIS 301 Management Information Systems. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Supply Chain and Information Systems participates in the M.S. in Information Systems (M.S.I.S.), the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology programs.

The department also participates in an interdepartmental M.S. in Information Assurance as well as in a master’s and Ph.D. program in Human Computer Interaction.

The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are graduate electives. Students may obtain a specialization in technology and innovation management within the M.B.A. program.

The M.S.I.S. is a 30-credit (minimum) curriculum designed around three interrelated areas – business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The M.S.I.S. program will educate students on applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas — core, specialization, minor, and research methods—and the dissertation. The Management of Information Systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Marketing

Undergraduate Study

For undergraduate curriculum in business, major in marketing. The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major.

A major in marketing acquaints students with the management decisions that surround the satisfaction of customer needs in the purchase and use of goods and services. Examples of marketing decisions areas are product development, pricing, marketing communication, marketing analytics, and personal selling.

Completion of the major prepares students for careers such as product manager, marketing analyst, digital marketing specialist, marketing consultant, advertising or promotions manager, marketing researcher, sales representative or manager, and special event manager; in the public and private sectors.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. The students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses:

- Required Marketing Courses (9 credit hours)
  - MKT 444 Marketing Research 3
  - MKT 447 Consumer Behavior 3
  - MKT 443 Strategic Marketing Management 3
- Elective Marketing Courses (9 credit hours)
  - MKT 368X Spreadsheet-based Marketing Models 3
  - MKT 410 Promotional Strategy 3
  - MKT 442 Sales Management 3
  - MKT 445 Customer Relationship Management 3
  - MKT 446 Retailing 3
  - MKT 448 Global Marketing 3
  - MKT 449 Marketing Seminar 3
  - MKT 451 Marketing Channels 3
  - MKT 453 Brand Management 3
  - MKT 351X Services Marketing 3

The department also offers a minor for non-Marketing majors in the College of Business. The minor required 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Marketing participates in the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology.

The M.B.A. program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in marketing.

The Ph.D. in Business and Technology with a Marketing (MKT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on marketing issues relating to strategic decision making, understanding consumer preferences and behaviors, and using data analytics for increasing the performance of the firm.

Supply Chain Management

Undergraduate Study

For undergraduate curriculum in business, major in Supply Chain Management. Supply Chain Management is an integrated program of study concerned with the efficient flow of materials, products, and information within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. The program provides students with the core knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, transportation management, warehouse management, inventory control, material handling, product and service support, information technology, and strategic supply chain management.

The program offers two concentrations: logistics and operations. The logistics concentration focuses on skills related to transportation, distribution, warehousing, facility location analysis, and packaging. The operations concentration focuses on the analysis, design, implementation, planning, control, and improvement of manufacturing and service processes.

The study of Supply Chain Management prepares students for professional careers with manufacturers, retail distributors, logistics service providers, including
The Supply Chain Management major requires students to take 18 credit hours in the supply chain management area. This requirement is met by completion of the following common core courses:

**Core (15 credits)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCM 424</td>
<td>Process Management, Analysis, and Improvement</td>
<td>3</td>
</tr>
<tr>
<td>SCM 453</td>
<td>Supply Chain Planning and Control</td>
<td>3</td>
</tr>
<tr>
<td>SCM 460</td>
<td>Decision Tools for Logistics and Operations Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 461</td>
<td>Principles of Transportation</td>
<td>3</td>
</tr>
<tr>
<td>SCM 486</td>
<td>Principles of Purchasing and Supply Management</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives (3 credits)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<tr>
<td>SCM 491X</td>
<td>International Live Case and Study Tour</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits 33**

Students are encouraged to consider meeting the requirement for both concentrations to establish a broader foundation for a successful career in supply chain management.

The department also offers a minor for non-Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

**Graduate Study**

The Department of Supply Chain and Information Systems participates in the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology programs. The department also participates in the interdepartmental M.S. in Transportation program.

The M.B.A. program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Students can obtain a specialization in Supply Chain Management within the M.B.A. program.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management (SCM) as their major area of specialization. The primary objective of the SCM specialization is to prepare students for careers in research universities. The SCM domain is broad and includes the design, development and control of business processes for the conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems also included. However, in today’s world, with competition across supply chain networks, SCM also involves integrating business processes across firms. Research in this area is therefore interdisciplinary in nature and addresses both intra- and inter-organizational issues.

### International Business Interdepartmental Undergraduate Secondary Major

The international business program is designed to provide students with an understanding of the international business environment. Students are expected to develop an understanding of issues associated with international business issues as applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The program is designed to prepare students for employment in multinational companies and for business assignments beyond the United States. International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this program should strengthen their placement opportunities with companies that are engaged in international business and trade.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.

### College of Design

**Luis Rico-Gutierrez-Dean**

**Tim Borich-Associate Dean for Outreach**

**Mark Chidister-Associate Dean for Academic Programs**

**Kevin Kane-Associate Dean for Research**

[www.design.iastate.edu/](http://www.design.iastate.edu/)

**Objectives of the Curricula in Design**

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college’s programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

**Organization of Curricula**

All undergraduate programs in the College of Design share a common foundational curriculum, the Core Design program, followed by degree-specific curricula. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous inclusive base for the college’s professional and non-professional programs. It creates shared language, experience, and community for programs, faculty and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple programs, and experiment with interdisciplinary work.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students’ ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the degree programs, is composed to ensure that students receive a well-rounded undergraduate education.

### High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability
- 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra
• 3 years of science, including at least two of the following:
  • 1 year of biology, 1 year of chemistry, or 1 year of physics
• 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Admission Standards to Enrollment Managed Professional Programs

Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, academic performance, and a written essay. Students from a two-year institution may also apply as transfer students to the following programs: B.S. in Community and Regional Planning, B.A. in Art and Design, and Bachelor of Design.

Advising

Each student receives personal assistance from an academic advisor within the student’s curriculum area. Students enrolled in the college’s Core Design Program are advised by professional advisors. Once admitted to professional programs, students are assigned to faculty advisors within the student’s curriculum area. Advisors help students develop a program of study, access pertinent university resources and provide information on career choice.

The college’s career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Honors Program.

Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements.

Core Design Program

<table>

Architecture
http://www.arch.iastate.edu

Undergraduate Study
The undergraduate program in architecture is an accredited five-year curriculum leading to the Bachelor of Architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth year students.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four year professional program. Admission to the professional degree program is based on the applicant’s performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources.

Objectives of the Bachelor of Architecture program:
The department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tuned and made sustainable; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software.

Graduate Study
The Department of Architecture offers two graduate degrees in architecture: a three-year accredited professional degree (M.Arch.) and a two-semester to three-semester research degree (M.S. in Arch.). Both degrees encourage interdisciplinary work within the College of Design and across related fields within the university. Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch. / M.C.R.P.) and the College of Business (M.Arch. / M.B.A.). Financial support in the form of teaching and research assistantships is available competitively.

Master in Architecture
M.Arch. is an accredited professional degree in architecture. It is designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold four-year pre-professional degree in architecture.
The M.Arch. program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts addressing environmental, social and technological issues. We believe that even though the scale of the architect's action might be limited, the range of information needed to make creative, intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary learning, and teamwork.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years including the first summer term. The curriculum starts with an intensive three-semester course sequence that places equal emphasis on three study areas: architectural design and media, science and technology, and theory and history seminars on the built environment. While this learning framework shapes the whole curriculum, the remaining four semesters have a more open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a number of options, including study abroad, specialized studios with a variety of faculty, and the opportunity to do an independent project.

Students with undergraduate degrees in architecture or other related design fields may be given advanced standing in the program; advanced standing students may waive up to the whole first year. Students admitted to the program hold undergraduate degrees in a broad range of fields such as art history, history, literature, interior design, economics, mathematics, computer science, anthropology, and medicine. These students must complete the full three years of the curriculum.

**Master of Science in Architecture**

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the listed study areas. These study areas are: Sustainability and Green Design, Rural and Urban Studies, Representation and Digital Media, Design Inquiry, Advanced Building Design, Architectural and Construction History, and Building Science and Construction. The degree is also open for applicants with non-professional degrees in various fields depending on the study area proposed by the applicant.

Financial support in the form of teaching and research assistantships is available.

Contact the department office for specific curricula.

**Curriculum in Architecture**

The Department offers undergraduate and graduate degree programs:

- A 167.5-credit undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree. (B. Arch.)
- A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)
- A 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture. (M.S. Arch.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

**Total B. Arch. Requirement: 167.5 cr.**

Only 65 cr from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr of free electives; 2.00 minimum GPA.

**International Perspective:** 3 cr.

**U.S. Diversity:** 3 cr.

**Communications:** 10 cr.

The Bachelor of Arts in Art and Design is a four-year degree program with two options: Art and Culture or Visual Culture Studies. Both options require students to complement their art coursework with study in an area outside of the College of Design. This can include a second major or minor, or an alternative program of study approved by your academic adviser.

Many students pursue this BA degree in conjunction with a second major or a minor such as journalism, advertising, business, history or psychology.

The two Art and Design curricula provide a solid liberal arts educational experience that can be a springboard into a wide array of graduate school and career opportunities, including art criticism, art history, art sales, corporate art collections, gallery/museum studies, and art therapy.

Art and Culture Option
The Art and Culture option provides a general studies degree in which students combine art with another area of interest. Students create their own programs of study, which may include another major or minor in a subject taught outside the College of Design. This concentration emphasizes studio components.

Required courses include three (3) art or design history courses (two at the 300/400 level).

Visual Culture Studies Option
For students who are really interested in art history or museum studies, the Visual Culture Studies option allows the student to take a larger number of courses in those topics. Required courses include several art or design history courses at the 300/400 level, which may include a museum or gallery internship.

This curriculum offers two concentrations: Art and Culture and Visual Culture Studies. Both concentrations are combined with an applied career minor or approved program of study.

Consideration for admission into the B.A. curriculum is based upon department resources.

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits applied toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangement for this process must be made with department advisers.

Art and Culture Concentration
The curriculum in Art and Design, Art and Culture Concentration leads to a 120.5 credit undergraduate Bachelor of Arts degree.

Consideration for admission into the B.A. curriculum is based upon department resources.

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits applied toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangement for this process must be made with department advisers.

Total Degree Requirements: 122 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr; 9 P-NP cr. of free electives; 2.00 minimum GPA

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

(C- or better grade)

6 cr. from department curriculum sheet

Math/Physics/Biol. Sciences: 6 cr.  
6 cr. from department curriculum sheet

General Education Courses: 9 cr.  
Six credits of course levels 300-400 from department curriculum sheet.  6  
Three credits from department curriculum sheet.  3  
Total Credits  9

Visual Culture Studies Core: 9 cr.  
ART H 280 History of Art I  3  
ART H 281 History of Art II  3  
Choose ONE from the following  
DSN S 183 Design Cultures  3  
or ART H 292 Introduction to Visual Culture Studies  3  
Total Credits  9

Visual Culture Studies Concentration: 28 cr.  
24 cr. in History/Theory/Criticism courses from any department in the College of Design. May include up to 9 cr. Museum/Gallery Internship. 12 cr. must be at 300 level or above.  

Program of Study: 30 cr.  
30 cr. from an approved program of study, including 6 cr. at 300-400 level and 6 cr. foreign language.  

Electives: 15 cr.  
See also: A 4-year plan of study grid showing course template by semester.

Biological/Pre-Medical Illustration

Undergraduate Study

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "communicating science through art," the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, free-lance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences.

Design courses  29  
DSN S 131 Design Representation  3  
ARTIS 230 Drawing II  3  
ARTIS 233 Watercolor Painting  3  
ARTIS 308 Computer Modeling, Rendering and Virtual Photography  3  
ARTIS 330 Drawing III: Life Drawing  3  
BPM I 323 Scientific Illustration Principles and Techniques  3  
BPM I 326 Illustration and Illustration Software  3  
BPM I 327 Illustration as Communication  3  
BPM I 337 Application of Scientific Illustration Techniques  3  
BPM I 497 Illustration Internship  3  
12 credits chosen from a list of approved upper level courses in art and design  12

Biological Science courses  24  
LAS 101 Orientation for Open Option and Preprofessional Students  3  
Biol 211 Principles of Biology I  3  
Biol 211L Principles of Biology Laboratory I  1  
Biol 212 Principles of Biology II  3  
Biol 212L Principles of Biology Laboratory II  1  
Biol 255 Fundamentals of Human Anatomy  3  
Biol 256 Fundamentals of Human Physiology  3  
Biol 351 Comparative Chordate Anatomy  3  
One of the following  3  
Biol 356 Dendrology  3  
Biol 366 Plant Systematics  3  
Biol 454 Plant Anatomy  3  
9 credits chosen from a list of approved biological science courses  9

Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

Communication Proficiency Requirement. Students must earn a minimum of C in both ENGL 150 and ENGL 250 or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316.

Students in BPM I must complete a senior project or an internship experience (BPM I 497) in which they design and produce artwork that is suitable for publication or public display.

Minor

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses.

The biological sciences must include:

- Biol 211 Principles of Biology I  3  
- Biol 211L Principles of Biology Laboratory I  1  
- Biol 212 Principles of Biology II  3  
- Biol 212L Principles of Biology Laboratory II  1

The art and design courses must include:

- BPM I 323 Scientific Illustration Principles and Techniques  3  
- BPM I 337 Application of Scientific Illustration Techniques  3  
- Advanced drawing, illustration, electronic media or painting course  3

For more information, contact the BPM I adviser in 102 Catt Hall or view the website listed above.

Community and Regional Planning

Community and regional planning is a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Undergraduate Study

Graduates of the Community and Regional Planning department are able to integrate planning knowledge and skills in a variety of practical applications, and can communicate effectively in written and oral form. Graduates will be qualified for a variety of entry-level positions. They will also be well prepared for graduate study in a variety of fields, including law, public policy, public health, environmental science, geography, sociology, urban design, and architecture.

Graduates of the Community and Regional Planning Department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/ oral and graphic communications, collaboration, and in synthesizing and applying
knowledge to practice. Graduates are expected to be able to assess the impact of plans and alternatives based on equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Our students gain an education that, when combined with experience, supports eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in Design Studies, Digital Media, Critical Studies in Design, Environmental Studies, and Sustainability.

Graduate Study

The Department offers the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. Students may design their own area of concentration with the assistance of their major professor. The primary focus of the M.C.R.P. degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (21 credits), electives (21-23 credits) and one of the following: capstone studio (4 credits), professional report (4 credits), or thesis (6 credits). The required core consists of C R P 532, 561, 563, 564, 566, 568 and 592. Students select electives in consultation with their Program of Study (POS) committee.

C R P 532 Community Planning Studio 3
C R P 561 Planning Theory for Practice 3
C R P 564 Introduction to Analytical Methods for Planning 3
C R P 566 Values and Decision Making 3
C R P 568 Planning and Development 3
C R P 592 Land Use and Development Regulation Law 3

Admission to the M.C.R.P. program is by application to the department and to the Graduate College. Students with a Bachelors degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department’s Director of Graduate Education (DOGE) in writing prior to the first day class of the student’s first semester in the program to have credits waived. Students are encouraged to complete an internship in a planning office. No foreign language is required for the degree master of community and regional planning.

Double degree programs are offered with architecture (M.C.R.P./M.Arch.), business administration (M.C.R.P./M.B.A.), landscape architecture (M.C.R.P./M.L.A.) and sustainable agriculture (M.C.R.P./M.S.). The department also participates in the interdepartmental major in transportation (see Transportation). Information about our programs and how to apply can be obtained from the department’s web page at: www.design.iastate.edu/communityplanning, or send an email to crp@iastate.edu.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to graduate students in all disciplines of the University. Information about the graduate certificate may be obtained from the department office and from the department’s web page at: www.design.iastate.edu.

CRP currently offers several courses via distance learning to graduates and planning professionals interested in expanding their knowledge of planning. Further details of current distance course offerings may be found on the CRP website and on the ISU Continuing Education website. For more information, send an e-mail to crp@iastate.edu

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 128 hour credit undergraduate program leading to the Bachelor of Science. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

The Community and Regional Planning Program can be completed in two to four years. Students may apply for admission to the program at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student’s cumulative GPA and a departmental review of course work. Transfer applications from students in programs in sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 13 cr.

(C- or better grade)

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
ENGL 309 Report and Proposal Writing 3
or ENGL 314 Technical Communication 3
SP CM 212 Fundamentals of Public Speaking 3
LIB 160 Information Literacy 1

Total Credits 13

Humanities: 9 cr., 6 cr. 300 level or above

PHIL 201 Introduction to Philosophy 3
or PHIL 206 Introduction to Logic and Scientific Reasoning 3
or PHIL 230 Moral Theory and Practice 3
Six credits from program curriculum sheet 6

Total Credits 9

Social Sciences: 18 cr. 300 level or above

ECON 101 Principles of Microeconomics 3
or ECON 102 Principles of Macroeconomics 3
POLS 215 Introduction to American Government 3
SOC 134 Introduction to Sociology 3
Nine credits from program curriculum sheet. 9

Total Credits 18

Math/Physics/Biol. Sciences: 13 cr.

STAT 101 Principles of Statistics, 6 cr. in Natural Sciences, 3 cr. in Math.

Design Core: 3 cr.

DSN S 102 Design Studio I 3-4
or DSN S 183 Design Cultures 3-4

Total Credits 3-4

Community and Regional Planning Core: 24 cr.

C R P 201 Making the Metropolis 3
C R P 293 Environmental Planning 3
C R P 301 Planning Methods Studio 4
C R P 383 Theory of the Planning Process 3
C R P 391 Field Travel 1
C R P 432 Community Planning Studio 4-6
C R P 492 Planning Law, Administration and Implementation 3
C R P 498 Portfolio Development and Review 1

Total Credits 22-24

Planning Elective: 24 cr.

24 cr. from:

C R P 416 Urban Design and Practice 6
C R P 417 Urban Revitalization 3
C R P 425 Growth Management 3
C R P 429 Planning in Developing Countries 3
C R P 435 Planning in Small Towns 3
C R P 445 Transportation Policy and Planning 3
C R P 451 Introduction to Geographic Information Systems 3

European Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 13 cr.

(C- or better grade)
Design Core Program: 11.5 cr.

General Electives: 24 cr.

Twenty-four credits of general electives from program curriculum sheet

Design

The Bachelor of Design is a 122.5 credit non-professional undergraduate degree program focused on the interdisciplinary nature of design and the power of the design studio as a place and method for generating ideas and solving problems. The core of the degree program is a series of forums and studios intended to connect history, theory and practice, and give students hands-on experience grappling with design challenges that vary in complexity and scale. Thematic course modules are taught by faculty from multiple design disciplines.

The Bachelor of Design offers opportunities for students to engage design thinking in a collaborative and interdisciplinary environment. The curriculum developed out of a shared philosophy that designers have the capacity to generate ideas and think creatively about society’s increasing economic, social and environmental challenges. Innovation and entrepreneurship are encouraged and valued. BDes graduates are prepared for a wide range of career paths and graduate programs. The curriculum allows students to pursue double majors to couple design thinking with other discipline of interest, such as advertising, business, engineering, or journalism. Transfer students can also enter the program and complete the degree in as few as four semesters for students with Associate of Arts (AA) or Associate of Science (AS) degree or the equivalent in academic transfer credit. Upon completion, students may enter graduate programs in the design professions or other fields in which design thinking and critical analysis are valued.

http://www.design.iastate.edu/design/curriculum.php

Check the Schedule of Classes (http://classes.iastate.edu) for availability for DES courses.

Curriculum for Bachelor of Design

Total Degree Requirement: 122.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 6 cr. in Design History/Theory/Criticism credit and 6 cr. in Design Skills credit; 16 technical cr.; 21 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

ENGL 150 Critical Thinking and Communication
ENGL 250 Written, Oral, Visual, and Electronic Composition
LIB 160 Information Literacy

3 credits selected from:

ENGL 302 Business Communication
ENGL 309 Report and Proposal Writing
ENGL 314 Technical Communication

Total Credits 10

*Mathematics/Physical Sciences/Biological Sciences: 9 cr.
9 cr. from approved list

*Social Sciences: 9 cr.
9 cr. from approved list

*Humanities: 9 cr.
9 cr. from approved list

*At least 3 credits in Mathematics/Physical Sciences/Biological Sciences, Social Sciences, or Humanities must be above 300-level.

Design Core Program: 11.5 cr.

DSN S 102 Design Studio I
DSN S 115 Design Collaborative Seminar
or DSN S 110 Design Exchange Seminar I

Select 9 credits from approved list

Total Credits 9

Design History/Theory/Criticism: 12 cr.

12 cr. selected from approved list.

Minor and/or Electives: 21 cr.

Graphic Design

http://www.design.iastate.edu/graphicdesign/index.php

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Graphic design.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, visual organization and communication media, and interaction design. Graphic design students effectively integrate abstract thinking skills such as communication design theory, history, methodology; and technology. Components of visual communication including typography, symbology, time-based media, information design, branding, image creation, and other communication systems are integrated with an understanding of professional practice.

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design, Master of Arts (M.A.) in Graphic Design, and Master of Arts (M.A.) in Graphic Design with a specialization in environmental graphic design.

M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. The M.F.A. is recognized as the terminal degree in the graphic design field. The degree requires completion of a written thesis integrating theory, research, and design problem solving.

The M.A. in Art and Design with a specialization in graphic design requires a minimum of 30 credits including seminar courses in art and design, a studio concentration, a history course, a business practice course, courses outside of graphic design, and the completion of a capstone course in graphic design. Graduate students selecting the M.A. in graphic design will focus on a first professional degree. Applicants without a degree in graphic design may be required to complete up to 17 additional credits of coursework.

The M.A. in Art and Design with a specialization in environmental graphic design requires a minimum of 34 credits including a seminar course in art and design, a studio concentration, a history course, courses in design methods, and the completion of a capstone course in environmental graphic design. Graduate students selecting the M.A. in environmental graphic design will focus on a first professional degree. Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.
Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students' progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Graphic Design, College of Design, Iowa State University, Ames, IA 50011-3092.

**Curriculum in Graphic Design**

The Curriculum in Graphic Design leads to a 123.5 credit undergraduate Bachelor of Fine Arts in Graphic Design including the 30 credit core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 34 graduate credit program is offered leading to the Master of Arts specialized in Environmental Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework).

A 30 graduate credit program is offered leading to the Master of Arts specialized in Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in graphic design may be required to complete up to 18 additional credits of coursework).

A 60 graduate credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions see Graduate Study under Undergraduate Study on the Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay. Graduation into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

**Electives: 2 cr.**

Remaining electives sufficient to complete graduation requirements.

**Industrial Design**

http://www.design.iastate.edu/industrialdesign/index.php

**Undergraduate Study**

**B.J.D. Bachelor of Industrial Design** Students in this program take a carefully defined sequence of courses developed to give them exposure and practice in the areas of theory and skill required by industrial design. These include drawing, form development, history, creative thinking, engineering principles, research, design methodology, human factors, computer-aided design, manufacturing and commercial factors. In their third year, students will select electives from concentration tracks arranged around specialty areas and current issues in the profession. The upper level studio classes are reserved for study abroad, internships, and sponsored projects with students from other departments and colleges.

**Curriculum in Industrial Design**

The Curriculum in Industrial Design leads to a 132.5 credit undergraduate Bachelor of Industrial Design including the 30.5 credit core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.
Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 45 credit graduate post-professional graduate program is also offered leading to the degree Master of Industrial Design. (NOTE: Applicants without a degree or background in industrial design may be required to complete up to 18 additional credits of coursework.)

Total Degree Requirements: 132.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

ENGL 150 Critical Thinking and Communication (*) 3
ENGL 250 Written, Oral, Visual, and Electronic Composition (*) 3
L1B 160 Information Literacy 1

One of the following: 3

COMST 101 Introduction to Communication Studies
COMST 102 Introduction to Interpersonal Communication
CMS 286 Communicating with the Deaf
SP CM 110 Listening
SP CM 212 Fundamentals of Public Speaking
THTRE 251 Acting I

IND D 397 Industrial Design Internship
IND D 495 Study Abroad Option
IND D 507 Industrial Design Practicum

Total Credits 60

Concentration track electives: 9 cr.

Sequence of electives assembled to create a focused area of study.

See also: a 4-year plan of study grid showing course template by semester.

Graduate Study

The Master of Industrial Design (M.I.D.) is traditionally recognized as a terminal degree in industrial design for students with or without industrial design degrees or backgrounds. Applicants with an industrial design degree or background will take a minimum of 45 credits. Applicants with no industrial design degree or background will be required to take up to 18 additional credits for successful completion.

The graduate program is designed to offer the most relevant mix of skills and experience, including directed research programs, internships, international travel and industry-sponsored coursework. Program faculty will teach courses in design thinking, innovation, product development, project management, systems and service design, interaction, eco-design, social responsibility, and entrepreneurship.

ISU’s Master of Industrial Design (M.I.D.) program emphasizes strategy and innovation grounded in the synergy between research and practice. Students may choose to focus on the creation of new knowledge and culminate their graduate studies through a research-based thesis. Or, students may focus on the application of research in solving complex design problems and commercial issues of product realization that culminates in a final project followed by a written report. Students will also be able to explore advanced concepts in such areas as extended manufacturer responsibility, supply chain and logistics, international vendor relations, advanced materials and biopolymers, and alternative business models.

Integrated Studio Arts

http://www.design.iastate.edu/artvisualculture/index.php

The Department of Art and Visual Culture offers degree programs focused on visual art and visual culture and offers courses in art history, studio arts and art education. Degree offerings include the Bachelor of Arts in Art and Design, Bachelor of Fine Arts in Integrated Studio Arts and the Master of Fine Arts in Integrated Visual Arts.

Undergraduate Study

B.F.A. Integrated Studio Arts

Students select from studio options including ceramics, digital media, drawing, furniture design, illustration, jewelry and metalsmithing, scientific illustration, two- and three-dimensional mixed media, painting, photography, printmaking, textiles, and new technological genres. Over the four-year course of study students will develop a portfolio and prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem solving, critical thinking, and skill development, drawing on contemporary developments, historical and cultural theory, and studio practice.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

The department offers no minor but participates in the undergraduate minors in Classical Studies, Critical Studies in Design, Design Studies and Digital Media.

Undergraduate Curriculum

The Curriculum in Integrated Studio Arts leads to a 126.5 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts. Admission into the program requires the completion of at least 30.0 credits, including the following courses: DSN S 102, 110 or 115, 131, and 183; 6 credits of Social Sciences/Humanities;
6 credits Math/Science; ENGL 150 (or test-out credit); LIB 160. Review of the student’s portfolio and essay will also be significant factors.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the College of Design Core Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 126.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.
(C- or better grade)

Graduate Study

The department offers the Master of Fine Arts (M.F.A.) in Integrated Visual Arts. The M.F.A. curriculum in Integrated Visual Arts requires a minimum of 60 credits. The program of study includes seminar classes, a studio concentration, history and criticism courses, elective courses outside the department or area of study and the completion of a thesis exhibition or thesis.

M.F.A. graduates in Integrated Visual Arts link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio practice, business, higher education or new interdisciplinary fields. The M.F.A. is recognized as the terminal degree. A required thesis exhibition is composed of two parts: a substantial exhibition; and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

Studio Courses: 39 cr.

Courses numbered ARTIS | 27
Studio Courses outside of ISA | 6
Thesis/Orals | 6

Seminar Courses: 6 or 7 cr.

(student take 3 sections of ARTIS 571 or 2 sections of ARTIS 571 and ARTIS 511)

Interior Design

http://www.design.iastate.edu/interiordesign/index.php

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Interior Design, www.design.iastate.edu/interiordesign

B.F.A. Interior Design. Emphasis is on the student’s application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction and application of human factors. The curriculum is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional level education.
Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present their portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Critical Studies in Design, Design Studies, and Digital Media.

**Curriculum in Interior Design**

The Curriculum in Interior Design leads to a 129.5 credit undergraduate Bachelor of Fine Arts in Interior Design including a 30.5 credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance and a portfolio of original work.

A 34 graduate credit program is offered leading to the master of arts, for students planning to undertake professional or design research-orientated pursuits. (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program is also offered leading to the degree master of fine arts.

For more complete graduate program descriptions see Graduate Study under the degree master of fine arts.

Consideration for admission into the undergraduate Interior Design curriculum requires the completion of the 30.5 credit Core Design Program, including the following courses:

- DSN S 102 Design Studio I
- DSN S 115 Design Collaborative Seminar
- or DSN S 110 Design Exchange Seminar I
- DSN S 131 Design Representation
- DSN S 183 Design Cultures
- Six credits of Social Science/Humanities
- Six credits of Math/Science
- ENGL 150 Critical Thinking and Communication
- or ENGL 250 Written, Oral, Visual, and Electronic Composition
- LIB 160 Information Literacy

Admission is based on department resources and will be determined by a formal review at the end of the Core Design Program.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

**Total Degree Requirement: 129.5 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communication: 10 cr.**

(C- or better grade)

- ENGL 150 Critical Thinking and Communication
- ENGL 250 Written, Oral, Visual, and Electronic Composition
- LIB 160 Information Literacy

One course from the following:

- COMST 101 Introduction to Communication Studies
- COMST 102 Introduction to Interpersonal Communication
- CMDIS 286 Communicating with the Deaf
- SP CM 212 Fundamentals of Public Speaking

**Total Credits**

**Humanities: 6 cr.**

6 cr. from program curriculum sheet.

**Social Sciences: 6 cr.**

6 cr. from program curriculum sheet.

- ARTID 467 Interior Design Studio VI
- or DSN S 546 Interdisciplinary Design Studio
- ARTID 469 Advanced Studies in Interior Design

**Total Credits**

**Studio/Business Option: 6 cr.**

6 cr. from program curriculum sheet.

**Electives: 6 cr.**

Complete electives sufficient to complete graduation requirements.

See also: A 4-year plan of study grid showing course template by semester.

**Graduate Study**

The department offers the degrees of Master of Fine Arts (M.F.A.) in Interior Design, and Master of Arts (M.A.) in Art and Design, with degree specialization in interior design.
The M.A. in Art and Design with specialization in interior design requires a minimum of 34 credits including a studio concentration and work in research methods and human factors. Candidates focus on research in an area of specialization culminating in a written thesis comprised of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the PhD. Applicants without a degree in interior design may be required to complete up to 40 additional credits of course work. M.F.A. graduates in Interior Design are proficient in visual communication skills, design theory, human factors, and space planning. The M.F.A. degree is considered a terminal degree in the interior design field. The degree requires completion of a written thesis comprised of original research.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student's undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students' progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Interior Design, College of Design, Iowa State University, Ames, Iowa, 50011-3092

Landscape Architecture

Undergraduate Study

Landscape Architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. The department also cooperates in the undergraduate minor in Design Studies, Critical Studies in Design, and Digital Media.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester’s credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems. To enhance the study of landscape architecture in off-campus settings, the department requires students to choose from among the following three options during the spring and summer of their fourth year: a professional internship, an independent study abroad experience, or National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design’s Career Services Office.

Personal laptop/notebook computers and appropriate software are regularly used in classes starting with the second year.

The undergraduate curriculum is fully accredited by the Landscape Architecture Accreditation Board (LAAB) and provides the education which, combined with experience, is necessary for professional license.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Program of 30 credits and a four-year professional program of 119.5 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor’s and Master’s levels.

The department also offers a graduate program leading to the degrees of Master of Landscape Architecture or Master of Science in Landscape Architecture. For more complete graduate program descriptions, contact the department or go to the Graduate program link on the College of Design web page.

Total Degree Requirement: 149.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Electives: 13 cr.

Complete electives sufficient to complete graduation requirements.
See also: A 4-year plan of study grid showing course template by semester.

Graduate Study

The department offers two primary opportunities for professional and post-professional study: the M.L.A. degree, which provides the skills and knowledge for professional practice and the M.S.L.A. degree, which focuses on graduate-level research on the built environment. Minor work is offered to students taking major work in other departments.

The M.L.A. degree is a first professional degree in landscape architecture, for students with undergraduate degrees other than landscape architecture. Students enroll in a six-semester full-time program of coursework, some of which overlaps with the bachelor’s degree curriculum. However, graduate-level work is accomplished by a minimum of 30 credits of advanced courses, both required and elective, completed at the 500-level. This coursework also provides an opportunity to concentrate study in a topical area of practice, through elective courses and/or an optional thesis. Students’ concentrations—in areas such as history-theory, design-art; ecological design; or community design, etcetera—are determined by the student in conjunction with his/her major professor and will be designated in a program of study, to be completed by the end of his/her first year. Electives may be selected from within the department and college as well as from other departments across campus.

The M.L.A. program has recently been granted provisional accreditation by LAAB and is undergoing a required 3-year review for initial accreditation. Full accreditation status is expected after 2013. Students who graduate before the program’s full accreditation will be considered by LAAB to have graduated from an accredited program.

The M.S.L.A. is an unaccredited, research degree addressing landscape architecture as a scholarly endeavor. The degree is primarily intended as an advanced professional degree targeted at students already possessing an accredited first professional degree (B.L.A., B.Arch, M.Arch, etc.) and wishing to pursue in-depth, independent research. The M.S.L.A. is granted upon completion of 36 credits (at least 30 of which are completed at the 500-level) and the acceptance of a thesis or creative component. Periodically, students without accredited, first professional design degrees wish to complete an unaccredited master’s degree in landscape architecture. Such students may, in special cases, be allowed to pursue an M.S.L.A., provided they take an additional 12 credits of coursework, at least 6 of which must be an approved design studio, for a total of 48 hours of coursework.

Students may also enter a special program to earn both the M.L.A. and the master of community and regional planning (M.C.R.P.) degrees. Students interested in the double degree M.L.A./M.C.R.P. program should contact the departments to receive a detailed description of requirements. The department also teaches in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

Design Studies

Interdepartmental Undergraduate Program

http://design.iastate.edu

The Design Studies programs bring together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design, art, and planning fields.

Core Design Program

Four Design Studies courses constitute the Core Design Program: Design Studio I (Dns S 102), Design Representation (Dns S 131), Design Cultures (Dns S 185) and Design Collaborative (Dsn S 115). Full or partial credit of the Core Design program is required for all undergraduate students in the College of Design.

Minor—Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.

Minor—Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multidisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minor—Digital Media

The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of design, art, and planning. This minor is open to all undergraduate students at Iowa State University.

Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

Bachelor of Design

The Bachelor of Design is a 122.5 credit undergraduate degree program focused on the interdisciplinary nature of design and the power of the design studio as a place and method for generating ideas and solving problems. The core of the degree program is a series of forums and studios intended to connect history, theory and practice, and give students hands-on experience grappling with design challenges that vary in complexity and scale.

The Bachelor of Design offers opportunities for students to engage design thinking in a collaborative environment focused on addressing contemporary real-world problems and opportunities. Thematic course modules taught by faculty in multiple disciplines will incorporate methods that artists, designers, and planners use to creatively address contemporary issues such as sustainable living environments, energy efficiency, water and food systems, transportation networks, climate change, and social entrepreneurship. Graduate of this degree are not design professionals but the curriculum prepares students to work as part of a team in a variety of disciplinary settings from design professions to journalism, business, law, engineering, arts, and public service. To that end, the
The Master of Urban Design (M.U.D.) is an advanced, interdisciplinary program of study that focuses on contemporary challenges of urbanism at local, regional and global scales. The program is geared toward students with previous professional study that focuses on contemporary built environment.

In this three-semester (summer, spring, fall), 36-credit degree program, students integrate design into the understanding and framing of urbanized environments by engaging directly in a community of inquiry and practice—learning to create more adaptable, flexible and resilient cities and regions within the context of a changing world.

Through this program, students will:

• gain knowledge of new practices, technologies, and methods of urban design.
• learn advanced thinking skills and integrate concepts, ideas and approaches in a team-based, interdisciplinary design process, and
• acquire knowledge and skills that support professional leadership in research and design work focused on local, regional and global issues in the contemporary built environment.

Application information is available at http://www.design.iastate.edu/urbananddesign.php

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students’ critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, and mechanical engineering.

For more information, refer to the graduate study sections for each engineering program.
Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

**Joint Undergraduate Programs**

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

**Accreditation**

Twelve undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. These twelve programs are: aerospace, agricultural, biological systems, chemical, civil, computer, construction, electrical, industrial, materials, mechanical and software engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

**Organization of Curricula**

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences. Students should complete the requirements of the basic program before proceeding to a professional program.

**Preparation for the Engineering Curricula**

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

**Requirement for Entry into Professional Program**

Students enrolled in the College of Engineering must satisfy the following requirements before enrolling in the professional courses (200-level and above) offered by departments in the Engineering College:

1. Completion of the basic program with a minimum grade point average of 2.00 in the basic program courses.
2. A minimum grade point average of 2.00 for all courses taken at Iowa State University.
3. The College of Engineering requires a grade of C or better for any transfer credit course that is applied to the Basic Program.

The following are the only exceptions to this rule:

a. Students who have completed all of their coursework while enrolled in the College of Engineering, but have not met the three basic program requirements, may enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering.

b. Students transferring to the College of Engineering from another college or university, or from a program outside this college, who have not met the three basic program requirements may also enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering. However, they may be granted an additional semester upon review by the college.

c. Iowa State students not pursuing an engineering degree may generally take engineering courses without restrictions provided they meet the prerequisites and space is available.

d. Only the first two semesters of 200-level and above engineering courses, taken at ISU while a student is not enrolled in the College of Engineering, can be applied toward an engineering degree.

**Requirement for Graduation**

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

**Engineering Minors**

The College of Engineering offers four undergraduate minors which are open only to students in the College of Engineering. These are minors in biomedical engineering, energy systems, engineering sales and nondestructive evaluation. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The biomedical engineering minor is a 16 credit interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Biomedical Engineering in Courses and Programs.

The energy systems minor is a 15 credit program that provides engineering students with focused educational opportunities in the broad area of energy systems. Students will understand broad energy perspectives, the language of energy systems and the economic, environmental, and policy issues related to energy. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Energy Systems in Courses and Programs or see http://www.me.iastate.edu/energy-systems-minor/.

The engineering sales minor is a 15 credit minor that complements the technical training in the student’s major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) open to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

**Engineering Minor (Interdisciplinary)**

The College of Engineering offers undergraduate minors in wind energy and nuclear engineering which are open to all students at ISU who meet the prerequisites. The wind energy minor is a 15 credit minor which enables students to acquire an interdisciplinary knowledge of the wind energy industry. There are two required courses; the remaining credits are chosen from a list of elective courses that are related to wind energy. The minor is administered by a supervisory faculty committee from several departments. For minor course requirements, refer to Wind Energy Minor in Courses and Programs. The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also transfer courses that have been evaluated as substitutes for ISU courses may be used toward the minor.

For minor course requirements, refer to Nuclear Engineering in Courses and Programs.

**Undergraduate Majors and Minors Outside the College of Engineering**

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.
Advising System
The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to provide a resource contact person for students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. Transfer students may also complete orientation online. All entering students are encouraged to attend orientation which includes meeting with an academic adviser to register for classes. Placement assessments given during the orientation program help determine the student’s current level of proficiency which enables the academic adviser to prepare an appropriate course schedule for the student.

Special Programs
All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering’s International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional year to complete curriculum requirements. These programs are arranged so that the student alternates academic work with employment periods. The student has the opportunity to assess career paths within his/her chosen curriculum and the employer evaluates the student's potential as a future full-time employee. Both domestic and international co-op programs are available.

Cooperative education students pay no tuition or fees to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (298, 398, or 498) for each work period and are considered full-time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for one semester per academic year while maintaining his/her status as a full-time student. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the internship program will require an additional semester to complete curriculum requirements. Internship students pay no tuition or fees to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (397) for a fall or spring semester work period (396) for the summer term are considered to be full-time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Engagement. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

The College of Engineering has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study abroad, visit the Engineering International Engagement website: http://www.engineering.iastate.edu/studyabroad/

Engineering

Basic Program for Professional Engineering Curricula
The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor’s degree in a minimum time.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing MATH 143 Preparation for Calculus before enrolling in MATH 168 Calculus II.

The Department of English may recommend placement in one or more sections of ENGL 099 or ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates deficiencies. Satisfactory completion of the recommended English course(s) will be required of students to complete their Basic Program.

Basic Program
(A minimum GPA of 2.00 required for this set of courses, including any transfer courses).

S E 185  Problem Solving in Software Engineering

Total Credits 27

ENGL 250 Written, Oral, Visual, and Electronic Composition is normally taken in the second year. However, students who advance place into this course may be able to enroll during their first year. Credit for ENGL 150 Critical Thinking and Communication is earned upon successful completion of ENGL 250 Written, Oral, Visual, and Electronic Composition, but only when ENGL 250 Written, Oral, Visual, and Electronic Composition is completed at Iowa State. In addition to the basic program courses listed above, curriculum designated courses normally taken the first year of each engineering curricula are listed below.

The student’s adviser may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable.

**Students planning to enroll in C E, Ch E, or Mat E will find CHEM 177 General Chemistry I to be a better preparation for CHEM 178 General Chemistry II. However CHEM 167 General Chemistry for Engineering Students, is accepted as a substitute for CHEM 177 General Chemistry I for those students declaring one of these curricula after having completed CHEM 167 General Chemistry for Engineering Students.**

**Recommended choices by program:**

Credit hours for graduation will be given for any one of the following without increasing a curriculum’s minimum number of credits required for graduation:

- **SSH Electives**
- **R** indicates required courses.
achieved this by:

or be actively pursuing an advanced degree in graduate school. They will have become actively contributing, valued engineers showing professional growth.

Within three to five years after graduation, Aerospace Engineering alumni will have become actively contributing, valued engineers showing professional growth.

Program Educational Objectives:

- Multi-disciplinary, advanced technology problems.
- Industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.
- Development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, structural, and transportation challenges play major roles.

Make To Innovate (M:2:I) is an exciting new program in the Aerospace Engineering Department that engages students in hands-on projects to augment their understanding of engineering fundamentals.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended for students who participate in alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years.

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement:

The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

Within three to five years after graduation, Aerospace Engineering alumni will have become actively contributing, valued engineers showing professional growth or be actively pursuing an advanced degree in graduate school. They will have achieved this by:

- Utilizing their strong foundation in science, mathematics and engineering.
- Demonstrating teamwork, leadership, and integrity.
- Being aware of the societal, economic and environmental impact of their work.
- Demonstrating critical thinking and effective communication skills.
- Ensuring superior quality, customer satisfaction, and safety outcomes in their work.

Curriculum in Aerospace Engineering

Leading to the degree bachelor of science.

Total credits required: 129.0.

Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

International Perspectives 1: 3 cr.

U.S. Diversity 1: 3 cr.

Communication Proficiency/Library requirement:

ENGL 150 Critical Thinking and Communication (C or better in this course) 3

ENGL 250 Written, Oral, Visual, and Electronic Composition (C or better in this course) 3

Approval by department required

LIB 160 Information Literacy 1

General Education Electives: 15.0 cr

Complete 15 cr. including a series. A series of at least two courses must be taken to fulfill this requirement. General Education Electives are requirements for graduation so may not be taken on a P-NP basis.

Basic Program: 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses. See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167 General Chemistry I 4 or CHEM 177L Laboratory in General Chemistry I 4

ENG 150 Critical Thinking and Communication 3

ENG 250 Written, Oral, Visual, and Electronic Composition 3

ENGR 101 Engineering Orientation R or AER E 101H Engineering Honors Orientation 1

AER E 160 Aerospace Engineering Problems With Computer Applications Laboratory 3

LIB 160 Information Literacy 1

MATH 165 Calculus I 4

MATH 166 Calculus II 4

PHYS 221 Introduction to Classical Physics I 5

Total Credits 27

Math and Physics Science: 13 cr.

MATH 265 Calculus III 4

MATH 267 Elementary Differential Equations and Laplace Transforms 4

PHYS 222 Introduction to Classical Physics II 5

Total Credits 13

Aerospace Engineering Core: 44 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses:

AER E 261 Introduction to Performance and Design 3

AER E 310 Aerodynamics I: Incompressible Flow 3

AER E 311 Aerodynamics II: Compressible Flow 3

AER E 321 Flight Structures Analysis 3

AER E 331 Flight Control Systems I 3

AER E 322 Aerospace Structures Laboratory 2

AER E 344 Aerodynamics and Propulsion Laboratory 3

Iowa State University – 2015-2016

117
### AER E 351
Astrodynamics I

### AER E 355
Aircraft Flight Dynamics and Control

### AER E 411
Aerospace Vehicle Propulsion I

### AER E 421
Advanced Flight Structures

### AER E 461
Modern Design Methodology with Aerospace Applications

### AER E 462
Design of Aerospace Systems

### E M 324
Mechanics of Materials

**Graduate Study**

The department offers graduate programs that lead to the degrees master of engineering, master of science, and doctor of philosophy with major in aerospace engineering and minor work to students taking major work in other departments. For all graduate degrees, it is possible to establish a co-major program with another graduate degree-granting department within the aerospace program. Students can specialize in one or more of the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

### Master of Science and Master of Engineering

The Master of Science degree requires a thesis and has strong research emphasis. The Master of Science degree is recommended for students who anticipate entering a doctoral program later. The Master of Engineering degree does not require either research credits or a thesis and is intended for students who do not anticipate pursuing a doctoral degree. The Master of Engineering degree can be completed with coursework only or with a combination of coursework and creative component. Credits for creative component will be obtained by registering for AerE 599 Creative Component. A written report and an oral presentation will be given to the student’s graduate committee.

At least 30 credits of acceptable graduate work are required for both the Master of Science and the Master of Engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf).

### Bachelor of Science/Master of Science Concurrent Degree Program

The department offers concurrent BS/MS and BS/ME degree programs (http://www.aere.iastate.edu/students/concurrent-degrees) and a concurrent BS/MBA degree program which offers an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master’s degree before completing a bachelor’s degree. The concurrent degree programs reduce by one year the normal time period for completing both degrees separately.

### Preparation for Graduate Work

The normal prerequisite for major graduate work in aerospace engineering is the completion of an undergraduate curriculum substantially equivalent to that required of aerospace engineering students at this university. Due to the diversity of interests of aerospace faculty, students whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite aerospace background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses are offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

### Graduate Minor Work

Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

### Agricultural Engineering

#### Undergraduate Study

For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Program Criteria for Agricultural Engineering Programs by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

### Curriculum Educational Goal, Objectives, and Learning Outcomes:

**Goal:** To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

---

### Nondestructive Evaluation (NDE)

The NDE Minor (http://catalog.iastate.edu/collegeofengineering/non-destructiveevaluationengineering) is multidisciplinary and open to undergraduates in the College of Engineering.
Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their agricultural engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Student Outcomes: At graduation, students will have developed and demonstrated these outcomes:

(a) an ability to apply knowledge of mathematics, science, and engineering;
(b) an ability to design and conduct experiments, as well as to analyze and interpret data;
(c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
(d) an ability to function on multidisciplinary teams;
(e) an ability to identify, formulate, and solve engineering problems;
(f) an understanding of professional and ethical responsibility;
(g) an ability to communicate effectively;
(h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
(i) a recognition of the need for, and an ability to engage in life-long learning;
(j) a knowledge of contemporary issues;
(k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a bachelor of science curriculum in biological systems technology and in industrial technology. Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. A concurrent bachelor of science and master of business administration program is also offered by the department. Refer to Graduate Study for more information.

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering. Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.

International Perspectives: 3 cr. ¹

Power and Machinery Engineering Option: 40 cr.

- A B E 340: Functional Analysis and Design of Agricultural Field Machinery
- A B E 342: Agricultural Tractor Power
- A B E 413: Fluid Power Engineering
- AGRON 154: Fundamentals of Soil Science
- E M 345: Dynamics
- BIOL 251: Biological Processes in the Environment
- or BIOL 211
- E M 378: Mechanics of Fluids
- MAT E 273: Principles of Materials Science and Engineering
- M E 324: Manufacturing Engineering
- M E 324L: Manufacturing Engineering Laboratory

Total Credits: 40

Land and Water Resources Engineering Option: 40 cr.

- A B E 408: GIS and Natural Resources Management
- A B E 431: Design and Evaluation of Soil and Water Conservation Systems
- AGRON 154: Fundamentals of Soil Science
- BIOL 251: Biological Processes in the Environment
- or BIOL 211: Introductory Microbiology Laboratory
- C E 326: Principles of Environmental Engineering
- C E 372: Engineering Hydrology and Hydraulics
- E M 378: Mechanics of Fluids
- GEO 201: Geology for Engineers and Environmental Scientists
- MICRO 201: Introduction to Microbiology
- MICRO 201L: Introductory Microbiology Laboratory

Structures Elective

- A B E 472: Design of Environmental Modification Systems for Animal Housing (offered Spring even years)
- A B E 478: Wood Frame Structural Design (offered Spring odd years)

Subsurface Systems Elective

- C E 360: Geotechnical Engineering
- C E 473: Groundwater Hydrology

Water Quality Elective

- A B E 432: Nonpoint Source Pollution and Control
- A B E 436: Design and Evaluation of Soil and Water Monitoring Systems (offered Spring even years)
- A B E 537: Total Maximum Daily Load (TMDL) Development and Implementation

Animal Science Elective

- AN S 223: Poultry Science
- AN S 225: Swine Science
- AN S 226: Beef Cattle Science
- AN S 229: Sheep Science
- AN S 235: Dairy Cattle Science

Computer Graphics (One of the following)

- A B E 271: Engineering Applications of Parametric Solid Modeling
- A B E 272: Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER
- A B E 273 CAD for Process Facilities and Land Use Planning (Preferred)

A B E Elective

- A B E 424: (3 different 1cr courses)
- A B E 424A: Air Pollution: Air quality and effects of pollutants
- A B E 424B: Air Pollution: Climate change and causes
- A B E 424C: Air Pollution: Transportation Air Quality
- A B E 424D: Air Pollution: Off-gas treatment technology
- A B E 424E: Air Pollution: Agricultural sources of pollution
- A B E 469: Grain Processing and Handling
- A B E 480: Engineering Analysis of Biological Systems

Total Credits: 40

Animal Production Systems Engineering Option: 40 cr.

- A B E 469: Grain Processing and Handling
- A B E 472: Design of Environmental Modification Systems for Animal Housing (offered Spring even years)
- A B E 475: Practicum in Animal Production Systems
- A B E 478: Wood Frame Structural Design (offered Spring odd years)
- C E 332: Structural Analysis I
- BIOL 251: Biological Processes in the Environment
- or BIOL 211
- C E 333: Structural Steel Design I
- C E 334: Reinforced Concrete Design I
- E M 378: Mechanics of Fluids
- M E 436: Heat Transfer

Technical elective

- A B E 271: Engineering Applications of Parametric Solid Modeling
- A B E 272: Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER
- A B E 273 CAD for Process Facilities and Land Use Planning (preferred)

Total Credits: 40

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. Diversity, International Perspectives and Social Science/Humanities courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (http://www.abe.iastate.edu/undergraduate-students/agricultural-engineering/ae-curricula)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester for an agricultural power and machinery option in Agricultural Engineering.

See also: A 4-year plan of study grid showing course template by semester for a land and water resources engineering option in Agricultural Engineering.
See also: A 4-year plan of study grid showing course template by semester for an animal production systems engineering option in Agricultural Engineering.

**Graduate Study**

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at [http://www.abe.iastate.edu/](http://www.abe.iastate.edu/).

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

**Biological Systems Engineering**

**Undergraduate Study**

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Program Criteria for Biological Systems Engineering Programs by the Engineering Accreditation Commission of ABET, [http://www.abet.org/](http://www.abet.org/).

**Curriculum Educational Goal, Objectives, and Learning Outcomes**

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

**Goal:** To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

**Program Educational Objectives:** Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

**Student Outcomes:** At graduation, students will have developed and demonstrated:

- (a) an ability to apply knowledge of mathematics, science, and engineering;
- (b) an ability to design and conduct experiments, as well as to analyze and interpret data;
- (c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- (d) an ability to function on multidisciplinary teams;
- (e) an ability to identify, formulate, and solve engineering problems;
- (f) an understanding of professional and ethical responsibility;
- (g) an ability to communicate effectively;
- (h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- (i) a recognition of the need for, and an ability to engage in life-long learning;
- (j) a knowledge of contemporary issues;
- (k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent bachelor of science and master of business administration program is also offered by the department.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering, Curricula. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences, Curricula. The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

**Curriculum in Biological Systems Engineering**

Administered by the Department of Agricultural and Biosystems Engineering. Leading to the degree bachelor of science.

**Total credits required:** 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.

**International Perspectives:** 3 cr.

**U.S. Diversity:** 3 cr.

**Communication Proficiency/Library requirement:** (Minimum GPA of 2.00 in this set of courses.)

### Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
2. U.S. Diversity, International Perspectives and Social Science/Humanities courses may not be taken Pass/Not Pass.
3. Choose from department approved list. (http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula)
4. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester for Biological Systems Engineering.

### Graduation Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27.
For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

**Chemical Engineering**

www.cbe.iastate.edu

**Administered by the Department of Chemical and Biological Engineering**

**Undergraduate Study**

For undergraduate curriculum in chemical engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and the Chemical Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products, chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer’s influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates that have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments; and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and societal context, and recognition of the need for, and an ability to engage in life-long learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, chemical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

**Program Educational Objectives**

The objectives of the Chemical Engineering Program at Iowa State University are to produce graduates who:

- will excel in careers as professional chemical engineers in the businesses and industries related to chemical engineering; and

- will successfully pursue research and advanced studies in chemical engineering, or in related fields such as chemistry or biology, or in related professional fields such as medicine, law, and business.

**Biological Engineering Option**

Students may enhance their academic preparation for the growing opportunities in the biologically-related industries by pursuing a selection of courses with a biological emphasis.

**Cooperative Education**

A cooperative education program is available to students in chemical engineering.

**Curriculum in Chemical Engineering**

Administered by the Department of Chemical and Biological Engineering

Leading to the degree bachelor of science.

Total credits required: 129 cr. See also Basic Program and Special Programs.

Total Credits: 30

Other Remaining Courses: 21 cr.

1. Choose from department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks) for approved course substitutions for BBMB 301.

Biological Engineering Option

The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering:

- The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering: 
  - Math and Physical Science – BBMB 404 Biochemistry I or BIOL 313 Principles of Genetics, 3 cr., may be substituted for BBMB 301 Survey of Biochemistry from list above when taken with BBMB 405 Biochemistry II or BIOL 314 Principles of Molecular Cell Biology, respectively. BBMB 420 must be taken in combination with BBMB 301.
  - Chemical Engineering Core – Replace CH E 426 Chemical Engineering Laboratory II, 2 cr. with CH E 427 Biological Engineering Laboratory, 2 cr. in required Core.

Other Remaining Courses for Biological Engineering Option

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. Undergraduate diversity and international perspectives courses may not be taken on a Pass-Not Pass basis.
2. Choose from department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in this category at the 300-level or above to qualify for the B.S. degree in chemical engineering.
3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and either a master of science in Civil Engineering or a master of business administration in the College of Business Administration. These students would have an opportunity to graduate in five years with both degrees.

### Graduate Study

The Department of Civil, Construction and Environmental Engineering offers work for the master of engineering, master of science, and doctor of philosophy degrees with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, and transportation engineering. The department also offers graduate minors of 9 to 15 credits of coursework to students from other engineering departments.

Candidates for the degrees of master of engineering and master of science are required to satisfactorily complete a total of 30 credits of acceptable graduate work. The master of engineering degree involves all course work. The master of science degree requires the preparation of a thesis or creative component. Candidates for the doctor of philosophy degree refer to the department’s home page and/or the department’s Graduate Student Handbook for degree options and credit requirements. The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of engineering students at this university. However, because of the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student’s background and area of interest. A prospective graduate student is urged to specify the degree program and area of specialization in which he or she is interested on the application for admission. The department participates in the interdepartmental majors in transportation (master of science only), environmental science, and biorenewable resources and technology (see Index).

The Department of Civil, Construction and Environmental Engineering (CCEE Department) offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 credits, including nine credits of “core courses” and three credits of “elective courses” from approved CCEE Department lists.

For the environmental engineering and environmental systems certificates, each certificate requires the completion of four courses of three credits each and at least two of these courses shall be from an approved “core course” CCEE Department list and the remaining courses may be selected from an approved “elective courses” CCEE Department list. These courses are offered by different departments at Iowa State University. These two certificates also require the completion of a seminar course, C E 591 Seminar in Environmental Engineering, or any equivalent to be approved by the Environmental Engineering graduate faculty.

For additional requirements for these three certificates, refer to the document that describes each graduate certificate. These documents are available from the Department of Civil, Construction, and Environmental Engineering.

### Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

**Total credits required: 129. Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.**

**Note:** Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

CHEM 231L Laboratory in Elementary Organic Chemistry 1
GEOI 201 Geology for Engineers and Environmental Scientists 3
MATH 165 Calculus III 4
MATH 266 Elementary Differential Equations 3
MICRO 201 Introduction to Microbiology 2

Notes.
1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (http://www.ccee.iastate.edu/academics/advising/civil-engineering-student-forms)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. Students who transfer in with CHEM 167 General Chemistry for Engineering Students/CHEM 167L Laboratory in General Chemistry for Engineering will be able to take CHEM 178 General Chemistry II/CHEM 178L Laboratory in College Chemistry II to complete the program’s Chemistry requirement.

Computer Engineering

www.ece.iastate.edu

Administered by the Department of Electrical and Computer Engineering
Undergraduate Study

For the undergraduate curriculum in computer engineering leading to the degree Bachelor of Science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software systems, embedded systems, networking, information security, computer architecture, and VLSI. Students also may take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

The program objectives for the computer engineering programs describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the computer engineering program at Iowa State University are:

• Graduates, within five years of graduation, should demonstrate peer-recognized expertise together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of computer and software systems, including system integration and implementation.

• Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.

• Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self study.

• Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.

• Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

Curriculum in Computer Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 127 See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement:

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The Master of Engineering degree is course-work only. It is recommended for off-campus students.

The Master of Science degree with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers three graduate certificate programs in embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering also is a participating department in the interdepartmental certificate, Master of Engineering, and Master of Science in Information Assurance programs. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.
The degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.

2. See Basic Program for Professional Engineering Curriculum for accepted substitutions for curriculum designated courses in the Basic Program.

3. From department approved lists. (http://www.ece.iastate.edu/academics/bachelors-degree-requirements)

See also: A 4-year plan of study and showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

**Construction Engineering**

Administered by the Department of Civil, Construction and Environmental Engineering

**Undergraduate Study**

For curriculum in construction engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Construction Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science. By three to five years after graduation, graduates of the construction engineering program will have:

1. Established themselves in successful careers in construction engineering, or a related field.

2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.

3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer's plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

- interact with practicing professionals.
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- develop leadership skills by participating in student organizations.
- develop, analyze, and interpret alternative solutions to open-ended problems.
- study abroad.

**Math and Physical Science: 20 cr.**

- **Total Credits: 27**

**Computer Engineering Core: 33 cr.**

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses).

- **Total Credits: 20**

**Other Remaining Courses: 32 cr.**

- **Total Credits: 33**

**Seminar/Co-op/Internships:**

- **Total Credits: 32**

**Co-op or internship is optional.**

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

**Transfer Credit Requirements**

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.

2. See Basic Program for Professional Engineering Curriculum for accepted substitutions for curriculum designated courses in the Basic Program.

3. From department approved lists. (http://www.ece.iastate.edu/academics/bachelors-degree-requirements)

See also: A 4-year plan of study and showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

**Construction Engineering**

Administered by the Department of Civil, Construction and Environmental Engineering

**Undergraduate Study**

For curriculum in construction engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Construction Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science. By three to five years after graduation, graduates of the construction engineering program will have:

1. Established themselves in successful careers in construction engineering, or a related field.

2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.

3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer’s plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

**Construction Engineering**

Administered by the Department of Civil, Construction and Environmental Engineering

**Undergraduate Study**

For curriculum in construction engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Construction Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science. By three to five years after graduation, graduates of the construction engineering program will have:

1. Established themselves in successful careers in construction engineering, or a related field.

2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.

3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer’s plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

- interact with practicing professionals.
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- develop leadership skills by participating in student organizations.
- develop, analyze, and interpret alternative solutions to open-ended problems.
- study abroad.
The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship program to supplement academic work with work experience.

Construction engineering students are encouraged to participate in life-long learning, continuous professional development, and to achieve professional engineer registration and/or registration as a certified professional constructor. Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering Graduate Study for more information.

Graduate Study
An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. See Civil Engineering, Courses and Programs.

A graduate certificate is also available which requires 12 credits:

Electrical Engineering  
Undergraduate Study  
For the undergraduate curriculum in electrical engineering leading to the degree Bachelor of Science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.  
The Department of Electrical and Computer Engineering (ECoE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.  
The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective...
courses in computer networking, security, computer architecture, digital systems, and software.

The program objectives for the electrical engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the electrical engineering program at ISU are:

- Graduates, within five years of graduation, should demonstrate peer-recognized expertise together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of electrical and electronic devices and systems.
- Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECPE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Courses for students who are not in the electrical engineering program: E E 442 Introduction to Circuits and Instruments, E E 448 Introduction to AC Circuits and Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

**Graduate Study**

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in power systems engineering.

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental graduate minor in complex adaptive systems. Students interested in this program should see the Complex Adaptive Systems section of the catalog for requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s website.

**Curriculum in Electrical Engineering**

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

**Total credits required:** 128 See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

**International Perspectives:** 3 cr. ¹

**U.S. Diversity:** 3 cr. ¹

**Communication Proficiency/Library requirement:**

- ENGL 150 Critical Thinking and Communication (C or better in this course) 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition (C or better in this course) 3
- LIB 160 Information Literacy 1
- One of the following: 3
  - ENGL 314 Technical Communication (C or better in this course)
  - ENGL 309 Report and Proposal Writing (C or better in this course)

**General Education Electives:** 15 cr. ³

Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

**Basic Program:** 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses. See Requirement for Entry into Professional Program in College of Engineering Overview section.

- CHEM 167 General Chemistry for Engineering Students 4
- or CHEM 177 General Chemistry I
- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- ENGR 101 Engineering Orientation R
- E E 185 Introduction to Electrical Engineering and Problem-Solving I ² 3
- LIB 160 Information Literacy 1
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4
- PHYS 221 Introduction to Classical Physics I 5

Total Credits 27
Math and Physical Science: 16 cr.
- MATH 265 Calculus III 4
- MATH 267 Elementary Differential Equations and Laplace Transforms 4
- MATH 207 Matrices and Linear Algebra 3
- PHYS 222 Introduction to Classical Physics II 5

Total Credits 16

Electrical Engineering Core: 41 cr.
(A minimum GPA of 2.00 required for this set of courses, including any transfer courses).
- E E 285 Problem Solving Methods and Tools for Electrical Engineering 4
- CPR E 281 Digital Logic 4
- CPR E 288 Embedded Systems I: Introduction 4
- E E 201 Electric Circuits 4
- E E 230 Electronic Circuits and Systems 4
- E E 224 Signals and Systems I 4
- E E 303 Energy Systems and Power Electronics 3
- E E 311 Electromagnetic Fields and Waves 4
- E E 322 Probabilistic Methods for Electrical Engineers 3

Core Elective: one of the following:
- E E 321 Communication Systems I 7
- E E 324 Signals and Systems II 7

Core Elective: one of the following:
- E E 330 Integrated Electronics 3
- E E 332 Semiconductor Materials and Devices 3

Total Credits 41

Note: E E 321 and E E 332 are 3-credit courses, whereas E E 324 and E E 330 are 4-credit courses. The core credit requirement (41 credits) assumes 7 credits taken for these options. Any core credit surplus or deficiency can be used as credits for E E technical electives.

Other Remaining Courses: 29 cr.
- E E 491 Senior Design Project I and Professionalism 3
- E E 492 Senior Design Project II 2
- I E 305 Engineering Economic Analysis 3

One of the following:
- ENGL 309 Report and Proposal Writing (C or better in this course) 3
- ENGL 314 Technical Communication (C or better in this course) 3

E E/Cpr E Technical Electives including one approved sequence 3

Elective from Math, E E, Cpr E and/or non-E E/Cpr E 6

Total Credits 29

Seminar/Co-op/Internships:
- E E 166 Professional Programs Orientation R
- E E 294 Program Discovery R
- E E 394 Program Exploration R
- E E 494 Portfolio Assessment R

Co-op or internship is optional

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

Total Credits 15

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study
The department offers programs for the degrees master of engineering, master of science and doctor of philosophy with a major in industrial engineering. A formal minor is available at the M.S. and Ph.D. levels to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in industrial engineering. The M.S. and Ph.D.
degrees are designed to improve the student’s capability to conduct research as well as their professional expertise.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution. Because of the diversity of industrial engineering topics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering; e.g., mathematics or physics. However, completion of a math sequence of calculus through differential equations is required.

With the help of a program of study committee, a graduate student develops an educational program in areas within industrial engineering. Typical areas of concentration include ergonomics/human factors, engineering management, human computer interfaces, advanced manufacturing, systems engineering, operations research, and information engineering.

The department offers a certificate in advanced manufacturing, in collaboration with the mechanical engineering department, which consists of four graduate courses selected from an approved list in both departments.

For additional information about graduate degree programs, admission criteria, and procedures refer to https://www.imse.iastate.edu/graduate-program/.

Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree bachelor of science.

Total credits required: 122 cr. See also Basic Program and Special Programs. Grades of C or better are required for any transfer credit course that is applied to the degree program. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. 1

U.S. Diversity: 3 cr. 1

Communication Proficiency/Library requirements:

ENGL 150 Critical Thinking and Communication (C or better in this course) 3
ENGL 250 Written, Oral, Visual, and Electronic Composition (C or better in this course) 3
LIB 160 Information Literacy 1

Remaining Communication courses: 6 cr.

ENGL 314 Technical Communication 3
SP CM 212 Fundamentals of Public Speaking 3
Total Credits 6

Social Sciences and Humanities Electives: 12 cr. 2

Six of twelve credits must be from 200-level or above courses. Six credits must be sequential or related courses.

Basic Program: 27 cr. 3

A minimum GPA of 2.00 required for this set of courses, including any transfer courses. See Requirement for Entry into Professional Program in College of Engineering Overview section.

Optional co-op/internship courses

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also the following grid showing course template by semester: 4-Year Plan of Study for Industrial Engineering. (http://catalog.iastate.edu/planofstudy/engineering/industrial_engineering_bs)

Materials Engineering

Undergraduate Study

For the undergraduate curriculum in materials engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and the Materials Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org/. Materials engineering is a broadly-based discipline relating the composition, structure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies
The objectives of the materials engineering program are to produce graduates who:

- practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
- engage in advanced study in materials and related or complementary fields

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates will have gained experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research work. They will have hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, design, and professional practice experience. Students tailor their programs to their goals and interests through the selection of a specialization from the three available: ceramic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

The department also offers a cooperative education program that combines classroom learning with work experience.

Well qualified juniors in materials engineering who are interested in graduate study may apply for concurrent enrollment during their senior year in the Graduate College to simultaneously pursue both bachelor of science and master of science degrees. See Materials Science and Engineering for more information.

Seminar/Co-op/Internships
MAT E 401 Materials Engineering Professional Planning R
Co-op and internships are optional
1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

See also: A 4-year plan of study grid showing course template by semester.

Materials Science and Engineering
Graduate Study
The department offers work toward the following advanced degrees: Master of Engineering in Materials Science and Engineering, Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.
Built on a foundation of thermodynamics, kinetics of phase transformations, mechanical behavior, physical properties, solid state science, and the structure and chemistry of materials, the graduate program offers advanced studies in many areas of materials science and engineering, including the design and control of materials for structural, electronic, photonic, magnetic, optical, and biological functionality. Graduates of the program have a fundamental understanding of the critical aspects of the field and how they are applied to real materials systems. The program is highly flexible and research-oriented, where students work carefully with their major professor in tailoring the various academic and research components to meet their interests.
With the ability to address complex problems in materials science while considering the various constraints inherent to both academic and industrial environments, our graduates are well prepared for a wide range of academic and research-related careers. They are skilled in carrying out independent and collaborative research, able to communicate effectively in formal and informal settings, and are proficient at writing persuasive technical articles and grant proposals.
The department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, and the Center for Advanced Technology Development. These laboratories offer excellent resources and opportunities for graduate student research.
Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program where students may simultaneously pursue both master of science and bachelor of science degrees.
The requirements for the M. Eng., M.S. and Ph.D. degrees are established by the student’s program of study committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research (M.S. and Ph.D. only), proposal (M.S. and Ph.D. only), preliminary oral examination (Ph.D. only), dissertation (M.S. and Ph.D. only), and a final oral examination (M.S. and Ph.D. only). Academic coursework requirements include 31 credits for the M.Eng., 21 credits for the M.S. degree and 32 credits for the Ph.D., with additional specific rules for choices available from the department.

There are no foreign language requirements for any of the graduate degrees administered by the Department of Materials Science and Engineering. Graduate students wishing to declare a formal minor in materials science and engineering will have at least one materials science and engineering faculty member serving on their program of study committee. For the M. Eng., M.S. and Ph.D. degrees, they will take a minimum of 8 materials science and engineering course credits for the M. Engr. or M.S. degrees and a minimum of 12 materials science and engineering course credits for the Ph.D. degree.

Mechanical Engineering
Undergraduate Study
For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Mechanical Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org/.
Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing devices and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are used in research, development, design, testing, production, technical sales, technical management, as well as medicine, law, and business. Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Mechanical engineers are employed in a wide range of industries; examples include agricultural/heavy equipment, biomedical, consulting, energy and power, manufacturing, product design and transportation.
The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:
1. Graduates will have utilized a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will have become effective collaborators and innovators, leading or participating in efforts to address social, technical and business challenges.
3. Graduates will have engaged in life-long learning and professional development through self-study, continuing education or graduate and professional studies in engineering, business, law or medicine.
The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. The mechanical engineering disciplinary areas emphasized are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student’s unique educational goals, whether they include immediate entry into industry or further professional or graduate study.
A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum. Students also develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.
Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Energy Systems Minor
http://www.me.iastate.edu/energy-systems-minor/
The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found here (http://www.me.iastate.edu/energy-systems-minor).
required courses
ECON 380 Environmental and Resource Economics 3
E E 351 Analysis of Energy Systems 3
Electives: Choose from a list of approved courses 9
Total Credits 15
The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Nuclear Engineering Minor
http://www.me.iastate.edu/students/degrees-and-programs/engineering-minors/
The nuclear engineering minor is administered by the mechanical engineering department and is open to all undergraduates. The minor may be earned by completing 15 credits from the following courses. A complete list of approved courses can be found here (http://www.me.iastate.edu/students/degrees-and-programs/engineering-minors).

Graduate Study
The department offers programs for the degrees Master of Engineering (M. Eng.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the student’s capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments. Well-qualified juniors and seniors in mechanical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Graduate Programs Office and on the department’s website (http://www.me.iastate.edu/).
The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.
The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.
The requirements for advanced degrees are established by the student’s program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.
Program requirements can be found on the department webpage (http://www.me.iastate.edu/) and in the Mechanical Engineering Graduate Student Handbook.

Curriculum in Mechanical Engineering
Administered by the Department of Mechanical Engineering. Leading to the degree bachelor of science.

Total credits required: 129 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr. 1
U.S. Diversity: 3 cr. 1

M E 332 Engineering Thermodynamics II 3
M E 335 Fluid Flow 4
M E 370 Engineering Measurements 3
M E 421 System Dynamics and Control 4
Program Educational Objectives

Within five years of graduation, the graduates should:
1. attain a productive career in Software Engineering or related fields;
2. attain leadership roles and become effective collaborators to advance professional and organizational goals;
3. engage in continuous learning and professional development.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) peer-recognized expertise, (b) engagement in professional practice, (c) sustained learning, (d) leadership and (e) teamwork.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the Department of Computer Science and the Department of Electrical and Computer Engineering provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

Administered by the Department of Electrical and Computer Engineering in the College of Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

Software Engineering
Undergraduate Study

For the undergraduate curriculum in Software Engineering (http://www.me.iastate.edu/students/degrees-and-programs/ba-degrees/software-engineering), the curriculum is accredited under the General Criteria and Software Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

This curriculum is jointly administered by the Department of Computer Science and the Department of Electrical and Computer Engineering at Iowa State University. The Software Engineering program provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of state-of-the-art software technologies and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers emphasis areas in software engineering principles, process and practice. Students may also take elective courses in computer engineering and computer science.

M E 436 Heat Transfer 4
One Senior Capstone Design course from the following 3
M E 415 Mechanical Systems Design
M E 442 Heating and Air Conditioning Design
M E 466 Multidisciplinary Engineering Design
M E 486 Appropriate Technology Design

Total Credits 38

Other Remaining Courses: 24 cr.
Complete 15 cr. Technical Electives 2 15
M E 170 Engineering Graphics and Introductory Design 3
STAT 305 Engineering Statistics 3
Complete one of the following communication courses with a minimum grade of C. 3
ENGL 302 Business Communication
ENGL 309 Report and Proposal Writing
ENGL 314 Technical Communication
SP CM 212 Fundamentals of Public Speaking

Total Credits 24

Co-op/Internship optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list of technical electives (http://www.me.iastate.edu/students/degrees-and-programs/ba-degrees/software-engineering) and general education electives (http://www.me.iastate.edu/students/degrees-and-programs/ba-degrees/software-engineering/general-education). Note: electives used to meet graduation requirements may not be taken Pass/Not Pass (P-NP).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Transfer Credit Requirements

The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program. The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, 3 must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level M E technical electives. No more than 3 credits of independent study shall be applied to meet the 12 credit requirement.

See also: A 4-year plan of study grid showing course template by semester. (http://catalog.iastate.edu/planoofstudy/engineering/mechanical_engineering_ba)
Basic Program: 27 cr.
A minimum GPA of 2.00 is required for this set of courses, including any transfer courses. See Requirement for Entry into Professional Program in College of Engineering Overview section.

S E 494  | Software Engineering Portfolio Development     | R
Co-op or internship (S E 396, S E 397, S E 398) is optional

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 492 Senior Design Project II and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
3. Choose from department approved lists. (https://www.se.iastate.edu/academics/resources)
4. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives (http://www.se.iastate.edu/academics/resources/#general).

Systems Engineering
Administered by the Department of Industrial and Manufacturing Systems Engineering

Systems Engineering Master's Degree
The Systems Engineering Program focuses on developing an individual’s analytical skills to design, evaluate, and build modern complex engineered systems. Engineers who can conceptualize, model, and integrate hardware, software, data, and humans are critical in technology driven multi-disciplinary design teams. The Iowa State University Master of Engineering in Systems Engineering Program is designed to train engineers to excel in the technology driven design environment commonly found in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements
Unrestricted admission requires (1) a 3.0 grade point average from an ABET accredited undergraduate engineering program, (2) two years of engineering experience or current full-time employment as an engineer, (3) calculus, engineering statistics, and engineering economy. A GRE is not required for this program.

Applicants for admission to the Systems Engineering Program apply through the Graduate College at Iowa State University. Each applicant must submit:
- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to 9 credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted.
The Master of Engineering in Systems Engineering Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Degree Requirements

Systems Engineering Core (12 credits):
• IE 564 Decision Analysis in Systems Design
• IE 565 Systems Engineering and Analysis
• IE 570 Systems Engineering and Project Management
• IE 585 Requirements Engineering

Supporting Courses (eighteen credits):
Six graduate courses in engineering, science or a related field.

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.

Iowa State University offers a Systems Engineering Certificate program composed of the core courses and an independent study (IE 590).

Note: Students typically are allowed to transfer up to 6 credit hours of non-ISU graduate credit into their degree program.

Please see the Systems Engineering & Engineering Management Student Handbook for complete information.

Biomedical Engineering Minor

Undergraduate Study

Minor supervised by an interdisciplinary faculty committee, administered by Chemical and Biological Engineering. The Biomedical engineering minor is a unique opportunity for students to acquire a multi-disciplinary engineering and life sciences background for entering the field of biomedical engineering.

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core biology and engineering relevant to further study in biomedical engineering along with an introduction to the application of engineering principles to biomedical problems from a multidisciplinary perspective as well as the applications within the majors of the participating departments. Minor requirements are as follows:

A minimum of 16 cr. meeting the six requirements below with a minimum of 9 of those credits not being used to meet degree requirements and a minimum of 6 cr. at the 300 level or above. For most students this last stipulation will probably result in 18 cr. being taken.

BIOL 212 Principles of Biology II  3
B M E/CH E 220 Introduction to Biomedical Engineering  3
BIOL 256 Fundamentals of Human Physiology  3
Introductory Engineering Elective  3
Advanced Engineering Elective  3
Professional Elective  1-3

Total Credits  16-18

* A second (Introductory) engineering course from a department other than that of your major that is not duplicative of material in a course taken in your own department. The topic of the course should have ready application to later BME-related electives in that discipline (MATE 273; E M 274 or 324; CH E 210, E E 201, 230 or 208X; or other courses approved by Minor Chair).

** 300-500 level engineering course with clear biomedical engineering application (B M E 341, 450, 490; B M E/CH E 440, CH E 542; B M E/MAT E 456; EE 430; IE 571; or other courses approved by Minor Chair).

*** 300-500 level engineering or life sciences course with clear biomedical engineering application OR B M E 490 OR departmental 490 with biomedical engineering topic OR 200+ level life sciences laboratory course (If a 200-level course is chosen here, the student will need to meet the required 6 cr. of 300+ courses by substitution of a higher-level course for the other requirements or by taking an additional course.), OR 300-500 level B M E courses, which may be offered on-line from the University of Iowa.

Engineering Sales Minor

With approximately 15% of engineering job postings involving product sales, marketing or customer field support, a minor in engineering sales can be a critical step towards a great job offer. Besides being one of the best paid positions in engineering, technical sales offers substantial travel opportunities and the ability to solve customers’ engineering problems in the field with people. Talk to your adviser to see how just a few additional courses could fit into your schedule and fast-track your job prospects.

To fill this need, the Department of Industrial and Manufacturing Systems Engineering has developed a minor in sales engineering. The engineering sales minor is a 15 credit minor that complements the technical training in the student’s major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is available only to engineering students and is administered by a supervisory faculty committee. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements.

Requirements:
• I E 450 Technical Sales for Engineers I
• I E 451 Technical Sales for Engineers II
• Mkt 340 Principles of Marketing
• Mkt 343 Personal Sales

AND
One of the following:
• I E 305 Engineering Economic Analysis
• Fin 301 Principles of Finance

The objectives of the minor are to provide a broad understanding of the technical sales process, primarily from the business-to-business perspective. At the conclusion of the minor, students will be able to:

• Calculate a return on investment and communicate to customer
• Determine payback period for a given solution and communicate to customer
• Perform a market segmentation
• Develop a client value analysis
• Perform prospecting and business-to-business marketing
• Identify decision makers and processes
• Manage a sales process
• Use sales automation software
• Apply knowledge of underlying international sales issues
• Prepare written and verbal sales presentations
• Provide information about product/service pricing
• Lead a team selling process
• Establish sales channel management procedures
• Develop sound distribution strategies and global sales processes
• Formulate bid strategies/negotiation strategies
• Employ good time management skills

Those students interested in pursuing this minor should contact an academic adviser in their home department and fill out a REQUEST FOR MINOR form. Evaluation of all students requesting this minor will be conducted in the Department of Industrial and Manufacturing Systems Engineering. Any questions should be directed to Ms. Devna Popejoy-Sheriff at devna@iastate.edu.

Energy Systems Minor

http://www.me.iastate.edu/energy-systems-minor/

Energy systems are pervasive in our society. A list of energy-related subjects and applications in the engineering curriculum would be nearly endless, but here are some examples:

• Mechanical engineers have a core area in thermo-fluids where courses in thermodynamics, fluid mechanics, and heat transfer form a base for energy systems.
• Electrical engineers address power transmission and distribution as well as electric motors and power systems.
• Civil engineers develop structures for wind turbines and hydroelectric dams.
The course requirements for the undergraduate minor in NDE are:

- Construction engineers need to understand how building systems impact energy utilization.
- Chemical engineers develop alternative fuels and clean burning technologies.
- Material engineers develop new materials for batteries and fuel cells.
- Aerospace engineers develop wind turbines.
- Industrial engineers address manufacturing efficiency and energy reduction.
- Agricultural engineers develop biorenewable energy sources.

Energy systems are also a significant focus of the grand challenges of engineering (http://www.engineeringchallenges.org), and this minor will help our students address these issues in their engineering careers.

The goal of the minor in energy systems is to provide ISU engineering students with focused educational opportunities in the broad area of energy systems. Successful energy systems minor students will understand broad energy perspectives, the language of energy systems, and the economic, environmental, and policy issues related to energy in the two required courses (six credits) for the minor (EE 351 and Econ 380). The remaining nine credits in the minor can be selected from a list of approved engineering courses related to energy systems to give students the opportunity to extend their knowledge.

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found here (http://www.me.iastate.edu/energy-systems-minor).

Minor supervised by an interdisciplinary faculty committee, administered by Aerospace Engineering. The NDE minor is a unique opportunity for engineering students to acquire a multidisciplinary engineering qualification in the rapidly evolving field of Nondestructive Evaluation.

Non-destructive Evaluation Engineering

Minor supervised by an interdisciplinary faculty committee, administered by Aerospace Engineering. The NDE minor is a unique opportunity for engineering students to acquire a multidisciplinary engineering qualification in the rapidly evolving field of Nondestructive Evaluation.

Undergraduate Study

Students interested in completing the NDE engineering minor must be enrolled in the College of Engineering at Iowa State University. They must submit the “Request for Minor” form and complete the minimum prescribed 16 credit-hours of course work defined below. Acceptance is based on approval by the administering department, Aerospace Engineering.

The course requirements for the undergraduate minor in NDE are:

- MAT/E/M 350 Principles of Nondestructive Testing 3
- M S/E/M 362L Nondestructive Testing Laboratory 1
- Two of the following NDE specific courses 6-7
  - M S/E/M 350 Nondestructive Evaluation
  - E E 351 Analysis of Energy Systems 3
  - Electives: Choose from a list of approved courses 9

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

A combined average grade of C or higher is required in courses applied to the minor and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Nuclear Engineering

http://www.me.iastate.edu/students/degrees-and-programs/engineering-minors/

Minor administered by Mechanical Engineering

The nuclear engineering undergraduate minor allows engineering students to acquire a formal background in nuclear engineering topics that will not only benefit them, but also fulfill a societal need for future hiring of engineers. Through this program, students can enroll in a formal minor that enables them to acquire a basic and fundamental knowledge of nuclear sciences and engineering, thus enabling them to pursue employment in any one of a number of fields associated with the construction, operation or regulation of nuclear power generation.

Students completing this minor acquire a body of knowledge in the fundamentals of nuclear science and engineering. The required courses selected ensures that all graduates of the nuclear engineering minor obtain a minimum body of knowledge in nuclear science and engineering that would allow them to apply their specialized field of engineering knowledge to nuclear-related applications, such as nuclear plant and site construction, nuclear power plant operations, nuclear safety and radiation protection.

The supporting courses that are listed in this program provide an opportunity for students to build upon the knowledge gained in the required courses by taking either more advanced courses or more specialized courses dealing with specific areas of nuclear engineering.

Undergraduate Study

Students interested in completing the nuclear engineering minor must be enrolled at Iowa State University and have the appropriate technical background. They should complete and submit the “Request for Minor” form for submission to the Nuclear Engineering program director. The selection process is based on approval by the administering department, Mechanical Engineering.

The course requirements for the undergraduate minor in nuclear engineering are:

Required course:
- NUC E 401 Nuclear Radiation Theory and Engineering 3

Four of the following: 12
- NUC E 402 Nuclear Reactor Engineering
- NUC E 405 Radiation Protection and Shielding
- NUC E 410 Nuclear Reactor Theory
- NUC E 421 Nuclear Criticality Safety
- NUC E 430 Nuclear Energy and Society
- NUC E 441 Probabilistic Risk Assessment
- NUC E 461 Radiation Detection, Measurement and Simulation
- NUC E 490 Independent Study

Total Credits 15

*Students have the option of enrolling in these web-based distance courses offered at select universities. It is the responsibility of the student to arrange for enrollment and payment for these courses. Courses must be successfully
completed with a "C" or higher in order to be considered for transfer credit. Contact the Nuclear Engineering program director for more information.

The minor must include at least nine credits which are beyond the total used to meet curriculum requirements for the bachelors degree in engineering.

Engineering

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of ENGR 160 Engineering Problems with Computer Applications Laboratory, ENGR 340 Introduction to Wind Energy: System Design & Delivery, ENGR 466 Multidisciplinary Engineering Design and ENGR 467 Multidisciplinary Engineering Design II Multidisciplinary Engineering Design II are coordinated through Engineering Student Services in Engineering Academic and Student Affairs.

ENGR 160 Engineering Problems with Computer Applications Laboratory 3
ENGR 340 Introduction to Wind Energy: System Design & Delivery 3
ENGR 466 Multidisciplinary Engineering Design 3
ENGR 467 Multidisciplinary Engineering Design II 3

Engineering Mechanics

Administered by the Department of Aerospace Engineering

Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers graduate programs that lead to the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and has strong research emphasis. The master of science degree is recommended for students who anticipate entering a doctoral program later. The master of engineering degree does not require either research credits or a thesis. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

The master of engineering degree does require a creative component which will be obtained by registering for E M 599 Creative Component. A written report and an oral presentation will be given to the student’s graduate committee.

At least 30 credits of acceptable graduate work are required for both the master of science and the master of engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf).

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

College of Human Sciences

Pamela White, Dean
Carla Peterson, Associate Dean Research and Graduate Education
Linda Serra Hagedorn, Associate Dean Undergraduate Programs, International Affairs, Diversity, Equity, and Community, Students Services

Debra Sellers, Associate Dean and Director of Human Sciences Extension and Outreach
www.hs.iastate.edu/

The College of Human Sciences provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences (CHS) was founded in 2005 and fosters innovative synergies in teaching and learning in addition to the discovery of new knowledge, and in many ways is reinventing how human potential can be enhanced. Members of the college strive to improve the quality of people’s lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Recommended High School Preparation

Recommended preparation for students entering most departments of the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social science and/or humanities. In addition, students interested in Elementary Education or Early Childhood Education are advised to complete three or more years of high school study in one foreign language.

Information for Prospective Students

Each student in the College of Human Sciences works closely with an academic adviser who is associated with the program in which the student is majoring. Advisers assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisers attempt to assist students as they develop their schedule of classes to meet their goals, interests, and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Undecided Students

The College of Human Sciences offers an open option for entering students who have not selected a specific area of study. An orientation course helps students explore the opportunities available. Program planning information can be obtained from the undecided adviser in the College of Human Sciences Student Services Office. Undecided students are encouraged to participate in the MINDS (http://www.hs.iastate.edu/prospective/learning-communities/minds) Learning Team.

Planned Transfer Programs

By careful planning, students may begin their education at another college and then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Recruitment Office.

Divisions of the College

• Apparel, Events, and Hospitality Management (http://www.aeshm.hs.iastate.edu)
• Food Science and Human Nutrition (http://www.fshn.hs.iastate.edu)
• Human Development and Family Studies (http://www.hdfs.hs.iastate.edu)
• Kinesiology (http://www.kin.hs.iastate.edu)
• School of Education (http://www.education.iastate.edu)

Accreditation and Licensure

The following program-specific accreditation/licensure/registrations have been attained by departments or School of Education within the college:

Department of Apparel, Educational Studies, and Hospitality Management:

• Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration.
• Apparel Merchandising, and Design major is endorsed with the American Apparel and Footwear Association’s Education Foundation. The design primary option is accredited by the National Association of Schools in Art and Design.
Department of Food Science and Human Nutrition:
- The Food Science degree, including Industry and Technology options are approved by the Institute of Food Technologists.
- The Didactic Program in Dietetics and Dietetics Internship are accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics.

Department of Human Development and Family Studies:
- The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC), Academy for Early Childhood Programs, is licensed by the Iowa Department of Human Services, and maintains a 5 Star Rating from the Iowa Quality Rating System.
- The Early Childhood Education (administered in collaboration with the School of Education) and the Family and Consumer Sciences Education Teacher Licensure Program are licensed by the Iowa Department of Education and the Iowa Board of Educational Examiners.

Department of Kinesiology:
- Athletic Training Option is accredited by the Commission on Accreditation of Athletic Training Education.
- Physical Education Teacher Licensure Program is licensed by the Iowa Department of Education and Iowa Board of Educational Examiners.

School of Education - Educator Preparation and Licensure:
- All Iowa State University Educator Preparation Programs are accredited by the Iowa Department of Education and the Iowa Board of Educational Examiners.
- All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the University Educator Preparation Program.
- Each student will be enrolled in the School or Department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.
- For details concerning the professional educator requirements and the areas of specialization requirements, see Teacher Education.

Undergraduate Core Curriculum

Purposen
The College of Human Sciences has established core learning outcomes to provide the unifying foundation critical to personal and professional success for all College of Human Sciences undergraduate students. Assessment of College of Human Sciences’ core learning outcomes will measure student competence in four (4) areas. Assessment results will be used by CHS students, faculty and staff to enhance student learning experiences.

Four components
The core identifies the expected minimum outcomes that each undergraduate in the college must meet:
- Communication - Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats without distracting errors in usage or convention.
- Self-Assessment/Self Reflection - Consistently and realistically analyze and evaluate one’s own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy.
- Critical Thinking - Generate, acquire and evaluate information based on scientific evidence, creative processes, and logical and ethical reasoning to make decisions and solve problems in one’s personal, professional and community endeavors.
- Social Justice - Articulate and demonstrate a clear concept of a just society in which individuals and groups equitably share in societal benefits within a global community.

Expectations for Departments/School of Education/Programs
Departments/schools/programs are expected to identify courses at three levels where the learning outcomes will be assessed. At least one significant educational activity will be embedded in introductory, intermediate and advanced coursework for each outcome.

General Education
Students in the College of Human Sciences are required to complete a program in general education which is integrated in their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

I. Communication Skills (10 cr.): ENGL 150, ENGL 250; LIB 160; and 3 credits in oral communication
II. Biological and physical sciences and mathematical disciplines (9 cr.): at least 3 credits in mathematical disciplines
III. Social sciences and humanities (15 cr.): at least 6 credits in social sciences and at least 6 credits in humanities

Double Majors
Undergraduate students may elect a second major from the departments or school and program areas listed above, or from a major field offered for the bachelor’s degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, prerequisites and supporting courses.

Two Bachelor’s Degrees
Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index, Bachelor’s Degree, Two.

International and Cross Cultural Programs
International experience opportunities are available and encouraged through the College of Human Sciences to broaden international and cross-cultural perspectives. Scholarships and other forms of financial assistance are available which provide partial support for students studying abroad. The College has established collaborative programs with universities around the world including Glasgow Caledonian University, Glasgow, Scotland; Soonchunhyang University, Asan, South Korea; University of Pretoria, Pretoria, South Africa; the London College of Fashion, London, England; Lorenzo de Medici, Florence, Italy; Academia Italiana, Florence, Italy; Paris American Academy, Paris, France; Henan Normal University, Xinxiang, China; Wuhan Textile University, Wuhan, China; Donghua University, Shanghai, China; University of Agricultural Sciences, Dharwad, India, and the Universiti Putra Malaysia, Selangor, Malaysia. Students also have an opportunity to participate in group study abroad programs in Europe, Africa, Central and South American, and Asia.

Other opportunities may be developed through consultation with the college director of international programs and the student’s adviser; for example, students have acquired internships and studied in such countries as Ghana, Spain, Ireland, China, England, Australia, Germany, France, and Costa Rica. Opportunities for international student teaching are available in Indonesia, Norway, Poland, Ecuador, Italy, Taiwan, Germany, and New Zealand. Faculty members bring diversity and global perspectives to instruction and research through their work in
Undergraduate Majors

For more information about a major, see:
1. The curriculum descriptions in this section of the catalog
2. The department catalog section under Courses and Programs
3. Department websites.

Apparel, Events, and Hospitality Management

Apparel, Merchandising, and Design
Options: Merchandising; Creative and Technical Design; and Product Development and Sourcing. See Curriculum in Apparel, Merchandising, and Design

Event Management
See Curriculum in Event Management

Hospitality Management
See Curriculum in Hospitality Management

Food Science and Human Nutrition

Culinary Science
See Curriculum in Culinary Science

Diet and Exercise B.S./M.S.
Jointly administered with the Department of Kinesiology. See Curriculum in Diet and Exercise

Dietetics
See Curriculum in Dietetics

Food Science
Options: Food Science and Industry; Food Science and Technology. See Curriculum in Food Science

Nutritional Science
Options: Pre-Health Professional and Research; and Nutrition and Wellness. See Curriculum in Nutritional Science

Human Development and Family Studies

Child, Adult, and Family Services
Options: Child Programs; Youth Programs; and Adult/Family Programs. See Curriculum Child, Adult, and Family Services

Family and Consumer Sciences Education and Studies
Options: Communications; Professional Studies; Teacher Licensure. See Curriculum in Family and Consumer Sciences Education and Studies

Financial Counseling and Planning
See Curriculum in Financial Counseling and Planning

Kinesiology

Athletic Training
See Curriculum in Kinesiology

Diet and Exercise B.S./M.S.
Jointly administered with the Departments of Food Science and Human Nutrition. See Curriculum in Diet and Exercise

Kinesiology & Health
Options: Community and Public Health; Exercise Science, Physical Education Teacher Education; and Pre-Health Professions. See Curriculum in Kinesiology

School of Education

Early Childhood Education - Unified
Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education

Elementary Education
Administered by the School of Education. See Curriculum in Elementary Education

Secondary Education
Offered in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Index, Teacher Education

International Studies (secondary major only)
The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see Index, International Studies).

Undergraduate Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel, Merchandising, and Design - See http://www.aeshm.hs.iastate.edu/majors/and/#minor

Athletic Coaching - See http://www.kin.hs.iastate.edu/programs/minors/coaching/

Child, Adult, and Family Services - See http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#child-adult-and-family-services

Culinary Science - See http://www.fshn.hs.iastate.edu/undergraduate-programs/undergraduate-programs/#minor

Dance - See http://www.kin.hs.iastate.edu/programs/dance/minor/

Educational Services in Family and Consumer Sciences - See http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#educational-services-in-family-and-consumer-sciences

Event Management - See http://www.aeshm.hs.iastate.edu/majors/event-management/#minor

Exercise Science - See http://www.kin.hs.iastate.edu/programs/minors/exercise-science/

Financial Counseling and Planning - See http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#financial-counseling-and-planning

Food Safety (interdepartmental minor) - See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Food Science - See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Gerontology (interdisciplinary minor) - See http://www.gerontology.iastate.edu/programs/ugrad-minor/
Health Promotion - See http://www.kin.hs.iastate.edu/programs/minors/health-promotion/
Hospitality Management - See http://www.aeshm.hs.iastate.edu/majors/hospitality-management/#minor
Learning Technologies - See http://www.education.iastate.edu/te/programs/digital-learning/
Kinesiology - See http://www.kin.hs.iastate.edu/programs/minors/kinesiology/
Nutrition - See http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/
Sport and Recreation - See http://www.kin.hs.iastate.edu/programs/minors/sport-and-recreation/

See Index for minor requirements for specific departments and programs.

Graduate Programs

The College of Human Sciences offers a variety of programs leading to a Masters degree, a Ph.D., or a graduate certificate. Each unit offers a variety of program options, as well as opportunities for interdisciplinary study in the areas of gerontology, toxicology, nutritional studies, and genetics. Multiple opportunities for on-campus and distance education programs are available.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in business, government agencies, and public and private agencies and institutions, as well as for teaching, research, and extension positions in colleges and universities.

Information for Prospective Students

Graduate study in the College of Human Sciences is conducted through collaboration with the Graduate College, and application is completed through the Graduate College. Details regarding the application process and general information about graduate studies at ISU are found in the Graduate College section of this catalog. (http://www.grad-college.iastate.edu/). Details regarding the curricula and specific specifications for each program are found on department websites.

Each graduate student in the College of Human Sciences works closely with an academic adviser and a Program of Study (POS) committee. The POS assists students in developing academic programs tailored to meet individual needs, guide research and/or internship activities, and provide information and guidance about career choices. Graduate assistantship support is available for many students and involves them in research, teaching, and administrative experiences. Incoming students are encouraged to work with departmental advisors to develop appropriate class and assistantship activities.

Graduate Curricula

Information about curricula and degree options for each College of Human Sciences unit is available on the unit websites below.

• Apparel, Events, & Hospitality Management – http://www.aeshm.hs.iastate.edu/
• Food Science & Human Nutrition – http://www.fshn.hs.iastate.edu/
• Human Development & Family Studies – http://www.hdfs.hs.iastate.edu/
• Kinesiology – http://www.kin.hs.iastate.edu/
• School of Education - http://www.education.iastate.edu/

Distance Education Opportunities

Several courses and degree programs are available on-line. Additionally, some degree programs are provided with a combination of online and condensed schedules that require limited time on campus. Details about these offerings are found on unit websites.

Some degree programs and graduate certificates are offered through collaboration with the Great Plains Interactive Distance Education Alliance (GP-IDEA; http://www.gpidea.org/). These online programs allow students to earn a graduate degree from ISU while taking courses and interacting with students from a number of participating universities. As well, the CHS offers a Masters of Family and Consumer Sciences-Comprehensive (http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-comprehensive) online.

Certificates

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. At Iowa State University, an undergraduate certificate is awarded concurrently or after baccalaureate requirements are finished. The following undergraduate certificates are available in the College of Human Sciences:

- Merchandising Certificate - see http://www.aeshm.hs.iastate.edu/about/contact-us/

Graduate Certificates

Graduate certificates provide formal recognition of focused graduate study in an area of specialization that is less comprehensive than required for a master’s degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master’s or doctoral degree. The following graduate certificates are available in the College of Human Sciences:

- Community College Leadership Certification - see www.cclp.hs.iastate.edu/
- Community College Teaching Certificate - see http://www.education.iastate.edu/graduate-studies/certificates/community-college-teaching/
- Development and Family Sciences Advanced Research Design and Methods - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/
  * Dietetics Internship Certificate - see www.dietetics.iastate.edu/
  * Family Financial Planning Certificate - see www.hdfs.hs.iastate.edu/graduate/curriculum/ms-fcs/
- Family Well Being in Diverse Society - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/#family-well-being-in-diverse-society
  * Gerontology Certificate - see www.hdfs.hs.iastate.edu/graduate/curriculum/ms-fcs/
  * Infant and Early Childhood Mental Health - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/#infant-and-early-childhood-mental-health
  * Instructional Design Certificate - see http://www.education.iastate.edu/graduate-studies/certificates/instructional-design/
- Life Span Development - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/
  * Literacy Coaching Certificate - see www.education.iastate.edu/te/graduate/literacy/literacy-coaching/
- Principal Endorsement (Pre-LEAD) - see http://www.education.iastate.edu/graduate-studies/certificates/principal-endorsement/
- Social Justice Certificate - see www.education.iastate.edu/graduate/social-justice/certificates/
- Special Education Certificate - see http://www.education.iastate.edu/graduate-studies/certificates/special-education-certificate.html
- Superintendent Licensure - see www.education.iastate.edu/graduate/ed-admin/superintendent/
  * Youth Development Specialist - see http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/
  * Youth Program Management & Evaluation - see http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/
  * online certificate

Apparel, Events, and Hospitality Management

The department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student’s major area of study whether it be Apparel, Merchandising, and Design; Event Management; Hospitality Management; agriculture, business, design education, engineering, liberal arts and sciences or minor areas of study including entrepreneurial studies, design studies, or international studies.
Apparel, Merchandising, and Design

Curriculum in Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in A M D at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level). The major in apparel, merchandising, and design provides a broad based program of study with flexibility in creating program options. Courses are required in general education, and apparel industry professional core. To complete the program, a student selects a primary option from design, product development/sourcing and merchandising. Merchandising requires selection of an additional secondary option.

A minor in apparel, merchandising, and design is available.

Curriculum in Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in AMD at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level).

- EVENT 371 Conference and Meeting Planning
- EVENT 471 Special Events Coordination
- P R 220 Principles of Public Relations
- P R 305 Publicity Methods
- P R 321 Public Relations Writing

Total Credits 9

Approved Photography classes

Undergraduate Study

The program offers study for the degree of Bachelor of Science with a major in apparel, merchandising, and design (A M D). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, source and present textile and apparel products to meet the needs of consumers. They understand the issues involved in textile and apparel production and marketing, both nationally and internationally. Graduates appreciate the interdependence of nations and cultures as producers and consumers of textile products.

The A M D major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, A M D core classes, and structured clusters of courses to form an option in merchandising, product development/sourcing, or design. The combinations of primary, electives, and secondary options allow students to individualize their programs.

An option in merchandising prepares students for the planning, development, and presentation of market-oriented product lines and events. Career opportunities are in product development, sourcing, buying, promotion, and management in both the manufacturing and retailing sectors with a focus on the textile and apparel industry. An option in creative and technical design is appropriate for those interested in the aesthetic and creative aspects of design, product or line development, promotion of textiles and apparel, technical design, apparel engineering, product development, sourcing, and quality assurance. An option in product development/sourcing is appropriate for those interested in both designing and merchandising products or lines for consumer groups, sourcing and manufacturing. Students in design have a review of their design skills (A M D 301 Basic Design Concepts Review) after A M D 225 Patternmaking I, A M D 245 Aesthetics and Brand Image, and A M D 278 Fashion Illustration.

For additional courses of interest, see Apparel, Events, and Hospitality Management.

Minor

A minor in apparel, merchandising, and design requires (16-17 cr) of the following:

- A M D 31 Overview of the Fashion Industry 3
- A M D 165 Dress and Diversity in Society 4
- A M D 204 Textile Science

One of the following: 3-4

- A M D 231 Product Development and Manufacturing
- A M D 245 Aesthetics and Brand Image
- AESHM 275 Retail Merchandising

6 credits (2 classes) of the 300-400 level at Iowa State in A M D or approved AESHM

Total Credits 9
The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.

Undergraduate Study
The Department of Kinesiology offers two Bachelor of Science degrees: Athletic Training and Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the component courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Athletic Training
Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination. Many states also have licensure requirements to practice athletic training. The Athletic Training education program at Iowa State University, accredited since 2001, includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation. The Athletic Training Program utilizes a competitive admission process for undergraduate students.

Curriculum in Athletic Training
This major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). The program is CAATE accredited and students are prepared for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found at www.cycloneathletictraining.com (http://www.cycloneathletictraining.com).

Communication Proficiency
In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course:

* A grade of C- or better is required.

**Curriculum and Instruction**

**Missions and Goals**

The Department of Curriculum and Instruction aspires to prepare transformative leaders in teaching, learning, and curriculum within diverse pre-K-16 settings through exemplary teaching, research and outreach. In order to reach this vision, we have the following mission. As an engaged community of scholars and teacher educators, we seek to:

- Enhance Iowa’s families, schools, and communities through exemplary education and teacher preparation;
- Provide educators and students with the knowledge, skills, and experience necessary to become transformative leaders in an increasingly changing and interdependent world; and
- Support the advancement of specialized academic disciplines through exemplary research and scholarship.

**Undergraduate Study**

The Department of Curriculum and Instruction provides the professional education coursework that leads to licensure of pre-service teachers. Majors offered in the department include Elementary Education (K-6), and Early Childhood Education-Unified (birth through age 8). The Early Childhood Education-Unified major is an interdepartmental program administered by the Departments of Curriculum and Instruction and Human Development and Family Studies.

Students who are interested in teaching at the secondary level (7-12) major in a specific discipline (e.g. Mathematics, Science, English, Social Studies) and complete the additional coursework in Curriculum and Instruction required for a teaching license.

**Editor’s Note:** The Iowa Board of Educational Examiners has mandated changes to the teacher licensure requirements which will impact students graduating after September 1, 2015. Students must consult with an education academic adviser to review these curriculum changes.

Elementary Education and Early Childhood Education-Unified majors must complete a professional course sequence:

</tr>
</tbody>
</table>

Some secondary licensure areas also require C I 426 Principles of Secondary Education.

The Curriculum and Instruction department offers a minor in Learning Technologies that may be earned by registering for the program and completing the following courses:
The Department of Curriculum and Instruction offers courses that can lead to a reading endorsement for grades K-8 or grades 5-12. Students seeking a K-8 endorsement should consult with an adviser in the English Department. The 5-12 endorsement is offered collaboratively with the English Department. Students seeking this endorsement should consult with an adviser in the English Department. Inquiries can be sent to the Licensure Analyst in Teacher Education Services (133 MacKay) to receive a list of courses needed for an Iowa State University reading endorsement. Prerequisites for the reading endorsement courses are listed in the catalog course descriptions.

Early Childhood Education-Unified

The undergraduate curriculum in Early Childhood Education-Unified leads to the Bachelor of Science Degree. See curriculum.

The curriculum in Early Childhood Education – Unified is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services. Graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education - unified teacher license. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences.

Early childhood education-unified majors must satisfy a world languages requirement for graduation.

Students who enroll in early childhood education-unified must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education-unified students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. The State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed explanation of the standards and assessment process may be found on the department’s website (http://www.education.iastate.edu/). The same information is also available from the student’s academic adviser.

Graduates of the elementary education program will be able to demonstrate:

- their understanding of concepts and structures of disciplines, tools of inquiry, how students learn and develop, and the effects of individual differences on learning;
- a broad range of instructional strategies, including knowledge of technology applicable to instruction;
- the ability to stimulate active inquiry with collaboration and supportive interaction among their students; and
- their ability to develop professional relationships with colleagues, parents, and agencies that support students and their learning in appropriate settings.

Secondary Education

For specific requirements for each area of specialization, see Teacher Education and curricula for the college in which the chosen degree major is sought.

Students seeking recommendations for a license to teach in the secondary schools must be admitted to the teacher education program and pursue a program that includes the professional core:

Total Credits: 18

Notes:
- Students seeking licensure in physical education, agriculture and science do not take C I 426 Principles of Secondary Education.
- Students seeking a teaching license in physical education must see an adviser in the Department of Kinesiology in the College of Human Sciences.
- All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the teacher education program and be recommended by the Associate Dean for Teacher Education.
- Each student must meet the performance outcome standards for teacher licensure. Each standard will be assessed in every major. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University.
- A detailed explanation of the standards and assessment process may be found at http://www.education.iastate.edu/. For more information, students should contact the academic adviser in their major. Each student will be enrolled in the department in which he or she plans to major, and must meet the graduation requirements of that department and the college in which it is situated.

Graduate Study

The Department of Curriculum and Instruction offers work for the degrees Master of Science, Master of Education, and Doctor of Philosophy with a major in education and minor work to students taking major work in other departments. Within the education major in the Department of Curriculum and
Instruction a student may earn an education degree with no area of specialization (master’s and doctorate) or specialize in special education (master’s only), or curriculum and instructional technology (master’s and doctorate). The special education specialization is designed to prepare candidates as practitioners and researchers in the field of mild/moderate disabilities or behavioral disorders/learning disabilities. The specialization in curriculum and instructional technology is designed to prepare candidates as researchers and practitioners in the fields of curriculum and instructional technology.

Students may also opt not to select an area of specialization. These students are asked to select a focus area for their graduate study. Focus areas include educational foundations, world language education, literacy education, mathematics education, multicultural education and international curriculum studies, and science education. See the Curriculum and Instruction web site at http://www.ci.hs.iastate.edu/ for more information on these focus areas.

A minor is available in curriculum and instructional technology at both the master’s and doctoral level. Information about the minors can be found on the web at http://www.citl.iastate.edu/student/degree_programs.php.

Prerequisite to major graduate work in education is preparation substantially equivalent to the completion of one of the undergraduate curricula in education offered at Iowa State University, or graduate preparation in a discipline to be used as a teaching field in a community college or university, and adequate proof that the student ranks above average in scholastic ability and promise of professional competence.

The world language requirement, if any, for the Ph.D. degree will be determined by the student’s program of study committee. If no world language is required, the total program must consist of a minimum of 78 semester credits, at least 12 of which must be earned outside the education major, and at least 16 of which must be earned outside the area of specialization. Statistics and research methods may not be included in the 16 credits. Should world language be included, the program of study committee may adjust the minimum program requirement downward, but in no instance may the program of study be less than 72 semester credits. Students whose native language is not English may substitute competence in English. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores.

Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. Students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, Educational Leadership and Policy Studies, and General Graduate Studies or to graduate level course offerings within other departments.

Graduate Teacher Licensure Programs

A Master of Arts in Teaching degree program leading to teacher licensure (science only) is available to students who currently have a bachelor’s degree in science (or a closely related field). A teacher licensure program in mathematics education is also available to graduate students (Department of Curriculum and Instruction). Teacher licensure at the graduate level is also offered in agricultural education (College of Agriculture and Life Sciences) and family and consumer sciences (College of Human Sciences). The Department of Curriculum and Instruction provides the professional education coursework.

Students in a graduate teacher licensure program must complete:

Total Credits: 15

Mathematics licensure students also take C I 526 Principles of Secondary Education.

Graduate level teaching endorsements are offered through the Department of Curriculum and Instruction. Graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master’s degree can incorporate those courses in a professional certificate program. Endorsement programs include Instructional Strategist I: Mild/Moderate Disabilities (K-8 or 5-12), or Instructional Strategist II: Behavior Disorders/Learning Disabilities, and special education consultant. A graduate level reading endorsement is also available.

Graduate Certificate Programs

The Department of Curriculum and Instruction offers Graduate Certificate programs to allow students to enhance their skills outside of full degree programs. The Certificate programs currently offered include Instructional Design, Literacy Coaching, and Special Education.

The Instructional Design Certificate is designed for those working in education, training, professional development, design, and/or outreach who wish to master knowledge and skills in instructional design. All credits earned toward the Instructional Design Certificate are Iowa State University graduate credits and can be earned before, after, or concurrently with a master’s or doctoral degree. More information about the Instructional Design Certificate is available at http://www.ci.hs.iastate.edu/gcert-id/.

The Literacy Coaching Certificate program consists of a series of advanced graduate level courses (17 semester credits) aimed at preparing eligible classroom teachers, instructional leaders, and other school personnel to serve in literacy leadership roles with the goal of improving teacher practices and student achievement in diverse PreK-12 school settings. The Literacy Coaching Certificate program provides unique opportunity to develop deep expertise in literacy research, policy, and practice, as well as skill in leadership at a leading university supported by two outstanding programs within the College of Human Sciences at Iowa State University: Literacy Education and Educational Administration. More information about the Literacy Coaching Certificate is available at http://www.ci.hs.iastate.edu/literacy/index.php.

The Special Education Certificate program allows educators who already hold a general education teaching license to complete the coursework necessary to each a teaching endorsement in Special Education. Both the Instructional Strategist I: Mild/Moderate Disabilities (K-6 and 7-12) and the Instructional Strategist II: Behavior Disorders/Learning Disabilities endorsements are available. The programs use a hybrid distance education model to provide accessible coursework, combining video conferencing with a limited number of on-campus sessions. More information about the Special Education Certificate program is available at http://www.ci.hs.iastate.edu/sped/gradprosp.php.

Curriculum in Elementary Education

The curriculum in Elementary Education is planned for students preparing to teach in grades kindergarten through six. For additional information, see Index, Elementary Education.

Teaching endorsements in areas closely related to elementary education, are available for elementary education majors. These include Art, English as Second Language K-12, English/Language Arts, Health, History, Mathematics, Music, Science (basic), Social Studies, Special Education (Instructional Strategist I: Mild/Moderate K-8), Speech Communication/Theater, World Language, See Teacher Education Courses, and Programs, for additional information about endorsements. Additional teaching endorsements, available at the graduate level to individuals who hold a valid Iowa teaching license, include the following: K-6 world language, reading, and special education (Instructional Strategist II: Behavior Disorders/ Learning Disabilities, ages 5-21).

Minor in learning technologies is available; see requirements under Curriculum and Instruction Courses and Programs.

Communication Proficiency

To meet graduation requirements, all students must have a C (2.0) or better for each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition.

U.S. Diversity and International Perspectives

To meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See department for approved lists of courses.

World Language and Culture Requirement

Elementary education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one world language (normally, completion of a two-semester sequence in any one world language). The requirement may be met by completion of three or more years of high school study in one world language. Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for WLC 101/102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take WLC 101/102 on a remedial basis, they will be graded S-F. Certification in American Sign Language is recognized by the...

Dance

Administered by the Department of Kinesiology.

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance. An interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index, Theatre and Performing Arts.

Diet and Exercise (H SCI) Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics,
the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Health Fitness Instructor.

**Total Degree Requirements: 124 cr. for bachelor’s degree and 34-41 cr. for master’s degree**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications and Library: 10 cr.**

Dietetics - Undergraduate Program (H SCI)

Curriculum in Dietetics

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetic internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Management: 11 cr.

Total Credits 0

Electives: 0-13 cr. Select from any university coursework to earn at least 120 total credits.

Admission to the dietetics program: Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based

...
on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietician. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN Courses.

Educational Leadership and Policy Studies

Departmental Mission, Vision and Goals statements

Mission:
The mission of the Department of Educational Leadership and Policy Studies is to advance the quality and effectiveness of educational institutions and individuals engaged in education. The department is guided by the missions of Iowa State University and the College of Human Sciences and embodies the concepts of the land-grant tradition of teaching, research, and service. The department is dedicated to enhancing the intellectual, cultural, social, and ethical potential of students and faculty for the benefit of Iowa, the nation, and the world. Specifically, the Department of Educational Leadership and Policy Studies:

- Provides graduate degree and career preparation programs, coursework, and other learning opportunities for students and practitioners.
- Conducts and disseminates basic and applied research for the advancement of educational theory and practice.
- Provides professional service for institutions, individuals, and organizations at all levels of education.

Vision:
Research: All Educational Leadership and Policy Studies faculty create and disseminate knowledge and promote educational inquiry that enhances educational practices at local, state, national, and international levels.

Teaching: All Educational Leadership and Policy Studies faculty engage in teaching that is consonant with the principles of adult learning and effective teaching that help students develop critical thinking and professionally relevant skills, and that provides a foundation for the application of knowledge to practice.

Service: All Educational Leadership and Policy Studies faculty, using their professional expertise, work with educators, educational institutions, and other constituent groups to solve problems.

Advising: All Educational Leadership and Policy Studies faculty foster students' professional and personal growth by guiding and inspiring them to formulate and complete relevant programs of study and to conduct high quality research.

Curriculum/Program: The Educational Leadership and Policy Studies faculty develop and implement futuristic curricula and programs to ensure that students learn to think critically and perform their professional roles in an exemplary fashion.

General Goals:
The general goals of the department, and hence of each of its program areas and affiliated programs, are to:

- Conduct high quality graduate education programs, both on- and off-campus, for students seeking graduate degrees in a major in education and/or seeking professional licensure as school service personnel.
- Establish appropriate conditions, opportunities, and resources with which both faculty and graduate students may engage in scholarly activities.
- Assist the educational enterprise of Iowa in development by utilizing, when appropriate, the talents and expertise of the faculty and graduate student body in such activities as workshops, conferences, and consultation in small groups, both on- and off-campus.

Graduate Study

Degrees: The Department of Educational Leadership and Policy Studies -- ELPS -- offers work for the degrees master of science, master of education, certificate of advanced studies, and doctor of philosophy with a major in education. ELPS also offers minor work to students majoring in other fields of study. At the master’s level, students may specialize in educational administration; higher education; and research and evaluation. Interested students should consult the specific program area for master’s degree information related to that program.

Students may complete the Ph.D. with a major in education and a specialization in educational leadership with emphasis in either educational administration or higher education. Specific information about the requirements of the Ph.D. degree is available from the departmental office or on the web (www.elps.iaastate.edu/elps/elpsdoc.htm).

The following information refers only to the Ph.D. program:

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition it is preferred that students complete a master’s degree and 3-5 years of professional experience.

Learning Opportunities: Doctoral students in Educational Leadership and Policy Studies will complete seminars, laboratory experiences, field experiences, independent research, and a capstone experience course. In addition to the common experiences noted above, students will each select an intellectual content area that will prepare them to work in the setting of their choice.

Careers: Graduates of the doctoral program are prepared to serve as leaders in various educational settings, including school administration, community colleges, public and private colleges and universities, and public and private educational agencies.

Outcomes: Graduates of the Ph.D. program, regardless of the emphasis chosen, possess skills and knowledge related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Work effectively with individuals and groups.
- Engage in ethical decision-making and management of resources to accomplish goals.
- Engage in scholarly inquiry.
- Express ideas clearly, both orally and in writing.
- Articulate their values, beliefs, and Philosophy of life.
- Relate sensitively to individuals from diverse backgrounds.
- Use the principles of program evaluation and assessment intelligently.
- Have a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
- Articulate the concepts, theories, and practices related to the educational content area emphasized in their studies.

Other Related Programs: Other graduate programs related to education (including Interdisciplinary Graduate Studies) may be more suited to the interests of potential students on the basis of previous education and experiences as well as future plans and needs. Potential students should refer to programs in the Departments of Agricultural Education and Studies, Curriculum and Instruction, Family and Consumer Sciences Education and Studies, Kinesiology, and Interdisciplinary Graduate Studies, or to graduate level course offerings within the other departments, to determine if these offerings may be more closely matched with their career interests.

The following information refers only to the masters level programs:

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Educational Administration (EdAdm)

Degrees and Certificates: Several programs are offered: (1) master of science degree, with thesis or creative component, in elementary or secondary school administration; (2) master of education practitioner; (3) advanced study leading to principal’s license; (4) certificate of advanced studies providing post-master’s training for superintendency licensure; and (5) doctor of philosophy with major in education and specialization in educational leadership. Courses are scheduled with consideration for cohort-collegial teams or groups.

Emphasis: The Educational Administration Program places dual emphasis on preparation of professional educational administrators and on the academic/scholarly aspects of educational leadership and management.

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.
Learning Opportunities: Students will complete courses, laboratory experiences, field experiences, and independent research so that they can effectively serve in leadership roles.

Careers: Graduates of Master’s Degree and Certificate of Advanced Study Programs in Educational Administration are prepared for leadership roles in Pre K-12 school districts and education agencies, typically as building-level principals, assistant principals, curriculum directors, and central office administrators. Doctoral graduates are prepared for PreK-12 leadership roles and academic or leadership positions in higher education.

Outcomes: Graduates of the Certificate of Advanced Studies Program will possess administrative and leadership skills necessary for the superintendency and central office administration. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Serve as visionary leaders, with effective skills in curricular and instructional leadership.
- Work effectively with individuals and groups, both within the district and community, to create and sustain a positive learning culture.
- Engage in ethical decision-making and effective management of human, material, and financial resources to accomplish district goals.
- Express ideas clearly to various publics, both orally and in writing.
- Articulate their values, beliefs, and Philosophies of education.
- Relate sensitively to individuals from diverse backgrounds.
- Access and utilize research information and technology to assist with organizational improvement.
- Translate educational administration concepts and theories into sound management and leadership practices.

Graduates of the Master’s Program with a specialization in educational administration and the Principal Licensure Program possess administrative and leadership skills necessary for PreK-12 building-level leadership roles. Upon program completion, each student will possess the knowledge and skills to:

- Work effectively with all members of the school community to create a shared vision of learning, which builds upon the formation of a shared understanding of the purposes of schooling in a pluralistic society.
- Demonstrate effective skills in collaborative instructional leadership, including an understanding of curriculum standards, principles of effective teaching practices, and effective assessment practices that lead to improved student learning.
- Implement a system of shared governance and empower faculty, staff, students, and families in the school improvement process.
- Create and sustain a safe and caring school culture that values diversity and maintains a commitment to equity in school practices.
- Engage in ethical and moral leadership practices and the effective management of human, material, and financial resources to accomplish school goals.
- Work collaboratively with internal and external stakeholders in responding to school needs and providing community resources to support the learning process.
- Access research and use data to inform teaching and learning practices and support the process of continuous improvement.
- Apply various technologies to support and enhance administrative and instructional purposes.
- Use leadership skills to transform the school into a learning community that promotes change and sustains school improvement initiatives.
- Engage all members of the school community in critical inquiry and reflection, to promote the belief that learning is a lifelong endeavor for every individual.

Graduates of the Ph.D. Program with a specialization in educational administration will possess skills and knowledge related to the six core domains: leadership, educational research, communication, educational evaluation, educational foundations, and educational technology. By the time of graduation, students will demonstrate the necessary skills and knowledge for those outcomes as listed under the ELPS Ph.D. program outcomes.

Event Management

Administered by the Department of Apparel, Educational Studies, and Hospitality Management.

Department name changed to Apparel, Events, and Hospitality Management (12-2011)

The program offers study for the degree of Bachelor of Science with a major in event management. The program prepares undergraduate students for careers in leading event and meeting management businesses. Through the major, students gain background and experiences in planning, budgeting, and implementing conferences, meetings, and other special events in the public or private sectors. Course work provides students with a general education plus professional preparation focusing on the concepts and principles involved in meeting and event planning; special event management; budgets and finance; site selection; contracts, vendors, and negotiations; marketing and promotions; food and beverage management; meeting technology; and hospitality law. Supporting courses include foodservice, catering, promotion, brand management, trend analysis, fashion, and resource management. Learning experiences are provided through planning university events such as Dance Marathon, Family Weekend, Student Union Board, and Homecoming, as well as other campus and community events.

Graduates from this program are prepared for careers in event planning (political events, celebrations, education, promotions, commemorations, trade shows, weddings, conferences, corporate events, exhibitions, festivals, philanthropies, entertainment, and conventions) and small business development (entrepreneurship). Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, promotion, and event management principles. Students are required to complete an internship in event management prior to graduation.

The AESHM Department offers a minor in event management. The minor can be earned by successfully completing the following for a total of 15 credits.

9 credits are required:

- EVENT 271 Introduction to Event Management
- EVENT 371 Conference and Meeting Planning
- EVENT 471 Special Events Coordination

And six credits of the following:

- AESHM 287 Principles of Management in Human Sciences
- AESHM 311 Seminar on Careers and Internships
- AESHM 340 Hospitality and Apparel Marketing Strategies
- AESHM 342 Aesthetics of Consumer Experience
- AESHM 470 Supervised Professional Internship
- AESHM 474 Entrepreneurship in Human Sciences

Total Credits: 15

Curriculum in Event Management

Administered by the Apparel, Events, and Hospitality Management Department.

Leading to the degree Bachelor of Science.

Total credits required: 123 including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree. The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Students majoring in Event Management are required to earn a C- or better in all AESHM and EVENT courses. Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

A minor in event management is available; see requirements under Apparel, Events, and Hospitality Courses and Programs.

Cr. Degree Requirements

Communication Skills

- ENGL 150 Critical Thinking and Communication
- ENGL 250 Written, Oral, Visual, and Electronic Composition
- LIB 160 Information Literacy

One of the following:

- COMST 102 Introduction to Interpersonal Communication
- COMST 214 Professional Communication
- SP CM 212 Fundamentals of Public Speaking

Total Credits: 10

Natural Sciences and Mathematical Disciplines

Select one MATH course from:

- MATH 104 Introduction to Probability
- MATH 105 Introduction to Mathematical Ideas
- MATH 140 College Algebra
- MATH 150 Discrete Mathematics for Business and Social Sciences
- MATH 160 Survey of Calculus
Human Resources Management (HRM)

- 6 credits from the following:
  - ECON 101 Principles of Microeconomics
  - ECON 102 Principles of Macroeconomics
  - HD FS 102 Individual and Family Life Development
  - PSYCH 101 Introduction to Psychology
  - PSYCH 230 Developmental Psychology
  - PSYCH 280 Social Psychology
  - SOC 134 Introduction to Sociology
  - A M D 165 Dress and Diversity in Society

Total Credits 9

Business and Professional Speaking

- 6 credits from the following:
  - ACCT 284 Financial Accounting
  - AESHM 112 Orientation for AESHM
  - AESHM 113 Professional Development for AESHM
  - AESHM 175D Financial Applications for Retail and Hospitality Industries: Hospitality Management
  - AESHM 287 Principles of Management in Human Sciences
  - AESHM 311 Seminar on Careers and Internships
  - AESHM 340 Hospitality and Apparel Marketing Strategies
  - AESHM 342 Aesthetics of Consumer Experience
  - AESHM 411 Seminar on Current Issues
  - AESHM 438 Human Resource Management
  - AESHM 450 Supervised Professional Internship
  - AESHM 458 Hospitality Planning (FFP), a 36-credit specialization in Gerontology, a 36-credit specialization in Dietetics, or a 36-credit specialization in Youth Development. Off-campus courses are offered via the World Wide Web (WWW). Specializations are available in Nutrition; Dietetics; Human Development and Family Studies; Hospitality Management; and Apparel, Merchandising, and Design.

Total Credits 6

Management of Organizations

- 3 credits from:
  - ACCT 215 Legal Environment of Business
  - HSP M 315 Hospitality Law
  - A M D 257 Museum Studies
  - A M D 467 Consumer Behavior
  - ADVRT 301 Advertising Principles
  - AESHM 170F Supervised Work Experience I: Event Management
  - AESHM 211 Leadership Experiences and Development (LEAD)
  - AESHM 222 Creative Thinking and Problem Solving
  - AESHM 270F Supervised Work Experience II: Event Management
  - AESHM 272 Fashion Show Production and Promotion
  - AESHM 275 Retail Merchandising
  - AESHM 377 Brand Management and Promotions
  - AESHM 379 Community Leadership: Examination of Social Issues
  - AESHM 421 Developing Global Leadership: Maximizing Human Potential
  - AESHM 472 Fashion Show Management

Total Credits 30

Family and Consumer Sciences

Master of Family and Consumer Sciences (M.F.C.S.)

- 30 credits from the following:
  - ACCT 284 Financial Accounting
  - AESHM 112 Orientation for AESHM
  - AESHM 113 Professional Development for AESHM
  - AESHM 175D Financial Applications for Retail and Hospitality Industries: Hospitality Management
  - AESHM 287 Principles of Management in Human Sciences
  - AESHM 311 Seminar on Careers and Internships
  - AESHM 340 Hospitality and Apparel Marketing Strategies
  - AESHM 342 Aesthetics of Consumer Experience
  - AESHM 411 Seminar on Current Issues
  - AESHM 438 Human Resource Management
  - AESHM 450 Supervised Professional Internship
  - AESHM 458 Entrepreneurship in Human Sciences
  - EVENT 211 Introduction to Event Management
  - EVENT 371 Conference and Meeting Planning
  - EVENT 471 Special Events Coordination
  - HSP M 101 Introduction to the Hospitality Industry
  - HSP M 315 Hospitality Law
  - A M D 257 Museum Studies
  - A M D 467 Consumer Behavior
  - ADVRT 301 Advertising Principles
  - AESHM 170F Supervised Work Experience I: Event Management
  - AESHM 211 Leadership Experiences and Development (LEAD)
  - AESHM 222 Creative Thinking and Problem Solving
  - AESHM 270F Supervised Work Experience II: Event Management
  - AESHM 272 Fashion Show Production and Promotion
  - AESHM 275 Retail Merchandising
  - AESHM 377 Brand Management and Promotions
  - AESHM 379 Community Leadership: Examination of Social Issues
  - AESHM 421 Developing Global Leadership: Maximizing Human Potential
  - AESHM 472 Fashion Show Management

Total Credits 75-78

Graduate Certificates

http://www.hs.iastate.edu/online-grad/programs/

An 18-credit graduate certificate in Family Financial Planning is offered for students who do not need a master’s degree and want to obtain the educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.
A 21-credit graduate certificate in Gerontology is offered.

A 13-credit Youth Development Specialist graduate certificate is offered.

A 13-credit graduate certificate in Youth Program Management & Evaluation is offered.

For additional information, students should contact the Research and Graduate Education Office, E262 Lagomarcino, Ames, Iowa 50011-3191, mfcsinfo@iastate.edu

Family and Consumer Sciences Education and Studies

Undergraduate Study

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree. (http://catalog.iastate.edu/collegeofhumansciences/familyandconsumerscienceseducationandstudies)

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 areas (http://www.nasafacs.org/national-standards-and-competencies.html): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the curriculum choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Graduates of the Teacher Licensure option may teach family and consumer sciences in middle, junior high, and senior high schools. Students who enroll in Teacher Licensure must apply and be accepted into the teacher education program prior to enrolling in advanced courses and must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. The State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the Iowa State University Teacher Education Standards and the State of Iowa Teaching Standards, along with other information about the University Teacher Education Program, can be found at www.education.iastate.edu/. This program option is approved by the Iowa Department of Education for the preparation of comprehensive and occupational career and technical education family and consumer sciences teachers.

Graduates of the Communications option have a broad-based knowledge of family and consumer sciences and the ability to communicate in a global and technologically changing society. They are able to plan, develop, creatively present and evaluate information. Students apply the principles of educational presentations, journalism, marketing, and public relations to the family and consumer sciences field within businesses, agencies, and organizations that work to empower individuals, families, and communities.

Graduates of the Professional Studies option pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for global settings. Students are prepared to work in a variety of careers ranging from non-profit organizations to the private sector in a business or entrepreneurial venture working with family nutrition, financial planning, life planning, current issues or other topics from the 16 content areas that affect individuals, families and communities.

Students in FCEDS may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. See http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/ and/or http://www.ncr.org/cfle-certification.

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (http://www.aafcs.org/CredentialingCenter/Certification.asp): CFC; Certified in Family and Consumer Sciences; CFCS-HDFS; Certified in Human Development and Family Studies; CFCS-HNFS; Certified in Hospitality, Nutrition, and Food Science; and CPFFE: Certified Personal and Family Finance Educator.

Opportunities are available for obtaining a minor from other programs through careful selection of elective credits and consultation with an adviser. For example, students pursuing the Communications and Professional Studies options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the content areas of family and consumer sciences such as Financial Counseling and Planning. They also are encouraged to enhance their program by selecting relevant additional courses in their area of interest. Students in the Teacher Licensure option may choose to add a minor (for example: Learning Technologies) or an additional endorsement such as Health Education, Middle School, ESL, Multi-Occupations, or Coaching Interscholastic Athletics.

There is also an opportunity to obtain a family and consumer sciences-general endorsement or teacher licensure as a post baccalaureate student.

The program offers a minor in Educational Services in Family and Consumer Sciences. The minor is earned by successfully completing 15 credits. For additional details, see http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/educational-services-in-family-and-consumer-sciences.

Communication Proficiency Requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C- or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

Minor

The HD FS department offers an Educational Services in Family and Consumer Sciences minor. The minor consists of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above.

The Educational Services in Family and Consumer Sciences minor may be earned by completing 15 credits:

- FCEDS 206 Professional Roles in Family and Consumer Sciences 2
- FCEDS 306 Educational Principles for Family and Consumer Sciences 4
- FCEDS 413 Planning and Assessment for Family and Consumer Sciences and Family Life Education 4
- FCEDS 491A Supervised Experiences in a Professional Setting: Communications 5
  or FCEDS 491B Supervised Experiences in a Professional Setting: Professional Studies

Total Credits 15

Graduate Study

The program offers work for the degrees master of science, master of education, and doctor of philosophy, each with the major, family and consumer sciences education. The M.S. degree requires a thesis; the M.Ed. degree requires a creative component; the Ph.D. requires a dissertation. Minors are available.

Programs for advanced degrees with a major in family and consumer sciences education are tailored to fit the educational background, experience, and professional goals of the student. Areas of study provided by the department include program planning, curriculum, evaluation, research methods, supervision
and administration, international education and development, and teacher education. Opportunities are available for strengthening one’s background in subject matter in other programs in the College of Human Sciences.

Students who complete a graduate program are professional family and consumer sciences educators and teacher educators who foster program planning, implementation, and evaluation at state, national, and international levels. They are producers and disseminators of research and scholarship in family and consumer sciences education and are leaders in programs and services for clientele in diverse settings. Currently, the graduate program is not accepting new admissions.

**Curriculum in Family and Consumer Sciences Education and Studies**

Administered by the Department of Human Development and Family Studies. Leading to a degree bachelor of science.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

Students in the program choose one of three options: Teacher Licensure, Communications, or Professional Studies.

**Option 1, Teacher Licensure,** is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior high, and senior high schools. Further information about licensure programs appears under Teacher Education.

**Option 2, Communications,** is designed for students seeking careers emphasizing the use of principles in journalism, marketing, communications, and public relations with diverse populations in business or social agency settings as well as extension, community agencies, community colleges, and youth and adult education programs in the global community.

**Option 3, Professional Studies,** is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

A minor in Educational Services in Family and Consumer Sciences is available, see requirements under Human Development and Family Studies Courses and Programs or in the catalog section Family and Consumer Sciences Education and Studies.

Family Financial Planning

Interinstitutional Graduate Program

Iowa State University offers a Master’s degree in Family and Consumer Sciences with specialization in Family Financial Planning. This is an interinstitutional distance education program offered entirely online. The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from each of the participating institutions: Iowa State University; Kansas State University; Montana State University; University of Nebraska; North Dakota State University; Oklahoma State University; South Dakota State University.

At Iowa State University, Family Financial Planning is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-FFP) that consists of 36 semester credits. Neither a thesis nor a creative component is required. Students typically complete the program in three years while employed full time. A computer with minimum specifications, Web access, and an email address are required for completing the program.

FFP Graduate Certificate Program

The Graduate Certificate in Family Financial Planning consists of the six courses from the MFCS-FFP that contain the competencies required for the Certified Financial Planner (CFP®) Certification Examination. Students interested in attaining the CFP® credential and not a master’s degree should enroll in the certificate program.

Courses include in the FFP graduate certificate program include:
- FFP 540 Estate Planning for Families
- FFP 545 Retirement Planning, Employee Benefits, and the Family
- FFP 555 Insurance Planning for Families
- FFP 565 Personal Income Taxation
- FFP 583 Investing for the Family’s Future
- FFP 595 Financial Planning - Case Studies

Both the Master’s degree and Graduate Certificate programs at Iowa State University are registered with Certified Financial Planner Board of Standards Inc. As a CFP Board-registered Program, ISU FFP courses satisfy CFP Board’s education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP®, CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and examination requirements. (CFP Board of Standards website: www.cfp.net (http://www.cfp.net/).

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

Admission Procedures: Admission to the FFP Certificate Program requires exactly one of the following:

- HD FS 341 Housing Finance and Policy
- HD FS 383 Fundamentals of Financial Planning
- HD FS 482 Family Savings and Investments

AESHM 342 Aesthetics of Consumer Experience
A M D 362 Cultural Perspectives of Dress
PHIL 340 Aesthetics

Two of the following:
- ENGL 302 Business Communication
- ENGL 314 Technical Communication
- P R 220 Principles of Public Relations
- P R 305 Publicity Methods
- FCEDS 491B Supervised Experiences in a Professional Setting

College of Human Science Electives, choose from AESHM, FCEDS, FS HN, 13-14 HD FS, HRI, H S, or AMD (TC) minimum 5 credits at 300 level or above, elective total will vary to equal a total of 123.5 credits.

University Electives 9

Total Credits 76-77
Registration
Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Food Science (H SCI)
Curriculum in Food Science
Administered by the Department of Food Science and Human Nutrition

Students select one of the following options and complete all requirements for that option: food science and technology option or food science and industry option.

Courses listed below are required for all of the options, except where specified by option below.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications and Library: 10 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
SP CM 212 Fundamentals of Public Speaking 3
Total Credits 10

Humanities and Social Sciences: 6-12 cr.
Select Humanities course from approved list 3
ECON 101 Principles of Microeconomics 3
If H Sci student, select: 6
Additional Humanities course
Additional Humanities or Social Science course

Ethics and Environmental: 3-6 cr.
FS HN 342 World Food Issues: Past and Present 3
If AgLS student, select from: 2-3
ENV S 120 Introduction to Renewable Resources
ENV S 201 Introduction to Environmental Issues

Mathematical Sciences: 7-12 cr.
Food science and technology option:
Select from: 8
MATH 165 Calculus I and Calculus II
or
MATH 181 & MATH 182 Calculus and Mathematical Modeling for the Life Sciences I and Calculus and Mathematical Modeling for the Life Sciences II
Select at least 3 credits from: 3-4
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics
STAT 105 Introduction to Statistics for Engineers
Total Credits 11-12

Food science and industry option:
Select at least 4 credits from: 4
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
Select at least 3 credits from: 3-4
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics

FS HN 421 Food Microbiology Laboratory 3
FS HN 471 Food Processing I 3
interested students apply to the Didactic Program in Dietetics. Admission to the
program is designated as pre-dietetics students. During spring semester of the
second year, students interested in pursuing the dietetics program enter the university
website: http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/.
There is a $30 fee for a statement of verification of completion of the DPD. For
the national examination administered by the Commission on Dietetic Registration
successful completion of the experience program, graduates are eligible to take
the national examination. Additionally, the curriculum for concurrent Bachelor of Science
in dietetics or kinesiology and health. Coursework has been designed to facilitate
completion of a single undergraduate degree. Students interested in this program enroll as pre-diet and exercise students. In the fall of
the third year, students apply for admission to the BS/MS program. Students not
accepted into the program can continue toward completion of the BS degree in
dietetics or kinesiology and health. Coursework has been designed to facilitate a
4-year graduation date for those students not accepted into the program and
electing to complete a single undergraduate degree. Students accepted into the
program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science and Human Nutrition (H SCI)

The Department of Food Science and Human Nutrition is jointly administered by
the College of Agriculture and Life Sciences and the College of Human Sciences.
All curricula offered by the department are available to students in either college. These
majors include:

- Culinary science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science

Visit the department website at: www.fshn.hs.iastate.edu.

Undergraduate Study

Culinary Science

Culinary science is an interdisciplinary degree combining a strong food science
foundation with acquisition of culinary skills. The program includes chemistry,
organic chemistry, biology, microbiology, and biochemistry as well as quantity food
production, fine dining management, and food safety and sanitation. Internship
experience in the food industry or culinary business is required. Culinary science
graduates are qualified to work as managers and specialists in food research,
product development, culinary applications, and food marketing and sales.

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council
for Education in Nutrition and Dietetics, the accrediting agency of the Academy of
Nutrition and Dietetics. The dietetics undergraduate curriculum meets the
academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor’s and Master’s degrees in diet and exercise meets the academic
requirements of the DPD. Graduates of the program are eligible to apply for
admission to accredited dietetics internships/supervised practice programs. Upon
successful completion of the experience program, graduates are eligible to take
the national examination administered by the Commission on Dietetic Registration
to become a Registered Dietitian (R.D.) and to practice in the field of dietetics.
There is a $30 fee for a statement of verification of completion of the DPD. For
information about verification statements policies, see the dietetics program
website: http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/.

Students interested in pursuing the dietetics program enter the university
designated as pre-dietetics students. During spring semester of the second year,
interested students apply to the Didactic Program in Dietetics. Admission to the
program is based on overall GPA (3.0 or above required), completion of required
coursework, completion of application and demonstrated interest in becoming a
registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement
upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science
with applications to medical dietetics, nutrition counseling and education, and
community nutrition. Foodservice management is also an important aspect of the
program. Graduates work in clinical settings, consulting, food companies, food
services, sports or athletic programs, corporate wellness programs, care facilities
for patients from neonatal to geriatric, and community or school health programs.

A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not
accepted into the program can continue toward completion of the BS degree in
dietetics or kinesiology and health. Coursework has been designed to facilitate a
4-year graduation date for those students not accepted into the program and
electing to complete a single undergraduate degree. Students accepted into the
program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical
sciences are used to study the nature of foods, the causes of their deterioration,
and the principles underlying the processing and preparation of food. It is the
application of science and technology to the provision of a safe, wholesome,
and nutritious food supply. Biotechnology and toxicology interrelate with food science
in the area of food safety. In the food industry, food scientists work in research
and development of products or processes, production supervision, quality control,
marketing and sales, test kitchens and recipe development, product promotion
and communication. Food scientists also work in government regulatory agencies
and academic institutions.

Two options are available in food science: food science and technology and
food science and industry. Both options are approved by the Institute of Food
Technologists, the professional organization of food science. Career
opportunities include quality control/assurance; production supervision; management
and sales; research careers in the food industry, government, or academia;
business; journalism; food product formulation and recipe development; food
promotion and communication; and consumer services in government and
industry. Students who have an interest in graduate study or research are
encouraged to select the food science and technology option. Students who wish
to combine education in engineering with food science may select additional
courses in chemical or agricultural engineering. Double majors are available and
may require an additional year.

Students in food science have the opportunity to pursue a Master of Business Administration (http://www.fshn.hs.iastate.edu/undergraduate-programs/food-
science) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food
science and MBA in five years, to meet the needs of students who are interested
in management careers in the food industry. Students apply for admission to the
MBA program in the spring of the third year. The program for concurrent BS in
food science/MBA degrees is a rigorous 5-year program, and admission is very
selective.

Nutritional Science

Nutritional science offers two options: pre-health professional & research and
nutrition & wellness. The pre-health professional & research option can serve
as a pre-professional program for medicine, dentistry, veterinary medicine, or
for graduate study in nutrition or other biological sciences. Students in the pre-
health professional & research option gain a strong basic science education along
with human nutrition expertise that enables them to attain the knowledge and
skills necessary to work in research laboratories of colleges and universities,
government agencies, industries, and foundations. Students in the nutrition &
wellness option will learn about the role of nutrition and healthy eating for disease
prevention and wellness with an emphasis on nutrition education for the public
and community agencies as well as effective program planning and evaluation.
Graduates will be prepared for employment opportunities in community and state
agencies, nonprofit organizations and health promotion enterprises, or public
health and related programs.

Departmental Learning Outcomes

Students graduating with degrees in culinary science, dietetics, diet and exercise,
food science, or nutritional science will be able to: 1) demonstrate a high level of
technical competence in their chosen field, perform successfully in a graduate

program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers coursework for a variety of minors (http://www.fshn.hs.iastate.edu/undergraduate-programs/minors). Minors available include:

- culinary science
- food safety (interdepartmental minor)
- food science
- nutrition
- food and society

All minors have the following requirements:

- At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
- The minor must include at least 9 credits that are not used to meet any other college or university requirement.
- The same courses may not be applied to two different minors.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy. Degree options include:

- food science and technology (http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology) (MS and PhD)
- meat science (http://www.ans.iastate.edu/section/meat/?pg=degree) (MS and PhD; co-major in animal science)
- nutritional sciences (http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences) (MS and PhD; interdepartmental graduate program)
- family and consumer sciences/dietetics (http://www.fshn.hs.iastate.edu/graduate-program/fcs-dietetics) (MS only)
- diet and exercise (http://www.hs.iastate.edu/academics/majors-list/diet-and-exercise) (BS/MS)
- nutritional sciences (BS/MS)

Prerequisite to major work is a baccalaureate degree in food science, nutrition, other physical/biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance.

Students who are registered dietitians and are eligible for admission to the FSHN Master’s degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology/#minor-in-food-science-and-technology)
- nutritional sciences (http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences/#minor-in-nutritional-sciences)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry perquisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTR 501

Certificates - Graduate

Food Safety and Defense (http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master’s degree program.

Dietetics Internship (http://www.dietetics.iastate.edu)

The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a “Graduate Certificate in Dietetics Internship” which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) credential. There is a nonrefundable application fee of $75.

Gerontology

Interdepartmental Minor and Interinstitutional Program

The gerontology program is designed for students desiring careers in aging-related fields and for students interested in improving their understanding of aging persons in American society. Students are expected to take courses to
develop the necessary interdisciplinary breadth which, in combination with other disciplinary training, can prepare them to work with older adults. Graduates understand the ways in which individual and societal aging influence, and are impacted by, developments in their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of human aging. Gerontology courses are offered in the interdepartmental gerontology program in the following participating departments and programs: Architecture; Biochemistry, Biophysics, and Molecular Biology; Economics; Apparel, Educational Studies, and Hospitality Management; Food Science and Human Nutrition; Kinesiology; Human Development and Family Studies; Political Science; Psychology; and Sociology.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in gerontology. A balanced grouping of courses assists the student in developing both a sensitivity to the issues and the ability to synthesize ideas from the variety of disciplines important to the study of the aging process.

Minor

Undergraduate students may minor in gerontology by taking 16 semester hours of gerontology related courses. Nine of these credits must come from the following courses:

- GERON 373 Death as a Part of Living (3)
- GERON 377 Aging and the Family (3)
- GERON 378 Retirement Planning and Employee Benefits (3)
- GERON 463 Environments for the Aging (3)

Students will participate in a practicum seminar, GERON 466 Gerontology Prepracticum Seminar, and will complete a supervised field practicum after all gerontology coursework is completed (GERON 467 Gerontology Practicum). A minimum of 3 semester credits must be selected from a list of supportive gerontology related courses. Supportive courses include units or topics related to aging and can be used to complement the student’s major interests. The student’s minor program must be approved by the undergraduate gerontology coordinator.

Graduate Study

A declared graduate minor in gerontology consists of a minimum of 12 credits taken from a list of acceptable courses, and from at least two departments. Nine of the 12 credits must be in courses that are focused specifically on aging. One 590 course (3 credits maximum) can be taken as part of the 12 credits. GERON 510 Survey of Gerontology is required for all minor students. At least one member of the gerontology faculty will be on a student’s advisory committee; this person must be a member of the Graduate Faculty. Contact the coordinator to determine whether courses other than those listed below are available.

Interinstitutional Program

Iowa State University offers a Master’s degree in Family and Consumer Sciences with specialization in gerontology. This is an interinstitutional distance education program offered through the Web. The student selects the home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the seven institutions: Iowa State University, Kansas State University, North Dakota State University, Oklahoma State University, Texas Tech University, the University of Arkansas, and the University of Missouri. The master’s degree consists of 36 semester hours, 24 of these hours are from the following courses:

- GERON 530 Perspectives in Gerontology (3)
- GERON 534 Adult Development (3)
- GERON 540 Nutrition and Physical Activity in Aging (3)
- GERON 545 Economics, Public Policy, and Aging (3)
- GERON 563 Environments for the Aging (3)
- GERON 577 Aging in the Family Setting (3)
- GERON 584 Program Evaluation and Research Methods in Gerontology (3)
- GERON 594 Professional Seminar in Gerontology (3)

The remaining 12 credits will include electives and specific courses needed to meet the requirements of the institution awarding the degree. Neither a thesis nor a creative component is required.

Gerontology Graduate Certificate Program

The 21-credit Graduate Certificate Program in Gerontology includes the following courses from the list of core courses:

- GERON 530 Perspectives in Gerontology (3)
- GERON 534 Adult Development (3)
- GERON 540 Nutrition and Physical Activity in Aging (3)
- GERON 594 Professional Seminar in Gerontology (3)

The additional six credits required for the certificate can be chosen from the remaining core courses or from other approved elective courses. A maximum of three credits of practicum also can be included in the elective credits. Admission Procedures: Admission to the Gerontology Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of the catalog. Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration, and fee payment processes through ISU.

Hospitality Management

Administered by the Department of Apparel, Educational Studies, and Hospitality Management.

Department name changed to Apparel, Events, and Hospitality Management (12-2011)

The Hospitality Management (HspM) program strives for excellence in professional and leadership development for the hospitality industry through education, research, and outreach with a mission of developing leaders in the hospitality industry. Educational experiences are planned to contribute to the graduate’s effectiveness as a career professional and as a person, family member, and citizen. Research and extension efforts are conducted with the purpose of improving management effectiveness and quality of services within hospitality organizations. Finally, the program is committed to serving the respective missions of Iowa State University and the College of Human Sciences and to serving the needs of the citizens of Iowa.

Undergraduate Study

The program offers work for the degree Bachelor of Science in hospitality management. Coursework is planned to provide students with a general education plus professional preparation for supervisory and executive positions in hospitality organizations. Principles of business management are presented, as well as fundamentals of hospitality operations. Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, marketing, and operational principles for managing hospitality operations. They demonstrate best practices in meeting customer expectations and use of technology to achieve operational efficiency and effectiveness.

Learning experiences are provided in the quantity food production and service facility of the Hospitality Management program and other approved establishments. Students are required to have a total of at least 600 hours of relevant work experience prior to graduation. Of the 600 hours, 200 hours are required prior to completing one year in the program.

The program offers a concurrent B.S. and M.S. degree that allows students to obtain a B.S. and M.S. degree in hospitality management in 5 years. Application for admission to the Graduate College should be made in the junior year.

Minor

A minor in Hospitality Management may be earned by successfully completing at least 15 credits of AESHM/Hsp M courses. The minor must include at least six (6) credits in courses numbered 300 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade.

- HSP M 101 Introduction to the Hospitality Industry (3)
- HSP M 233 Hospitality Sanitation and Safety (3)

Select 9 credits from:

- AESHM 287 Principles of Management in Human Sciences
- AESHM 438 Human Resource Management
- AESHM 474 Entrepreneurship in Human Sciences
- AESHM 477 Multi-channel Retailing
**Graduate Study**

The Hospitality Management program offers work for the Master of Science and Doctor of Philosophy degrees in hospitality management. Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. They can manage a hospitality enterprise successfully to achieve objectives of the operation or, at the doctoral level, successfully carry out responsibilities of a hospitality educator. Graduates will make positive contributions to the growth and improvement of the hospitality industry using current research in the decision-making process.

A degree in hospitality management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or closely related fields are encouraged to apply. PhD applicants must have two (2) years of professional work experience in the field.

The Master of Science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take three core courses out of the four offered in the core areas (human resources, financial management, marketing, and strategic management).

The PhD program requires a minimum of 72 credits, up to 30 of which may be applied from the Master’s degree. All PhD students take a minimum of 15 research/dissertation credits.

**Curriculum in Hospitality Management**

Administered by the Apparel, Events, and Hospitality Management Department. Leading to the Bachelor of Science degree.

The curriculum in Hospitality Management develops students as leaders for the hospitality professions.

A minor in Hospitality Management is available; see requirements under Hospitality Management, Courses and Programs.

Students majoring in Hospitality Management are required to earn C- or better in all AESHM and HSP M courses. Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Human Development and Family Studies
Undergraduate Study

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in four curricula: Child, Adult and Family Services; Early Childhood Education; Family and Consumer Sciences Education and Studies, and Financial Counseling and Planning.

Students graduating in Human Development and Family Studies will

1. Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats to foster collaboration, provide information and advance knowledge related to child, adult, family, and community services.

2. Consistently and realistically analyze and evaluate one’s own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy related to working with children, adults, families and communities.

3. Understand content related to working with children, adults, families, and communities within chosen program. Use critical thinking skills to evaluate and utilize evidence-based practices. Use logical and ethical reasoning to make decisions and solve problems.

4. Understand the diverse needs of children, adults, and families. Ensure equitable access of children, adults, and families to appropriate environments that support healthy living. Engage children, adults, and families with socially responsible and respectful behavior.

Communication Proficiency requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C– or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The Child, Adult and Family Services curriculum leads to work in helping professions with employment opportunities in public and private agencies. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults as program development specialists, coordinators, directors, teachers, direct care staff, and administrators, through opportunities to work directly in settings of interest to the student. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in Child, Adult and Family Services may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. See http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/ and/or http://www.ncfr.org/cfle-certification.

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education – unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education.

Early childhood education majors must satisfy a world languages and cultures requirement for graduation (see below for more information on the world languages and cultures requirement).

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education – unified students must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. The State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the Iowa State University Teacher Education Standards and the State of Iowa Teaching Standards, along with other information about the University Educator Preparation Program, can be found at www.education.iastate.edu/te. Additional information is also available from the student’s academic adviser.

Students in early childhood education – unified must meet the performance outcome standards for teacher licensure. Standards are assessed through coursework through assignments as such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experience in at least two different settings are required.

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree. (http://catalog.iastate.edu/collegeofhumanSciences/familyandconsumerScienceseducationandstudies)

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 content areas (http://www.nasafacs.org/national-standards-and-competencies.html); Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the program choose one of three options, Teacher Licensure, Communications, or Professional Studies.

Students in Family and Consumer Sciences Education and Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. See http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/ and/or http://www.ncfr.org/cfle-certification.

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (http://www.aafcs.org/CredentialingCenter/Certification.asp): CPFF: Certified in Family and Consumer Sciences; CFCS-HDFS: Certified in Human Development and Family Studies; CFCS-HNFS: Certified in Hospitality, Nutrition, and Food Science; and OPFFE: Certified Personal and Family Finance Educator.

Opportunities are available for obtaining a minor from other programs through careful selection of elective credits and consultation with an adviser. For example,
students pursuing the Communications and Professional Studies options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the content areas of family and consumer sciences such as financial counseling and planning. They also are encouraged to enhance their program by selecting relevant additional courses in their area of interest. Students in the Teacher Licensure option may choose to add an additional endorsement such as Health Education, Middle School, ESL, Multi-Occupations, or Coaching Interscholastic Athletics.

There is also an opportunity to obtain a family and consumer sciences endorsement or teacher licensure as a post baccalaureate student.

The Financial Counseling and Planning curriculum prepares students for careers in family financial services, offering three Emphases: Financial Planning, Financial Counseling or Family Financial Studies. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on individual specific career goals students may select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic. An internship encourages students to apply their studies and to experience the profession in real-world settings.

Financial Counseling and Planning majors are also prepared to enter graduate programs in family financial planning, financial education, economics, finance, and law.

Juniors and seniors in Financial Counseling and Planning who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a B.S. in Financial Counseling and Planning and a M.S. in Human Development and Family Studies or a B.S. in Financial Counseling and Planning and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. See Graduate Study for more information (http://www.hdfs.hs.iastate.edu/graduate/).

Minors

The department offers minors in Child, Adult and Family Services, Educational Services in Family and Consumer Sciences, and Financial Counseling and Planning. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above.

The Child, Adult and Family Services minor may be earned by completing 15 credits:

Graduate Study

The department offers work for the Master of Science (thesis and non-thesis option) and Doctor of Philosophy degrees with the major in Human Development and Family Studies. Minor work for students taking major work in other departments is also available. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and/or intervention or prevention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.

Graduate study in Human Development and Family Studies at Iowa State University is multidisciplinary and focuses on research and practice in several content areas such as adolescent/youth development, adult development and aging, family studies and policy, family economic well-being and financial planning, infant and child development, health and well-being, and lifespan development. In addition, the Department of Human Development and Family Studies offers coursework and experiences leading to the National Council of Family Relations certification as a family life educator.

Prerequisite to work in the major is the completion of a related undergraduate program with basic courses and/or experiences in areas such as child/human development, community and regional planning, economics, education, family studies, psychology, or sociology. Additional coursework or prerequisites (e.g. basic statistics) may be required depending on the undergraduate program and program of study. Students may be admitted to our doctoral program with either a bachelor's (MS/PhD Track, 5 years) or a master's degree (PhD Track only, 3 years). Students admitted to the PhD Track without a prior master's degree must complete requirements for a thesis-based master’s degree as part of their doctoral program of study.

All students take a core set of courses; the program of study is then completed with a selection of courses that meet the individual needs of the student. The variety and flexibility in the coursework allows a student to tailor a program to specific academic interests. The graduate programs are based on a theory, research, and application interactive paradigm with all three areas integrated into our content and method courses.

The department offers a graduate minor in Human Development and Family Studies. To earn this minor, students in a Master's program must take 9 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit: (credits in 591 or 691 not allowed). To earn a minor in HD FS students in a Doctoral program must take 12 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit: (credits in 591 or 691 not allowed).

The department offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field. The certificates emphasize application and relevance to growing diversity and demands on the workforce and include Developmental and Family Sciences Advanced Research Design and Methods (15 credits); Family Well-Being in Diverse Society (12 credits); Infant and Early Childhood Mental Health (12 credits, online); and Life-span Development (12 credits, online).

The department also participates in several Master of Family and Consumer Sciences degree programs (http://catalog.iastate.edu/collegenofhumansciences/familyandconsumersciences/). Admission to the youth (YTH), family financial
planning (FFP) and gerontology (GERON) specialization programs require submission of the Graduate College application form, transcripts, 2 letters of recommendation, resume and a goal statement.

First, students selecting this option may choose Human Development and Family Studies as the focus of their studies.

Second, a 36-credit Master of Family and Consumer Sciences-Youth Development (MFCS-YD) or a 13-credit Youth Development Specialist Certificate or a 13-credit Youth Program Management and Evaluation Certificate are designed to prepare individuals who work directly with youth or are involved in education and research related to youth. The courses for this program are completely online.

Third, a 36-credit Master of Family and Consumer Sciences-Family Financial Planning Program (MFCS-FFP), along with the 18-credit Graduate Certificate Program, is designed to prepare individuals to work in the financial planning field. The courses for the program are completely online. Completion of course work in the Master degree and Graduate Certificate meets the educational requirements to sit for the Certified Financial Planner (CFP) Board of Standards Certification Examination.

The department offers a Financial Counseling and Planning (FCP) concurrent degree program that allows students to obtain a B.S. in FCP and an M.S. in HD FS or a B.S. in FCP and a Graduate Certificate in Family Financial Planning in 5 years. Application for admission to the Graduate College should be made near the end of the junior year. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. Students interested in these programs should contact the department for details.

Finally, the department collaborates with the interdepartmental Gerontology program; students may declare a minor in Gerontology. The Master of Family and Consumer Sciences - Gerontology program (MFCS-GERON) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to older adults. Professionals offering direct services often are involved in health promotion programs, directing inter-generational activities, managing senior centers or retirement communities, counseling older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of older adults, and work with business and industry on issues related to an aging workforce.

Curricula:
- Child Adult and Family Services
- Early Childhood Education — Unified
- Family and Consumer Sciences Education and Studies
- Financial Counseling and Planning

Curriculum in Child, Adult and Family Services

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

Total credits required: 120. The child, adult and family services curriculum, with options in child programs, youth programs, adult/family programs, leads to employment opportunities in the helping professions working with children, adults, and families in a variety of public and private human service agencies and organizations.

A minor in child, adult and family services is available; see requirements under Human Development and Family Studies, Undergraduate programs.

The following requirements are for the child programs, youth programs, adult/family programs:

Communications and Library: 13 credits

Curriculum in Early Childhood Education – Unified

The curriculum in early childhood education – unified (ECE) prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. This curriculum has been approved by the Iowa Department of Education and meets the requirements for the early childhood education – unified teacher license. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and School of Education.

Early childhood education majors must satisfy a world languages requirement for graduation (see below for more information on the world languages requirement).

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education – unified students must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. The state of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the Iowa State University Teacher Education Standards and the State of Iowa Teaching Standards, along with other information about the University Educator Preparation Program, can be found at www.education.iastate.edu/.

Additional information is also available from the student’s academic advisor. Students in early childhood education – unified must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through artifacts such as assignments, projects, or practicum participation. These standards are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experiences in at least two different settings is required.

World Language and Culture Requirements

Early childhood education – unified majors must satisfy a graduation requirement equivalent to the first year of university-level study in one world language (normally, completion of a two-semester sequence in any one world language). The requirement may be met by completion of three or more years of high school study in one world language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101/102 in those languages. If these students choose to take 101-102 on a remedial basis, they will be graded S-F. Test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language.

U.S. Diversity and International Perspectives Requirement: Students in early childhood education – unified fulfill the U.S. Diversity with SP ED 250 or HD FS 240. International Perspectives Requirements are met by choosing three credits of coursework from university-approved Humanities and Social Sciences included on the ECE approved options sheet.

**Curriculum in Family and Consumer Sciences Education and Studies**

Administered by the Department of Human Development and Family Studies. Leading to a degree bachelor of science.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

Students in the program choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Option 1, **Teacher Licensure**, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior high, and senior high schools. Further information about licensure programs appears under Teacher Education.

Option 2, **Communications**, is designed for students seeking careers emphasizing the use of principles in journalism, marketing, communications, and public relations with diverse populations in business or social agency settings as well as extension, community agencies, community colleges, and youth and adult education programs in the global community.

Option 3, **Professional Studies**, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Careers include working with diverse populations in Extension, business, community agencies, and community colleges, or non-profit groups and organizations involving youth and adult education programs.

A minor in Educational Services in Family and Consumer Sciences is available, see requirements under Human Development and Family Studies Courses and Programs or in the catalog section Family and Consumer Sciences Education and Studies.

Curriculum in Financial Counseling and Planning

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

The Financial Counseling and Planning curriculum prepares students for careers in family financial services, offering three Emphases: Financial Planning, Financial Counseling or Family Financial Studies. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on individual specific career goals, students may select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic. An internship encourages students to apply their studies and to experience the profession in real-world settings. A minor in Financial Counseling and Planning is available; see requirements under Human Development and Family Studies Courses and Programs.

Emphasis 3: Family Financial Studies: 18 credits

Select 18 credits from either Emphasis 1 or Emphasis 2
Human Sciences

Human Sciences courses provide integrative study and enriching experiences in areas that cut across the diverse curricula of the College of Human Sciences. These may include such areas as leadership, global understanding, social justice/responsibility, and ethics. Students in any college may take these courses.

Kinesiology

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.
3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

Undergraduate Study

The Department of Kinesiology offers two Bachelor of Science degrees: Athletic Training and Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the major/option courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Athletic Training

Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination. Many states also have licensure requirements to practice athletic training. The Athletic Training education program at Iowa State University, accredited since 2001, includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation. The Athletic Training Program utilizes a competitive admission process for undergraduate students.

B.S. degree in Kinesiology & Health

The Kinesiology & Health major includes four specialization options. Options comprise a focused area of study within Kinesiology and Health. Coursework within each specialization option builds upon personal and scholarly learning by enabling students to master content and skills specific to career applications. Options available are:

1. Community and Public Health
2. Exercise Science
3. Pre-Health Professions
4. Physical Education/Teacher Education

Academic options within the Kinesiology & Health major

Students in the Community and Public Health option are prepared for professional employment at local, state or national health agencies, medical centers, and other public or private organizations that seek to promote health in the population. Students in the Exercise Science option are prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health clubs, cardiac rehabilitation programs or personal training. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health. Graduates also have a basic understanding of management issues related to business applications in the health and fitness field.

Students in the Pre-Health Professions option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in medicine, physical therapy, physician assistant or other healthcare profession.

Students in the Physical Education/Teacher Education option are prepared to teach physical education in grades K-12 and to meet the State of Iowa learning outcomes for teachers. Graduates can plan developmentally appropriate physical education, and individualize instruction and assessment for diverse audiences. Enrollment in the Physical Education/Teacher Education option is limited because of accreditation requirements and the provision of more individualized field experiences.

Learning outcomes for the undergraduate degree

Despite the diversity of options, the learning outcomes comprise a common framework for each student as they progress through Iowa State University.

The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

Communication
Uses clear and effective written, oral, visual, and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.

Lifelong learning, assessment, and self-reflection
Analyzes and evaluates one’s own knowledge, abilities and actions relative to professional standards, seeks opportunities to grow professionally, and utilizes self-assessment and assessment of others to foster physical, cognitive, social, and emotional well-being.

Content knowledge, discovery, and critical thinking
Understands fundamental concepts of physical activity and health, conducts scientific inquiry, and applies critical thinking to solve problems from personal, scholarly, and professional perspectives.

Ethics, diversity, and social justice
Demonstrates leadership and social responsibility to improve quality of life for others and ensures equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.

Other Program Offerings:

B.S./M.S. degree in Diet and Exercise

A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in Diet and Exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), within the College of Agriculture and Life Sciences and the College of Human Sciences, and the Department of Kinesiology, within the College of Human Sciences. Students interested in this program must enroll as freshmen in the Pre-Diet and Exercise program. In the fall of the junior year, students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue toward completion of a B.S. degree in Dietetics or Kinesiology & Health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in Diet and Exercise.

Endorsement to coach interscholastic athletics

The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see Teacher Education, Requirements for Areas of Specialization.

Endorsement to teach health education

Those interested in teaching health education in the public schools may get a primary licensure or an additional endorsement. The State Department of Education has approved the Health Teaching Licensure for grades 5-12.

Basic Activity Instruction Program

The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, and sports. These courses are designed to serve general education purposes for all students.

Dance
Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance. An Interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index, Theatre and Performing Arts.

Graduate Study
The Department of Kinesiology graduate seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a non-thesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department web site (http://www.kin.hs.iastate.edu/graduate).

The department participates in the interdepartmental minor in gerontology (see Index).

Curriculum in Athletic Training
The athletic training major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). See program details for course requirements. Admission procedures and technical standards can be found at www.cycloneathletictraining.com (http://www.cycloneathletictraining.com).

Curriculum in Kinesiology and Health
The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the health, physical activity, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of four options:

1. Community and Public Health
2. Exercise Science
3. Pre-Health Professions
4. Physical Education Teacher Education

Minors in athletic coaching, dance, exercise science, health promotion, kinesiology, and sport and recreation are available; see requirements under Kinesiology, Undergraduate Programs.

A major in Performing Arts with a dance emphasis is available; see requirements under Curriculum in Performing Arts in Theatre.

Communication Proficiency
In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course:

Program requirements:
The following courses are required in all majors and options:

H S 110 Personal and Consumer Health 3
KIN 252 Disciplines and Professions in Kinesiology and Health 1
KIN 253 Orientation in Kinesiology and Health 1
KIN 258 Physical Fitness and Conditioning 2
KIN 358 Physiology of Exercise (*) 3
H S 350 Human Diseases (*) 3

* A grade of C- or better is required.

Total cr. required: A minimum of 124 credits is required, with a minimum of 46 credits in courses numbered 300 or above.

Courses for Kinesiology and Health Major

Option 1. Community and Public Health
This option prepares students for careers in health promotion and disease prevention. Students are prepared for work in state and local health agencies, community and government programs, hospitals, worksite health programs, and not-for-profit organizations. Graduates are eligible to take the Certified Health Education Specialist (CHES) exam.

Option Requirements:
P R 220 Principles of Public Relations 3
or P R 305 Publicity Methods
H S 105 First Aid and Emergency Care 2
H S 215 Drug Education 3
H S 310 Community and Public Health (*) 3
H S 380 Worksite Health Promotion 3
H S 385 Strategies for Professional School and Field Experience Opportunities R
H S 430 Community Health Program Development 3
H S 464 Physical Activity Epidemiology 3
H S 485 Directed Field Experience in Health Promotion (take 10 8-16 to 16 credits)
HD FS 449 Program Evaluation and Proposal Writing 3

or ENGL 309 Report and Proposal Writing
P R 220 Principles of Public Relations 3
or P R 305 Publicity Methods
KIN 366 Exercise Psychology (*) 3

One of the following
ENGL 313 Rhetorical Website Design
or HD FS 395 Children, Families, and Public Policy
Electives: 11-18 credits

* A grade of C- or better is required.

Option 2. Exercise Science
This option prepares students for careers in exercise/fitness promotion. Students are prepared as health/fitness specialists, personal trainers, strength and conditioning specialists, and health coaches. Students find work in fitness centers, worksite health programs, medical facilities, cardiac rehabilitation centers, and other agencies that provide fitness services. Students are eligible to sit for certification exams offered by the American College of Sports Medicine and the National Strength & Conditioning Association.

Option Requirements:
KIN 259 Leadership Techniques for Fitness Programs 2
KIN 266 Advanced Strength Training and Conditioning 2
KIN 345 Management of Health-Fitness Programs and Facilities 3
KIN 355 Biomechanics (*) 3
KIN 360 Sociology of Sport and Exercise (*) 3
KIN 366 Exercise Psychology (*) 3
KIN 372 Motor Control and Learning Across the Lifespan (*) 3
KIN 385 Strategies for Professional School and Field Experience Opportunities R
KIN 458 Principles of Fitness Assessment and Exercise Prescription (*)
KIN 459 Internship in Exercise Leadership 1
KIN 462 Medical Aspects of Exercise 3
KIN 485A Internship in Exercise Science: Health/Fitness Management. (take 8 to 16 crs)
H S 380 Worksite Health Promotion 3
A TR 220 Basic Athletic Training 1
or H S 305 Instructor’s First Aid and Cardio-pulmonary Resuscitation 2
Electives: 15-25 credits

* A grade of C- or better is required.

Option 3. Physical Education Teacher Education
This option is for students seeking a license to teach K-12 physical education. All courses required for licensure have a minimum grade requirement of a C or C-.

Students interested in a coaching and/or a health endorsement must complete additional coursework.

Option Requirements:
KIN 231 Fundamentals of Tumbling and Gymnastics (*) 1
KIN 232 Fundamentals of Team Sports (*) 1
KIN 236 Fundamentals of Individual Sports and Fitness (*) 1
KIN 238 Fundamentals of Outdoor and Adventure Activities (*) 1
KIN 280 Directed Field Experience in Elementary Physical Education 1
KIN 281 Directed Field Experience in Secondary Physical Education 1
KIN 282 Field Experience with Educational Outreach 1
KIN 312 Movement Education in Elementary School Physical Education 3
KIN 313 Teaching Secondary Physical Education 3
KIN 355 Biomechanics (*) 3
KIN 360 Sociology of Sport and Exercise (*) 3
KIN 365 Sport Psychology (*) 3
or KIN 366 Exercise Psychology
KIN 372 Motor Control and Learning Across the Lifespan (*) 3
KIN 395 Adapted Physical Education 3
KIN 417 Supervised Teaching in Physical Education in the Secondary School arr

†
The minor requires a minimum of 17 credits and may be earned by completing the following:

**KIN 418** Supervised Teaching in Physical Education in the Elementary School 8

**KIN 471** Measurement in Physical Education 3

**KIN 475** Physical Education Curriculum Design and Program Organization 3

**DANCE 211** Fundamentals and Methods of Social and World Dance (*) 1

**H S 105** First Aid and Emergency Care (*) 2

**H S 305** Instructor’s First Aid and Cardiac-Pulmonary Resuscitation (*) 2

**C I 202** Learning Technologies in the 7-12 Classroom 3

**C I 204** Social Foundations of Education in the United States 3

**C I 406** Multicultural Foundations of School and Society: Introduction 3

**Electives:** 6 credits

† Arranged with instructor.

* A grade of C- or better is required.

**Option 4. Pre-Health Professions**

This option is for students interested in graduate study or for those who are preparing for professional programs in medicine, physical therapy, physician assistant, and other healthcare professions. Course work provides background in human movement while completing the requirements for entry into graduate or professional school.

**Option Requirements:**

- **BIOL 211** Principles of Biology I 3
- **BIOL 211L** Principles of Biology Laboratory I 1
- **BIOL 212** Principles of Biology II 3
- **BIOL 212L** Principles of Biology Laboratory II 1
- **KIN 355** Biomechanics (*) 3
- **KIN 360** Sociology of Sport and Exercise (*) 3
- **KIN 365** Sport Psychology (*) 3
- or **KIN 366** Exercise Psychology
- **KIN 372** Motor Control and Learning Across the Lifespan (*) 3
- **KIN 385** Strategies for Professional School and Field Experience Opportunities R
- **9 cr. from the following** 9
- **H S 464** Physical Activity Epidemiology 3
- **KIN 455** Research Topics in Biomechanics
- **KIN 458** Principles of Fitness Assessment and Exercise Prescription
- **KIN 462** Medical Aspects of Exercise
- **KIN 467** Exercise and Health: Behavior Change
- **KIN 472** Neural Basis of Human Movement
- **KIN 480** Functional Anatomy
- **KIN 366** Exercise Psychology 3
- **KIN 481** Biomechanics Lab
- **KIN 482** Exercise Physiology Lab
- **KIN 483** Exercise Psychology Lab
- **KIN 484** Assessment and Control of Locomotion
- **KIN 495** Seminar in Exercise and Sport Science

**Specialization Requirements:** Sciences as required by professional schools. 14-30 credits

**Electives:** 5-24 credits

* A grade of C- or better is required.

**Minors**

**Athletic Coaching**

The minor requires a minimum of 17 credits and may be earned by completing the following:

- **A TR 220** Basic Athletic Training 2
- **KIN 315** Coaching Theory and Administrative Issues 3
- **KIN 365** Sport Psychology 3
- **BIOL 155** Human Biology 3
- or **BIOL 255** Fundamentals of Human Anatomy 3
- **PSYCH 230** Developmental Human Psychology 3
- 3 cr. from the following:
  - **KIN 355** Biomechanics
  - or **KIN 358** Physiology of Exercise

**Dance**

The minor requires a minimum of 21 credits and may be earned by completing the following:

- **DANCE 220** Modern Dance Composition 2
- **DANCE 222** Modern Dance II 1
- **DANCE 270** Dance Appreciation 3
- **DANCE 320** Sound and Movement 3
- **DANCE 360** History and Philosophy of Dance 3
- **DANCE 384** Teaching Children’s Dance 2
- **DANCE 385** Methods of Teaching Dance 2
- **DANCE 386** Teaching Dance Technique and Composition 2
- 3 additional credits selected from dance courses numbered 200 or above.*

* Participation in Orchesis I or II is recommended.

**Exercise Science**

The minor requires a minimum of 17 credits and may be earned by completing the following:

- **KIN 258** Physical Fitness and Conditioning 2
- **KIN 358** Physiology of Exercise 3
- **KIN 366** Exercise Psychology 3
- **3-6 cr. from the following** 3-6
  - **A TR 220** Basic Athletic Training
  - **KIN 259** Leadership Techniques for Fitness Programs
  - **KIN 266** Advanced Strength Training and Conditioning
  - **KIN 345** Management of Health-Fitness Programs and Facilities
  - **KIN 360** Sociology of Sport and Exercise
- **3-6 cr. from the following** 3-6
  - **KIN 458** Principles of Fitness Assessment and Exercise Prescription
  - **KIN 462** Medical Aspects of Exercise
  - **KIN 467** Exercise and Health: Behavior Change

**Health Promotion**

The minor requires a minimum of 18 credits and may be earned by completing the following:

- **H S 110** Personal and Consumer Health 3
- **H S 350** Human Diseases 3
- **H S 380** Worksite Health Promotion 3
- **3-6 cr. from the following** 3-6
  - **H S 215** Drug Education
  - **H S 305** Instructor’s First Aid and Cardiac-Pulmonary Resuscitation
  - **H S 310** Community and Public Health
- **3-6 cr. from the following** 3-6
  - **H S 430** Community Health Program Development
  - **KIN 467** Exercise and Health: Behavior Change

**Kinesiology**

The minor requires a minimum of 15 credits and may be earned by completing the following: (For non-majors only.)

- **KIN 355** Biomechanics 3
- **KIN 358** Physiology of Exercise 3
- **KIN 360** Sociology of Sport and Exercise 3
- **KIN 372** Motor Control and Learning Across the Lifespan 3
- **KIN 385** Sport Psychology 3
- or **KIN 366** Exercise Psychology
Sport and Recreation

The minor requires a minimum of 18 credits and may be earned by completing the following:

- KIN 315 Coaching Theory and Administrative Issues 3
- KIN 365 Sport Psychology 3
- KIN 366 Sociology of Sport and Exercise 3
- KIN 399 Recreational Sport Management 3
- MGMT 370 Management of Organizations 3

3 cr. from the following

- ADVRT 230 Advertising Principles 3
- P R 220 Principles of Public Relations 3
- P R 305 Publicity Methods 3
- MGMT 310 Entrepreneurship and Innovation 3
- MGMT 313 Feasibility Analysis and Business Planning 3
- MGMT 371 Organizational Behavior 3
- MGMT 471 Personnel and Human Resource Management 3

Nutritional Science

Undergraduate Program (H SCI)

Other Content

Curriculum in Nutritional Science

Administered by the Department of Food Science and Human Nutrition

Pre-Health Professional and Research Option

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 13 cr.

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- ENGL 314 Technical Communication 3
- LIB 160 Information Literacy 3
- SP CM 212 Fundamentals of Public Speaking 3

Total Credits 13

Humanities and Social Sciences: 6-12 cr.

Select Humanities courses from approved list 3
Select Social Science course from approved list 3
If H Sci student, select:
- Additional Humanities course 3
- Additional Humanities or Social Science course 6

Ethics and Environmental: 3-6 cr.

If AgLS student, select from:
- ENV S 120 Introduction to Renewable Resources 2-3
- ENV S 201 Introduction to Environmental Issues 3

Mathematical Sciences: 6-12 cr.

Select at least 3 credits from:
- MATH 140 College Algebra 3
- MATH 143 Preparation for Calculus 3
- MATH 160 Survey of Calculus 3
- MATH 165 Calculus I 3
- MATH 165 & MATH 166 Calculus I and Calculus II 6
- MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 3-8
- MATH 181 & MATH 182 Calculus and Mathematical Modeling for the Life Sciences I and Life Sciences II 6

Select at least 3 credits from:
- STAT 101 Principles of Statistics 3
- STAT 104 Introduction to Statistics 4

Total Credits 6-12

Physical Sciences: 17 cr.

- CHEM 177 General Chemistry I 4
- CHEM 177L Laboratory in General Chemistry I 1
- CHEM 178 General Chemistry II 3
- CHEM 178L Laboratory in College Chemistry II 1
- CHEM 331 Organic Chemistry I 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- CHEM 332 Organic Chemistry II 3
- CHEM 332L Laboratory in Organic Chemistry II 1

Total Credits 17

Biological Sciences: 24-29 cr.

- BIOL 211 Principles of Biology I 3
- BIOL 211L Principles of Biology Laboratory I 3
- BIOL 310 Principles of Genetics 3

Select at least 3 credits from:
- BIOL 305 Principles of Molecular Cell Biology 2-3
- BBMB 301 Survey of Biochemistry 3
- BBMB 304 Biochemistry I 3
- BBMB 305 Biochemistry II 3
- MICRO 201 Introduction to Microbiology 2-3
- MICRO 302 Biology of Microorganisms 3
- MICRO 214L Introductory Microbiology Laboratory 3
- MICRO 302L Microbiology Laboratory 3

Total Credits 24-29

Food Science and Human Nutrition: 37 cr.

- FS HN 110 Professional and Educational Preparation 1
- FS HN 167 Introduction to Human Nutrition 3
- FS HN 203 Contemporary Issues in Food Science and Human Nutrition 3
- FS HN 265 Nutrition for Active and Healthy lifestyles 3
- FS HN 360 Advanced Human Nutrition and Metabolism 3
- FS HN 361 Nutrition and Health Assessment 2
- FS HN 362 Nutrition in Growth and Development 3
- FS HN 467 Molecular Basis of Nutrition in Disease Prevention 3
- FS HN 480 Professional Communication in Food Science and Human Nutrition 2
- FS HN 492 Research Concepts in Human Nutrition 2

Select at least 15 additional credits from:
- BIOL 314 Principles of Molecular Cell Biology 3
- BIOL 315 Principles of Molecular Cell Biology 3
- FS HN 214 Scientific Study of Food 3
- FS HN 215 Advanced Food Preparation Laboratory (or FS HN 115 lab) 3
- FS HN 242 Societal Impacts on Food Systems 3
- FS HN 311 Food Chemistry 3
- FS HN 365 Obesity and Weight Management 3
- FS HN 367 Medical Terminology for Health Professionals 3
Electives: 0-12 cr. Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu

Nutrition and Wellness Option
Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Food Systems: 9 cr.
FS HN 242 Societal Impacts on Food Systems 3
FS HN 203 Contemporary Issues in Food Science and Human Nutrition 3
FS HN 242 Societal Impacts on Food Systems 3
FS HN 203 Contemporary Issues in Food Science and Human Nutrition 3

Food Science and Human Nutrition: 36 cr.
FS HN 101 Food and the Consumer 3
FS HN 110 Professional and Educational Preparation 1
FS HN 111 Fundamentals of Food Preparation 2
FS HN 115 Food Preparation Laboratory 1
FS HN 167 Introduction to Human Nutrition 3
FS HN 203 Contemporary Issues in Food Science and Human Nutrition 3
FS HN 264 Fundamentals of Nutritional Biochemistry and Metabolism 3
FS HN 265 Nutrition for Active and Healthy Lifestyles 3
FS HN 361 Nutrition and Health Assessment 2
FS HN 364 Nutrition and Prevention of Chronic Disease 3
FS HN 365 Obesity and Weight Management 3
FS HN 366 Communicating Nutrition Messages 3
FS HN 403 Food Laws, Regulations, and the Regulatory Process 2
FS HN 463 Community Nutrition 3
FS HN 480 Professional Communication in Food Science and Human Nutrition 1
FS HN 495 Practicum 2
FS HN 495 Practicum 2
Total Credits 36

Physical Sciences: 5 cr.
CHEM 163 College Chemistry 4
or CHEM 177 General Chemistry I 1
CHEM 163L Laboratory in College Chemistry 1
or CHEM 177L Laboratory in General Chemistry I 1
Total Credits 5

Biological Sciences: 19 cr.
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 255 Fundamentals of Human Anatomy 3
BIOL 255L Fundamentals of Human Anatomy Laboratory 1
BIOL 256 Fundamentals of Human Physiology 3
BIOL 256L Fundamentals of Human Physiology Laboratory 1
MICRO 201 Introduction to Microbiology 2
MICRO 201L Introductory Microbiology Laboratory 1
Total Credits 19

Food Science and Human Nutrition: 36 cr.
FS HN 101 Food and the Consumer 3
FS HN 110 Professional and Educational Preparation 1
FS HN 111 Fundamentals of Food Preparation 2
FS HN 115 Food Preparation Laboratory 1
FS HN 167 Introduction to Human Nutrition 3
FS HN 203 Contemporary Issues in Food Science and Human Nutrition 3
FS HN 264 Fundamentals of Nutritional Biochemistry and Metabolism 3
FS HN 265 Nutrition for Active and Healthy Lifestyles 3
FS HN 361 Nutrition and Health Assessment 2
FS HN 364 Nutrition and Prevention of Chronic Disease 3
FS HN 365 Obesity and Weight Management 3
FS HN 366 Communicating Nutrition Messages 3
FS HN 403 Food Laws, Regulations, and the Regulatory Process 2
FS HN 463 Community Nutrition 3
FS HN 480 Professional Communication in Food Science and Human Nutrition 1
FS HN 495 Practicum 2
Total Credits 36
Electives: 9-18 cr. At least 9 credits of electives must be 300-400 level courses. Select from any university coursework to earn at least 120 total credits.

Go to FS HN courses.

School of Education

http://www.education.iastate.edu

Missions and Goals

The School of Education will be a premier leader in education based on a strong foundation in the humanities and social sciences with a noted emphasis in leadership, and science, technology, engineering and mathematics (STEM) education. The School will advance research and scholarship in the areas of teaching, learning, and leadership and in the preparation of professionals for educational environments across multiple settings. The mission of the School of Education is to create, share, and apply knowledge and to advocate for equal educational opportunities and socially responsible educational reform in Iowa, the nation, and the world. The School will prepare excellent research-informed educators, researchers, administrators, and others in educational roles.

- Support the advancement of specialized academic disciplines through exemplary research and scholarship;
- Enhance Iowa’s families, schools, and communities through exemplary education and teacher preparation; and
- Provide educators and students with the knowledge, skills, and experience necessary to become leaders in an increasingly changing and interdependent world.

Undergraduate Study

The School of Education provides the professional education coursework that leads to licensure of pre-service teachers. Majors offered in the department include Elementary Education (K-6), and Early Childhood Education-Unified (birth through age 8). The Early Childhood Education-Unified major is an interdepartmental program administered by the School of Education and the Department of Human Development and Family Studies.

Students who are interested in teaching at the secondary level (7-12) major in a specific discipline (e.g. Mathematics, Science, English, Social Studies) and complete additional required coursework in the School of Education for a teaching license.

Note: The Iowa Board of Educational Examiners has mandated changes to the teacher licensure requirements that will impact students graduating after September 1, 2015. Students must consult with an education academic adviser to review these curriculum changes.

Elementary Education and Early Childhood Education-Unified majors must complete a professional course sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>C I 201 Learning Technologies in the PK-6 Classroom</td>
<td>3</td>
</tr>
<tr>
<td>C I 204 Social Foundations of Education in the United States</td>

Total Credits: 14-17

Notes: The School of Education offers courses that can lead to a reading endorsement for grades K-8 or grades 5-12. Students seeking a K-8 endorsement should consult with a School of Education academic adviser. The 5-12 endorsement is offered collaboratively with the English Department. Students seeking this endorsement should consult with an adviser in the English Department. Inquiries can be sent to the Licensure Analyst in Teacher Education Services (133 MacKay) to receive a list of courses needed for an Iowa State University reading endorsement. Prerequisites for the reading endorsement courses are listed in the catalog course descriptions.

Early Childhood Education – Unified

The undergraduate curriculum in Early Childhood Education – Unified leads to the Bachelor of Science Degree. See curriculum.

The curriculum in Early Childhood Education – Unified is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services. Graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education – unified teacher license. The program is an interdepartmental major administered by School of Education and the Department of Human Development and Family Studies within the College of Human Sciences.

Early childhood education – unified majors must satisfy a world languages requirement for graduation.

Students who enroll in early childhood education – unified must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education – unified students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. The State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the twelve Iowa State University Teacher Education Standards and the eight State of Iowa Teaching Standards, along with other information about the University Teacher Education Program, can be found at http://www.education.iastate.edu/, the teacher education website. Additional information is also available from the student’s academic adviser.

Students in early childhood education – unified must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through artifacts such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experiences in at least two different settings is required. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University.

Elementary Education

The undergraduate curriculum in elementary education leads to the Bachelor of Science degree.

The curriculum in elementary education is planned for students preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. Graduates in
this curriculum who meet all requirements set by the Iowa Board of Educational Examiners will be recommended for licensure, which would allow them to teach in elementary classrooms in either public or private schools. Endorsements in art, English/language arts, English as a Second Language (ESL), health, history, music, basic science, social studies, mathematics, special education (Instructional Strategist I: Mild/Moderate Disabilities K-8), and speech communication/theater are available for elementary education students. An endorsement for teaching world languages in elementary schools is available through the Department of World Languages and Cultures.

Elementary education majors must satisfy a world languages requirement for graduation.

Students who enroll in elementary education must apply and be accepted into the teacher education program prior to enrolling in advanced elementary education courses. Iowa Department of Education licensure requirements state that every student must meet the performance outcome standards for teacher licensure. Standards will be assessed in each course and students will receive both formative and summative evaluations of their progress toward meeting these standards throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found on the school's website (http://www.education.iastate.edu/te), or may be obtained from a School of Education academic adviser.

Secondary Education

Secondary Licensure areas at Iowa State University include:

Agricultural Education (grades 5-12) – College of Agriculture (http://www.education.iastate.edu/te/programs/secondary-education/agricultural-education-grades-5-12-agriculture)

Biology (grades 5-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/biology-grades-5-12-liberal-arts-and-sciences)

Chemistry (grades 5-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/chemistry-grades-5-12-liberal-arts-and-sciences)

Earth Sciences (grades 5-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/earth-sciences-grades-5-12-liberal-arts-and-sciences)

English (grades 5-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/english-grades-5-12-liberal-arts-and-sciences)

Health Education (grades 5-12) – College of Human Sciences (http://www.education.iastate.edu/te/programs/secondary-education/health-education-grades-5-12-human-sciences)

History – Social Sciences (grades 5-12) – College of Liberal Arts and Sciences, Human Sciences (http://www.education.iastate.edu/te/programs/secondary-education/history-social-sciences-grades-5-12-liberal-arts-and-sciences-human-sciences)

Mathematics (grades 5-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/mathematics-grades-5-12-liberal-arts-and-sciences)

Music (grades K-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/music-grades-k-12-liberal-arts-and-sciences)

Physical Education (grades K-12) – College of Human Sciences (http://www.education.iastate.edu/te/programs/secondary-education/physical-education-grades-k-12-human-sciences)

Physics (grades 5-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/physics-grades-5-12-liberal-arts-and-sciences)

World Languages and Cultures (grades 5-12) – College of Liberal Arts and Sciences (http://www.education.iastate.edu/te/programs/secondary-education/world-languages-and-cultures-grades-5-12-liberal-arts-and-sciences)

Students seeking recommendations for a license to teach in the secondary schools must be admitted to the teacher education program. For specific requirements for each area of specialization, see Teacher Education and curricula for the college in which the chosen degree major is sought.

Notes:

• Students seeking licensure in physical education, agriculture and science do not take CI 426 Principles of Secondary Education Principles of Secondary Education.
• Students seeking a teaching license in physical education must see an adviser in the Department of Kinesiology in the College of Human Sciences.
• All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the Iowa State University teacher education program and the Iowa Board of Educational Examiners.
• Each student must meet the performance outcome standards for teacher licensure by completing a portfolio. Each standard will be assessed in every major. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University.
• A detailed explanation of the standards and assessment process may be found at http://www.education.iastate.edu/te/graduate/cit/graduate-specialization/ for more information. Students should contact the academic advisor in their major. Each student will be enrolled in the department in which he or she plans to major, and must meet the graduation requirements of that department and the college in which it is situated.

Graduate Study
The School of Education offers coursework and experiences for the degrees of Doctor of Philosophy, Master of Science, and Master of Education with a major in education. Graduate teacher licensure/degree programs are offered in secondary science and secondary mathematics, as well as endorsement programs in special education. Graduate students may also pursue administrative licensure for roles as principals and superintendents. The School of Education offers graduate coursework leading to a minor for masters and doctoral students in other fields of study. Several graduate certificate programs are offered through the School of Education.

Doctoral Degree Program
Students in the School of Education may complete the Ph.D. with a major in education. Specializations in Curriculum and Instructional Technology and Educational Leadership are offered. Within the Educational Leadership specialization, students may emphasize educational administration or higher education (higher education administration, community college, social justice). Students pursuing the Ph.D. may earn an education degree with an emphasis area. Emphasis areas include literacy, mathematics education, multicultural education, or science education. Specific information about the requirements of and options available within the Ph.D. degree in education are available from the school office or on the web (www.education.iastate.edu/graduate).

The following information refers only to the Ph.D. program:
Prerequisite to major graduate work in education is completion of an undergraduate degree and a masters degree with coursework appropriate to the planned area of study, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition, several areas of emphasis prefer that students have 3-5 years of professional experience. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores.

Graduates of the Ph.D. program in education are prepared to pursue careers as scholars, leaders, and administrators in various educational settings, including public and private colleges and universities, community colleges, public and private educational agencies, and corporate training settings.

Master’s Degree Programs
Students in the School of Education may seek a specialization in Curriculum and Instructional Technology (M.S., M.Ed.), Educational Administration (M.Ed.), Higher Education (M.S., M.Ed.), Research and Evaluation (M.S.), Special Education (M.S., M.Ed.), or Student Affairs (M.Ed.). Within the Higher Education specialization, students may opt to emphasize community college leadership or leadership and learning. Students may also pursue a master’s degree with an emphasis area. Emphasis areas include literacy, mathematics education, multicultural education, or science education.

Graduates of the master’s degree programs are prepared to pursue careers as educational leaders, higher education professionals, researchers, and advanced practitioners in colleges and universities, community colleges, public and private schools, education agencies, and informal (free-choice) education settings. A minor is available in Curriculum and Instructional Technology at both the master’s and doctoral level. Information about the minors can be found on the web at http://www.education.iastate.edu/te/graduate/ct/graduate-specialization/

Graduate Teacher and Administrator Licensure Programs
A Master of Arts in Teaching degree program leading to teacher licensure (science education) is available to students who currently have a bachelor’s degree in a science area (or a closely related field). A teacher licensure program in mathematics education is also available to graduate students (School of Education). Teacher licensure at the graduate level is also offered in agricultural education (College of Agriculture and Life Sciences), family and consumer sciences (College of Human Sciences), and physical education (College of Human Sciences). The School of Education provides the professional education coursework.

Students in a graduate teacher licensure program must complete:
- SP ED 501 Teaching Secondary Students with Exceptionalities in General Education 3
- C I 505 Using Technology in Learning and Teaching 3
- C I 506 Multicultural Foundations of School and Society: Advanced 3
- C I 529 Educational Psychology and the Secondary Classroom 3
- H P C 504 Studies in the Foundations of Education in the United States 3

Total Credits 15

Mathematics licensure students also take C I 526 Principles of Secondary Education Principles of Secondary Education.

Graduate level teaching endorsements are offered through the School of Education. Graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master’s degree can incorporate those courses in a professional certificate program. Endorsement programs include Instructional Strategist I: Mild/Moderate Disabilities (K-8 or 5-12), or Instructional Strategist II: Behavior Disorders/Learning Disabilities, and special education consultant. A graduate level reading endorsement is also available.

The School of Education offers graduate programs for students seeking Iowa licensure as principals and superintendents. The PreLEAD (Preparation for Leadership) program is designed for working professionals and includes coursework and field experiences leading to Iowa licensure as a principal. Students may complete the program as a certificate (non-degree) or as a Master of Education degree. A Certificate of Advanced Studies program allows students who hold a master’s degree in Educational Administration to pursue the coursework and clinical field experiences necessary to earn an Iowa Superintendent or AEA Chief Administrator license.

Graduate Certificate Programs
The School of Education offers Graduate Certificate programs to allow students to enhance their skills outside of full degree programs. The Certificate programs currently offered include Applied Research Methods in the Human Sciences, Community College Leadership, Community College Teaching, Instructional Design, Literacy Coaching, Principal Licensure (Pre-LEAD), Social Justice in Higher Education, Special Education, and Superintendent Licensure (Certificate in Advanced Studies). Certificate programs require a minimum of 12 graduate credits (several require more than this) and can be earned in conjunction with a degree program. More information about graduate certificate programs in the School of Education can be found at (www.education.iastate.edu/graduate).

Youth Development
Interinstitutional Graduate Program
Iowa State University offers a Master’s degree in Family and Consumer Sciences with specialization in Youth Development. This is an interinstitutional distance education program offered entirely online. The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from each of the participating institutions: Iowa State University; Kansas State University; Montana State University; University of Nebraska; North Dakota State University; Oklahoma State University; South Dakota State University. At Iowa State University, Youth Development is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-YTH) that consists of 36 semester credits. A computer with minimum specifications, Web access, and an email address are required for completing the program. A creative component is completed as the final project/exam for this degree. The final project is tailored to the needs of the individual student and determined in cooperation with the POS committee. The student presents the agreed-upon project to the committee in a 60- to 90-minute final oral examination meeting via a video conference call. http://www.hs.iastate.edu/online-grad/programs/mfcs-youth-dev-online/
The Master of Family and Consumer Sciences with Youth Development specialization is the only online degree available focusing solely on the skills to serve today’s young people. Students become immersed in a strengths-based curriculum and learn a methodology that supports youth, enabling them to grow socially, emotionally, and cognitively. The program has its roots in positive youth development. Rather than focusing solely on corrective measures, a positive youth development approach equips individuals in the second decade of life with the skillset necessary for a successful transition into adulthood.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Two on-line graduate certificates are available as a part of this program:

• Youth Development Specialist Graduate Certificate (http://www.hs.iastate.edu/online-grad/programs/mfcs-youth-dev-online/#youth-development-specialist-graduate-certificate)

• Youth Program Management and Evaluation Graduate Certificate (http://www.hs.iastate.edu/online-grad/programs/mfcs-youth-dev-online/#youth-program-management-and-evaluation-graduate-certificate)

College of Liberal Arts and Sciences

Beate Schmittmann, Dean
Arne Hallam, Associate Dean
Martin Spalding, Associate Dean
Amy Siagell, Associate Dean
Ruth W. Swenson, Associate Dean Emerita
Zora D. Zimmerman, Associate Dean Emerita

www.las.iastate.edu/

The College of Liberal Arts and Sciences is a world-class learning and research community. Iowa State’s most academically diverse college, LAS educates students to become global citizens, providing rigorous academic programs in the sciences, humanities and social sciences within a supportive, student-centered learning environment.

Learning and Teaching Mission

The primary mission of the college is to promote learning in all its dimensions by providing the student with ample opportunities to acquire the requisite knowledge, abilities, and skills to succeed in the world beyond the university. Through coursework within the major and in general education, students will develop skills in reasoning, analysis, and communication; achieve an understanding of the intellectual, historical, and artistic foundations of culture; and work to strengthen their abilities to interact with people, cultures, and the environment in an ethical and sensitive manner. To achieve these learning goals, the college asks students to acquire depth in learning within disciplines of their own choosing, and to acquire breadth through general education courses and electives.

A bachelor’s degree in liberal arts and sciences is the end result of a curriculum that connects and integrates study in a major with general education.

Requirements for a degree are deliberately flexible. Students select programs of study suited to a variety of interests and goals. Students having academic interests not fully met by departmental majors may also pursue a major offered by one of the college’s interdepartmental programs or may apply for an undergraduate major in Interdisciplinary Studies. The college also participates in the University Honors Program allowing students with exceptional academic promise to develop unique and challenging programs of study. Additionally, the college collaborates with the School of Education to support students seeking Teacher Licensure.

The college has four curricula: a curriculum in Liberal Arts and Sciences, leading to the Bachelor of Arts or the Bachelor of Science degree; a curriculum in music, leading to the Bachelor of Music degree; a curriculum in liberal studies, leading to the Bachelor of Liberal Studies degree; and a curriculum in Software Engineering, leading to the Bachelor of Science degree.

The college also is home to the Open Option Program that prepares students for any curriculum at the University.

High School Preparation/ Admission Requirements

Students entering the college are required to present evidence of the following high school preparation:

• 4 years of English (typically includes courses in literature as well as courses in speech and composition, excluding at least one senior-level writing course)

• 3 years of social studies (typically includes two semesters of world history, two semesters of American history, and a semester of American government with electives chosen from areas such as economics, sociology, or psychology)

• 2 years of a single world language (Note: A minimum of 3 years of a single world language in high school meets the world language graduation requirement in the College of Liberal Arts and Sciences. Three years or more of a single world language are strongly recommended for students who wish to continue their work in that language at the university.)

• 3 years of mathematics (preparation includes two semesters of beginning algebra, two semesters of geometry, and two semesters of intermediate algebra; a fourth year of study involving analytic geometry, trigonometry, linear algebra, and/or calculus is strongly recommended for students who will major in mathematical or scientific disciplines)

• 3 years of science (at least two of these years chosen from biology, chemistry, and physics)

Recommended but not required as a condition of admission to the College of Liberal Arts and Sciences is one semester of computer experience. (Such a course should stress problem-solving with computers and should not substitute for courses in mathematics. In schools where computer use is an integral part of most courses, separate instruction in computers is not necessary.)

Students who transfer from another college or university with at least 24 credits of satisfactory coursework may be exempt from most of these requirements.

Students who do not meet the requirements listed here may be admitted with a limited number of deficiencies. Contact the college office for further information about resolving these deficiencies.

Transfer Students

To graduate from the College of Liberal Arts and Sciences, a transfer student must complete the general requirements of the college as well as those of the university. Students planning to transfer to Iowa State University for the purpose of enrolling in the College of Liberal Arts and Sciences are advised to contact the college office for information concerning degree program requirements.

Prospective transfer students are urged to learn about the academic programs that are of interest to them well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU. Additional information concerning transfer credit evaluation may be obtained through the Office of Admissions as well as the department in which a student is interested.

A transfer student in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of his or her graduation or under one of the five immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met though adjustments will be made in instances where courses are no longer available or where programs have been changed. A transfer student is responsible for reviewing his/her transfer credit evaluation with the academic advisor during the first semester of enrollment.

For information on articulation/transfer agreements that apply to students who have earned Associates of Arts degrees from an Iowa public community college or who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa, see Articulation/ Transfer Agreements in the Admission Transfer Information section of the catalog.

University Requirements

The university requirements for the bachelor’s degree, including statements of academic standards, learning goals, the university residence requirement, the communication proficiency requirement, U.S. diversity and international perspectives requirements, and the library requirement, appear in the Colleges and Curricula section of this catalog.

Curriculum in Liberal Arts and Sciences

To obtain a bachelor’s degree from the College of Liberal Arts and Sciences curriculum in liberal arts and sciences, an undergraduate student must earn a minimum of 120 semester credits including a minimum of 32 semester credits earned in residence at Iowa State University. In addition, the student must meet university requirements, noted above, college general education, world language, advanced communication, advanced credit requirements, and the requirements of a major. Courses taken on a pass/not pass basis may be counted toward the required total of 120 credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.
The major in Interdisciplinary Studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives.

**General Education Requirements and Learning Goals**

The central importance of a general education is reflected in the learning goals of each of three disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation to support learning for all majors.

**General Education Areas**

The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

- **Arts and Humanities**—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.
- **Natural Sciences and Mathematical Disciplines**—(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should experience science as a rational search for understanding the structure and behavior of the natural world, and should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking.
- **Social Sciences**—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Lists of courses approved for the three general education areas are available on the LAS College website (http://www拉斯.iastate.edu/students/academics/general-education).

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas.

Courses from the department of the first major may not be applied to general education requirements. Courses cross-listed with a course in the student’s first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once. Students may not apply the same course in more than one general education area.

**World Language Requirement**

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture’s language.

As a means of achieving this objective, a student must satisfy a graduation requirement equivalent to the first year of university-level study in one world language (normally, completion of a two-semester sequence in any one world language). Students who have completed three or more years of high-school world language study (or the equivalent academic record or certification of proficiency in American Sign Language) are deemed to have met the LAS World Language Requirement. These students may not enroll in or receive credit for 101 or 102 in those languages nor may they take those courses on a remedial basis; test-out credit may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language.

Students who have completed more than one year but less than three years of high-school world language study may satisfy the World Language Requirement by (a) passing the exam for credit at the 102 level, (b) receiving a passing grade in a 102 world language course, (c) receiving a passing grade in a world language course at the 200-level or higher, (d) being a native speaker of a language other than English and passing English 150 and 250 with a grade of C- or better, (e) completing a major in any world language, or (f) in the case of Spanish, earning a passing grade in SPAN 097 Accelerated Spanish Review.

Before enrolling in either SPAN 097 Accelerated Spanish Review or a 102 level language course, students are advised to take the on-line placement test available at www.language.iastate.edu. SPAN 097 is designed for students who need additional remedial work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year level (201-202).

Students who have completed SPAN 097 and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Questions about the World Language Requirement and how to meet it should be directed to the Department of World Languages and Cultures. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply additional courses in world languages toward the appropriate general education areas.

**Advanced Communication Skills**

The continued development of communication skills following the sophomore year is the responsibility of the student’s major department. The department promotes this development by adopting measures to certify the writing proficiency of its own majors. Certification occurs upon satisfactory completion of a designated course in which writing is evaluated and is a significant component. This designated course may be either a course required in the student’s program or an advanced writing course offered by the Department of English, such as:

- ENGL 302 Business Communication 3
- ENGL 305 Creative Writing: Nonfiction 3
- ENGL 314 Technical Communication 3

**Advanced Credit Requirements**

To obtain a bachelor’s degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student’s grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher.

**Credit by Examination Program**

Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education area requirements.

**The Major**

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major is comprised of 24 to 48 credits in a specific discipline as determined by the faculty. Tracks within a major must have a common 24 credit core. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.) Courses in the first major listed on the degree program may not be counted in the general education groups.

Courses meeting the requirement of additional majors may be counted in the general education groups. When choosing an additional major, students must confirm that the additional major is allowable (see list under “Double Majors”).

See the Majors tab above for a listing of majors.

**Double Majors**

Students may elect a second major from the departments and program areas in the College of Liberal Arts and Sciences, or from a major field offered for the bachelor’s degree in another college of the university. Double majors between the following are not allowed: Chemistry with Biochemistry and Agricultural Biochemistry; Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Genetics, and Microbiology; any combination of Journalism and Mass Communication, Advertising, and Public Relations. A student in the Bachelor of Liberal Studies or Bachelor of Music curricula may not add a major from the Liberal Arts and Sciences curriculum, though they may work toward a second degree in the Liberal Arts and Sciences curriculum.

To be awarded a double major both major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major.

If the primary major should lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major. Students with a primary major in another college who wish to take a second major in the
College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education and World Language Requirements.

A student may earn two degrees in the Liberal Arts and Sciences curriculum with two appropriate majors and at least 30 additional credits. Any degree offered by this college may be earned together with a degree and a major in any other college of the university. For the requirements for two degrees, see Two Bachelor’s Degrees in the Degree Planning section of the catalog.

Minors

A minor, which is optional, must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

A list of minors offered by the college of Liberal Arts and Sciences can be found on the University Minors page.

Courses applied toward the general education groups may be used to meet the requirements of a minor. See University Minors page for more information.

If a student declares a minor and completes the requirements specified by the offering department/program, the minor will be recorded on the transcript.

Certificate Programs

The LAS College also administers certificate programs in Community Leadership and Public Service and in Latin American Studies. Students interested in pursuing these certificates are advised to consult with their academic adviser and with the relevant program that administers the certificate. Completion of a certificate will be recorded on the transcript.

Electives

Students will take additional courses, freely elected, sufficient to accumulate a total of 120 credits. These additional courses together with the general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.

Planning the Program of Study

Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student’s chosen major is provided to the student and the adviser through AccessPlus. The student should review the audit each semester and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean’s office. Students are responsible for reviewing and updating their degree audits in a timely fashion in order to avoid delays in graduation.

During the first two years, students should meet proficiency requirements in ISU Comm Foundations (English 150, 250) and Information Literacy (LIB 160) and make progress toward meeting the general education requirements. The third and fourth years should emphasize completion of the major (and minor, if elected) and general education requirements, and should give the student an opportunity to take electives. Students seeking the enhanced academic opportunities provided by Study Abroad, National Student Exchange, and Internships will want to engage in careful planning of the Program of Study.

Academic Advising Learning Outcomes

Through their experience with academic advising, students will:

• Develop an understanding of the structure, application, and goals of a liberal arts education in relation to their academic development.
• Be able to formulate appropriate questions, seek information, and evaluate and apply academic advice.
• Know the requirements, policies and protocol of the university, college, and department as they relate to their educational experience.
• Understand how degree programs can be enhanced by study and experiences tailored to their intellectual and personal goals.
• Be able to identify and utilize university resources effectively to:
  • Satisfy degree requirements
  • Plan programs of study, including selection of appropriate courses and registration
  • Discover how interests, skills and goals connect to fields of study and careers
  • Link curricular and co-curricular activities
  • Research and prepare for advanced study and/or careers
  • Share responsibility for a mentor-mentee relationship between advisee and adviser.

The Open Option

Many students entering Iowa State University do not wish to declare a major. They want time to become familiar with the academic opportunities that the university offers and to determine the best match between their academic interests and abilities. These students enter Iowa State University as Open Option majors.

The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State. Open Option students are assigned academic advisers in the Liberal Arts and Sciences Student Academic Services Office. These advisers help students with academic and career development.

During the first year, an orientation class introduces students to all of the colleges and majors on campus. An optional career development class in the second semester guides students in selecting a major and career that match their academic and personal goals.

Aided by their advisor, Open Option students select courses that allow them to sample their academic interests before committing to a specific university major. Open Option students typically declare a major during their second or third semester. In addition, students who may have started in a specified field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

Honors Program

Students enrolled in the College of Liberal Arts and Sciences are encouraged to participate in the University Honors Program.

Liberal Arts and Sciences Honors is designed to add depth and breadth to students’ programs of study and intellectual development. Students in Liberal Arts and Sciences Honors benefit from the resources and capabilities of a large and dynamic research university along with the small class sizes and intellectual community that characterize smaller, selective liberal arts colleges. Membership in LAS Honors offers specific benefits to students such as collaborations with individual faculty members on Honors projects, extended library loan privileges, 24-hour use of the Jischke Honors Building and priority registration for classes. LAS Honors encourages freshmen as well as more advanced students to join. Graduation in the Honors Program is recognized by a special notation on the student’s diploma and permanent record. Honors students wear white Honors cords at graduation.

Reserve Officers’ Training Corps Programs (ROTC)

The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in Military Science (Army), Naval Science, and Air Force Aerospace Studies.

Teacher Licensure

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for licensure. Teaching licenses are issued for a specific teaching level, e.g., grades 5-12. Subject area endorsements are listed on the candidate’s license. The College of Liberal Arts and Sciences collaborates with the School of Education in approved licensure programs. Students who plan to teach in secondary schools (grades 5-12) may qualify for a license by completing an approved licensure program in one of the following majors:

• Biology
• Chemistry
• Earth Science
• English
• History
• Mathematics
• Music (through the Bachelor of Music curriculum)*
• Physics
• World Languages and Cultures (Endorsements are available in French, German, and Spanish.)

Students may also add these additional endorsements to their primary license:
Campus degree program. The B.L.S. is a general studies degree in the liberal arts. Iowa Regent universities to meet the needs of Iowans who want to earn a college degree. This degree, the Bachelor of Liberal Studies (B.L.S.), was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree.

The LAS College administers a bachelor’s degree program in Liberal Studies.

Curriculum for Bachelor of Liberal Studies

There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

For specific degree requirements, see Liberal Studies.

Curriculum for Software Engineering

A Bachelor of Science degree in software engineering is jointly administered by the Department of Electrical and Computer Engineering (College of Engineering) and the Department of Computer Science (College of Liberal Arts and Sciences). The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This interdepartmental program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering.

Departments of the College

Majors and minors in the College of Liberal Arts and Sciences are administered by the following departments:

- Air Force Aerospace Studies
- Anthropology
- Biochemistry, Biophysics, and Molecular Biology
- Chemistry
- Computer Science
- Ecology, Evolution, and Organismal Biology
- Economics
- English
- Genetics, Development, and Cellular Biology
- Geological and Atmospheric Sciences
- Greenlee School of Journalism and Communication
- History
- Mathematics
- Military Science (Army Reserve Officers’ Training Corps)
- Music and Theatre
- Naval Science
- Philosophy and Religious Studies
- Physics and Astronomy
- Political Science
- Psychology
- Sociology
- Statistics
- World Languages and Cultures

The Major

A list of majors in the College of Liberal Arts and Sciences is available from the "Programs, Majors" button at the top of the Colleges and Curricula page.

Cross-disciplinary studies in the College of Liberal Arts and Sciences encompass a variety of interdisciplinary and cross-disciplinary areas of study as well as courses that cross established departmental lines. Students may enroll in Program courses; declare majors or minors where offered, or develop an Interdisciplinary Studies major built upon Program offerings. Certificates are also available as separate foci of studies beyond a student’s major or minor. (see Index for Program courses).

Cross-Disciplinary Programs

African and African American Studies Program

(Minor only) African and African American Studies

American Indian Studies Program

(Minor only) American Indian Studies
The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media.

To receive a bachelor of arts degree in advertising, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, P R or JL MC. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level courses or above. Advertising majors are required to take:

</table>

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC, or P R. These include:

- JL MC 101 Mass Media and Society 3
- JL MC 110 Orientation to Journalism and Communication 1
- JL MC 201 Reporting and Writing for the Mass Media (C+ or better) 3
- ADVRT 230 Advertising Principles 3
- ADVRT 301 Research and Strategic Planning for Advertising and Public Relations 3
- ADVRT 334 Advertising Creativity (C+ or better in ADVRT 334 or ADVRT 336) 3
- or ADVRT 336 Advertising Account Management 3
- ADVRT 434 Advertising Campaigns 3
- or ADVRT 436 Advertising Portfolio Practicum 3
- JL MC 460 Law of Mass Communication 3
- ADVRT 499 Professional Media Internship 3

Additional recommended courses and requirements for the advertising major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or minor in the school. All students are required to take a second major or minor outside the school as an area of expertise. A Designated Area of Concentration (DAC) outside the school may be used in place of a minor or second major with faculty approval.

**Minors**

The Greenlee School offers a minor in advertising and a minor in journalism and mass communication.

For a minor in advertising or journalism and mass communication, students complete 15 credits, including JL MC 101. The other 12 credits, at least 9 of which must be from Iowa State University, are selected from course offerings in the advertising and journalism and mass communication majors, including:

6 credits from the following: 6

Journalism and mass communication or public relations majors may not minor in advertising, and advertising and public relations majors may not minor in journalism and mass communication.
Anthropology

Undergraduate Study

An undergraduate major in Anthropology can serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology students develop a well-rounded professional education in cultural anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and society, the biology and evolution of humans and other primates, and through the study of past human communities and material culture. Students learn the important historical and contemporary issues of our subdisciplines, and they learn what it means to be an Anthropologist and acquire an anthropological perspective on global issues. Students develop an appreciation of the value of cultural difference at the local, national and global levels. Students may obtain experience in archaeological, ethnographic and biological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Groups I and III. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Group II.

Undergraduate students with majors in anthropology are required to take the following anthropology core courses:

ANTHR 306  Cultural Anthropology  3
ANTHR 307  Biological Anthropology  3
ANTHR 308  Archaeology  3
ANTHR 450  Historical and Theoretical Approaches in Anthropology  3

One course in statistics is required  3

A minor in anthropology consists of at least 15 credits.

One of the following in cultural anthropology:

- ANTHR 306  Cultural Anthropology  3
- ANTHR 340  Magic, Witchcraft, and Religion  3
- ANTHR 323  Topics in Latin American Anthropology  3
- ANTHR 322  Peoples and Cultures of Native North America  3

One of the following in archaeology or biological anthropology:

- ANTHR 307  Biological Anthropology  3
- ANTHR 308  Archaeology  3
- ANTHR 321  World Prehistory  3
- ANTHR 315  Archaeology of North America  3
- ANTHR 319  Skeletal Biology  3
- ANTHR 482  Topics in Biological Anthropology  3

Communication Proficiency requirement: The department requires that a student earn a grade of C or better in:

- ENGL 250  Written, Oral, Visual, and Electronic Composition  3

Two of the following courses

- ENGL 302  Business Communication  3
- ENGL 309  Report and Proposal Writing  3
- ENGL 314  Technical Communication  3

An additional writing-intensive course outside anthropology.

The principal sub-disciplines of anthropology are represented by the following:

1. Cultural anthropology:

- ANTHR 201  Introduction to Cultural Anthropology  3
- ANTHR 230  Globalization and the Human Condition  3
- ANTHR 306  Cultural Anthropology  3
- ANTHR 309  Introduction to Culture and Language  3
- ANTHR 313  Kinship and Marriage in a Global Perspective  3
- ANTHR 322  Peoples and Cultures of Native North America  3
- ANTHR 323  Topics in Latin American Anthropology  3
- ANTHR 332  Current Issues in Native North America  3
- ANTHR 333  Asian American Material Cultures  3
- ANTHR 336  Global Development  3
- ANTHR 340  Magic, Witchcraft, and Religion  3
- ANTHR 354  War and the Politics of Humanitarianism  3
- ANTHR 411  Applied Anthropology  3
- ANTHR 418  Global Culture, Consumption and Modernity  3
- ANTHR 431  Ethnographic Field School  4-6
- ANTHR 434B  Internship: Cultural Anthropology  2-6
- ANTHR 434D  Internship: Linguistic Anthropology  2-6
- ANTHR 444  Sex and Gender in Cross-cultural Perspective  3
- ANTHR 450  Historical and Theoretical Approaches in Anthropology  3
- ANTHR 451B  Practicum in Anthropology: Cultural Anthropology  1-3
- ANTHR 451D  Practicum in Anthropology: Linguistic Anthropology  1-3
- ANTHR 490B  Independent Study: Cultural Anthropology  1-5
- ANTHR 490D  Independent Study: Linguistic Anthropology  1-5

2. Archaeology:

- ANTHR 202  Introduction to Biological Anthropology and Archaeology  3
- ANTHR 308  Archaeology  3
- ANTHR 315  Archaeology of North America  3
- ANTHR 320  Great Plains Archaeology  3
- ANTHR 321  World Prehistory  3
- ANTHR 428  Topics in Archaeological Laboratory Methods and Techniques  3
- ANTHR 429  Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School  4-6
- ANTHR 434A  Internship: Archaeology  2-6
- ANTHR 450  Historical and Theoretical Approaches in Anthropology  3
- ANTHR 451A  Practicum in Anthropology: Archaeology  1-3
- ANTHR 427I  Field Archaeology  4
- ANTHR 490A  Independent Study: Archaeology  1-5

3. Biological Anthropology:

- ANTHR 202  Introduction to Biological Anthropology and Archaeology  3
- ANTHR 307  Biological Anthropology  3
- ANTHR 319  Skeletal Biology  3
- ANTHR 350  Primate Behavior  3
- ANTHR 424  Forensic Anthropology  3
- ANTHR 434C  Internship: Biological Anthropology  2-6
- ANTHR 438  Primate Evolutionary Ecology and Behavior  3
- ANTHR 445  Biological Field School  4-6
- ANTHR 451C  Practicum in Anthropology: Biological Anthropology  1-3
- ANTHR 490C  Independent Study: Biological Anthropology  1-5

Graduate Study

The department offers a master of arts degree with a major in anthropology. Graduate courses are offered in the areas of biological anthropology, archaeology, cultural anthropology, and anthropological history and theory. Competence in one foreign language and in statistics must be demonstrated. A thesis, based on original research, is required.

Biochemistry and Biophysics

Agricultural Biochemistry Major in the College of Agriculture and Life Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Agricultural biochemistry.

Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences

Biochemistry and biophysics are recommended to students whose career interests involve advanced graduate or medical study or employment in biochemistry or biophysics, or in related areas of the biological or medical sciences.

Biochemistry undergraduate major program of study

Total Degree Requirement: 120 cr.

- BBMB 101  Introduction to Biochemistry  1
- BBMB 102  Introduction to Biochemistry Laboratory  1
BBMB 201 Chemical Principles in Biological Systems 2
BBMB 404 Biochemistry I 3
or (4 credits)
BBMB 504 Amino Acids and Proteins
BBMB 505 Bioenergetics and Metabolism
BBMB 405 Biochemistry II 3
or (4 credits)
BBMB 506 Membrane Biochemistry
BBMB 507 Biochemistry of Nucleic Acids
BBMB 411 Techniques in Biochemical Research 4
BBMB 461 Molecular Biophysics 2
or BBMB 561 Molecular Biophysics
BBMB 490 Independent Study (Not required) 1-3
BBMB 499 Undergraduate Research (Not required but strongly encouraged) 1-5
Take one of the following: 5-7
CHEM 201 Advanced General Chemistry
or CHEM 177 General Chemistry I
& CHEM 178 General Chemistry II
Take one of the following: 4
CHEM 201L Laboratory in Advanced General Chemistry
or CHEM 177NL Laboratory in General Chemistry I
or CHEM 177L Laboratory in General Chemistry I
CHEM 211 Quantitative and Environmental Analysis Laboratory
& 211L Quantitative and Environmental Analysis Laboratory
BBMB 561L Laboratory in Molecular Biophysics 2
or CHEM 322L Laboratory in Physical Chemistry
CHEM 324 Introductory Quantum Mechanics 3
CHEM 325 Chemical Thermodynamics 3
CHEM 331 Organic Chemistry I 6
& CHEM 332 Organic Chemistry II
CHEM 333L Laboratory in Organic Chemistry I (for Chemistry and Biology Majors) 1-2
or CHEM 331L Laboratory in Organic Chemistry I
CHEM 334L Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors) 2
or CHEM 332L Laboratory in Organic Chemistry II
MATH 165 Calculus I 4
MATH 166 Calculus II 4
MATH 265 Calculus III 3-4
or MATH 266 Elementary Differential Equations
or MATH 267 Elementary Differential Equations and Laplace Transforms
PHYS 221 Introduction to Classical Physics I
& PHYS 222 Introduction to Classical Physics II
Biol 211 Principles of Biology I
& BIOL 212 Principles of Biology II
BIOL 211L Principles of Biology Laboratory I 1
or BIOL 212L Principles of Biology Laboratory II
or BIOL 313L Genetics Laboratory
BIOL 313 Principles of Genetics 3
BIOL 314 Principles of Molecular Cell Biology 3
Biological Science electives 4
from Biology, Genetics, Microbiology, Biochemistry or Chemistry

Communication Proficiency (Minimum grade C-)

LIB 160 Information Literacy 1
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
One course from the following:
ENGL 305 Creative Writing: Nonfiction 3
ENGL 309 Report and Proposal Writing 3
ENGL 314 Technical Communication 3
BBMB 411 Techniques in Biochemical Research 4

General Education Area

Arts and Humanities 12
Social Sciences 9
International Perspectives 3
U.S. Diversity 3

Biophysics undergraduate major program of study

Total Degree Requirement: 120 cr,
BBMB 101 Introduction to Biochemistry 1
BBMB 102 Introduction to Biochemistry Laboratory 1
BBMB 404 Biochemistry I 3
BBMB 411 Techniques in Biochemical Research 4
BBMB 461 Molecular Biophysics 2
or BBMB 561 Molecular Biophysics
Take one of the following: 5-7
CHEM 201 Advanced General Chemistry
or CHEM 177 General Chemistry I
& CHEM 178 General Chemistry II
CHEM 201L Laboratory in Advanced General Chemistry
or CHEM 177NL Laboratory in General Chemistry I
or CHEM 177L Laboratory in General Chemistry I
CHEM 211 Quantitative and Environmental Analysis Laboratory
& 211L Quantitative and Environmental Analysis Laboratory
BBMB 561L Laboratory in Molecular Biophysics 2
or CHEM 322L Laboratory in Physical Chemistry
CHEM 324 Introductory Quantum Mechanics 3
CHEM 325 Chemical Thermodynamics 3
CHEM 331 Organic Chemistry I 6
& CHEM 332 Organic Chemistry II
CHEM 333 Laboratory in Organic Chemistry I (for Chemistry and Biology Majors) 1-2
or CHEM 331 Laboratory in Organic Chemistry I
CHEM 334 Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors) 2
or CHEM 332 Laboratory in Organic Chemistry II
MATH 165 Calculus I 4
MATH 166 Calculus II 4
MATH 265 Calculus III 4
MATH 266 Elementary Differential Equations 3
MATH 267 Matrices and Linear Algebra 3
or MATH 317 Theory of Linear Algebra 3
PHYS 221 Introduction to Classical Physics I
& PHYS 222 Introduction to Classical Physics II
One course from the following:
MATH 481 Numerical Methods for Differential Equations
STAT 407 Methods of Multivariate Analysis
STAT 430 Empirical Methods for the Computational Sciences
COM S 207 Fundamentals of Computer Programming 3
STAT 305 Engineering Statistics 3-4
or STAT 231 Probability and Statistical Inference for Engineers
BIOL 211 Principles of Biology I
& BIOL 212 Principles of Biology II
BIOL 211L Principles of Biology Laboratory I 1
or BIOL 212L Principles of Biology Laboratory II
or BIOL 313L Genetics Laboratory
BIOL 313 Principles of Genetics 3
BIOL 314 Principles of Molecular Cell Biology 3
Additional 300+ or higher level courses in biochemistry, biophysics, biological sciences, chemistry or physics. 9

Communication Proficiency (Minimum grade C-)

LIB 160 Information Literacy 1
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
One course from the following:
ENGL 305 Creative Writing: Nonfiction 3
ENGL 309 Report and Proposal Writing 3
ENGL 314  Technical Communication 3 
BBMB 411  Techniques in Biochemical Research 4

General Education Area
Arts and Humanities 12 
Social Sciences 9 
U.S. Diversity 3 
International Perspectives 3

Biochemistry minor is offered in both the College of Liberal Arts and Sciences and Agriculture and Life Sciences
BBMB 404  Biochemistry I 3 
BBMB 405  Biochemistry II 3 
BBMB 411  Techniques in Biochemical Research 4 
One course from the following: 2-3 
BBMB 461  Molecular Biophysics (2 crs) 
BBMB 561  Molecular Biophysics (2 crs) 
CHEM 325  Chemical Thermodynamics 
300+ level courses in BBMB or CHEM to 15 cr total 3-4 
Total Credits 15-17

These lists of courses should not be regarded as statements of fixed requirements or as complete outlines of the work necessary for the major. They are given solely for the convenience of students or advisers who wish to estimate the amount of basic study that may be needed.

See also the B.S./M.S. program under Graduate Study.

Graduate Study
The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), plant physiology, and toxicology. Minor work is offered to students taking major work in other departments. 

Prerequisite to graduate work is a sound undergraduate background in biology, chemistry, mathematics, and physics. 
All graduate students are required by the department to teach as part of their training for an advanced degree. 

The department offers a B.S./M.S. program in biochemistry that allows students to obtain both the B.S. and M.S. degrees in five years. The program is open to students in the College of Liberal Arts and Sciences and in the College of Agriculture. Students interested in this program should contact the department office for details. Application for admission to the Graduate College should be made near the end of the junior undergraduate (third) year. Students would begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships.

Undergraduate Study
The department of Biochemistry, Biophysics & Molecular Biology (http://www.bbmb.iastate.edu) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture and Life Sciences. 

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches: genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine. 

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

Bioinformatics and Computational Biology
Undergraduate study
Undergraduate study in BCBio is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell Biology, and the Department of Mathematics. The undergraduate B.S. degree is offered through the College of Liberal Arts and Sciences.

Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad ranges of possibilities to get involved in research. 

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBio graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology that now exist. 

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. 

Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

In addition to basic degree requirements listed in the curriculum in Liberal Arts and Sciences, BCBio majors must satisfy the following requirements:
A. Complementary Courses for the BCBio Major

or MATH 317 Theory of Linear Algebra
MATH 265 Calculus III 4
MATH 266 Elementary Differential Equations 3
or MATH 267 Elementary Differential Equations and Laplace Transforms
MATH 304 Combinatorics 3
MATH 314 Graph Theory 3

MATH 373 Introduction to Scientific Computing 3
MICRO 402 Microbial Genetics and Genomics 3
STAT 342 Introduction to the Theory of Probability and Statistics II 3
STAT 402 Statistical Design and the Analysis of Experiments 3
STAT 407 Methods of Multivariate Analysis 3
STAT 416 Statistical Design and Analysis of Gene Expression Experiments 3
STAT 444 Bayesian Data Analysis 3
STAT 480 Statistical Computing Applications 3

D. The communications and English proficiency requirements of the LAS college are met by:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors 3

And one of the following:

ENGL 309 Report and Proposal Writing
ENGL 312 Biological Communication
ENGL 314 Technical Communication

The lowest grade acceptable in ENGL 150 Critical Thinking and Communication, ENGL 250 Written, Oral, Visual, and Electronic Composition or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors is C-.

Minor in Bioinformatics and Computational Biology

The administering departments offer a minor in Bioinformatics and Computational Biology, which requires the following courses.

BIOL 211 Principles of Biology I 3
BIOL 212 Principles of Biology II 3
GEN 313 Principles of Genetics 3
COM S 227 & COM S 228 Introduction to Object-oriented Programming and Introduction to Data Structures 7
or
COM S 207 & COM S 208 Fundamentals of Computer Programming and Intermediate Computer Programming

STAT 330 Probability and Statistics for Computer Science 3
BCBIO 211 Introduction to Bioinformatics and Computational Biology 3
BCBIO 401 Fundamentals of Bioinformatics and Computational Biology I 3
BCBIO 402 Fundamentals of Bioinformatics and Computational Biology II 3

Total Credits 28

Note: The following other STAT courses may be substituted for STAT 330, with permission of the BCBio Major: STAT 101, 104, 105, 201, 231, 305, or 341

Most students pursuing a minor in Bioinformatics and Computational Biology will be biology, genetics, computer science, computer engineering, statistics, or mathematics students who have already taken some of these courses for their major. However, a total of 9 credits must be used only to fulfill the requirements of the minor.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Entomology, Genetics, Development and Cell Biology; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, Information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu.

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are
appointed as research assistants and participate in BCB 697 Graduate Research Rotation, working with three or more different research groups to gain experience in both "wet" (biological) and "dry" (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A course load similar to the following list would be considered acceptable:

- **MATH 265** Calculus III 4
- **STAT 341** Introduction to the Theory of Probability and Statistics I 3
- **COM S 207** Fundamentals of Computer Programming 3
- **COM S 208** Intermediate Computer Programming 3
- **COM S 330** Discrete Computational Structures 3
- **CPR E 310** Theoretical Foundations of Computer Engineering 3
- **CHEM 163** College Chemistry 4
- **CHEM 231** Elementary Organic Chemistry 3
- **BBMB 301** Survey of Biochemistry 3
- **BIOL 313** Principles of Genetics 3
- **BIOL 315** Biological Evolution 3

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics:

- **BCB 567** Bioinformatics I (Fundamentals of Genome Informatics) 3
- **BCB 568** Bioinformatics II (Advanced Genome Informatics) 3
- **BCB 569** Bioinformatics III (Structural Genome Informatics) 3
- **BCB 570** Bioinformatics IV (Computational Functional Genomics and Systems Biology) 3

And also should include

- **GDCB 511** Molecular Genetics 3
- **BCB 690** Student Seminar in Bioinformatics and Computational Biology 3
- **BCB 691** Faculty Seminar in Bioinformatics and Computational Biology 3
- **BCB 593** Workshop in Bioinformatics and Computational Biology 3

M.S. students take the above background and core courses, take at least 6 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu.)

### Biological/Pre-Medical Illustration

**Undergraduate Study**

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "communicating science through art," the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, free-lance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences.

### Design courses

</tbody>
</table>

One of the following 3 credits
- BIOL 356 | Dendrology |
- BIOL 366 | Plant Systematics |
- BIOL 454 | Plant Anatomy |

9 credits chosen from a list of approved biological science courses

Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

**Communication Proficiency Requirement.** Students must earn a minimum of C in both ENGL 150 and ENGL 250 or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316.

Students in BPM I must complete a senior project or an internship experience (BPM I 497) in which they design and produce artwork that is suitable for publication or public display.

### Minor

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses.

The biological sciences must include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Principles of Biology I</td>

</tr>
</tbody>
</table>

Advanced drawing, illustration, electronic media or painting course

For more information, contact the BPM I adviser in 102 Catt Hall or view the website listed above.

### Biology

**Interdepartmental Undergraduate Program**

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation’s leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to
undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution and Organismal Biology and the Department of Genetics, Development and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology. The major’s curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student’s career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics. While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

- Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.
- Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.
- Molecular and Cellular Biology—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.
- Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth’s biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education (http://catalog.iastate.edu/careerpreparation/teachereducation) for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and at industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement. Courses that are available each summer are listed at www.coms.usm.edu (http://www.coms.usm.edu).

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for courses to Iowa Lakeside Laboratory and other field stations in different biomes, e.g. marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information see www.otrs.duke.edu (http://www.otrs.duke.edu) or contact the Biology Student Services Office in 103 Bessey Hall.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, including four with lab. The first year provides a broad introduction to the nature of life. Students choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

</tr>
<tr>
<td>BIOL 212</td>
<td>Principles of Biology II</td>
</tr>
<tr>
<td>BIOL 212L</td>
<td>Principles of Biology Laboratory II</td>
</tr>
</tbody>
</table>

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110.
Students then explore concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of biological science at the 300 level, or above, from an approved list of courses. Of these, at least 9 credits must be taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level programs in their courses. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

**General requirements**

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements—Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212.

**Graduate Study**

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

**Curriculum in Biology**

**College of Liberal Arts and Sciences**

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

**Total Degree Requirement: 120 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications Proficiency (with a C or better)**

Total Credits 21

**Botany**
Interdepartmental Graduate Major

Undergraduate Study
Students wishing to pursue an undergraduate degree in the basic plant sciences are encouraged to investigate the numerous possibilities available to them at Iowa State University. The undergraduate Biology Program, jointly administered by faculties of the departments of Ecology, Evolution, and Organismal Biology (EEOB) and Genetics, Cell and Developmental Biology (GDCB), includes a wide spectrum of opportunities for students to develop their academic interests through the study of plant biology. Students can major in Biology in the College of Liberal Arts and Sciences or in the College of Agriculture. Contact the Biology Student Services office in 103 Bessey Hall for general information about the Biology Program. For those students interested in applied plant sciences, undergraduate majors in Agronomy, Horticulture, and Forestry are also available through the College of Agriculture.

Graduate Study
The Botany Graduate Program offers work for the degrees Master of Science and Doctor of Philosophy with a graduate major in Botany, and minor work for students majoring in other departments or graduate programs. Within the Botany Graduate Major, one of the following areas of specialization may be designated: aquatic and wetland ecology, cytology, ecology, morphology, mycology, physiology and molecular biology, or systematics and evolution. Relevant graduate courses that may be counted toward completion of these degrees are offered by the Departments of EEOB and GDCB, and by other departments and programs. The specific requirements for each student’s course distribution and research activities are set by the Program of Study Committee established for each student individually, and must satisfy all requirements of the Graduate College (See Index). GRE (and if necessary, TOEFL) scores are required of all applicants; students are encouraged to contact faculty prior to application.

Related interdepartmental graduate majors in Ecology and Evolutionary Biology (EEOB); Environmental Science (EnSci); Genetics (IG); Molecular, Cellular and Developmental Biology (MCDB); Plant Physiology (IPPM); and Toxicology should also be investigated as possible graduate programs with specific disciplinary focus.

Chemistry

Undergraduate Study
For undergraduate curricula in liberal arts and sciences leading to the degrees Bachelor of Science and Bachelor of Arts, see Liberal Arts and Sciences, Curriculum. Graduates holding the B.S. degree in Chemistry qualify in many fields as: teachers of Chemistry, supervisors in industry, technical sales personnel, and research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they may explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, or to obtain additional majors or strong minors. The B.A. degree does not prepare students as well for graduate study or professional employment in chemistry.

Graduates have firm foundations in the fundamentals and application of current chemical theories. They are able to design, carry-out, record, and analyze the results of chemical experiments. They are able to use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research. Graduates are able to communicate the results of their work to chemists, as well as non-chemists. They understand the ethical and environmental dimensions of problems and issues facing chemists. They follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals. Graduates are skilled in problem solving, critical thinking, and analytical reasoning. These skills may be applied to careers in education and industry; in professions such as law, medicine, environmental sciences, and forensic sciences. The curricula in Chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree provided they also take one Biochemistry course, typically BBMB 301 Survey of Biochemistry, BBMB 316 (http://catalog.iastate.edu/azcourses/bbmb) Principles of Biochemistry or BBMB 404 Biochemistry I and BBMB 405 (http://catalog.iastate.edu/azcourses/bbmb) Biochemistry II.

Liberal arts majors who wish to transfer into Chemistry at the end of their second year may still complete all degree requirements and graduate within five years. Undergraduate students seeking the B.S. degree in Chemistry usually take courses essential to the degree program according to the following schedule:

</tbody>
</table>
The Department offers a minor in chemistry which may be earned by credit in:

- Introduction to Classical Physics I (5)
- Introduction to Classical Physics II (5)
- Written, Oral, Visual, and Electronic Composition (3)
- Written, Oral, Visual, and Electronic Composition: Honors

**Third year**

- Introductory Quantum Mechanics (3)
- Chemical Thermodynamics (3)
- Laboratory in Physical Chemistry (3)
- Instrumental Methods of Chemical Analysis (2)
- Instrumental Analysis Laboratory (2)
- Inorganic Chemistry (2)
- Safety in the Chemical Laboratory (1)

Plus a foreign language requirement.

**Fourth year**

- Advanced Inorganic Chemistry (3)
- Inorganic Chemistry Laboratory (1)
- Technical Communication (3)
- Two advanced Chemistry courses (min 4 credits)

CHEM 399 Undergraduate Research or CHEM 499 Senior Research is strongly recommended. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements.

Chemistry majors seeking certification to teach Chemistry in secondary schools must meet the requirements of the College of Human Sciences as well as those of the Chemistry program. In addition, they must apply formally for admission to the teacher education program.

Undergraduate students seeking the B.A. degree in Chemistry have the following courses in their degree programs as minimum requirements:

One of the following sequences: 6-8

- General Chemistry I
- General Chemistry II
- Laboratory in General Chemistry I
- Laboratory in General Chemistry II

CHEM 201 Advanced General Chemistry

- Laboratory in Advanced General Chemistry

CHEM 211 Quantitative and Environmental Analysis (2)
- Quantitative and Environmental Analysis Laboratory (2)
- Inorganic Chemistry (2)
- Instrumental Methods of Chemical Analysis (2)
- Instrumental Analysis Laboratory (2)
- Introductory Quantum Mechanics (3)
- Laboratory in Physical Chemistry (2-3)
- Laboratory in Physical Chemistry (2)
- Chemical Thermodynamics (3)
- Organic Chemistry I (3)
- Laboratory in Organic Chemistry I (1)
- Organic Chemistry II (3)
- Laboratory in Organic Chemistry II (1)

The following are required as supporting work: 12

- Calculus I
- Calculus II
- Introduction to Classical Physics I
- Introduction to Classical Physics II

**Chemistry**

CHEM 178 General Chemistry II (3)
CHEM 211 Quantitative and Environmental Analysis (2)
CHEM 211L Quantitative and Environmental Analysis Laboratory (2)
CHEM 324 Introductory Quantum Mechanics (3)
CHEM 331 Organic Chemistry I (3)
CHEM 331L Laboratory in Organic Chemistry I (1)

And one of the following: 2-5

- Inorganic Chemistry
- Instrumental Methods of Chemical Analysis
- Laboratory in Physical Chemistry
- Laboratory in Physical Chemistry
- Organic Chemistry II

The total minimum credits in Chemistry thus will be 20 to 23 depending on which advanced courses are selected.

Communication Proficiency requirement: The Department requires a grade of C– or better in each of:

- Critical Thinking and Communication (3-6)
- Written, Oral, Visual, and Electronic Composition

**Graduate Study**

The Department offers work for the degrees Master of Science and Doctor of Philosophy with majors in Chemistry, Analytical, Inorganic, Organic, and Physical chemistry. Co-majors may be taken between areas within Chemistry or between one of the areas in Chemistry and another department. Courses in other areas of Chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in Chemistry may choose an additional specialty in one of six areas: Materials Chemistry, Industrial Chemistry, Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and Forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside course requirement. A minor in Chemistry is available to students in other departments. The Department participates in the interdepartmental major in Toxicology.

The Department of Chemistry requires all graduate students majoring in Chemistry to teach as part of their training for an advanced degree. Prerequisite to major graduate work is the completion of undergraduate work in Chemistry, Mathematics, and Physics substantially equivalent to that required of undergraduate Chemistry majors at this institution.

The course numbers for general Chemistry courses include 163-178, and 201.

Index to field of work for 200 level courses and above is given by the second and third digits of course numbers:

1. Inorganic Chemistry 00-09
2. Analytical Chemistry 10-19
3. Physical Chemistry 20-29 and 60-69
4. Organic Chemistry 30-39
5. Chemical Education 50-59
6. Interdisciplinary Chemistry 70-89
7. Research 99

**Classical Studies**

**Interdepartmental Undergraduate Program**

The cross-disciplinary program in Classical Studies engages students with the civilizations of ancient Greece and Rome and their influence, both past and present, on western and world cultures. The Classical Studies minor and interdisciplinary-studies major include an integrated curriculum of courses in the cultures, literatures, history, languages, archaeology, and art of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Current information about the Program may be found at: http://language.iastate.edu/academic-programs/classical-studies/

Courses in Classical Studies provide a classical context for students whose major fields of study or career interests include History, Anthropology, English, World
Languages and Cultures, Philosophy, Women’s Studies, material culture, law, medicine, political science, the life sciences, and related fields.

Interdisciplinary Studies Major in Classical Studies

Students interested in pursuing an interdisciplinary studies major in Classical Studies should consult the Program Chair http://language.iastate.edu/academic-programs/classical-studies/ or the Academic Adviser in the Department of World Languages and Cultures http://language.iastate.edu/students/

A student who wishes to declare a minor must successfully complete the following requirements:

a) One of the following sets of courses in ancient language:

- GREEK 101 & GREEK 102 Elementary Ancient Greek I and Elementary Ancient Greek II
- LATIN 101 & LATIN 102 Elementary Latin I and Elementary Latin II
- CL ST 201 & GREEK 101 Technical Terminologies in the Professions and Elementary Ancient Greek I
- CL ST 201 & LATIN 101 Technical Terminologies in the Professions and Elementary Latin I

b) One of the following courses: 3

- CL ST 273 Greek and Roman Mythology
- CL ST 275 The Ancient City

3. Three additional courses (not used to meet other requirements) from those listed below or approved by the program committee. Two of these classes (6 crs.) must be at the 300-level or above.

- CL ST 201 Technical Terminologies in the Professions
- CL ST 273 Greek and Roman Mythology
- CL ST 275 The Ancient City
- CL ST 275H The Ancient City: Honors
- CL ST 304 Cultural Heritage of the Ancient World
- CL ST 310 Ancient Philosophy
- CL ST 350 Rhetorical Traditions
- CL ST 353 World Literature: Western Foundations through Renaissance
- CL ST 367 Christianity in the Roman Empire
- CL ST 372 Greek and Roman Tragedy and Comedy
- CL ST 372H Greek and Roman Tragedy and Comedy: Honors
- CL ST 373 Heroes of Greece, Rome, and Today
- CL ST 373H Heroes of Greece, Rome, and Today: Honors
- CL ST 374 Sex, Gender, and Culture in the Ancient Mediterranean World
- CL ST 376 Classical Archaeology
- CL ST 376A Classical Archeology: Bronze Age and Early Iron Age Greece
- CL ST 376B Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)
- CL ST 383 Greek and Roman Art
- CL ST 383H Greek and Roman Art: Honors
- CL ST 394 The Archaeology of Greece: An Introduction
- CL ST 395 Study Abroad: The Archaeology of Greece
- CL ST 402 Greek Civilization
- CL ST 403 Roman Civilization
- CL ST 430 Foundations of Western Political Thought
- CL ST 480 Seminar in Classical Studies
- CL ST 490 Independent Study
- CL ST 512A Proseminar in European History, Ancient
- CL ST 594A Seminar in European History: Ancient
- ART H 378 Popes and Caesars: 2000 Years of Art History in Rome
- GREEK 201 Intermediate Classical Greek
- GREEK 332 Introduction to Classical Greek Literature
- GREEK 490 Independent Study
- HIST 280 Introduction to History of Science I
- LATIN 201 Intermediate Latin
- LATIN 332 Introduction to Latin Literature
- LATIN 490 Independent Study

Communication Studies

The Communication Studies Major

www.comstudies.las.iastate.edu

The Communication Studies Program focuses on human communication, exploring the ways humans create and negotiate meaning. Communication Studies majors master a focused course of inquiry into interpersonal processes as they create and sustain relationships and impact individuals, groups, and organizations. The Communication Studies curriculum builds primarily on social science traditions in developing a liberal arts education emphasizing human communication. Students in the Communication Studies Major study applied communication theory and research in interpersonal, small group, organizational, intercultural, and other contexts.

The Communication Studies (ComSt) major teaches students how to think critically, giving them the ability to examine complex communication issues, and develop and implement strategies grounded in evidence-based research. This prepares students for careers in business and industry and graduate education. Students majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, public relations, training and development, sales management, recruitment, event planning, sales, management, organizational development, business communication, law, and international and intercultural relations.

ComSt majors must earn at least 120 credits, with 45 credits at the 300-400 levels, and a minimum of 33 credits in ComSt.

Communication Proficiency Requirement

To meet the University’s Communication Proficiency requirement students are required to take:

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors

Plus one of the following: 3

- ENGL 302 Business Communication
- ENGL 309 Report and Proposal Writing
- ENGL 314 Technical Communication
- ENGL 415 Business and Technical Editing

An average of C- is required in ENGL 150 Critical Thinking and Communication, ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition, Honors), and this additional writing course.

The Communication Studies Major

Core Requirements (15 credits)

- COMST 101 Introduction to Communication Studies 3
- COMST 102 Introduction to Interpersonal Communication 3
- COMST 203 Introduction to Communication Research Methods 3
- COMST 301 Human Communication Theory 3

Plus one of the following: 3

- COMST 214 Professional Communication
- COMST 218 Conflict Management

Total Credits 15

Upper Division Requirements (15 credits). Select five courses from the following:

- COMST 310 Intercultural Communication 3
- COMST 311 Studies in Interpersonal Communication 3
- COMST 313 Leadership Communication Theories 3
- COMST 314 Organizational Communication 3
- COMST 317 Small Group Communication 3
- COMST 319 Communication Training and Development 3
- COMST 325 Nonverbal Communication 3
COMST 330 Computer Mediated Communication 3
Total Credits 15

Capstone Course Requirement (3 credits)
COMST 404 Research Seminar 3
Credits in COMST 384 Applied Organizational Communication, may not be applied toward the upper division requirements.
In accordance with college requirements, an overall average in Communication Studies courses of C (2.0) or better is required.

Enhancement Requirement (4 credits)
COM S 103 Computer Applications 4
Additional Recommended Courses
STAT 101 Principles of Statistics 4
COMST 450 Special Topics in Communication Studies 3

The Communication Studies Minor (18 credits)
The requirements for a minor in ComSt may be fulfilled by credit in:
COMST 101 Introduction to Communication Studies 3
COMST 102 Introduction to Interpersonal Communication 3
COMST 203 Introduction to Communication Research Methods 3
COMST 301 Human Communication Theory 3
Plus six credits in 300-level ComSt courses. 6
Credits in COMST 384 Applied Organizational Communication, may not be applied toward the minor. Students must earn an overall average of C (2.0) or better in all courses taken for the minor.
Total Credits 18

Computer Science
Major in Computer Science
The curriculum leading to the baccalaureate degree in computer science is designed to prepare students for positions as computer scientists with business, industry, or government, or for graduate study in computer science. The main educational objectives of the computer science program at Iowa State University are that its graduates demonstrate expertise, engagement, and learning within three to five years after graduation.
• Expertise: Graduated students should have the ability to establish peer-recognized expertise in the discipline. They should have the ability to articulate this expertise by formulating and solving problems of interest, by creating or deriving value through the application of technology, and by using mathematical foundations, algorithmic principles, and computer science theory in designing, implementing, and evaluating computer-based systems and processes which meet the desired needs of their employers.
• Engagement: Graduated students should have the ability to be engaged in the profession through the practice of computer science in industry, academia, or the public sector. They should demonstrate effective learning and commitment to working with others by applying communications skills and professional knowledge.
• Learning: Graduated students should have the ability to engage in sustained learning through graduate work, professional improvement opportunities, and self study so that they can adapt to the role played by information processing in ever-changing areas of science, technology, and society.

Curriculum in Computer Science
Students wishing to pursue the B.S. degree in computer science must first successfully complete the pre-major program consisting of Com S 227, Com S 228, and Math 165; all with a grade of C- or above.
A student seeking a B.S. degree in computer science must satisfy the requirements of the University and College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum) and the departmental requirements.
The departmental requirements consist of a minimum of 44 credits in computer science and satisfaction of written and oral requirements. Students must earn at least a C- in each course taken to fulfill the Degree Program.
The following courses are required:
COM S 101 Orientation 3
COM S 203 Careers in Computer Science 3

COM S 227 Introduction to Object-oriented Programming 4
COM S 228 Introduction to Data Structures 3
CPR E 281 Digital Logic 4
COM S 309 Software Development Practices 3
COM S 311 Design and Analysis of Algorithms 3
COM S 321 Introduction to Computer Architecture and Machine-Level Programming 3
COM S 327 Advanced Programming Techniques 3
COM S 330 Discrete Computational Structures 3
COM S 331 Theory of Computing 3
COM S 342 Principles of Programming Languages 3
COM S 352 Introduction to Operating Systems 3
COM S 362 Object-Oriented Analysis and Design 3
or COM S 363 Introduction to Database Management Systems 3

Total Credits 38

In addition, at least 6 credits of 400-level courses are required. At least 3 credits must be from courses in Group 1 (oral and written reports) and the remaining credits from courses in Group 1 or 2. Com S 402 may be applied towards the Group 1 requirement, provided 3 or more credits of 402 are taken. Com S 414 may not be applied towards fulfilling the 400-level electives.
Group 1 courses: Com S 401, 402, 409, 417, 425, 430, 437, 455, 461, 472, 474, 487, S E/CprE 418
Group 2 courses: Com S 412, 418, 426, 440, 444, 454, 477, 486, Math 481, CPR E 431, 458, 489

Group 1 (courses in this group require oral and written reports):
COM S 401 Projects in Computing Applications 3
COM S 402 Computer Science Senior Project 2-3
COM S 409 Software Requirements Engineering 3
COM S 417 Software Testing 3
COM S 425 High Performance Computing for Scientific and Engineering Applications 3
COM S 430 Advanced Programming Tools 3
COM S 437 Computer Game and Media Programming 3
COM S 455 Simulation: Algorithms and Implementation 3
COM S 461 Principles and Internals of Database Systems 3
COM S 472 Principles of Artificial Intelligence 3
COM S 474 Introduction to Machine Learning 3
COM S 487 Network Programming, Applications, and Research Issues 3
S E 416 Software Evolution and Maintenance 3

Group 2:
COM S 412 Formal Methods in Software Engineering 3
COM S 418 Introduction to Computational Geometry 3
COM S 426 Introduction to Parallel Algorithms and Programming 3
COM S 440 Principles and Practice of Compiling 3
COM S 444 Introduction to Bioinformatics 3
COM S 454 Distributed Systems 3
COM S 477 Problem Solving Techniques for Applied Computer Science 3
COM S 486 Fundamental Concepts in Computer Networking 3
MATH 481 Numerical Methods for Differential Equations 3
CPR E 431 Basics of Information System Security 3
CPR E 458 Real Time Systems 3
CPR E 489 Computer Networking and Data Communications 4

Toward satisfying requirements of the College of Liberal Arts and Sciences, the following courses should be included:
PHIL 343 Philosophy of Technology 3
SP CM 212 Fundamentals of Public Speaking 3
14 credits of Math and Statistics 14
MATH 165 Calculus I 4
MATH 166 Calculus II 4
One Statistics course from:
STAT 305 Engineering Statistics 3
One of the following

ENGL 309 Report and Proposal Writing 3
ENGL 314 Technical Communication 3

The minimum grade accepted in each of the three required English courses is a C-.

Students transferring from other institutions must take at least 45 credits at the 300 level or higher at Iowa State University while resident here; of these at least 15 credits should be in our department.

Students must earn a C- or better in each course in the department which is a prerequisite to a course listed in the student's degree program.

Undergraduate Minor in Computer Science

The Department of Computer Science offers an undergraduate minor in Computer Science. The minor requires at least 19 credits in computer science courses.

COM S 227 Introduction to Object-oriented Programming 4
COM S 228 Introduction to Data Structures 3
COM S 327 Advanced Programming Techniques 3
9 credits in courses 300 level or above 9

Undergraduate Curriculum in Software Engineering

The Department of Computer Science together with the Department of Electrical and Computer Engineering also offer a curriculum leading to an undergraduate degree in software engineering. The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice.

Students may also take elective courses in computer engineering and computer science.

See Index, Software Engineering. For curriculum information, see also College of Engineering and College of Liberal Arts and Sciences.

Graduate Study

The department offers graduate programs leading to degrees of Master of Science (MS) and Doctor of Philosophy (PhD) with a major in Computer Science. The Doctor of Philosophy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor for the students majoring in other disciplines.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor's degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, a minimum of 31 semester credits is required. A thesis or a creative component demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The PhD requirements are governed by the student’s program of study committee within established guidelines of the department and the graduate college. They include coursework (demonstrating breadth and depth of knowledge), a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Criminal Justice Studies

Interdepartmental Undergraduate Program

The criminal justice studies minor, a cross-disciplinary course of study in the College of Liberal Arts and Sciences, offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in criminal or juvenile justice.
Students who declare a minor in criminal justice studies are required to complete 15 credits of course work. Students must take five of the following six courses:

- CJ ST 240 Introduction to the U.S. Criminal Justice System 3
- CJ ST 241 Youth and Crime 3
- CJ ST 320 American Judicial Process 3
- CJ ST 332 Philosophy of Law 3
- CJ ST 340 Deviant and Criminal Behavior 3
- CJ ST 341 Criminology 3

Students are also required to complete a minimum of 3 credits of internship experience CJ ST 460 Criminal and Juvenile Justice Practicum. Completion of the minor requires 18 total credits.

**Earth Science**

**Major in Earth Science**

The Earth Science major is a broad program that typically emphasizes an interdisciplinary field. Programs leading to the bachelor of science may be individually designed but will include required courses in Geology and Meteorology, and required supporting work in chemistry, physics, and mathematics. Specific programs have been designed for students interested in a geology, meteorology, or an environmental earth science emphasis. Programs leading to the bachelor of arts for earth science teaching are available. The latter program must satisfy the requirements of the Teacher Education Program (see Index, Teacher Education).

See Four-Year Graduation Plan: B.S. in Earth Science

See Four-Year Graduation Plan: B.A. in Earth Science

**Communication Proficiency requirement:** The department requires a grade of C or better in:

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
  - or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors
- One of the following:
  - ENGL 309 Report and Proposal Writing
  - ENGL 314 Technical Communication
- ENGL 302 Business Communication 3
- JL MC 347 Science Communication 3

**Total Credits 12**

**Economics**

**Undergraduate Study**

The department offers work for the degrees of bachelor of science with a major in agricultural business, bachelor of science with a major in business economics, and bachelor of science with a major in economics. The department also offers a minor in agricultural business and a minor in economics. In addition, the department participates in the interdepartmental programs in international agriculture and global resources systems offered by the College of Agriculture and Life Sciences, and the interdepartmental programs in international studies and women’s studies offered by the College of Liberal Arts and Sciences. For further discussion of programs in agricultural business, see the statement below under College of Agriculture and Life Sciences. For programs in business economics, see the statement below under College of Business of ISU. For programs in economics, see the statement below under College of Liberal Arts and Sciences. Visit our web site at www.econ.iastate.edu.

Graduates of the Department of Economics have unique skills that distinguish them from other graduates. They have the ability to think and reason clearly, and can address complex issues using tools and decision making models of economics, mathematics, statistics, as well as concepts from the biological, physical, and social sciences. Graduates develop human relations skills that are essential in the work place and the community. They are able to communicate economic and business concepts to other professionals, collective organizations, governments, and the general public using a variety of means. Graduates understand the interaction of technology, human activity, and the environment. They are able to apply concepts associated with making “optimal” choices among economic alternatives. Graduates are prepared for graduate work in law, economics, and business, as well as the world of work, having learned tools of critical analysis and skills essential to getting and keeping meaningful employment.

1. **College of Agriculture and Life Sciences**

1.1. **Major - Agricultural Business**

The major in agricultural business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

The major in agricultural business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 15 credits must be earned from courses taught by the Department of Economics at ISU. The major in agricultural business requires:

**International Perspective:** 3 cr. from approved course list (http://tinyurl.com/bzbnv9).

**U.S. Diversity:** 3 cr. from approved course list (http://tinyurl.com/atq6kpj).

**Communication/Library:** 13 cr.

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- One of the following 3
  - ENGL 302 Business Communication
  - ENGL 309 Report and Proposal Writing
  - ENGL 314 Technical Communication
- One of the following 3
  - SP CM 212 Fundamentals of Public Speaking
  - AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
- LIB 160 Information Literacy 1

A grade of C or better must be earned in two of the English composition courses (ENGL 150, ENGL 250, and (ENGL 302 or ENGL 309 or ENGL 314)) and the speech fundamentals course (SP CM 212 or AGEDS 311).

**Total Credits 13**

**Humanities and Social Sciences:** 6 cr.

- ECON 102 Principles of Macroeconomics 3
- Three credits from approved course list (www.agstudent.iastate.edu/humanities.htm).

**Ethics:** 3 cr. from approved course list (www.agstudent.iastate.edu/ethics.htm)

**Life Sciences:** 6 cr.

- One of the following 3
  - BIOL 101 Introductory Biology
  - BIOL 211 Principles of Biology I
- Three credits from approved course list (www.agstudent.iastate.edu/life_science.htm).

**Total Credits 6**

**Mathematics:** 13-14 cr.

- One of the following 4
  - MATH 160 Survey of Calculus
  - MATH 165 Calculus I
- One of the following 3-4
  - ECON 207 Applied Economic Optimization
  - MATH 166 Calculus II
Choosing one of the following:

**MATH 165 & ECON 207** Survey of Calculus and Applied Economic Optimization *

**Electives: 22-24 cr.**

Agricultural business majors seeking a double major in economics must take a minimum of 42 credits in economics. These include all of the economics courses required for the economics major. To double major in economics, agricultural business majors must also earn an average grade of C or higher in ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics with no grade lower than a C-.

The freshman-year sequences should be followed in the sophomore year by the intermediate theory sequence:

**2.1. Major - Business Economics**

The major in business economics provides a high-quality education with a balanced emphasis in both business and economics. Graduates from the business economics major possess a unique mix of analytical and applied business skills well-suited for employment in upper level management and public service positions. Graduates also have solid preparation for graduate studies in law, economics, and in Master of Business Administration (MBA) programs. A double major in business economics and agricultural business is not permitted; a double major in business economics and economics is not permitted. A major in business economics with a minor in economics is not permitted. For the undergraduate curriculum in business economics, see College of Business.

2. **College of Business**

3. **3.1. Major - Economics**

The major in economics prepares students for advanced studies, professional degrees such as law and business administration, and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service. Candidates for the bachelor of science degree with a major in economics must fulfill requirements established by the College of Liberal Arts and Sciences. (For details of undergraduate curricula in liberal arts and sciences, see College of Liberal Arts and Sciences, Curriculum.)

Students majoring in economics are required to take the following courses within the General Education Area of Natural Sciences and Mathematical Disciplines:

3. **3. College of Liberal Arts and Sciences**

4. **4. Learner Outcome Goals**

The Department of Economics at Iowa State University has general goals for its B.S. graduates. These goals are for students to be able to solve problems and think critically, engage in economic reasoning, demonstrate leadership skills, communicate effectively, make ethical decisions, understand the environmental impacts of human activities, meet the challenges of living and working in a culturally diverse and global community, develop a capacity for innovativeness and creativity, and value the importance of life-long learning. Regarding each of these general goals, there are more specific additional goals, namely:

1. **Problem Solving/Critical Thinking:**
   a. Distinguish factual statements from opinions or value judgments.
   b. Summarize, analyze, and interpret research data and policy issues.
   c. Distinguish causal relationships from correlations.
   d. Determine the accuracy of statements.
   e. Understand the usefulness of abstractions and models.
   f. Identify assumptions and detect bias.
   g. Critically evaluate their arguments and those of others.
   h. Distinguish relevant information from irrelevant information.
   i. Establish priorities.
   j. Apply a holistic approach to solving complex, issue-laden, problems.

2. **Economic Reasoning:**
Courses to be included in the minimum of 15 credits include the following:

1. Minor - Agricultural Business

2. College of Liberal Arts and Sciences

2.1 Minor - Economics

Courses to be included in the minimum of 15 credits are:

<table>

</table>

Six credits of ECON 230-289, 300-389, 400-489 courses.

Graduate Study

The department offers work toward the degrees master of science and doctor of philosophy with majors in economics and agricultural economics. The department also offers minors to students with majors in other departments. Visit our web site at www.econ.iastate.edu.

Students do not need to have an undergraduate major in economics or agricultural economics in order to qualify for graduate work in the department. However, students must have completed undergraduate coursework in microeconomics, macroeconomics, statistics, calculus, and matrix algebra. Some background in Math courses emphasizing logic and proofs is preferred, particularly for the Ph.D. Candidates for the degree master of science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree master of science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of coursework, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the individual’s committee. Subject to staffing constraints, the department offers coursework to support the following fields of concentration: applied econometrics, agricultural economics, financial economics, industrial organization, international economics, human resources, macroeconomics, and environmental and resource economics. Each student must complete advanced courses in microeconomics and macroeconomics theory, quantitative methods and econometrics, and two fields from the list above. Students must demonstrate competence in theory by passing qualifying examinations. Students must also participate in workshops.

English

Undergraduate Study

As one of the core disciplines of the liberal arts, English promotes an understanding of the way language functions and provides all students with fundamental skills needed to succeed in college, at work, and as citizens. Courses in the department foster critical thinking, leadership ability, and democratic engagement and prepare students to communicate effectively in college, in the workplace, and in public forums. Students interested in majoring in English can choose a

- BA in English (with possible emphases in Literature, Creative Writing, Literary Editing, or Rhetoric)
- BA in English with an emphasis in Teacher Education (required courses for licensure are marked below)
- BS in Technical Communication

Students interested in a BS degree in English will need to complete 12 extra credits beyond the general education requirements; these credits must be taken in linguistics, natural science, mathematics, social science, or selected courses in kinesiology.

Those interested in civic discourse and oral communication can also major or minor in Speech Communication (see the catalog listing Speech Communication). Students in secondary education can also earn an ESL endorsement through classes in the English Department (courses are marked below).

An undergraduate major in English can be a solid basis for the professional study of law, medicine, theology, and business or careers in education, arts management, and publishing. An undergraduate major in Technical Communication can prepare students for careers in nonprofit and government communication, web design and communication consulting, software documentation, and scientific and technical writing and editing.

1. College of Agriculture and Life Sciences

1.1. Minor - Agricultural Business

Principles of Microeconomics

Intermediate Microeconomics

Six credits of ECON 230-289, 300-389, 400-489 courses.

6
The department also provides communication courses for students across the disciplines through the ISUComm initiative. The goal of ISUComm is to strengthen student communication and enhance students' critical thinking by creating opportunities for them to practice communication skills throughout their academic careers. These courses include ENGL 150 and 250 (ISUComm foundation courses) and Engl 302, 309, and 314 (ISUComm advanced communication courses). These courses benefit all ISU undergraduates by addressing written, oral, visual, and electronic communication, or WOVE. WOVE prepares students for 21st-century communication activities.

As part of Iowa State's commitment to interdisciplinary study and cultural inclusiveness, English also has strong ties with African American Studies, American Indian Studies, Classical Studies, Latina/o Studies, Linguistics, Speech Communication, and Women's Studies. In addition to course offerings in literature, creative writing, linguistics, speech communication, rhetoric, and technical communication, the field of English Studies features strong connections with the technical, scientific, and environmental work that distinguishes Iowa State.

International students and other nonnative speakers of English can go to the Intensive English and Orientation Program (IEOP) in the department, which offers special courses in English for both undergraduate and graduate students who are native speakers of other languages. (See catalog entries under English Courses for Native Speakers of Other Languages and English Requirement for International Students.)

**English Major Requirements**

English majors are required to have, in addition to ISUComm foundation courses (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), at least 37 credits in English. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate with a major in the English Department, a student must earn at least a C (not a C-) in ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition as well as in each of the courses taken to fulfill the program of study. Earning at least a C in ISUComm foundation courses and in one advanced communication course also meets the departmental Communication Proficiency requirement.

* Indicates English courses or groups required for students seeking teacher licensure.

</tr>
</tbody>
</table>

Some of these courses taken to meet licensure requirements may also meet General Education requirements for the college. See also the 4-year plan of study grid for English Education showing courses by semester.

**ESL Endorsement Requirements**

At Iowa State University, ESL is an add-on endorsement, which means that students need to be certified in another area and to take all basic teacher preparation courses. The growing number of English learners in our public schools make the ESL endorsement a useful addition to a teaching license.

To add English as a Second Language, students must earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

<table>

Departmental Awards and Scholarships
Each spring the English Department offers many scholarships and awards for both undergraduate and graduate students. Some undergraduate awards are for returning English and Technical Communication majors only; others are for returning students of any major who demonstrate excellence in some aspect of English or technical communication. Application forms and a list of current awards are available on the English Department website and in 206 Ross Hall early in the Spring Semester. Award winners are announced each year in April.

English Minor Requirements
The minor in English prepares students in any discipline for which communication activities are needed to succeed in their professions. Minors in English will complete 15 credits beyond ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition, all with a grade of C (not C-) or higher, of which will be at the 300 or 400 levels. Twelve of these hours must be taken at Iowa State. Up to 6 of the 15 credits taken for the minor may be used to meet other degree program requirements.

Graduate Study
The department offers graduate work in six majors and one graduate certificate program. We have three Master of Arts majors, one Master of Fine Arts major, two Doctor of Philosophy majors, and one TESL/TEFL Certificate. Information on application requirements and procedures for all of our graduate majors is available at http://www.engl.iastate.edu/graduate-students/how-to-apply/.

The Master of Arts (MA) degree programs offer various possibilities for the advanced study of writing, language, and literature. The degree requires a minimum of 30 hours of graduate credits, including a final thesis or creative component (3 credits). Both the MA in English and the MA in TESL/Applied Linguistics have language requirements that may be fulfilled in a number of ways. Students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement.

Students admitted to the MA in English choose between two areas of specialization. The Literature specialization is designed to prepare students for a variety of career paths. These include going on for a PhD; teaching at the secondary, two- and four-year college, and university levels; and working in fields such as publishing, research and administration, or non-profit organizations. The Literature and the Teaching of Reading specialization is designed for students with a teaching license who wish to take graduate literature courses and work toward a reading endorsement by taking three reading courses in Curriculum and Instruction.

The MA in Rhetoric, Composition, and Professional Communication (RCPC) prepares students for careers in business, technical, and professional communication in the private and public sectors and for teaching writing and communication at the postsecondary level.

The MA in TESL/Applied Linguistics (TESL/AL) prepares students for careers in teaching English to nonnative speakers of English, either in the U.S. or abroad. Students with MA degrees in TESL teach adults and younger learners in a wide variety of contexts, supervise language programs, work for testing organizations, and create language teaching materials. Students admitted to the degree program can choose among optional specializations: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESP); Literacy; and Language in ESL.

The Master of Fine Arts (MFA) program in Creative Writing and Environment (CWE) focuses on the rhetorical theory, history, pedagogy, and practice of written, oral, visual, and electronic communication (WOVE) in professional communities, such as business, industry, science, and government. The degree prepares graduates for academic positions in rhetoric, in multimodal composition, and in business, professional, and technical communication, as well as for work in the private and public sectors as professional communication specialists, editors, designers, and communications managers. Candidates are required to complete 72 hours of graduate credit and a dissertation and to pass a portfolio assessment, a preliminary examination, consisting of a comprehensive examination and a special field examination, and an oral defense of the dissertation.

The PhD in Rhetoric and Professional Communication (RPC) focuses on the rhetorical theory, history, pedagogy, and practice of written, oral, visual, and electronic communication (WOVE) in professional communities, such as business, industry, science, and government. The degree prepares graduates for academic positions in rhetoric, in multimodal composition, and in business, professional, and technical communication, as well as for work in the private and public sectors as professional communication specialists, editors, designers, and communications managers. Candidates are required to complete 72 hours of graduate credit and a dissertation and to pass a portfolio assessment, a preliminary examination, consisting of a comprehensive examination and a special field examination, and an oral defense of the dissertation.

A Graduate Certificate in Teaching English as a Second Language/Teaching English as a Foreign Language (TESL/TEFL) prepares students to teach English to nonnative speakers of English either in the U.S. or abroad. It offers students grounding in the linguistic understanding of English and a flexible program of study with courses in teaching methodology, language assessment, and the use of technology to address student language needs. This 12-credit program requires two prerequisites, one core requirement, and three graduate courses. All courses are cross-listed with courses in Linguistics.

The Department offers graduate students an opportunity to gain professional experience through fieldwork and internships, departmental research activities, ISUComm, the Intensive English and Orientation Program (IEOP), and the Speech Communication Program. Teaching and research assistantships are available for qualified students. Teaching assistants are responsible for teaching, with faculty supervision, ISUComm Foundation Courses, courses in public speaking, English as a Second Language (ESL), and business and technical communication. Research assistants may be assigned to faculty members engaged in research projects. One or more Pearl Hogrefe Fellowships in Creative Writing covering stipend and tuition are awarded each year to outstanding graduate students. Grannis Scholarships may be awarded to new students in the Applied Linguistics and Technology doctoral program. Freda Huncke Endowment Graduate Teaching Fellowships are awarded to select first-year students.

With prior written approval from the School of Education, students may use selected courses to meet requirements for the ESL endorsement (K-12) for teachers.

The English Department at the MA level requires 9 credits of English at the 500 or 600 level in the respective major (English, RCPC, TESL/AL). A graduate minor in the English Department at the MA level requires 12 credits of creative writing courses at the graduate level with 3 of those credits being ENGL 550 Creative Writing: Craft and Professional Practice. A graduate minor in the English

Environmental Science

http://www.ensci.iastate.edu

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced coursework in Environmental Science, Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.
2. 30 credits of course work in the major, including a required core of 15 credits.

A combined average grade of C or higher is required in courses applied in the major.

Graduate Study

Environmental Science offers an interdisciplinary graduate program leading to the M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics.

Applicants should have completed an undergraduate or masters degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science graduate program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in Environmental Science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Environmental Studies

Interdepartmental Undergraduate Program

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Secondary Major

The Environmental Studies secondary major is taken in addition to a first major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Students seeking a minor in Environmental Studies complete 24 credits of ENV S coursework including:

At least one general survey course chosen from:

| ENV S 101 | Environmental Geology: Earth in Crisis |

At least one integrative/issues course chosen from:

| ENV S 324 | Energy and the Environment |
| ENV S 342 | World Food Issues: Past and Present |
| ENV S 404 | Global Change |
| ENV S 424 | Sustainable and Environmental Horticulture Systems |

At least two human/societal perspectives courses chosen from:

| ENV S 293 | Environmental Planning |
| ENV S 320 | Ecofeminism |
| ENV S 334 | Environmental Ethics |
| ENV S 345 | Population and Society |
| ENV S 355 | Literature and the Environment |
| ENV S 380 | Environmental and Resource Economics |
| ENV S 382 | Environmental Sociology |
| ENV S 383 | Environmental Politics and Policies |
| ENV S 384 | Religion and Ecology |
| ENV S 442 | The Policy and Politics of Coastal Areas |
| ENV S 472 | U. S. Environmental History |
| ENV S 484 | Sustainable Communities |
| ENV S 491 | Environmental Law and Planning |

Beyond these three requirements, any Environmental Studies course and up to six credits of approved environmental coursework outside of Environmental Studies may be applied toward the 24 credit total for the major. Regardless of their home college, Environmental Studies majors must complete at least 9 credits of approved coursework in natural science. Unless prohibited by program or college rules, courses used to fulfill requirements of the Environmental Studies major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including:

At least one general survey course chosen from:

| ENV S 101 | Environmental Geology: Earth in Crisis |
| ENV S 120 | Introduction to Renewable Resources |
| ENV S 173 | Environmental Biology |

At least one integrative/issues course chosen from:

| ENV S 160 | Water Resources of the World |
| ENV S 204 | Biodiversity |
| ENV S 324 | Energy and the Environment |
| ENV S 342 | World Food Issues: Past and Present |
| ENV S 404 | Global Change |
| ENV S 424 | Sustainable and Environmental Horticulture Systems |

At least two human/societal perspectives courses chosen from:

| ENV S 293 | Environmental Planning |
| ENV S 320 | Ecofeminism |
| ENV S 334 | Environmental Ethics |
| ENV S 345 | Population and Society |
| ENV S 355 | Literature and the Environment |
| ENV S 380 | Environmental and Resource Economics |
| ENV S 382 | Environmental Sociology |
| ENV S 383 | Environmental Politics and Policies |
| ENV S 384 | Religion and Ecology |
| ENV S 442 | The Policy and Politics of Coastal Areas |
| ENV S 472 | U. S. Environmental History |
| ENV S 484 | Sustainable Communities |
| ENV S 491 | Environmental Law and Planning |
A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

French

French (Frnch)

World Languages and Cultures majors with a concentration in French have two options:

WLC Option I: French Studies

Under WLC Option I, students with a concentration in French Studies must complete at least 30 credits beyond the intermediate (FRNCH 201 Intermediate French I-FRNCH 202 Intermediate French II) level.

Major option in French Studies (30 credits total)

A. Required Core Courses (12 credits)

Genetics

Alan M. Myers, Chair, Genetics Major Committee

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements. (See Preprofessional Study.)

Curriculum in Genetics - Requirements

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation.

1. Genetics and Life Sciences

A grade of C– or better is required in all Genetics and Life Science courses.

Total Credits 33-34
5. International Perspectives: 3 cr. from university approved list
This course can satisfy both the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list
This course can satisfy both the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Library
A. Courses required of all Genetics majors
   Grades of C or better are required in ENGL 150 and ENGL 250 and advanced writing.

   ENGL 150  Critical Thinking and Communication  3
   ENGL 250  Written, Oral, Visual, and Electronic Composition  3
   or ENGL 250H  Written, Oral, Visual, and Electronic Composition: Honors  1
   LIB 160  Information Literacy  1
   One advanced English writing course from department approved list  3

   Total Credits  10

B. Course required of majors in the College of Agriculture and Life Sciences only.
A grade of C or better is required by the college

   SP CM 212  Fundamentals of Public Speaking  3
   or AGEEDS 311  Presentation and Sales Strategies for Agricultural Audiences  3

   Total Credits  3

8. General Education electives
Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

   A. College of Agriculture and Life Sciences
   Humanities course from college approved list  3
   Social Science course from college approved list  3
   Ethics course from college approved list  3

   Total Credits  9

   B. College of Liberal Arts and Sciences
   Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from department approved list  12
   Social Science courses from college approved list  9
   Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.

   Total Credits  21

Undergraduate Minor
The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used only to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

   GEN 313  Principles of Genetics  3
   GEN 313L  Genetics Laboratory  1
   BIOL 314  Principles of Molecular Cell Biology  3
   GEN 410  Analytical Genetics  3
   GEN 409  Molecular Genetics  3
   Two or more additional credits in Genetics at the 300 level or above.  2

   Total Credits  15

Graduate Study
Graduate study in genetics leading to the Master of Science and Doctor of Philosophy degrees is offered at ISU. Graduate study is organized as a separate interdepartmental graduate major from the undergraduate program. For more information on graduate study in genetics see: Genetics - Interdisciplinary.

Geology
Undergraduate Study
The department offers courses in geology and meteorology. Majors can be earned in earth science (B.A., B.S.), geology (B.S.), and meteorology (B.S.). Candidates for all degrees must satisfy the requirements established by the College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum). In addition, the department has requirements for each major. A minimum of 120 credits are required.

The bachelor of science in Geology prepares the student for a professional career and/or graduate study in the geological sciences. Students selecting geology as a major will elect an option in traditional geology or environmental geology/hydrogeology. The traditional option prepares a student for employment in state and U.S. geological surveys, mineral and petroleum exploration, and graduate study in most aspects of geology. Required courses in this option include:

   GEOL 100  The Earth  3
   GEOL 100L  The Earth: Laboratory  1
   GEOL 102  History of the Earth  3
   GEOL 102L  History of the Earth: Laboratory  1
   GEOL 302  Summer Field Studies  6
   GEOL 315  Mineralogy and Earth Materials  3
   GEOL 315L  Laboratory in Mineralogy and Earth Materials  1
   GEOL 316  Optical Mineralogy  2
   GEOL 356  Structural Geology  5
   GEOL 365  Igneous and Metamorphic Petrology  3
   GEOL 368  Sedimentary Geology  4
   GEOL 479  Surficial Processes  3
   And 9 credits of geology electives  9

   Total Credits  44

The environmental geology/hydrogeology option prepares a student for employment in environmental consulting, state and U.S. geological surveys, regulatory agencies, and graduate study in the environmental aspects of geology. Required courses in this option include:

   GEOL 100  The Earth  3
   GEOL 100L  The Earth: Laboratory  1
   GEOL 102  History of the Earth  3
   GEOL 102L  History of the Earth: Laboratory  1
   GEOL 302  Summer Field Studies  6
   GEOL 315  Mineralogy and Earth Materials  3
   GEOL 315L  Laboratory in Mineralogy and Earth Materials  1
   GEOL 316  Optical Mineralogy  2
   GEOL 356  Structural Geology  5
   GEOL 368  Sedimentary Geology  4
   GEOL 411  Hydrogeology  4
   One of the following  3
   GEOL 419  Environmental Geochemistry
   GEOL 426  Stable Isotopes in the Environment
   GEOL 434  Contaminant Hydrogeology
   GEOL 479  Surficial Processes  3
   And 6 credits of geology electives  6

   Total Credits  45

Required supporting courses include:

   CHEM 177  General Chemistry I  4
   CHEM 177L  Laboratory in General Chemistry I  1
   CHEM 178  General Chemistry II  3
   CHEM 178L  Laboratory in College Chemistry II  1
   PHYS 111  General Physics  5
   PHYS 112  General Physics  5
   One of the following  4
   MATH 165  Calculus I
   MATH 181  Calculus and Mathematical Modeling for the Life Sciences I

   One of the following  4
Graduate Study

The department offers programs leading to the master of science and doctor of philosophy with majors in Earth Science, Geology, and Meteorology. Program options are available for the M.S. and Ph.D. degrees in earth science leading to careers in teaching. The department also cooperates in the interdepartmental major in Water Resources (see Index). Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate background and performance and their expressed goals.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology. A non-thesis option is also offered for the M.S. degree in Meteorology.

Graduates in Geology specialize in a subsdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

Course requirements for the M.S. degree include MTEOR 542, 543, 507 or 518, 552 or 516x, and 502 or 504 or 505 or 605. In addition to the 5 required courses from this list, students must take at least 3 more credits of graduate course work in Meteorology, Agricultural Meteorology, or a field related to their research interests (students will work closely with their POS committee to determine the exact amount of structured course work required — typically this is 18-21 credits). Students without prior synoptic meteorology course work must complete MTEOR 511 and may substitute these credits in place of the required MTEOR 507 or 518 courses.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

German

German (Ger)

WLC Option I: German Studies

Under WLC Option I, students with a concentration in German must complete at least 30 credits beyond the intermediate (GER 201) level. Students electing the German Studies option may count a maximum of two of the following courses towards the major:

GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms' Tales 3-4
GER 378 German Film and Media Studies 3-4

A. German Studies Required Core Courses: (22 credits)

GER 301 Reading: Problems of the Early Twentieth Century 3
GER 302 Composition 3
GER 304 German for Business and Professions 3
GER 305 Conversation: The City in Contemporary Europe 3
GER 320 Germany Today 3
GER 330 German Literature and Culture 3
GER 476 Topics in German Cultural Studies 3-4

B. Electives:

The remaining 8 credits may be chosen from the following courses:

Repeatable course:

GER 330 German Literature and Culture 3

Study Abroad and Internship option:

GER 499 Internship in German 1-3

Courses taught in English (up to 8 credits applicable towards major; majors must enroll for 4 credits):

GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms' Tales 3-4
GER 378 German Film and Media Studies 3-4

C. Study Abroad: The department strongly recommends that all students of German participate in an approved study abroad program based in a German-speaking country. Credit from an approved study abroad program may be applied to the major.

Curricular Notes: GER 330 German Literature and Culture may be repeated once for major credit when offered with a different topic (6cr. total). GER 476 Topics in German Cultural Studies is required for the WLC major option in German Studies. Majors must enroll in GER 476 Topics in German Cultural Studies for 4 credits. Majors choosing the German Studies option may select two additional courses for 4 cr. from the following:

GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms' Tales 3-4
GER 378 German Film and Media Studies 3-4

Minor in German

The German minor requires 15 credits of courses taught in German. At least six credits must be chosen from among German 301, 302, 304, 305, 320, and 330. At least three credits must be chosen from German 320 and 330. Courses taught primarily in English (German 370, 371, 375, 378, and 476) cannot count toward the German minor.

Three credits must be in literature or culture taught in German

GER 320 Germany Today 3
GER 330 German Literature and Culture 3

Eligible minor courses 12
WLC Option II: Languages and Cultures for Professions (LCP)

Under WLC Option II students with a concentration in German must complete a minimum of 30 credits beyond the intermediate (GER 201 - GER 202) level. Students electing the LCP option may count one of the following courses toward the major.

GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms’ Tales 3-4
GER 378 German Film and Media Studies 3-4

I. Languages and Cultures for Professions (Business)

Students with a primary major in the College of Business may select from one of the following options:

Business Option 1

International Business Secondary Major and German LCP Minor Emphasis (27 credits total)

A. International Business Secondary Major (12 credits from approved list)

B. LCP Minor Emphasis Courses (15 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 304 German for Business and Professions 3
GER 305 Conversation: The City in Contemporary Europe 3
or GER 302 Composition 3
GER 320 Germany Today 3
GER 499 Internship in German 1-3

Business Option 2

International Business Secondary Major and LCP Major Option (42 credits total)

A. International Business Secondary Major (12 credits from approved list)

B. LCP Second Major (30 credits)

I. LCP Required Core Courses (19 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 301 Reading: Problems of the Early Twentieth Century 3
GER 304 German for Business and Professions 3
GER 305 Conversation: The City in Contemporary Europe 3
GER 320 Germany Today 3
GER 476 Topics in German Cultural Studies 3-4
GER 499 Internship in German 1-3

II. Electives (11 credits)

GER 302 Composition 3
GER 330 German Literature and Culture 3
GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms’ Tales 3-4
GER 378 German Film and Media Studies 3-4

Curricular Notes: students may enroll in the Languages and Cultures for Professions (LCP) Option only as a Second Major. They may not graduate with the Second Major in LCP alone. LCP Majors may select two of the following courses, which must be taken for 4 credits:

GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms’ Tales 3-4
GER 378 German Film and Media Studies 3-4

II. Languages and Cultures for Professions (Engineering)

Engineering students pursuing the second major option in German are required to take at least 30 credits beyond the intermediate GER 201 Intermediate German I - GER 202 Intermediate German II level.

Engineering LCP: Second Major Option in German (30 credits total)

A. Required Core Courses (19 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 301 Reading: Problems of the Early Twentieth Century 3
GER 304 German for Business and Professions 3
GER 305 Conversation: The City in Contemporary Europe 3
GER 320 Germany Today 3
GER 476 Topics in German Cultural Studies 3-4
GER 499 Internship in German 1-3

B. Electives (11 credits)

GER 302 Composition 3
GER 330 German Literature and Culture 3
GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms’ Tales 3-4
GER 378 German Film and Media Studies 3-4

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a Second Major. They may not graduate with the Second Major in LCP alone. LCP Majors may select two of the following courses, which must be taken for 4 credits:

GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimms’ Tales 3-4
GER 378 German Film and Media Studies 3-4

History

The History department offers courses leading to the B.A. and B.S. degrees in history, the M.A. degree in history, the M.A. and Ph.D. degrees in the history of technology and science, and the Ph.D. degree in agricultural history and rural studies.
The department offers a variety of survey courses (200 series) for first- and second-year students as well as general education courses or as introductions to advanced courses in history or other subject areas. In addition to 200-level survey courses, it offers advanced undergraduate courses in the history of Europe, Asia, Africa, Latin America, the United States, technology and science, agriculture, and other selected topics.

**Undergraduate Study**

**The History Major**

For a description of the undergraduate curriculum with a major in History see Liberal Arts and Sciences, Curriculum. History majors may earn either a bachelor of arts or bachelor of science degree. The minimum required for a major in history is 37 credits, including HIST 195 and HIST 495. At least 24 credits of HIST must be in courses numbered 300 or above. Students may take a maximum of 12 credits at the 200-level, a maximum of 15 credits at the 300-level, and must take a minimum of 12 credits at the 400-level or above. A minimum of 15 credits of HIST numbered 300 or above must be taken in residence at Iowa State. The department will accept a maximum of 6 credits of cross-listed courses originating in another teaching department toward the major degree. Candidates for the B.A. must complete two years of university-level study in one foreign language or the equivalent.

**Objectives for History Majors**

1. Display the appropriate level of cognitive knowledge of historical themes and events based upon the student’s course of study
2. Display an understanding of past cultures and social organizations, based on the course of study
3. Develop the fundamental methodological skills of the historical craft—The ability to contextualize and analyze primary source evidence. Familiarity with the concepts of historical argument and interpretation, and the ability to formulate effective argumentation in written and oral forms. Awareness of the basic historiography in selected research area. The ability to conduct research and to write a historical essay based upon primary and secondary source research. Students receive an introduction to these concepts in HIST 195 Introduction to History.
4. Display a sophisticated understanding of the relationship between past events and the present. For purposes of outcomes assessment, all History majors must complete three credits of HIST 495 Historiography and Research Writing or, if qualified and willing, one graduate level writing/ research seminar.

Communication Proficiency requirement: History majors must receive a grade of C or better in each of ENGL 150 and ENGL 250 (or ENGL 250H), and HIST 495 or any graduate seminar.

For a description of the major in History as preparation for professional programs, see Preprofessional Study. Students majoring in History may also earn a second major in International Studies; see Inter-national Studies.

Majors must distribute their courses across geographic and chronological areas such that they take at least 3 credits at the 300-level or above in five of the following six areas:

- U.S. history, European history, African/Asian/Latin American history
- Ancient history (pre-500), medieval and early-modern history (ca. 500-1750), and modern history (post-1750)

Individual courses may fulfill both a geographic and a chronological area. For example, a course on nineteenth century France may count as both European history and modern history. No single course, however, may be used to fulfill more than one geographic and one chronological area. If a course stretches significantly across two or more areas, students will select which geographic and/or which chronological area they want the course to fulfill. The History Department undergraduate adviser should be consulted as to which courses fulfill what areas. HIST 495 Historiography and Research Writing may not be used to fulfill any area.

**Minor**

The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 must be in courses numbered 300 or above, excluding HIST 490 Independent Study. A minimum of 9 credits numbered 300 or above must be taken at Iowa State. The College of Liberal Arts and Sciences requires students to earn a C or higher in at least 6 of the required 300-level credits. A student may count a maximum of 3 hours of cross-listed courses originating in another teaching department toward the minor in History. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

**Graduate Study**

The History Department offers two graduate degrees: a M.A. in History and a Ph.D. in Rural, Agricultural, Technological and Environmental History.

Most history graduate courses are either proseminars or seminars. Proseminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Seminars require students to conduct original historical research and to write research papers reporting the results.

The M.A. in history includes three options. See the departmental website on the M.A. in History for a full discussion of the options and requirements. An M.A. in History serves as the basis for continued study in history, as well as preparation for careers in law, education, business, and government service. Throughout world history human beings have depended on rural and agricultural communities as well as on the technologies developed and employed by these communities to sustain lives. Iowa State’s Doctoral Program in Rural, Agricultural, Technological and Environmental History offers a scholarly community and learning environment dedicated to the close examination of pervasive and enduring questions about these basic aspects of human history. Such questions can best be answered through the multi-faceted perspectives provided by rural, agricultural, technological, and environmental history. The result is a dynamic learning experience that leads to comparative and transnational analysis shaped by a broad range of methods drawn from the humanities and social/physical sciences. The Program’s aim is to produce students who are excellent researchers and engaging teachers, capable of succeeding in a broad variety of professional positions, both inside and outside of academia.

The Ph.D. in Rural, Agricultural, Technological and Environmental History is designed for students who have completed an M.A. in History. Those who have not yet completed an M.A. will be expected to complete the degree while progressing toward the Ph.D. Thirty semester hours of graduate credit are required for the M.A. and 72 for the Ph.D. Students who continue beyond the M.A. are expected to pass preliminary examinations in four areas of specialization, complete a dissertation, and defend it orally in the Ph.D. final examination. See the departmental website on the program for a full description of requirements.

**Interdisciplinary Studies**

**Interdepartmental Undergraduate Major Administered by the College of Liberal Arts and Sciences**

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty review board, and an academic adviser design the major. Leading to either the Bachelor of Arts or the Bachelor of Science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more departments. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College’s cross-disciplinary programs. Areas of interest in Interdisciplinary Studies have included Classical Studies, Criminology and Criminal Justice, International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and U.S. Latino/a Studies.

A student seeking admission to the program in interdisciplinary studies writes a letter of application that explains how the proposed major meets specific educational and learning goals. A faculty review board screens applications. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the review board in the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student’s educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

The interdisciplinary studies major must satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.

3. The courses will be chosen from at least two disciplines.

All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major. To meet the English and communication proficiency requirement, a grade of C or better must be earned in either an advanced English composition course or a course in the major with a significant writing component.

Further information may be obtained from the college office.

**International Studies**

*Interdepartmental Undergraduate Major and Minor, Administered by the College of Liberal Arts and Sciences*

Through a combination of coursework and study abroad, students who complete a secondary major or minor in International Studies can prepare for careers or advanced study in the international arena, such as foreign service, journalism, advocacy organizations, scientific or research institutions, business, nongovernmental development organizations (NGOs), humanitarian agencies, environmental organizations, human rights organizations, think tanks, international agriculture, and engineering. Students in International Studies gain an understanding of global issues, learn to communicate across cultures, and develop awareness of cultural ideas and attitudes.

A secondary major and a minor in International Studies are available for undergraduates. The program requirements are structured around a combination of a designated Topical Module and a Geographic Region, both selected by the student. Each student’s program of study is designed to reflect opportunities at Iowa State University as well as the academic, intellectual, and professional interests of the student.

**Secondary Major**

A student seeking a secondary major in International Studies must successfully complete two core courses plus courses in a selected Geographic Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

**Requirements for the Secondary Major in International Studies:**

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Geographic Regions:
  - Africa and the Middle East
  - Asia
  - Latin America
  - Western Europe
  - Russia, East Europe and Central Asia
- 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Topical Modules:
  - Global Environmental Issues
  - Globalization and Economic Development
  - International Issues in Science and Technology
  - International Communication
  - International Conflict
  - Social and Cultural Change
- 3 additional credits of coursework selected from either the Geographic Region or Topical Module.
- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language or by passing an approved exam.
- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable Iowa State.

The major must include a minimum of 12 credits not used to meet any other department, college, or university requirement.

**Minor**

A student seeking a minor in International Studies must successfully complete two core courses plus courses in a selected Geographical Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

**Requirements for the Minor in International Studies:**

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Geographic Regions:
  - Africa and the Middle East
  - Asia
  - Latin America
  - Western Europe
  - Russia, East Europe and Central Asia
- 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Topical Modules:
  - Global Environmental Issues
  - Globalization and Economic Development
  - International Issues in Science and Technology
  - International Communication
  - International Conflict
  - Social and Cultural Change
- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language or by passing an approved exam.
- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable Iowa State.

The minor must include a minimum of 9 credits not used to meet any other department, college, or university requirement.

**Language Proficiency**

Students with a major or minor in International Studies fulfill the Language Proficiency requirement through one of the following options:

- Completion of two years of university-level language instruction in a single world language that is relevant to the selected geographic region, as demonstrated by completion of a foreign language course numbered 202 or higher. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.
- Passing an examination given by the Department of World Languages and Cultures or otherwise certifying proficiency equivalent to two years of college-level study. Students proficient in languages not offered at ISU may petition for special consideration.
- Intensive study abroad experience that includes in-the-field-use of a language other than English. Individual prior approval of the International Studies Director is required for this option.

**Study/Service/Work Abroad Experience**

Students with a major or minor in International Studies are required to complete an international experience (study, service, or internship) of a minimum of three weeks in duration. Longer experiences are recommended but not required. Up to 12 credits of coursework taken abroad can be applied to the major if it is approved by the International Studies Program Director.

**Journalism and Mass Communication**

**The Journalism and Mass Communication Major**

The journalism and mass communication major prepares students for careers in journalism that involve all aspects of news and information. Emphasis is placed on generating ideas, organizing, writing, editing and presenting information for various media platforms and audiences. Students work with advisers to develop a program of study that prepares them for work in communication-specific areas including broadcast media, magazines and/or newspapers, photo journalism, science communication or visual communication and online/multimedia.

To receive a bachelor of science degree in journalism and mass communication, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, P R, or JL MC. At least 50 of these credits must come...
from the liberal arts and sciences. Overall, at least 45 credits must be from 300-
level or above. Journalism and mass communication majors are required to take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 101 Principles of Statistics (or another approved statistics course)</td>
<td>4</td>
</tr>
</tbody>
</table>

The degree requirements allow for a minimum of 34 credits and a maximum of 48
credits to be taken in ADVRT, P R, and JL MC. These include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JL MC 101 Mass Media and Society</td>
<td>3</td>
</tr>
<tr>
<td>JL MC 110 Orientation to Journalism and Communication</td>
<td>1</td>
</tr>
<tr>
<td>JL MC 201 Reporting and Writing for the Mass Media</td>
<td>3</td>
</tr>
<tr>
<td>JL MC 202 Intermediate Reporting and Writing for the Mass Media (C+ or better in JL MC 202 or JL MC 206)</td>
<td>3</td>
</tr>
<tr>
<td>JL MC 206 Reporting and Writing for the Electronic Media</td>
<td>3</td>
</tr>
<tr>
<td>JL MC 460 Law of Mass Communication</td>
<td>3</td>
</tr>
<tr>
<td>JL MC 499 Professional Media Internship</td>
<td>3</td>
</tr>
</tbody>
</table>

Additional recommended courses and requirements for the journalism and mass communication major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or a minor in the school. All students are required to take a second major or minor outside the school as an area of expertise. A Designated Area of Concentration (DAC) outside the school may be used in place of a minor or second major with faculty approval.

## Minors

The Greenlee School offers a minor in advertising and a minor in journalism and mass communication.

For a minor in advertising or journalism and mass communication, students complete 15 credits, including JL MC 101. The other 12 credits, at least 9 of which must be from Iowa State University, are selected from course offerings in the advertising and journalism and mass communication majors, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 credits from the following:</td>
<td>6</td>
</tr>
<tr>
<td>ADVRT 230 Advertising Principles</td>
<td></td>
</tr>
<tr>
<td>ADVRT 301 Research and Strategic Planning for Advertising and Public Relations</td>
<td></td>
</tr>
<tr>
<td>ADVRT 335 Advertising Media Planning</td>
<td></td>
</tr>
<tr>
<td>P R 220 Principles of Public Relations</td>
<td></td>
</tr>

<td></td>
</tr>
<tr>
<td>ADVRT 497 Special Topics in Communication</td>
<td></td>
</tr>
<tr>
<td>JL MC 497 Special Topics in Communication</td>
<td></td>
</tr>
</tbody>
</table>

Journalism and mass communication or public relations majors may not minor in advertising, and advertising and public relations majors may not minor in journalism and mass communication.

## Graduate Study

The Greenlee School of Journalism and Communication offers work for a master of science degree in journalism and mass communication.

### Majors plan a program of study in one of two tracks:

I. Communication as theory and research -- The School offers advanced academic preparation in communication theory and research leading to the master of science degree. Graduate work prepares students to use and contribute to research and scholarship in the field of communication. The degree requires a thesis or creative component based on original research, which must be defended successfully before a committee at the end of the program.

Areas of research emphasis include: science and risk communication, media performance, media effects, advertising, public relations, political communication, communication technology, law and ethics, international communication, visual communication and emerging media.

II. Professional and Strategic Communication -- The School offers advanced professional study in journalism and mass communication leading to the master of science degree. Graduate work prepares students for professional careers in a variety of mass communication fields. Students with limited training or experience in journalism and mass communication may include skills courses in their programs, but the credits for those courses will not count toward the graduate degree. The degree requires either a creative component or thesis.

All students must complete four core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JL MC 592 Introduction to Graduate Study in Journalism and Mass Communication</td>
<td>R</td>
</tr>
<tr>
<td>JL MC 501 Theories of Mass Communication</td>
<td>3</td>
</tr>
<tr>
<td>JL MC 502 Communication Research Methods</td>
<td>4</td>
</tr>
<tr>
<td>JL MC 598 Seminars in Mass Communication</td>
<td>1-3</td>
</tr>
</tbody>
</table>

Each student selects elective courses based on his/her area of emphasis and career goal, in consultation with the student's major professor and Program of Study Committee.

The Greenlee School graduate program offers minor work for students majoring in other departments. The M.S. minor requires:

JL MC 501, JL MC 510 and one other course in journalism and mass communication for a total of 9 credits taken within the Greenlee School.

## Liberal Studies

The bachelor of liberal studies degree (B.L.S.) was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The degree may be earned from Iowa State University, the University of Iowa, or the University of Northern Iowa.

The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Work done in community colleges or other accredited colleges and universities can be applied toward the degree, as can applicable courses taken at any of the three Iowa Regent universities, whether on or off campus.

The B.L.S. program has no residence requirements. To complete the degree, students may earn credits through distance-learning formats as well as regular on-campus courses. Students may also earn credits by proficiency or test-out examinations.

## Admission

Admission to the B.L.S. program is open to persons who meet either of the following levels of previous educational attainment:

- Hold the associate in arts (A.A.) or associate in science (A.S.) degree from an accredited two-year college. (Holders of the associate in applied science or associate in applied arts degree are not automatically eligible, although some courses may be found applicable upon review.)
- Have at least 60 semester credits of collegiate work acceptable toward graduation at ISU with a total cumulative grade point average of at least 2.00 (a C average).

## Requirements for the B.L.S. Degree

The B.L.S. candidate must earn a total of 120 credits in accordance with requirements listed below. Courses taken at Iowa State University on a pass/not pass basis may be counted toward graduation only as electives. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

### General Education Requirements 46 cr.

- Basic English Composition 6
- World language 8
- Arts and humanities 12
Mathematics, statistics, or computer science 3
Natural sciences 8
Social sciences 9
Distribution Requirements ** 36
Electives 38
Total Credits 120

*The requirement may be met by completion of three or more years of high school study in one world language. A list of courses acceptable in the general education groups can be obtained from the college website (http://www.las.iastate.edu/students/academics/general-education).

**A minimum of 12 credits is required in each of the five distribution areas listed below.

- **Humanities** (literature, philosophy, history, religion, art and music appreciation)
- **Communications and arts** (journalism, speech, writing, drama, art, world language)
- **Natural sciences and mathematical disciplines** (chemistry, physics, biology, geological and atmospheric sciences, mathematics, statistics, computer science)
- **Social sciences** (sociology, psychology, economics, political science, anthropology, geography)
- **Professional fields** (business, education, family and consumer sciences, social work, agriculture, engineering, nursing)

At least 24 upper-level credits are required in the three distribution areas with a minimum of 6 upper-level credits in each of the areas.

**Other Requirements**

Included in the total of 120 credits must be the following:

- 45 upper-level credits from a four-year college
- 30 credits from ISU earned during the junior/and or senior year.
- Three credits of course work in U.S. Diversity and 3 credits in International Perspectives.
- A grade average of at least 2.00 (a C average) in all coursework applied to the B.L.S. degree, in all upper-level coursework, and in all work completed after admission to the B.L.S. program.
- Proficiency in communication demonstrated by completion of an approved composition course from a four-year college.

**Linguistics**

**Undergraduate Study**

Linguistics is a cross-disciplinary program in the College of Liberal Arts and Sciences designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, communication disorders, computer science, English, psychology, and speech communication and world languages and cultures, thus providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as teaching English both as a first and as a second language, second language studies, psycholinguistics, cross-cultural communication, linguistic anthropology, computational linguistics, speech-language pathology, and audiology.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major.

Majors in linguistics complete a minimum of 36 hours in linguistics with a grade of C or better in each linguistics course. Courses specifically required are:

- LING 119 Introduction to World Languages 3
- LING 120 Computers and Language 3
- LING 207 Introduction to Symbolic Logic 3
- LING 219 Introduction to Linguistics 3
- LING 220 Descriptive English Grammar 3
- LING 309 Introduction to Culture and Language 3
- LING 371 Phonetics and Phonology 3
- LING 413 Psychology of Language 3
- LING 420 History of the English Language 3
- LING 437 Grammatical Analysis 3

In addition, linguistics majors must choose 6 credits of courses from one or more of the following areas:

**Communication Disorders**

- LING 275 Introduction to Communication Disorders 3
- LING 286 Communicating with the Deaf 3
- LING 471 Language and Reading Development in Children 3

**Computers and Linguistics**

- LING 510 Introduction to Computers in Applied Linguistics 3
- LING 520 Computational Analysis of English 3
- LING 526 Computer-Assisted Language Learning 3

**Second Language Studies**

- LING 425 Second Language Learning and Teaching 3
- LING 518 Teaching English as a Second Language Methods and Materials 3
- LING 519 Second Language Assessment 3
- LING 524 Literacy: Issues and Methods for Nonnative Speakers of English 3
- LING 525 Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English 3

**Sociolinguistics and Language**

- LING 305 Language, Thought and Action 3
- LING 422 Women, Men, and the English Language 3
- LING 514 Sociolinguistics 3
- LING 527 Discourse Analysis 3

**Spanish Linguistics**

- LING 395X Language Proficiency 3
- LING 395X Communication Proficiency requirement: The linguistics program requires grades of C+ or better in each of the following:
  - ENGL 150 Critical Thinking and Communication 3
  - ENGL 250 Written, Oral, Visual, and Electronic Composition 3
  - or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors 3
  - LIB 160 Information Literacy 1

Continuing ENGL Proficiency is based on one course from ENGL 305, ENGL 314, a WLC 370-379 course, or a CL ST 370-379 course.

For information about using linguistics courses in an interdisciplinary studies major, see Liberal Arts and Sciences, Cross-Disciplinary Studies.

**Graduate Study**

A graduate minor in linguistics permits students to investigate various aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines. Graduate courses for the minor may be cross-listed with courses in Anthropology, Communication Disorders, Computer Science, English, Psychology, and World Languages and Cultures.

For the master’s degree, a declared minor consists of 9 credits in linguistics including two foundation courses:
The courses listed above must include one of the sequences: flexibility for specialization, and students are encouraged to steer their education toward their application area. This program makes double majors more feasible and can justify their assumptions.

Mathematics

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in mathematics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The program in mathematics offers training suitable for students planning to enter secondary school teaching, to work in mathematics and computation for industry or government, or to continue their studies in graduate school. Students may satisfy the major requirements in several ways, suitable for various career objectives. Graduates can construct rigorous arguments to demonstrate mathematical facts. They can communicate their mathematical methods to others and can justify their assumptions.

Traditional Program

The traditional program of study for mathematics majors gives students a thorough grounding in mathematics. Graduates understand a broad range of mathematical topics and are familiar with a broad range of mathematical models. They have skills for solving problems in diverse situations. The program allows flexibility for specialization, and students are encouraged to steer their education according to career objectives. This traditional program of study requires:

2 The department requires a grade of C- or better.

Mathematics Plus

The Mathematics Plus option is for students who wish to establish a clear strength in a field of application of mathematics. They obtain the mathematics major by pursuing study of mathematics, through the upper division level, complementary to their application area. This program makes double majors more feasible and is appropriate for students who plan on employment or graduate study in the application field. It is not intended for students who plan on graduate study in mathematics. For more information, see the mathematics department web site or consult an adviser in mathematics.

Secondary Education

For certification requirements for teaching of mathematics in grades 5-12, see the Mathematics Department and School of Education web sites or consult an adviser.

Recommendations

The department strongly recommends that each student majoring in mathematics include in the program substantial supporting work beyond the minimum general education requirement of the college in one or more areas of application of mathematics, such as other mathematical sciences, engineering, natural science, or social science. Particularly useful are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM S 207</td>
<td>Fundamentals of Computer Programming</td>
<td>3</td>
</tr>
<tr>
<td>COM S 208</td>
<td>Intermediate Computer Programming</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 221</td>
<td>Introduction to Classical Physics I</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 222</td>
<td>Introduction to Classical Physics II</td>
<td>5</td>
</tr>
<tr>
<td>STAT 341</td>
<td>Introduction to the Theory of Probability and Statistics I</td>
<td>3</td>
</tr>
<tr>
<td>STAT 342</td>
<td>Introduction to the Theory of Probability and Statistics II</td>
<td>3</td>
</tr>
</tbody>
</table>

It also recommends that students contemplating graduate study in mathematics acquire a reading knowledge of French, German, or Russian.

Credits Not Counted

Credits earned in the following cannot be counted toward graduation by mathematics majors:

<table>
<thead>
<tr>

Graduate Study

The department offers programs leading to a Master of Science or Doctor of Philosophy degree in mathematics or applied mathematics, as well as minor work for students whose major is in another department. The department also offers a program leading to the degree of Master of School Mathematics (M.S.M.).

Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should prepare themselves by taking several upper division mathematics courses. It is desirable that these credits include introduction to analysis and abstract algebra.

The M.S. degree requires a student to have completed 30 credit hours and to write a creative component or thesis. Additionally, students must pass a comprehensive oral examination over their coursework and their creative component or thesis. See the online Mathematics Graduate Handbook for specific requirements.

The Ph.D. degree requires a student to take 48 credit hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation which is defended by an oral exam. Ph.D. candidates must have at least one year of supervised teaching experience. See the on-line Mathematics Graduate Handbook for specific requirements.

The M.S.M. degree is primarily for in-service secondary mathematics teachers. Students desiring to pursue the M.S.M. degree should present some undergraduate work in mathematics beyond calculus. Candidates for the M.S.M. degree must write an approved creative component and pass a comprehensive oral examination over their course work and their creative component.

Meteorology

Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct the past and anticipate the future. Graduates provide essential information for solving problems in resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

The study of Meteorology involves the description of the earth’s atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn the bachelor of science degree. The major satisfies guidelines specified by the American Meteorological Society and meets education requirements for employment with the National Weather Service and the World Meteorological Organization. Successful preparation for professional or graduate work in Meteorology requires that the student develop and integrate a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling, and effective oral and written communication. The faculty view the senior thesis (MTEOR 499 Senior Research), in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education requirements of the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a globally-oriented profession. The program requires the following courses:

- MTEOR 111 Synoptic Applications
- MTEOR 201 Introductory Seminar
- MTEOR 206 Introduction to Weather and Climate
- MTEOR 301 General Meteorology
- MTEOR 311 Introduction to Synoptic Meteorology
- MTEOR 341 Atmospheric Physics I
- MTEOR 342 Atmospheric Physics II
- MTEOR 411 Synoptic Meteorology
- MTEOR 417 Mesoscale Forecasting Laboratory
- MTEOR 432 Instrumentation and Measurements
- MTEOR 443 Dynamic Meteorology I
- MTEOR 454 Dynamic Meteorology II
- MTEOR 499 Senior Research

An additional 9 credits must be chosen from:

- MTEOR 402 Watershed Hydrology
- MTEOR 404 Global Change
- MTEOR 405 Environmental Biophysics
- MTEOR 406 World Climates
- MTEOR 407 Mesoscale Meteorology
- MTEOR 452 Climate Modeling
- MTEOR 490 Independent Study
- GEOL 415 Paleoclimatology
- CHEM 163 College Chemistry & 163L and Laboratory in College Chemistry

Or

- CHEM 177 General Chemistry I & 177L and Laboratory in General Chemistry I
- PHY 221 Introduction to Classical Physics I
- PHY 222 Introduction to Classical Physics II
- MATH 165 Calculus I
- MATH 166 Calculus II
- MATH 265 Calculus III
- MATH 266 Elementary Differential Equations
- STAT 105 Introduction to Statistics for Engineers
- SP CM 212 Fundamentals of Public Speaking

Total Credits: 38

A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology:

- MTEOR 206 Introduction to Weather and Climate
- MTEOR 301 General Meteorology

Several co-op programs are available for upper division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a bachelor of science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, additional coursework is recommended in a mathematical or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

See Four-Year Graduation Plan: B.S. in Meteorology - Path 1: For students prepared to start in calculus

See Four-Year Graduation Plan: B.S. in Meteorology - Path 2: For students needing preparatory mathematics prior to calculus

Minor - Meteorology

The department offers a minor in Meteorology which may be earned by completing 15 credits including MTEOR 111 Synoptic Applications (only 1 credit
may count toward the minor), MTEOR 206 Introduction to Weather and Climate and MTEOR 301 General Meteorology. Further information concerning programs of study, including sample degree programs, is available from the department.

Music

http://www.music.iastate.edu

Administered by the Department of Music and Theatre

Undergraduate Study

The Department of Music and Theatre offers a strong undergraduate music program, where students study with full-time faculty professionals in a supportive environment that encourages students to become their best.

The music curriculum provides:

1. A comprehensive program of professional studies for students who wish to prepare for careers in music, including teaching, performance, and composition, and for students who plan to pursue graduate studies in music.

2. Courses in music literature, theory and areas of performance for all students, regardless of major.

The department embodies the land-grant philosophy of service to the people of the state with a faculty of active scholars, teachers, and artists committed to excellence in teaching, creative/scholarly work, and arts outreach. The department is an accredited institutional member of the National Association of Schools of Music (NASM).

The Theatre Program is administered by the Department of Music and Theatre (see Index, Theatre and Performing Arts.)

Curricula Available to Music Majors

Students interested in pursuing an emphasis in music theater should see Index, Theater and Performing Arts.

Bachelor of Music

This curriculum leads to the degree bachelor of music. This degree is more specialized and contains fewer general education requirements than the bachelor of arts degree with a major in music. Students in this curriculum choose between options in education, performance, and composition. To obtain a bachelor of music degree, a student must earn a minimum of 125-146.5 credits (depending on the option chosen) including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 300 or above and must meet all of the requirements specified below.

Courses taken on a pass/not pass basis may be counted toward the required total credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.

Degree Requirements

GENERAL EDUCATION REQUIREMENTS (Students choosing the music education option should consult their advisers.) 32 cr.

Social Science: 6

Humanities: 6

MUSIC 383 History of Music I 3

MUSIC 384 History of Music II 3

PHYS 198 Physics of Music 3

Mathematics, Physical and Biological Sciences 6

Electives (not Music) 5

OTHER REQUIREMENTS 15 Cr.

### Bachelor of Arts—Music Major

A more general degree than the bachelor of music, the bachelor of arts degree requires no formal specialization. It includes more general education requirements and provides a broader course of academic study.

For the undergraduate curriculum in Liberal Arts and Sciences, major in music, leading to the degree bachelor of arts, see Liberal Arts and Sciences, Curriculum.
Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 111</td>
<td>Wind Ensemble</td>
<td>1</td>
</tr>

</tr>
</tbody>
</table>

**Large Ensembles:**

- **MUSIC 111** Wind Ensemble
- **MUSIC 115** Symphonic Band
- **MUSIC 141** Lyrica Women’s Choir
- **MUSIC 151** Oratorio Chorus
- **MUSIC 161** Iowa State Singers
- **MUSIC 181** Symphony Orchestra

**Chamber music ensembles:**

- **MUSIC 113** Jazz Ensemble
- **MUSIC 161** Iowa State Singers
- **MUSIC 301** Opera Studio
- **MUSIC 321** Advanced Ensemble

**Continuation Examination**

To be approved for continuation as a music major on the junior level, and enroll in Music 319, a student must pass a continuation examination taken normally at the end of the fourth semester as a music major. Before taking this examination, the student must complete the requisite forms as well as write an essay including:

1. his/her personal goals
2. a self-assessment of his/her progress thus far
3. an assessment of what he/she expects to accomplish before graduation

The student taking the Continuation Examination Committee. Requirements include the performance of three works representing different periods or styles selected by, and studied with, the applied teacher, a self-prepared piece, and sight reading. The student must display acceptable solo ability and performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candidate assessment of the student’s potential to achieve the stated goals. In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination. See Piano Proficiency below. For details and forms go to: http://www.music.iastate.edu

**Piano Proficiency Requirement**

All music majors must demonstrate proficiency in functional skills at the piano. Keyboard music majors (students whose primary instrument is piano or organ) accomplish this through courses in their curricula. All other students accomplish this by satisfactorily completing Music 228. All entering non-keyboard music majors with previous piano experience meet with the class piano instructor, usually the week before classes start in the fall semester, to determine the appropriate piano class (127, 128, 227, 228) for their initial piano enrollment. Some students are deemed to have met the piano proficiency at this time. Non-keyboard music majors with no previous piano experience should enroll in Music 127, Class Piano I. Continuous enrollment in piano classes is required until successful completion of the piano proficiency requirement. Important: The piano proficiency must be met, either through completion of Music 228 or by demonstrating proficiency, to pass the continuation examination. Failure to do so could delay a student’s graduation. All students must fulfill the piano proficiency requirement in order to pass the continuation examination and enroll in Music 319.

**Graduation Proficiency**

To be recommended for graduation, a music student should demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the bachelor of music degree will present a graduation recital.

**Communication Proficiency Requirement: The Department requires a grade of C– or better in each of ENGL 150 and ENGL 250 (or ENGL 250H). In addition the Communication Proficiency must be certified through one of the following options:**

1. Certification of writing skills, by the instructor, after completion of one of the following:
   - **MUSIC 110** Introduction to Music Literature and Styles
   - **MUSIC 383** History of Music I
   - **MUSIC 384** History of Music II
   - **MUSIC 472** History of American Music

Bachelor of arts students whose chief professional interest lies in research are encouraged to minor in world languages and cultures, history, literature, or philosophy.

**General Requirements**

**Entrance Audition.**

In order to be accepted as a music major, a prospective student must pass an entrance audition for the applied faculty in his/her performance area (piano, organ, woodwinds, strings, percussion, brass, or voice). Passing the audition is dependent on the demonstration of performance skills appropriate for college level instruction and the potential to perform at a professional level. In addition, the number of students accepted must balance with the space available in the corresponding applied studios. Once accepted, a student must complete a placement examination in keyboard skills. This examination is normally given by members of the departmental faculty the week preceding the opening of classes for fall semester.

**Seminars and Recitals.**

All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas, departmental recitals, and 12 recitals of their choosing each semester.

**Ensemble Requirement.**

See the options above for additional ensemble requirements.

**All Bachelor of Music students:**

Enrollment in an ensemble course, chosen from the lists below, each semester of full-time enrollment (except during student teaching) is required.

**Students in a music education options:**

At least six semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required. One semester of 114A may count as a large ensemble.

**Bachelor of Music students in options other than education:**

At least 2 semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required.
Candidates for the minor in music technology will complete 15 credits including:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 473</td>
<td>Music of the Baroque and Classical Eras</td>
<td>3</td>
</tr>
<tr>
<td>MUSIC 475</td>
<td>Music of the Romantic Era</td>
<td>3</td>
</tr>
</tbody>
</table>

(Passing one of these courses does not automatically satisfy the requirements for Communication Proficiency.)

2. Satisfactory completion of an advanced writing course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 302</td>
<td>Business Communication</td>

<td>Technical Communication</td>
<td>3</td>
</tr>
</tbody>
</table>

**Learning Outcomes and Assessment**

Music graduates will understand and demonstrate:

1. Knowledge of music cultural heritage and history
2. Appreciation for musical creativity, reasoning, and the aesthetic value of music
3. Knowledge of organization and structures of music
4. Analytical skills necessary for listening, performing, and teaching
5. Skills necessary to perform music from a variety of periods, styles, and genres
6. Necessary abilities to communicate ideas musically, verbally, and in writing
7. Awareness of the diversity of musical ideas throughout the world’s cultures
8. For Music Education students: success in meeting the ISU Teaching Standards as outlined by the University Teacher Education Program

Assessment measures include the continuation examination, graduating senior surveys and exit interviews, public performances, senior projects, course grades, teacher certification (for music education students), and the National Association of Schools of Music accreditation review.

**Minor in Music**

Candidates for the minor in music will complete 19 credits in music including:

<table>
<thead>
<tr>

</tbody>
</table>

At least 6 of the 19 credits must be in courses numbered 300 and above taken at ISU with a grade of C or better. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Students pursuing a music minor must meet the audition requirements and/or prerequisites for all courses they wish to take.

**Minor in Music Technology**

Candidates for the minor in music technology will complete 15 credits including:

† Arranged with instructor.

Bachelor of Music students may not count PHYS 198 in the Music Technology minor.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. The minor must include at least nine credits not used to meet any other department, college, or university requirement. Students pursuing a minor in music technology must meet the audition requirements and/or prerequisites for all music courses they wish to take.

**Theatre and Performing Arts**

www.theatre.iastate.edu

(Administered by the Department of Music)

Performing Arts graduates will understand and demonstrate:

1. Knowledge of the cultural heritage and history of the Performing Arts
2. A theoretical and experiential background in the areas of performance, theatrical design, music, and dance
3. Knowledge of creative problem solving and artistic collaboration
4. Skills necessary to perform in or design for a variety of periods, styles, and genres in theatre and dance
5. Awareness of the diversity of expression in the Performing Arts throughout the world’s cultures
6. A practical understanding of the rigors of the field.

Assessment measures include the semester exhibit of design work or audition pieces, graduating senior seminar and exit interviews, public performances or designs, course grades, exhibited convention work, and internship evaluations.
Undergraduate Study

Students interested in theatre as a major area of concentration declare a major in Performing Arts and select an emphasis in Theatrical Design or Acting/Directing. Students implement the theories and principles explored in the classroom by participating in production work. During the academic year, Iowa State University Theatre presents up to ten mainstage and second stage productions in Fisher Theater, and works in close collaboration with ISU Music and Dance.

The major in Performing Arts offers the undergraduate student a cross-disciplinary concentration in Music, Dance and Theatre. The core curriculum consists of 24 credits in the three areas. Students elect a 24-credit emphasis in either Dance, Theatrical Design or Acting/Directing. In addition to coursework, Performing Arts majors and minors participate in concert (Orchesis, Footfalls), workshop (Opera Studio, Minority Theatre Workshop) and production (Barchje, Stars Over Veishea, ISU Theatre/Music Theatre/Second Stage and Studio) experiences.

Performing Arts graduates, in addition to a solid theoretical and experiential background in the areas of performance, theatrical design, dance and music, are prepared to meet the challenges of the work force or graduate school with their strengths in collaboration, creative problem solving, meeting deadlines and processing diverse input to yield cohesive output. Two required professional internships prior to graduation are vital to the student’s appreciation and practical understanding of the rigors of the field.

The theatre area offers a wide variety of courses. Students may select from courses in acting, design (costume, scenic, lighting/sound), make-up, stage direction, playwriting, stage management, and theatre history. Independent study and special topics courses supplement formal course offerings to provide opportunities to intensively study in a particular aspect of theatre.

Auditions for ISU Theatre productions are open to all students irrespective of academic major. Similarly, participation in areas of production other than acting is open to both majors and nonmajors. Qualified students also present experimental, laboratory, and Minority Theatre Workshop productions. Student actors, directors, designers, and technical crew heads are required to maintain a grade point average of at least 2.0 to participate in productions.

Theatre scholarships are awarded on a yearly basis to students who make significant contributions to Iowa State University Theatre.

Graduate Study

The department offers graduate courses as supporting work in other fields.

Bachelor of Arts - Performing Arts Major (Perf)

Philosophy

Philosophy - Undergraduate Study

Philosophy tries to make sense of human experience and reality through critical reflection and argument. The questions it treats engage and provoke all of us, and they occupy an important place in our intellectual tradition: Are there objective standards for deciding what is right and wrong, or is morality merely a subjective matter? Is capitalism morally acceptable? Do I have a will, and is it free? How do my words and thoughts come to be about the world? Does God exist? Can machines think? How are mind and body related? Students in philosophy classes will be exposed to arguments on both sides of such questions, and they will be encouraged to develop and rationally defend their own positions.

Philosophy is not an isolated discipline. It enjoys mutually beneficial exchanges with many fields of study within the humanities and sciences. Philosophers develop tools that allow them to examine critically the assumptions and implications of the social and natural sciences, religion, and law.

The study of philosophy provides several benefits. It emphasizes rigorous understanding of problems, together with careful analysis of the strengths and weaknesses of the available solutions. It encourages clarity in the presentation of one's own ideas, as well as sensitivity in the consideration of the ideas of others. The study of philosophy therefore encourages one to develop skills and habits that are useful not only in philosophy, but in other areas as well. Philosophy students historically do well, for example, in law and medical schools.

However, one should not think that philosophy is only valuable in academic settings. Philosophical questions arise in many areas of family, business, and civic life. Philosophers strive to face these questions with the kind of intellectual honesty that leads to respect for the views of others, and continual reassessment of their own. In this way, the study of philosophy fosters values and attitudes that are helpful for responding to a lifetime of intellectual challenges.

The degree program in philosophy requires a minimum of 33 credits, plus the zero credit PHIL 492 course. The following courses compose the core program of the major from which 15 credits shall be chosen. Additionally, two courses at the 400 level or above (other than PHIL 490 and PHIL 492) are required.

Ethical theory: One course required.

- PHIL 330 Ethical Theory
- PHIL 335 Social and Political Philosophy
- PHIL 535 Contemporary Political Philosophy

History: Two courses required.

- PHIL 310 Ancient Philosophy
- PHIL 314 17th Century Philosophy
- or PHIL 315 18th Century Philosophy

Metaphysics and Epistemology: One course required.

- PHIL 364 Metaphysics: God, Minds, and Matter
- PHIL 366 Truth, Belief and Reason
- PHIL 380 Philosophy of Science

Logic:

PHIL 207 Introduction to Symbolic Logic is required.

Minor in Philosophy

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy. At least 9 credits must be in courses numbered 300 or above. Students may want to emphasize specific areas by taking 15 hours of courses chosen from the following:

Philosophy of Science:

- PHIL 201 Introduction to Philosophy
- PHIL 206 Introduction to Logic and Scientific Reasoning
- or PHIL 207 Introduction to Symbolic Logic
- PHIL 314 17th Century Philosophy
- PHIL 315 18th Century Philosophy
- PHIL 380 Philosophy of Science
- PHIL 381 Philosophy of the Social and Behavioral Sciences
- PHIL 480 Controversies in Science

PHIL 483 Philosophy of Biology
PHIL 485 Philosophy of Physics

History of Philosophy:

- PHIL 201 Introduction to Philosophy
- PHIL 310 Ancient Philosophy
- PHIL 314 17th Century Philosophy
- PHIL 315 18th Century Philosophy
- PHIL 316 19th Century Continental Philosophy
- PHIL 317 20th and 21st Century Continental Philosophy
- PHIL 318 20th and 21st Century Anglo-American Philosophy
- PHIL 460 Epistemology and Metaphysics

Law, Social Values and Policy:

- PHIL 230 Moral Theory and Practice
- PHIL 235 Ethical Issues in a Diverse Society
- PHIL 331 Moral Problems in Medicine
- PHIL 332 Philosophy of Law
- PHIL 333 Family Ethics
- PHIL 335 Social and Political Philosophy
- PHIL 336 Bioethics and Biotechnology
- PHIL 338 Feminist Philosophy
- PHIL 343 Philosophy of Technology
- PHIL 430 Value Theory
- PHIL 535 Contemporary Political Philosophy

Communication Proficiency requirement: The department requires a grade of C or better in each of ENGL 150 and ENGL 250 (or ENGL 250H), and approval of writing by instructor of any philosophy course 300 level or above, to be designated by the student.

Philosophy - Graduate Study

The department offers work for a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 300 (but not PHIL 490 each taken in conjunction with PHIL 590). For those taking the Ph.D., the requirement is four courses above 300, at least one of which is above 400 (but not PHIL 490) each taken in conjunction with PHIL 590. Interested students should ask the chair to assign a minor adviser.

The department participates in the interdepartmental program in general graduate studies.

Physics and Astronomy

Undergraduate Study

Physics and astronomy are basic natural sciences which attempt to describe and provide an understanding of both our world and our universe. Physics serves as the underpinning of many different disciplines including the other natural sciences and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration. Many opportunities exist for students who terminate their studies with a bachelor’s degree, especially when combined with technology studies in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

The department normally expects each student majoring in physics to complete at least the following courses:

- PHYS 241 Principles and Symmetries in Classical Physics I 5
- PHYS 242 Principles and Symmetries in Classical Physics II 5
- PHYS 321 Introduction to Modern Physics I 3
- PHYS 321L Introductory Laboratory in Modern Physics I 1
- PHYS 322 Introduction to Modern Physics II 3
- PHYS 322L Introductory Laboratory in Modern Physics II 1
- PHYS 304 Thermal Physics 3
PHYS 306 Physics of Wave Motion 3
PHYS 361 Classical Mechanics 3
PHYS 362 Intermediate Mechanics 3
PHYS 364 Electricity and Magnetism I 3
PHYS 365 Electricity and Magnetism II 3
PHYS 480 Quantum Mechanics I 3
MATH 207 Matrices and Linear Algebra (or) 3
or
MATH 317 Theory of Linear Algebra 4
and 3 credits of laboratory work chosen from 3
PHYS 310 Electronic Instrumentation for Experimental Physics
PHYS 311 Intermediate Laboratory
PHYS 311T Intermediate Laboratory for Secondary Physicists Teachers
PHYS 470L Applied Physics Laboratory
or
ASTRO 344L Astronomy Laboratory
*PHYS 221 and PHYS 222 may be substituted for PHYS 241 and PHYS 242.

All students are required to earn at least 5 credits in laboratory work in physics in addition to the laboratory components of PHYS 241 and PHYS 242. These 5 credits must be in courses numbered 304 or higher or in approved substitutions. All students must earn at least 32 credits in physics and astronomy courses numbered 304 or higher. The basic list of expected courses is not a rigid requirement and changes in this basic list will be approved by the department curriculum committee on recommendation of the student's adviser when such changes will better serve the student's needs. In particular, students planning a physics major and also seeking certification for high school teaching may, with the approval of their adviser, follow a significantly different program designed to meet their particular needs; these students should consult the department for further information. Further information concerning programs of study, including sample degree programs, is available from the department.

Students majoring in physics who wish an emphasis in astronomy/astrophysics should consider a minor in astronomy. Those planning graduate work in physics or astronomy/astrophysics should add to the basic list the course PHYS 481. Other useful courses include:

MATH 365 Complex Variables with Applications 3
PHYS 496 Modern Optics 3
STAT 447 Statistical Theory for Research Workers 4
One or more of the following may also be added according to interest
ASTRO 405 Astrophysical Cosmology 3
PHYS 421 Ultrafast Laser Science and Spectroscopy 3
PHYS 432 Molecular and Cell Biophysics 3
PHYS 461 Physics of Biomolecules 3
PHYS 511 Condensed Matter Physics I 3
PHYS 526 Particle and Nuclear Physics 4
PHYS 528 Mathematical Methods for the Physical Sciences 3
PHYS 541 General Relativity 3

The expected outcomes for students in these programs are:
1. a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, wave motion and modern physics
2. proficiency in laboratory methods
3. proficiency in modern scientific computational methods
4. a sound foundation in the liberal arts including proficiency in communication skills.

In addition to the performance on exams and course grades, information on evaluating of the success in meeting these goals is obtained by:
1. an annual written survey of all students majoring in the program
2. an annual written survey of all graduating seniors
3. a periodic written survey of program alumni
4. student evaluations of all courses
5. adviser evaluations
6. a bimonthly meeting of program majors with the department chair

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows:

PHYS 241 Principles and Symmetries in Classical Physics I 5
PHYS 242 Principles and Symmetries in Classical Physics II 5
PHYS 321 Introduction to Modern Physics I 3

One of the following
PHYS 321L Introductory Laboratory in Modern Physics I
PHYS 322L Introductory Laboratory in Modern Physics II
PHYS 310 Electronic Instrumentation for Experimental Physics
PHYS 311 Intermediate Laboratory
PHYS 311T Intermediate Laboratory for Secondary Physics Teachers

Other acceptable courses
PHYS 304 Thermal Physics
PHYS 306 Physics of Wave Motion
PHYS 322 Introduction to Modern Physics II
PHYS 361 Classical Mechanics
PHYS 362 Intermediate Mechanics
PHYS 364 Electricity and Magnetism I
PHYS 365 Electricity and Magnetism II
PHYS 421 Ultrafast Laser Science and Spectroscopy
PHYS 432 Molecular and Cell Biophysics
PHYS 461 Physics of Biomolecules
PHYS 480 Quantum Mechanics I
PHYS 481 Quantum Mechanics II
PHYS 496 Modern Optics
*PHYS 221 and PHYS 222 may be substituted for PHYS 241 and PHYS 242

The department offers a minor in astronomy which may be earned by completing 15 credits chosen as follows:

ASTRO courses *

3 credits from the following (if only 12 Astro credits) 3
PHYS 304 Thermal Physics
PHYS 321 Introduction to Modern Physics I
PHYS 361 Classical Mechanics
PHYS 362 Intermediate Mechanics
PHYS 364 Electricity and Magnetism I
PHYS 365 Electricity and Magnetism II
PHYS 480 Quantum Mechanics I
PHYS 481 Quantum Mechanics II
PHYS 496 Modern Optics
AER E 351 Astrodynamics I

* must include ASTRO 344L Astronomy Laboratory and may include one of the courses ASTRO 120 The Sky and the Solar System, ASTRO 150 Stars, Galaxies, and Cosmology or ASTRO 250 Astronomy Bizarre

12 or more credits must be at the 300 level or higher. Note that only ASTRO 344L may be used to satisfy both the requirements of a physics major and an astronomy minor.

Communication Proficiency requirement: The department requires a grade of C or better in each of ENGL 150 and ENGL 250 (or ENGL 250H), and a C– or better in ENGL 302, ENGL 305, ENGL 309 or ENGL 314. Students are also encouraged to study at least one foreign language.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with majors at both levels in applied physics, astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department, the Ames Laboratory, and the Applied Science Center, including the Microelectronics Research Center, are available for research.

Students with bachelor's degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate school. In some cases additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their area of specialization. They are able to
communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and soliciting research support. They have considerable teaching experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete:

PHYS 531 Statistical Mechanics 3
PHYS 564 Advanced Classical Mechanics 3
PHYS 571 Electricity and Magnetism I 3
PHYS 572 Electricity and Magnetism II 3
PHYS 591 Quantum Physics I 4
PHYS 592 Quantum Physics II 4

Candidates for an advanced degree in applied physics are expected to complete:

PHYS 571 Electricity and Magnetism I 3
PHYS 591 Quantum Physics I 4
PHYS 470L Applied Physics Laboratory 2-5
PHYS 699 Research arr

PHYS 572 Electricity and Magnetism II 3
PHYS 531 Statistical Mechanics

† Arranged with instructor.

Candidates for an advanced degree in astrophysics should complete:

PHYS 531 Statistical Mechanics 3
PHYS 564 Advanced Classical Mechanics 3
PHYS 571 Electricity and Magnetism I 3
PHYS 591 Quantum Physics I 4
ASTRO 505 Astrophysical Cosmology 3
ASTRO 510 Observational Astrophysics 3

Astrophysics Ph.D. candidates must take at least three of the 580 level Astro courses, while candidates for the Research Masters must take at least two 580 level Astro courses.

Except for the applied physics major where a thesis is always required, the degree master of science is offered both with and without thesis. For all areas of study except applied physics the basic requirements for the M.S. are the same: at least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students must complete not less than 6 credits from outside their major area, with 3 credits being required from outside the department, and 3 credits from a 500 or 600 level course in another area of specialization. Students choosing a M.S. degree with thesis may apply up to 8 credits of 599 but no credits of 599 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 599, but may not apply any credits of 699 toward the minimum 30 credits.

Students whose major area is applied physics must complete at least 30 credits of acceptable graduate work for the M.S. degree and not less than 19 credits of these must be in the required courses listed above; the remaining 11 credits of the 30 credit minimum may be chosen freely either from within the student’s major area or from without and either from the department or outside, but it should be noted that not more than 3 credits of PHYS 699 Research may be applied toward the 30 credit minimum.

In addition to course work in the major area of study, all candidates for the Ph.D. degree must complete 12 credits from outside this area. Of these 6 must be taken from other departments and 6 must be taken from the department with the additional constraint that this latter must include at least one 500 or 600 level introductory course in another area of specialization. Each candidate for the Ph.D. degree is required to teach one year of elementary physics or astronomy. Graduate students interested in a physics minor should contact the department for requirements.

Political Science

Undergraduate Study

The study of political science is designed to enable students to understand the nature of politics, public values, and the institutions and processes of politics in their various forms.

Students completing a major in political science will understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory and methods, international relations, and comparative politics. Graduates can analyze and formulate effective argumentation in written and oral forms, including the ability to appreciate and accommodate diverse political ideas, and the ability to collect and critique information and ideas of others in support of original arguments. Graduates appreciate the knowledge and civic responsibilities required for effective participation in political life.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses. See also Preprofessional Study.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Requirements for the Major:

For the purpose of defining undergraduate requirements in the Department of Political Science, the Department employs four subfields within the discipline, with the following courses in each:

I. Theory and Methods

<table>
<thead>
<tr>

</table>
Minors in the College of Liberal Arts and Science require a minimum of 6 credits in courses numbered 300 and above. A student minoring in Political Science normally will be expected to take at least 9 credits in Political Science, nine of which must be at the 300 level or above. A student minoring in Political Science can expect to acquire skills and background knowledge relevant to a career in public policy or public sector management of information assurance. The department also offers work for a Graduate Certificate of Public Management and Policy (GCPMP) for those interested in an educational certificate program that requires less work than a full masters program. In addition, the Department of Political Science offers work for a Master of Science in Information Assurance (MSIA) and a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University.

Graduate Study

The department offers work for a Master of Arts degree (MA) with a major in political science and minor for students in other departments. The department also offers work for a Graduate Certificate of Public Management and Policy (GCPMP) for those interested in an educational certificate program that requires less work than a full masters program. In addition, the Department of Political Science offers work for a Master of Science in Information Assurance (MSIA) and a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University. Information with detailed requirements for all graduate degrees may be obtained at the department's web page at http://www.pols.iastate.edu/graduate-students/.

Master of Arts (MA)

This is a 30-credit masters degree that gives students the opportunity to explore the field of political science in order to pursue a Ph.D., go to law school, improve research skills, or understand politics better. We currently offer concentrations in American Politics, Comparative Politics, and International Relations. Beginning August 2015 we anticipate (pending university approval) a new curriculum in which the three concentration areas are American Politics, Global Politics, and Public Policy. Although it is not a formal concentration, some students have worked heavily in the area of political theory. Top students are eligible for graduate assistantships that make graduate study much more affordable and provide opportunities for assisting faculty with teaching and research. These are awarded on a merit basis. A thesis is required for this degree. The department also has a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University. Students wishing to pursue this joint degree must submit separate applications to Drake University and Iowa State University and be accepted by both institutions.

MA graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political questions, taking into account related ethical, legal, economic, and social issues.

The prerequisites for major graduate work in the MA program normally are completion of at least 15 credits in political science, the GRE (Graduate Record Examination), one year of a foreign language (equivalent to 8 semester hours) and a course in basic statistics (equivalent to STAT 101). If the basic statistics requirement has not been met, the student may remedy the deficiency by passing equivalent courses, for which no graduate credit will be received. During their program of study, all students are expected to complete STAT 401, POL S 502, and a thesis. Additional information including detailed graduation requirements can be found at http://www.pols.iastate.edu/graduate-students/ma-in-political-science/.

Master of Science in Information Assurance (MSIA)

The Master of Science in Information Assurance (MSIA) is a multi-disciplinary program designed to provide students with diverse backgrounds and interests the opportunity to obtain professional training in the emerging field of information assurance. The core of the MSIA program is built around a series of courses taught in Electrical and Computer Engineering, Mathematics, and Computer Science that introduce students to software and hardware aspects of cryptography and computer security. The program also recognizes, however, that information assurance is defined in terms of security, privacy, access, and reliability is not simply a technical problem but also involves important societal dimensions, including policy, education, ethics, and management. Recognizing that political science offers many potential intersections with information assurance (e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare, etc.), students with interests in these areas are encouraged to select the Department of Political Science as their home department.

Students opting to pursue a MSIA degree through the Department of Political Science can expect to acquire skills and background knowledge relevant to a career in public policy or public sector management of information assurance technologies. The MSIA degree can also help prepare students who wish to go on to pursue a PhD in information politics and policy.

Students interested in the MSIA degree program should consider Political Science as a home department if their future career and/or educational interests lie in such areas as: institutional issues related to the Internet and information technologies;
electronic government and electronic democracy: information technology, international security, and information warfare; information technology policy and law; and public administration and public sector management of information technology.

Admission requirements generally follow the same guidelines as the MA in Political Science. Degree requirements are specified by the MSIA program in cooperation with Political Science. More in-depth information on the program including detailed graduation requirements can be found at: http://www.polisci.iastate.edu/graduate-students/master-of-science-in-information-assurance/.

**Master of Arts/Juris Doctorate Program (MA/JD)**

The Drake Law School and the Department of Political Science at Iowa State University are co-sponsors of the Master of Arts/Juris Doctorate degree. This degree combines courses at both Iowa State University and the Drake Law School and follows most of the same requirements as a double degree. However, the student must have full admission to both schools. Detailed information for the MA/ JD can be found at the ISU Political Science webpage as well as the Drake Law School website (under Joint Degree): http://www.law.drake.edu/.

The increasing attention being focused on the solution of social problems by State and Federal governments has created a need for persons with advanced training in both law and political science. The Drake Law School and the ISU Department of Political Science jointly administer a MA/JD program to provide an opportunity for students at the Drake Law School to achieve, concurrently, a JD degree in law and a MA degree in political science, and for graduate students in political science at Iowa State University to achieve a degree in law.

Successful completion of this program will enable students at Drake Law School to receive both a JD and an MA degree within a three-year period, while graduate students in political science at Iowa State University will be able to transfer a substantial number of hours to the Drake Law School toward the fulfillment of the JD requirements in a similar amount of time. Additional information including detailed graduation requirements can be found at: http://www.polisci.iastate.edu/graduate-students/master-of-arts-juris-doctorate-program-m-a-j-d/.

**Minor**

Students in other graduate programs may obtain a minor in political science by completing at least 9 credits of political science courses. Interested students should consult the Graduate College Handbook for additional information on graduate minors.

**The Graduate Certificate of Public Management (GCPM)**

The Political Science Department offers a Graduate Certificate of Public Management (GCPM). The GCPM is a 15-credit certificate. Students who are interested in public management and policy, but unsure about committing to a full master’s degree, can aim for the certificate knowing that those courses will also count toward a master’s degree if they choose to continue on. Iowa State graduate students in other fields may want to pursue the certificate to improve their credentials on the job market if their interest overlaps with public management and policy. For example, doctoral students in higher education and education administration can earn all 9 of their “outside” credits in the GCPM coursework, add the 6 more elective credits, and earn a GCPM along with their PhD.

Requirements for admission are a graduate school application, an essay stating purposes for study, college transcripts, the GRE (waived for those with five or more years of public or nonprofit sector experience), three letters of recommendation, and the TOEFL for international students. More information on the program including curricular requirements can be found at: http://www.polisci.iastate.edu/graduate-students/the-graduate-certificate-of-public-management-and-policy/.

**Psychology**

**Undergraduate Study**

For college-level requirements in undergraduate curricula leading to the degrees of bachelor of arts and bachelor of science, see Liberal Arts and Sciences, Curriculum.

An undergraduate major in psychology may be taken as liberal arts education, as preparation for graduate study in psychology, or as background for professional education in law and in the health professions. A student with a bachelor’s degree in psychology may qualify for a variety of positions including those in social sciences, mental health, corrections, rehabilitation, developmental disability centers, business, management, and public opinion surveying. Depending on professional goals, a minor in another discipline may be desirable. Students should consult with their academic advisers early in their undergraduate curriculum. The requirements of the program enable graduates to understand and apply the scientific principles, facts, and basic methods of psychology in their personal and professional activities. Graduates will demonstrate an understanding of the scientific method and will be able to apply that understanding to the study of human behavior and the study of mental processes. They will also demonstrate the ability to effectively communicate their knowledge of psychological concepts through both writing and speech. Graduates will demonstrate a respect for individual and cultural differences and for the ethical issues that relate to the practice of psychology in both research and clinical settings. Professional work with a job title of psychologist in academic, business, clinical, government, and school settings requires graduate degrees.

The major must include the following psychology courses each with a minimum grade of C- and an overall average of C or better:

- PSYCH 101 Introduction to Psychology * 3
- PSYCH 102 Laboratory in Introductory Psychology * 1
- PSYCH 111 Orientation to Psychology 0.5
- PSYCH 301 Research Design and Methodology * 3
- PSYCH 440 Psychological Measurement I * 3

The major also must include at least one course from four of the following six areas:

**Area A**

- PSYCH 230 Developmental Psychology
- PSYCH 335 Abnormal Psychology of Children and Adolescents

**Area B**

- PSYCH 280 Social Psychology
- PSYCH 380 Social Cognition

**Area C**

- PSYCH 310 Brain and Behavior
- PSYCH 315 Drugs and Behavior

**Area D**

- PSYCH 312 Sensation and Perception
- PSYCH 313 Learning and Memory
- PSYCH 316 Cognitive Psychology
- PSYCH 318 Thinking and Decision Making

**Area E**

- PSYCH 360 Personality Psychology
- PSYCH 460 Abnormal Psychology

**Area F**

- PSYCH 250 Psychology of the Workplace
- PSYCH 350 Human Factors in Technology

Three additional 3-credit courses in psychology 9

Three additional 3-credit courses in psychology must be taken. Area courses may be used to meet this requirement, but variable credit courses (PSYCH 291, PSYCH 470, PSYCH 490, PSYCH 491, and PSYCH 492) may not.

In accordance with college requirements, a C or better average is required in the courses used to satisfy the major.

Departmental requirements for the B.A. and B.S. include the following supporting courses:

- 6 credits in Philosophy including PHIL 201 Introduction to Philosophy (not 207) 6
- 2 of the following:
  - BIOL 101 Introductory Biology (or higher)
  - BIOL 155 Human Biology (or 255 or 256)
  - BIOL 258 Human Reproduction (or Biol 313 Princ of Genetics)
  - CHEM 150 Chemistry in Modern Society (or higher)
  - PHYS 101 Physics for the Nonscientist (or higher)
  - STAT 101 Principles of Statistics (or higher) * 4
  - MATH 104 Introduction to Probability (or 150 or higher) ** 3
Students electing a B.S. degree also must complete PSYCH 302 Research Methods in Psychology with a minimum grade of C- and a minimum of 10 additional supporting credits in supporting courses from the list of courses in the LAS Gen Ed Natural Sciences and Mathematical Disciplines Area (or approved departmental list) as follows: three credits in mathematics, six credits in natural sciences, and one additional credit in a laboratory course.

Students electing a B.A. degree also must complete an ISU approved minor.

The department offers a minor in psychology. The minor requires completing 18 credits in psychology, including PSYCH 101 Introduction to Psychology and PSYCH 301 Research Design and Methodology, each with a minimum grade of C-. At least 9 of the 18 credits must be in 300 level courses (or above), but no more than three credits total may be from PSYCH 291 Introductory Research Experience, PSYCH 490 Independent Study, PSYCH 491 Research Practicum, and PSYCH 492 Fieldwork Practicum. In addition to an overall C average or better in courses used to satisfy the minor, a C- or better is required in each course. Contact the psychology advising office for more information.

**Communication Proficiency requirement**

The department requires a grade of:

C or better in:

- **ENGL 150** Critical Thinking and Communication 3
- **ENGL 250** Written, Oral, Visual, and Electronic Composition 3
- or **ENGL 250H** Written, Oral, Visual, and Electronic Composition: Honors 3

C- or better in one of the following:

- **PSYCH 302** Research Methods in Psychology 3
- **ENGL 302** Business Communication 3
- **ENGL 309** Report and Proposal Writing 3
- **ENGL 314** Technical Communication 3

**Four Year Plan**

Choose from approved departmental list

**Graduate Study**

The department offers work for the degree of doctor of philosophy in psychology. A master of science may be earned as part of that degree.

The department offers a doctoral specialization in counseling psychology (APA accredited) and doctoral areas of concentration in cognitive psychology and social psychology.

A basic goal of graduate study in the Department of Psychology is to provide all students with a broad base of knowledge in psychological science, as well as exposure to the content and methodological skills necessary for effective performance in teaching, research and professional practice. Accordingly, graduates have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research, communicating the results to the scientific community, students in the classroom, and the general public. Graduates in applied programs have specialized knowledge in counseling and program development. They are skilled in delivering such programs and services to diverse clientele in a variety of settings. The department also participates in the interdepartmental programs in human computer interaction and neuroscience (http://www.hci.iastate.edu/Academics/index.php), and in the interdepartmental minor in gerontology (http://www.gerontology.iastate.edu/?expand=graduate_program).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.

**Public Relations**

The Public Relations Major

The public relations major provides students with the concepts, skills, and expertise needed to help organizations build mutually beneficial relationships with diverse publics. The knowledge and tools students develop through the PR curriculum ensure they can enter any field from corporate communication to government affairs to a public relations firm. The professional internship experience coupled with coursework that focuses heavily on writing, research, and strategic planning provides opportunities for students to practice and refine their skills.

To receive a bachelor of science degree in public relations, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, P R, or JL MC. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level or above. Public relations majors are required to take:

- **STAT 101** Principles of Statistics 4

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, P R, and JL MC. These include:

- **JL MC 101** Mass Media and Society 3
- **JL MC 110** Orientation to Journalism and Communication 1
- **P R 220** Principles of Public Relations 3
- **JL MC 201** Reporting and Writing for the Mass Media 3
- **P R 301** Research and Strategic Planning for Advertising and Public Relations 3
- **P R 321** Public Relations Writing 3
- **P R 424** Public Relations Campaigns 3
- **JL MC 460** Law of Mass Communication 3
- **P R 499** Professional Media Internship 3

Additional recommended courses and requirements for the public relations major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or a minor in the school. All students are required to take a second major or minor outside the school as an area of expertise. A Designated Area of Concentration (DAC) outside the school may be used in place of a minor or second major with faculty approval.

The Greenlee School offers a minor in advertising and a minor in journalism and mass communication. Journalism and mass communication or public relations majors may not minor in advertising, and advertising and public relations majors may not minor in journalism and mass communication.

**Religious Studies**

**Religious Studies - Undergraduate Study**

Religious studies gives students the opportunity to investigate and reflect on the world’s religions in an objective, critical, and appreciative manner. Though there is emphasis in religious studies on the wide variety of religious phenomena as well as on the various methods in the study of religion, the aim is to help students develop their own integrated understanding of the nature of religion and its role in individual and social life.

Graduates of the religious studies program have knowledge of the religious diversity in the United States and the world. They have the ability to interpret religion empathetically and critically and to compare and contrast historical and contemporary differences and similarities of religious systems. They understand ways in which religion influences and is influenced by the historical, social, and cultural contexts in which religious systems function. Graduates often pursue careers in non-profit, community organizations; apply to professional schools or graduate programs; or enter seminaries to prepare for ministry.

The program provides students with the following opportunities: to major or minor in religious studies, to fulfill group requirements, to take religious studies courses that are integrated into another major, to take religious studies courses as electives, and to develop an interdisciplinary studies major. (See the professor in charge of the religious studies program for advice.)

The major in religious studies seeks to provide both breadth and depth. Breadth is provided through the exploration of the world’s various religious traditions and through exposure to a variety of theoretical approaches and methodologies in the academic study of religion. Depth is achieved through specialized courses in particular religious traditions and particular issues in the study of religions, culminating in research seminars. The objective is to expose the student to various components of the discipline of Religious Studies and by doing so develop skills that are valuable in a number of careers and that provide the necessary foundation for pursuing graduate studies.

Students who select Religious Studies as a major usually do so with an interest in complementing another major. An inherently interdisciplinary field, Religious Studies is an ideal complement for another liberal arts major but can also complement other fields, such as natural sciences, business, and education.
Students pursuing a major in religious studies must complete a minimum of 33 credits, including the following requirements:

<table>
<thead>
<tr>

<td>33</td>
</tr>
</tbody>
</table>

The program offers a minor that may be earned by completing a total of 15 credits in religious studies including either RELIG 205 Introduction to World Religions or RELIG 210 Religion in America. Nine hours must be in courses at the 300 level or above (no more than 3 hours of seminar and no more than 3 hours of independent study).

Communication Proficiency requirement: The department requires a grade of C or better in each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition, and requires one 300 level course in religious studies in which writing is evaluated as acceptable.

Students may choose to do a senior thesis under the supervision of a religious studies faculty adviser. This option may earn 3-6 credits toward the completion of the major.

Religious Studies - Graduate Study
Religious studies may be one of the three areas used for the interdisciplinary graduate study's degree.

Sociology
Undergraduate Study in Sociology
The Department of Sociology offers course work leading to either a bachelor of arts, bachelor of science, or a minor in sociology. Additionally, a bachelor of science in Agriculture & Society (http://www.soc.iastate.edu/undergrad/agandsociety.html) is offered. The department offers course work for the Interdisciplinary Studies major and minor in Criminal Justice (http://www.soc.iastate.edu/undergrad/criminaljustice.html).

Graduates of all these programs will understand and demonstrate:

1. general knowledge of sociology
2. research methods in sociology
3. critical thinking skills
4. application of sociology to pressing social issues
5. sociological and professional values
6. information technology skills
7. communication skills
8. personal and career development

Graduates understand how social institutions, communities, and organizations work and change; they can examine the causes and consequences of conformity, deviance, and inequality. They can apply sociological understanding of human behavior to practical work situations and everyday life. Graduates can read critically, think independently, and communicate effectively about social issues and social policy.

Sociology Major (College of Liberal Arts and Sciences)
A major in sociology can serve as a liberal arts education; as preparation for various positions in social service and related occupations in business and industry; as background for professional education in such areas as law and theology or as a basis for graduate professional training as a sociologist in academic, government, business, and industrial settings.

University Requirements:
- International Perspective
- US Diversity

Communications:
- ENGL 150 Critical Thinking and Communication
- ENGL 250 Written, Oral, Visual, and Electronic Composition
- LIB 160 Information Literacy

World Languages and Culture:
- 3 years H.S.
- SPAN 097 Accelerated Spanish Review
- 2 semesters college

Departmental requirements for sociology majors include the following supporting courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 101</td>
<td>Principles of Statistics</td>
<td>3-4</td>
</tr>
<tr>
<td>or STAT 104</td>
<td>Introduction to Statistics</td>
<td></td>

</tr>
<tr>
<td>ENGL 309</td>
<td>Report and Proposal Writing</td>
<td></td>
</tr>
<tr>
<td>ENGL 314</td>
<td>Technical Communication</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>6-7</td>
</tr>
</tbody>
</table>

Majors must receive grades of C or better in ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition, and a grade of C or better in either ENGL 302 Business Communication or ENGL 309 Report and Proposal Writing or ENGL 314 Technical Communication. Programs leading to a bachelor of arts degree will emphasize additional coursework in groups I and III of the general education requirements. Programs leading to a bachelor of science degree will emphasize additional coursework in groups IIA of the general education requirements. Some of the possible fields of concentration are criminal justice, community (urban and rural) sociology, family sociology, sociology of work, research methods and statistics, social change and development, complex organizations, human population and ecology, social inequality, social psychology, and sociological theory.

A program of study that meets the needs and interests of the student and department requirements will be developed in consultation with the major adviser. Programs of study will include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</table>
In addition to the program of study above, students must select complementary courses that will lead to a bachelor of arts or bachelor of science degree.

**Bachelor of Arts supporting coursework**

9 additional arts and humanities and/or social science courses 9

**Total Credits** 9

**Bachelor of Science supporting coursework**

At least 9 additional credits in natural science, math, or statistics 9

**Total Credits** 9

**Sociology Minor**

The department offers a minor in sociology which may be earned by completing 15 credits in sociology including:

- SOC 134 Introduction to Sociology 3

Additional 12 credits in Sociology courses 12

9 credits must be 300+ 3

**Total Credits** 15

At least 9 of the 15 credits must be at the 300 level or higher of these credits must be taken at Iowa State with a minimal grade of C. 9 credits must stand alone solely in the minor.

**Graduate Study**

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master’s program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology.

Course requirements are listed below. Information about examinations, theses and dissertations, P.O.S. committees and other requirements are available on the Sociology Department web site.

**Ph.D. Core Degree Requirements**

Although responsibility for determining the student’s course work resides with the POS committee, the Sociology Department has core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the core requirements with approval by the Departmental Officer of Graduate Education (DOGE) in consultation with the faculty.

A minimum of 72 semester credits (including master’s degree credits) is required for graduation.

**Required Courses for the Ph.D. Degree**

**Co-Major Requirements for the Graduate Program in Sustainable Agriculture**

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program’s curriculum satisfies the formal requirements for the MS and Ph.D. degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

The Department does not offer double majors in sociology.

For admission to the co-major program contact the graduate program coordinator.

**M.S. Core Degree Requirements**

Although responsibility for determining the student’s course work resides with the POS committee, the Sociology Department has core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the core requirements with approval by the Departmental Officer of Graduate Education (DOGE) in consultation with the faculty.

One additional course in sociology, or STAT 401, for a minimum of 9 credits.

**Required Courses for the M.S. Co-Major**
Co-Major Requirements for the Graduate Program in Sustainable Agriculture
The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program’s curriculum satisfies the formal requirements for the MS and PhD degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

Software Engineering

Undergraduate Study
For the undergraduate curriculum in Software Engineering (http://www.se.iastate.edu) leading to the degree Bachelor of Science. This curriculum is accredited under the General Criteria and Software Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

This curriculum is jointly administered by the Department of Computer Science and the Department of Electrical and Computer Engineering at Iowa State University. The Software Engineering program provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of state-of-the-art software technologies and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers emphasis areas in software engineering principles, process and practice. Students may also take elective courses in computer engineering and computer science.

Program Educational Objectives
Within five years of graduation, the graduates should:
1. attain a productive career in Software Engineering or related fields;
2. attain leadership roles and become effective collaborators to advance professional and organizational goals;
3. engage in continuous learning and professional development.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) peer-recognized expertise, (b) engagement in professional practice, (c) sustained learning, (d) leadership and (e) teamwork.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the Department of Computer Science and the Department of Electrical and Computer Engineering provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering
Administered by the Department of Electrical and Computer Engineering in the College of Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

Spanish (Span)

World Languages and Cultures majors with a concentration in Spanish have two options:

**WLC Option I: Hispanic Studies**

Under WLC Option I, students with a concentration in Spanish must complete a minimum of 33 credits beyond the intermediate (SPAN 201 Intermediate Spanish I- SPAN 202 Intermediate Spanish II) level.

**A. Hispanic Studies Required Core Courses: (12 cr.)**

- **SPAN 301** Spanish Grammar and Composition 3
- **SPAN 303A** Spanish Grammar and Conversation: Conversation through Culture 3
- or **SPAN 303B** Spanish Grammar and Conversation: Conversation for Professionals 3
- **SPAN 314** Introduction to Reading Hispanic Texts 3
- **SPAN 352** Introduction to Spanish Phonology 3

**B. Electives: Students must take at least 15 credits chosen from a, b, and c below (minimum of 3 credits from each section).**

- **a) At least 3 credits of literary studies chosen from the following:**
  - **SPAN 330** Studies in Spanish Literature to 1700 3
  - **SPAN 331** Studies in Spanish Literature from 1700 to the Present 3
  - **SPAN 332** Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century 3
  - **SPAN 333** Studies in Latin American Literature from the Twentieth Century to the Present 3

- **b) At least 3 credits of cultural studies chosen from the following:**
  - **SPAN 304** Spanish for Business and Professions 3
  - **SPAN 321** Spanish Civilization 3
  - **SPAN 322** Latin American Civilization 3
  - **SPAN 323** Spain Today 3
  - **SPAN 324** Latin America Today 3
  - **SPAN 326** Studies in Hispanic Art or Film 3

- **c) At least 3 credits of applied language and linguistics chosen from the following:**
  - **SPAN 351** Introduction to Spanish-English Translation 3
  - **SPAN 354** Introduction to Spanish-English Interpretation 3
  - **SPAN 401** Advanced Composition and Grammar 3
  - **SPAN 462** Contrastive Analysis of Spanish/ English for Translators 3
  - **SPAN 463** Spanish Dialectology 3
  - **SPAN 499** Internship in Spanish 1-3

Students may apply up to 6 credits of SPAN 395 Study Abroad to section a, b, or c above (appropriate section based upon course content and assigned by the WLC adviser).

**C. Students must take at least 6 credits of literature and/or culture at the 400 level, chosen from the following (each repeatable to 6 credits):**

- **SPAN 440** Seminar on the Literatures and Cultures of Spain 3
- **SPAN 441** Seminar on Cervantes and the Golden Age 3
- **SPAN 445** Seminar on the Literatures and Cultures of Latin America 3

**D. Study Abroad: The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Under Option I, any student who chooses not to participate in a department-approved program will be required to take 3 additional elective credits of Spanish at or above the SPAN 321 level (for a total of 36 credits beyond the intermediate 201-202 level).**

**E. Communication Proficiency Requirements: Degree-seeking students must earn a grade of C- or better in a sequence of English composition courses, usually ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition. The department will certify Communication Proficiency for students who receive a C or better in a WLC or Classical Studies course numbered 370-379. Such a course will also fill an LAS Group I (Arts and Humanities) requirement.**
WLC Option II: Language and Cultures for Professions

Under WLC Option II students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

I. Languages and Cultures for Professions (College of Agriculture and Life Sciences)

Students with a primary major in the College of Agriculture and Life Sciences pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

Agriculture and Life Sciences LCP: Second Major Option in Spanish (30 credits total).

A. Required LCP Core Courses: (12 Credits)

</table>
The cross-disciplinary program in speech communication offers courses designed for all students as part of their general education and as a complement to their professional training. It also offers a major or minor in speech communication as well as an additional endorsement for secondary teachers who already have an endorsement in another content area.

**Speech Communication**

(Administered by the Department of English)

The Speech Communication major provides students opportunities to develop their understanding and appreciation of the human communication process and to enhance their oral and written communication practice. Speech communication students develop an awareness of the importance of oral communication and listening for success in their personal, civic, and professional lives; become familiar with behavioral research in persuasion; understand how language is used to create social change; develop competent delivery skills; assess the quality of arguments; evaluate information found in research and public discourse; and cultivate rhetorical sensitivity in order to better connect with individuals and audiences. In this way, the program contributes to the humanistic, aesthetic, and critical development of liberally educated students in order to prepare them for full and effective participation in society.

**Undergraduate Study**

The cross-disciplinary program in speech communication offers courses designed for all students as part of their general education and as a complement to their professional training. It also offers a major or minor in speech communication as well as an additional endorsement for secondary teachers who already have an endorsement in another content area.

Students who major or minor in speech communication will prepare themselves for a wide variety of employment opportunities in business, industry and government, as well as in non-profit and educational organizations. With their effective oral communication, listening, teamwork, problem-solving and leadership skills, speech communication students find positions in general business management; human resources, benefits, financial services, retail, sales and marketing and serve various organizations as recruiters, trainers, promotions managers, communication specialists, community outreach personnel and event planners. The program also prepares students for the study of law, theology, and for graduate level work in speech communication and related disciplines.

The program participates in the following interdisciplinary undergraduate minor programs: the interdisciplinary program in linguistics and the interdisciplinary program in technology and social change. Speech Communication also offers a core course and several optional courses in the Undergraduate Certificate Program in Community Leadership and Public Service.

**Speech Communication Major**

A student electing to major in speech communication must earn at least 120 credits with 45 credits at the 300/400 level. A minimum of 33 of those credits must be earned in Speech Communication courses where the student earns a grade of C or better. Our flexible curriculum with few prerequisites can help you meet the 33 hour requirement in a timely way.

**Core Requirements (18 credits)**

- **SP CM 110** Listening
- **SP CM 212** Fundamentals of Public Speaking
- **SP CM 327** Persuasion
- **SP CM 412** Rhetorical Criticism
- **SP CM 416** History of American Public Address
- **SP CM 497** Capstone Seminar

**Additional Coursework (Choose at least 5 of the following for 15 credits)**

- **SP CM 275** Analysis of Popular Culture Texts
- **SP CM 305** Language, Thought and Action
- **SP CM 312** Business and Professional Speaking
- **SP CM 313** Communication in Classrooms and Workshops
- **SP CM 322** Argumentation, Debate, and Critical Thinking
- **SP CM 323** Gender and Communication
- **SP CM 324** Legal Communication
- **SP CM 350** Rhetorical Traditions
- **SP CM 404** Seminar
- **SP CM 417** Campaign Rhetoric

See also the 4-year plan of study grid showing suggested courses by semester.

Credits in SP CM 290 Special Projects or SP CM 499 Communication Internship cannot be applied toward the minimum required credits for the major.

The Communication Proficiency requirement may be met by (1) completion of ENGL 150 Critical Thinking and Communication, ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), or its equivalent, with a grade in each of C or better; (2) one additional writing course beyond ENGL 250 Written, Oral, Visual, and Electronic Composition with a grade of C or better from the following approved list:

- **ENGL 302** Business Communication
- **ENGL 303** Creative Writing: Fiction
- **ENGL 305** Creative Writing: Nonfiction
- **ENGL 309** Report and Proposal Writing
- **ENGL 314** Technical Communication
- **ENGL 415** Business and Technical Editing
- **JL MC 201** Reporting and Writing for the Mass Media

**Speech Communication Education**

Students working toward a primary teaching endorsement in another discipline may add a speech communication endorsement as an additional area. Coursework prepares students to teach speech, drama, arts, and media at the secondary school level. In addition, they prepare to direct co-curricular and extracurricular activities such as drama, speech and debate.

Each student seeking an additional endorsement in speech communication must meet a 29 hour requirement by taking the following courses:

- **SPAN 440** Seminar on the Literatures and Cultures of Spain 3
- **SPAN 441** Seminar on Cervantes and the Golden Age 3
- **SPAN 445** Seminar on the Literatures and Cultures of Latin America 3

*Additional credit from an approved study abroad program may be applied to the major.

**SPAN 321** Spanish Civilization and **SPAN 322** Latin American Civilization may be substituted.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

**Minor in Spanish**

The Spanish minor: Option 1: Hispanic Studies, Option 2: Languages and Cultures for Professions

Option 1: The Spanish minor in Hispanic Studies requires at least 15 credits, 12 of which must be at the 300 level or higher. The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional elective credits of Spanish at the 300 level or higher.

Option 2: Language and Cultures for Professions. The Spanish minor in Languages and Cultures for Professions requires the following courses (12 credits):

- **SPAN 303B** Spanish Grammar and Conversation: Conversation for Professionals 3
- **SPAN 304** Spanish for Business and Professions 3
- **SPAN 351** Introduction to Spanish-English Translation 3

One of the following 3

- **SPAN 321** Spanish Civilization 3
- **SPAN 322** Latin American Civilization 3
- **SPAN 323** Spain Today 3
- **SPAN 324** Latin America Today 3

The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional credits in culture chosen from the following:

- **SPAN 321** Spanish Civilization 3
- **SPAN 322** Latin American Civilization 3
- **SPAN 323** Spain Today 3
- **SPAN 324** Latin America Today 3

Note: students taking either **SPAN 321** Spanish Civilization or **SPAN 323** Spain Today must take either **SPAN 322** Latin American Civilization or **SPAN 324** Latin America Today; students taking either **SPAN 322** Latin American Civilization or **SPAN 324** Latin America Today must take either **SPAN 321** Spanish Civilization or **SPAN 323** Spain Today.
Statistics

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in statistics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) entry level statistics positions requiring the B.S. degree in statistics in business, industry or commerce, nonprofit institutions, and in state or federal government; (2) graduate study in statistics, Entry-level positions include the following types of work: statistical design, analysis and interpretation of experiments and surveys; data processing and analysis using modern computation facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, marketing, manufacturing, and quality control. Nonprofit organizations such as large health study institutions have entry-level positions for B.S. graduates in statistics. Also, there are opportunities for work in statistics that require a major in a subject-matter field and a minor in statistics.

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. They should have a clear comprehension of the theoretical basis of statistical reasoning and should be proficient in the use of modern statistical methods and computing. Such graduates should have an ability to apply and convey statistical concepts and knowledge in oral and written form. They should be aware of ethical issues associated with polling and surveys and in the summarizing the outcomes of statistical studies.

Undergraduate majors in this department usually include in their programs:

- STAT 201 Introduction to Statistical Concepts and Methods
- One of the following options
  - Option I
    - MATH 156 Calculus II
    - MATH 256 Calculus III
  - Option II
    - MATH 165 Calculus I
    - MATH 166H Calculus II, Honors
    - MATH 265H Calculus III, Honors

MATH 207 Matrices and Linear Algebra 3

or MATH 317 Theory of Linear Algebra

COM S 207 Fundamentals of Computer Programming

STAT 301 Intermediate Statistical Concepts and Methods

STAT 341 Introduction to the Theory of Probability and Statistics II

STAT 342 Introduction to the Theory of Probability and Statistics II

STAT 402 Statistical Design and the Analysis of Experiments

STAT 421 Survey Sampling Techniques

STAT 479 Computer Processing of Statistical Data

STAT 480 Statistical Computing Applications

These courses plus at least six additional credits in statistics at the 400 level or above constitute the major. With the permission of the department, I E 361 Statistical Quality Assurance/STAT 361 Statistical Quality Assurance may be substituted for three credits of 400 level courses. It is advisable to have a minor in a field of application. See also: A 4-year plan of study grid showing course template by semester.

English and Speech proficiency requirement: The department requires a grade of C- or better in each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), and completion of one of ENGL 302 Business Communication or ENGL 314 Technical Communication with a grade of C- or better. The department requires a passing grade in COMST 102 Introduction to Interpersonal Communication or SP CM 212 Fundamentals of Public Speaking.

Students intending to do graduate work in statistics normally will take additional courses in mathematics.

Minor

The department offers a minor in statistics which may be earned by completing an introductory course in statistics plus additional courses from 301, 326, 341, 342, 361, and 400 level or above to yield a total of at least 15 credits in statistics courses.

Graduate Study

The department offers graduate programs leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees with a major in statistics. Graduate work leading to a minor in statistics is available for students majoring in other programs, at both the M.S. and Ph.D. levels. The Ph.D. degree is also offered as a co-major with other graduate programs. The department participates in inter-disciplinary graduate programs in Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Human Computer Interaction, Nutritional Sciences, and Wind Energy Science, Engineering, and Policy.

Graduates of the M.S. program have an understanding of basic statistical theory and methods. Elective courses in the M.S. program provide an opportunity for students to emphasize particular areas of statistical methods or application in their program. Students complete a minimum of 34 semester credits, including work on a capstone project resulting in a written creative component under the direction of an individual major professor and presented in a final oral examination.

Graduates of the Ph.D. program in statistics have studied advanced theory and methods, and have demonstrated the ability to conduct independent research resulting in an original contribution to the discipline. Candidates for the Ph.D. degree in statistics complete a minimum of 72 semester credits, including at least 18 credits given for research activity, pass an oral preliminary examination, and submit a written dissertation containing original research that is defended in a final oral examination. Dissertation research is typically conducted in close
Graduates of co-major Ph.D. programs in statistics and an applied scientific discipline have mastered basic statistical theory and have studied advanced methodology. Students complete a minimum of 72 semester credits for courses in statistics and the chosen scientific discipline. Students conduct research that is a combination of statistical methodology and the scientific discipline. Co-major professors work with the student to prepare for an oral preliminary examination and conduct research leading to a single dissertation project that produces an original contribution to at least one of the two disciplines that is defended in a final oral examination.

Graduates of co-major Ph.D. programs in statistics and an area of theoretical mathematics have mastered basic statistical methods and have studied advanced statistical theory. Students complete a minimum of 72 semester credits. Co-major professors assist the student in preparing a dissertation that represents original research that makes a contribution at the interface of statistical theory and a sub-discipline of mathematics. The dissertation is defended in a final oral examination.

Teaching English as a Second Language (TESL)

The Minor in TESL will help prepare students to teach English to nonnative speakers of English, either in community programs in the United States or in overseas locations. The Minor provides understanding of how English works (ENGL/LING 219) and practical and theoretical applications in how English is taught to those who do not speak English natively (ENGL/LING 322x, ENGL/LING 324x, ENGL/LING 325x, and ENGL/LING 425). The TESL Minor prepares students to cross cultural boundaries to learn about, interact with, and assist speakers of other languages in learning English, the leading global language today. A TESL Minor will help students become global citizens through interacting with and teaching those from around the world who come to the United States and by giving students skills that will allow them to live and work in other countries. All classes listed are requirements for the Minor in TESL (15 credits). A C or better is required in each course used to satisfy the minor. Contact the Linguistics advising office for more information.

Technical Communication

Technical Communication Major Requirements

Technical Communication majors must take 34-36 credits within the major and 6 hours in a designated area of concentration related to technology, science, or design (an acceptable minor will also fulfill this requirement). Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline.

ENGL 310 Rhetorical Analysis 3
ENGL 314 Technical Communication 3
ENGL 350 Rhetorical Traditions 3
ENGL 487 Internship in Business, Technical, and Professional Communication 1-3

Choose 3:
(Note: Students planning to take ENGL 415 Business and Technical Editing in the future should take ENGL 220 Descriptive English Grammar for 3 of these credits.)

ENGL 220 Descriptive English Grammar
ENGL 302 Business Communication
ENGL 309 Report and Proposal Writing
ENGL 312 Biological Communication
ENGL 313 Rhetorical Website Design
ENGL 332 Visual Communication of Quantitative Information

Choose 5:

ENGL 411 Technology, Rhetoric, and Professional Communication
critical thinking and to provide students with the intellectual means to question prevailing assumptions. It encourages students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. It promotes social responsibility by examining the connections between personal experience and political activity, and validates student contributions and voices. Women’s Studies graduates are skilled in critical thinking, research methods, and effective communication. Because they have developed an understanding of gender, race, and class, they can understand and work effectively with employers, colleagues, and clients to analyze and address complex social problems. Women’s Studies graduates acquire strong backgrounds for careers in such areas as counseling, education, human resources, public policy, politics, business, or law. The program includes core courses in Women’s Studies and cross-listed courses in anthropology, art history, classical studies, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures. An undergraduate major requires 33 credits of core and cross-listed courses. Women’s Studies majors must satisfy the following requirements:

1. 21 credits selected from women’s studies core courses (W S).

A. Required core courses:

- W S 201 Introduction to Women’s Studies 3
- W S 301 International Perspectives on Women and Gender 3
- W S 401 Feminist Theories 3
- W S 402 Feminist Research in Action 3
- W S 499 Senior Thesis 3
- or W S 491 Senior Internship 3

B. The remaining 6 credits should be chosen from the Women’s Studies core courses:

- W S 203 Introduction to Lesbian Studies 3
- W S 205 Introduction to Queer Studies 3
- W S 302 Issues in Women’s Health and Reproduction 3
- W S 320 Ecofeminism 3
- W S 350 Women of Color in the U.S 3
- W S 425 Intersections of Race, Class and Gender 3
- W S 435 Women and Development 3
- W S 450 Topics in Women’s Studies (may be taken more than once) 3

2. 12 credits selected from W S cross-listed courses or W S core courses.

Women’s Studies majors are encouraged to declare either a minor or a second major in a different program or department.

Communication Proficiency requirement:
The Women’s Studies major requires an average grade of C- or better in ENGL 150 and ENGL 250 (or ENGL 250H) and W S 201.

Minor
Undergraduate students may minor in Women’s Studies by taking 15 semester hours of Women’s Studies classes, including:

- W S 201 Introduction to Women’s Studies 3
- W S 301 International Perspectives on Women and Gender 3
- one 400 level core Women’s Studies course 3
- 6 additional credits of core or cross-listed courses 6

Any student can declare a minor or major in Women’s Studies or choose to co-major in another program. Students interested in a minor or major in Women’s Studies should contact the Director of the program.

Graduate Study
The graduate minor in Women’s Studies is designed to provide students with knowledge of theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students opportunities for systematic study of gender and women’s experiences and perspectives in all knowledge fields. Students will be prepared to take leadership roles in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

The graduate minor requires 12 credits for students enrolled in a master’s or a doctoral degree program. Students are required to take either W S 501 Contemporary Feminist Theories or W S 502 Advanced Seminar in Feminist Research Methods; taking both is strongly recommended. Students will also take two or three electives selected from the list of core and cross-listed Women’s Studies courses approved for graduate study. At least one member of the Women’s Studies faculty will serve on the program of study for doctoral students. A list of eligible faculty members may be obtained from the Director of the Women’s Studies program.

World Languages and Cultures

Undergraduate Study

Degree: World Languages and Cultures, B.A.

Curriculum: World language study should be an integral part of an academic program for most students. The theoretical understanding of and practical experience in language underlie many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of World Languages and Cultures are designed to develop students’ understanding of a second culture through the language spoken by that culture.

Upon the completion of their program of studies in the Department of World Languages and Cultures, majors with a concentration in French, German, or Spanish will demonstrate proficiency in five goal areas: Communication, Cultures, Connections, Comparisons, and Communities. Students will be able to:

1. use their concentration language to present and interpret information and to communicate both orally and in writing;
2. demonstrate an understanding of the relationships among the products, practices, and perspectives of the culture(s) in which their concentration language is spoken;
3. demonstrate their ability to acquire information and further their knowledge through their concentration language;
4. demonstrate an understanding of the nature of language and the concept of culture by making comparisons with their own language and culture(s); and
5. demonstrate a desire to become a life-long learner of their concentration language.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program. Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. Students of Latin and Ancient Greek demonstrate proficiency by becoming able to read the languages and to translate from these languages into clear and idiomatic English. Cultural literacy includes a general knowledge of the culture’s history, familiarity with its literature, and basic knowledge of its social and political institutions.

The Department offers a major in World Languages and Cultures with two options, leading to the Bachelor of Arts degree:

1. Languages and Cultures with a Concentration in French, German, or Spanish;
2. Languages and Cultures with Professions (as a second major only) with a Concentration in French, German, or Spanish.

The Department offers minors in Chinese Studies, French, German, Russian Studies, Spanish, and World Film Studies; and instruction in American Sign Language, Arabic, and Classical Greek and Latin. The Department also houses the College of Liberal Arts and Sciences’ Programs in Classical Studies and International Studies.

A full statement of requirements for majors and minors may be obtained from the Department. For a complete statement of all the college degree requirements, see Liberal Arts and Sciences, Curriculum. Current and detailed information about the Department, including placement information, is available on-line at www.language.iastate.edu.

Policies

Students who have had formal training in world languages offered at Iowa State may obtain credit by passing appropriate examinations. Students with native fluency in languages taught at Iowa State may not enroll in or take the Exam for Credit in elementary or intermediate courses (100 and 200 level) in their native language. Students are considered to have native fluency if their ethnic first language as indicated on the matriculation form is the language in which they wish to enroll. Students are also considered to have native fluency if they have had substantial attendance at a secondary school or university where the language of instruction is the language in which they wish to enroll at ISU. Students with native fluency may be eligible to enroll in literature and civilization courses in their native language at the 300 level or above; such students must also consult the department office to determine eligibility for advanced composition and conversation courses (300 level and above). Students who have completed three or more years of high-school world language study may not enroll in or
receive credit for 101-102 in those languages; credit may be obtained by passing the appropriate Exam for Credit or by completing an advanced sequence (200-level or higher) in that language. Students who complete an approved sequence of courses in a single language at the 200- or 300-level (e.g., 201 and 202 or 301 and 302) with a grade of C- or higher are eligible to receive credit for 101 and 102 in that same language if they have not received credit for a 101 or 102 course in the language. Students who complete a 102 course with a grade of C- or higher are eligible to receive credit for 101 in that same language if they have not received credit for 101 in the same language. Students should contact the department after completion of the course sequence to receive credit. Courses in the 101-102 level may not be taken on a remedial basis.

Students who have completed two years but less than three years of a single high-school world language may not enroll in a 101 course in that language. These students may enroll in either a 102 course in that language, or in the case of Spanish, SPAN 097 Accelerated Spanish Review. Before enrolling in either SPAN 097 Accelerated Spanish Review or a 102 language course, students are recommended to take the on-line placement test available at www.language.iastate.edu. After completing the online placement test, students who believe that they have extenuating circumstances may appeal to the Department of World Languages and Cultures in order to request enrollment in a 101 language course.

SPAN 097 Accelerated Spanish Review is designed for students who need additional work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete with a passing grade will have fulfilled the LAS world language requirement. Students who have completed SPAN 097 Accelerated Spanish Review and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic adviser, the Department of World Languages and Cultures, or the Disability Resources Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

The Department of World Languages and Cultures participates in the Iowa Regents’ world language summer study abroad programs in France, Morocco, Peru and Spain. The Department also offers summer programs in Greece, Russia, Spain and Mexico; and semester study abroad programs in Mexico and Spain. Information concerning these programs can be obtained directly from the Department.

Language and literature courses numbered 300 and above are principally taught in the target language; courses numbered in the 270s, 370s, and 470s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any advanced (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Students at all levels of world language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

Materials fees: Each student enrolled in a 100- through 200-level world language course is assessed a materials and professional support fee of $25.00 per course. If a student drops a course subject to the fee by the 15th day of the semester the fee for that course will not be assessed.

Communication Proficiency requirement: The Department requires a grade of C- or better in each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition (ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), and a grade of C or better in any course numbered between 370 and 379 taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies.

Languages and Cultures for Professions (LCP)

Students with primary majors in the College of Business, the College of Engineering, or the College of Agriculture and Life Sciences are encouraged to complete an LCP second major option in World Languages and Cultures with a concentration in French, German, Spanish, or an LCP minor option in Chinese Studies or Russian. The primary objective of the LCP option is to provide learning environments within which students can achieve global literacy, linguistic proficiency, and inter-cultural competence. In the LCP curriculum, students will learn how professions are shaped by social and cultural forces and, alternatively, how professions shape society. In courses on contemporary culture and society, students will identify and analyze issues dealing with the complex interrelationships of languages and cultures and consider how they may affect their chosen profession. Students will experience living and working in diverse cultural settings through study abroad and internship opportunities offered through the LCP program and/or in collaboration with the Colleges of Business, Engineering, and Agriculture and Life Sciences. Students enrolled in the LCP second major option may receive non-graded academic credit for the successful completion of internships (WLC courses numbered 499 in each language area).

For the LCP second major option, students will complete 30 credits within their language concentration beyond the fourth-semester level, selected from the list of approved LCP core courses and electives designated for their respective college curricula in either Business, Engineering, or Agriculture and Life Sciences. Students may only enroll in the LCP option as a second major and may not graduate with the LCP option in the WLC major alone.

Students in the College of Business may combine course work in the International Business (IB) Secondary Major with course work in LCP by selecting from a list of approved options. Students should consult their academic adviser in the College of Business and the WLC adviser for coursework and international experience that fulfill requirements in both the IB and LCP major options.

World Film Studies

The World Film Studies undergraduate minor is an interdisciplinary, cross-cultural program in the department of World Languages and Cultures that provides coursework on the history, theory, and aesthetics of cinema of the non-English-speaking world. Upon completion of the World Film Studies minor students will

1) demonstrate solid skills of formal film analysis and knowledge of the essential theoretical concepts of cinema studies;
2) become familiar with prominent film directors, influential cinematic works, and cinematic traditions across the world;
3) gain an understanding of the evolution of cinema as an art form; understand the relations between cinema and other arts;
4) acquire knowledge and understanding of cinema as a mode of cultural expression and communication; develop new perspectives on U.S. culture and cinema through comparison with other non-English-speaking world cultures and cinemas.

A student seeking an undergraduate minor in World Film Studies must successfully complete a minimum of 15 credits, which must include WLC 278 Introduction to Global Film (Introduction to Global Film) and 12 credits selected from the following list of electives. Of these, at least 6 credits must be from courses taught in the department of World Languages and Cultures.

Curricular note: no more than 6 credits of each repeatable course (Frentch 326 and Frutch 378) may be applied to the minor.

Graduate Study

The Department of World Languages and Cultures offers course work leading to a graduate minor in French, German, Latin, Russian Studies or Spanish. The graduate minor in each of these languages is designed to provide an opportunity for graduate students to further their knowledge of that language to complement work in their major disciplines. The graduate minor provides formal recognition of student achievement and expertise in one of the languages above. Graduate minor credits are also offered in Greek.
Graduate Minor
Program Requirements:

Prerequisites
Graduate students who wish to minor in one of the languages above must have 400-level proficiency in that language. When this is not the case, the student may be required to take a language course below the 400-level, which would not count towards the graduate minor requirements.

Course Requirements
For the M.A. or M.S.: Three courses in the language of the minor. No more than three credits may be in courses numbered 401, 402, and 403. For the Ph.D.: Four courses in the language of the minor which must include at least one three credit course at the 500 level. No more than three credits may be in courses numbered 401, 402, or 403. At least two courses for the M.A. and the Ph.D. minors must be taken in residence at Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.

Special Courses in WLC
See /collegeofliberalartsandsciences/worldlanguagesandcultures/#courseinventory.

American Sign Language (ASL)
Courses primarily for undergraduate students

ASL 105. American Sign Language I. (4-0) Cr. 4. F.S.
Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from “Signed English”. ASL is a natural language with its own rules of grammar and usage. Meets U.S. Diversity Requirement

ASL 106. American Sign Language II. (4-0) Cr. 4. S.
Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from “Signed English”. ASL is a natural language with its own rules of grammar and usage. Meets U.S. Diversity Requirement

ASL 205. Intermediate American Sign Language I. (4-0) Cr. 4. F. Prereq: ASL 102 or equivalent.
Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics.

ASL 206. Intermediate American Sign Language II. (4-0) Cr. 4. S. Prereq: ASL 201 or equivalent.
A continuation and further application of language principles learned in WLC 205X, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of sematic equivalence and dialogic/monologic register.

ASL 275. Topics in Deaf Culture. (3-0) Cr. 3.
Focus on contemporary topics in Deaf Culture, Communities, and History. Readings and discussion from a wide range of sources. Topics vary according to faculty interest. Meets U.S. Diversity Requirement

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits of ASL 490 may be counted towards graduation.

Arabic (Arabc)
Courses primarily for undergraduate students

ARABC 101. Elementary Arabic I. (4-0) Cr. 4. F.
Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet.

ARABC 102. Elementary Arabic II. (4-0) Cr. 4. S. Prereq: ARABC 101 or placement by department exam.
Continuation of ARABC 101. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 195. Study Abroad. Cr. arr. Alt. SS., offered irregularly.
Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student’s training, augmented by practical living experience. Taught in Arabic.

ARABC 201. Intermediate Arabic I. (4-0) Cr. 4. F. Prereq: ARABC 102 or placement by department exam.
Intermediate level development of reading, writing, listening comprehension, and speaking skills in Modern Standard Arabic within the context of the Arabic world. Meets International Perspectives Requirement.

ARABC 202. Intermediate Arabic II. (4-0) Cr. 4. Prereq: ARABC 201 or placement by department exam.
Intermediate development of reading, writing, listening comprehension, and speaking skills in Modern Standard Arabic within the context of the Arabic world. Meets International Perspectives Requirement.

ARABC 295. Study Abroad. Cr. arr. Alt. SS., offered irregularly. Prereq: ARABC 102 or equivalent.
Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student’s training, augmented by practical living experience. Taught in Arabic.

Chinese Studies (Chin)

Chinese Studies Minor Option 1: Chinese Studies

CHIN 201 Intermediate Mandarin Chinese I 5
CHIN 202 Intermediate Mandarin Chinese II 5

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. Major. FRNCH 476 French Civilization Seminar in English and 3 credits of FRNCH 340 Studies in French or Francophone Literature must be completed on campus and may not be fulfilled through transfer or study abroad.

**Minor in French**

The French Minor requires a total of 15 credits in French, at least 9 credits of which must be at the 300-level.
6 credits in the required core sequence:

- FRNCH 301 French Writing and Grammar 3
- FRNCH 302 Reading and Writing French 3
- FRNCH 326 Studies in French or Francophone Film 3
- FRNCH 340 French for Business and Professions 3
- FRNCH 370 French Studies in English 3
- FRNCH 378 French Film Studies in English 3

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

III. Languages and Cultures for Professions (College of Engineering)

Students with a primary major in the College of Engineering pursuing the second major option in French are required to take at least 30 credits beyond the intermediate (FRNCH 201 Intermediate French I - FRNCH 202 Intermediate French II) level.

A. Required Core Courses (21 credits)

- FRNCH 301 French Writing and Grammar 3
- FRNCH 302 Reading and Writing French 3
- FRNCH 304 French for Business and Professions 3
- FRNCH 320 France Today 3
- FRNCH 340 Studies in French or Francophone Literature 3
- FRNCH 370 French Studies in English 3
- FRNCH 378 French Film Studies in English 3

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

B. Additional Courses (9 credits)

- FRNCH 305 French Conversation 3
- FRNCH 326 Studies in French or Francophone Film 3
- FRNCH 340 Studies in French or Francophone Literature 3
- FRNCH 476 French Civilization Seminar in English 3
- FRNCH 499 Internship in French 1-3

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

Courses primarily for undergraduate students

FRNCH 101. Elementary French I. (4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

FRNCH 102. Elementary French II. (4-0) Cr. 4. S.SS. Prereq: FRNCH 101

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available. Meets International Perspectives Requirement.

FRNCH 201. Intermediate French I. (4-0) Cr. 4. F. Prereq: FRNCH 102

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available. Meets International Perspectives Requirement.
FRNCH 202. Intermediate French II.
(4-0) Cr. 4. S. Prereq: FRNCH 201
Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.
Meets International Perspectives Requirement.
FRNCH 301. French Writing and Grammar.
(3-0) Cr. 3. F. Prereq: FRNCH 202
Emphasis on developing functional language skills in reading and writing. Selective review of grammar within the context of cultural and literary prose.
Meets International Perspectives Requirement.
FRNCH 302. Reading and Writing French.
(3-0) Cr. 3. S. Prereq: FRNCH 301
Readings in French prose, theater and poetry. Introduction to close reading and analysis. Development of reading and writing skills for upper-level courses.
FRNCH 304. French for Business and Professions.
(3-0) Cr. 3. Prereq: FRNCH 301
Meets International Perspectives Requirement.
FRNCH 305. French Conversation.
(3-0) Cr. 3. Prereq: FRNCH 202
Intensive conversational or listening practice emphasizing contemporary French or Francophone civilization. Native or near-native speakers are not eligible to enroll.
FRNCH 320. France Today.
(3-0) Cr. 3. Prereq: FRNCH 202
Selected topics dealing with contemporary French society and culture. Introduction to materials, resources, and forms of communication available on the Internet, and in other electronic and print media.
Meets International Perspectives Requirement.
FRNCH 326. Studies in French or Francophone Film.
(3-0) Cr. 3. Repeatable. Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302
In-depth study of a selected filmmaker, genre, or movement. Emphasis on analytical interpretation and relationship between film and French or Francophone culture, history, and society.
FRNCH 340. Studies in French or Francophone Literature.
(3-0) Cr. 3. Repeatable. Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302
In-depth study of a selected topic, genre, movement or writer in French or Francophone literature, civilization or culture. Emphasis on close readings and discussion.
(3-0) Cr. 3.
Topics vary according to faculty interest. Author, genre, or period study in French or Francophone history, literature, or culture. Readings, discussions, and papers in English.
Meets International Perspectives Requirement.
FRNCH 370F. French Studies in English: French Topics on Women and Gender Studies.
(Cross-listed with W S). (3-0) Cr. 3. Repeatable.
Topics vary according to faculty interest. Readings, discussions, and papers in English.
Meets International Perspectives Requirement.
FRNCH 378. French Film Studies in English.
(2-2) Cr. 3. Repeatable.
Analysis and interpretation of film in twentieth-century French society. Topics vary according to faculty interest. Film directors, genres, movements (e.g. The New Wave), historical survey, aesthetics, and cinematography. Readings, discussions and papers in English.
Meets International Perspectives Requirement.
FRNCH 476. French Civilization Seminar in English.
(3-0) Cr. 3. S.
Advanced seminar in French civilization. Topics vary according to faculty interest. Readings, discussions, and paper in English.
FRNCH 490. Independent Study.
Cr. 1. Prereq: Permission of French staff and department chair
Designed to meet the needs of students who wish to focus on areas other than those in which courses are offered. No more than 9 credits in Frnch 490 may be counted toward graduation.
FRNCH 499. Internship in French.
Cr. 1. F.S.S.S. Prereq: 9 credits of French at the 300 level; permission of advisor and WLC Internship Coordinator. Work experience using French language skills in the public or private sector, combined with academic work under faculty supervision. Credits may be applied only to LCP major. Offered on a satisfactory-fail basis only. No more than 3 credits of Frnch 499 may be applied to the major.
FRNCH 590. Special Topics in French.
Cr. 2. Prereq: Permission of instructor; 6 credits of 400 level French
FRNCH 590A. Special Topics in French: Literature or Literary Criticism.
Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level French
FRNCH 590B. Special Topics in French: Linguistics.
Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level French
FRNCH 590C. Special Topics in French: Language Pedagogy.
Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level French
FRNCH 590D. Special Topics in French: Civilization.
Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level French

Courses primarily for graduate students, open to qualified undergraduate students

FRNCH 590. Special Topics in French.
Cr. 2. Prereq: Permission of French.
6 credits of 400 level French

German (Ger)

WLC Option I: German Studies

Under WLC Option I, students with a concentration in German must complete at least 30 credits beyond the intermediate (GER 201 (https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures) - GER 202 (https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures)) level. Students electing the German Studies option may count a maximum of two of the following courses towards the major:

GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimm’s Tales 3-4
GER 378 German Film and Media Studies 3-4

A. German Studies Required Core Courses: (22 credits)

GER 301 Reading: Problems of the Early Twentieth Century 3
GER 302 Composition 3
GER 304 German for Business and Professions 3
GER 305 Conversation: The City in Contemporary Europe 3
GER 320 Germany Today 3
GER 330 German Literature and Culture 3
GER 476 Topics in German Cultural Studies 3-4

B. Electives:
The remaining 8 credits may be chosen from the following courses:
Repeatable course:
GER 330 German Literature and Culture 3

Study Abroad and Internship option:
GER 499 Internship in German 1-3

Courses taught in English (up to 8 credits applicable towards major; majors must enroll for 4 credits):
GER 370 German Studies in English 3-4
GER 371 The Holocaust in Text, Image, and Memory 3-4
GER 375 Grimm’s Tales 3-4
GER 378 German Film and Media Studies 3-4
C. Study Abroad: The department strongly recommends that all students of German participate in an approved study abroad program based in a German-speaking country. Credit from an approved study abroad program may be applied to the major.

Curricular Notes: GER 330 German Literature and Culture may be repeated once for major credit when offered with a different topic (6cr. total). GER 476 Topics in German Cultural Studies is required for the WLC major option in German Studies. Majors must enroll in GER 476 Topics in German Cultural Studies for 4 credits. Majors choosing the German Studies option may select two additional courses for 4 cr. from the following:

- GER 370 German Studies in English 3-4
- GER 371 The Holocaust in Text, Image, and Memory 3-4
- GER 375 Grimms' Tales 3-4
- GER 378 German Film and Media Studies 3-4

Minor in German

The German minor requires 15 credits of courses taught in German. At least six credits must be chosen from among German 301, 302, 304, 305, 320, and 330. At least three credits must be chosen from German 320 and 330. Courses taught primarily in English (German 370, 371, 375, 378, and 476) cannot count toward the German minor.

Three credits must be in literature or culture taught in German 3
- GER 320 Germany Today
- GER 330 German Literature and Culture

Eligible minor courses 12
- GER 301 Reading: Problems of the Early Twentieth Century 3-4
- GER 302 Composition 3-4
- GER 304 German for Business and Professions 3-4
- GER 305 Conversation: The City in Contemporary Europe 3-4
- GER 320 Germany Today 3
- GER 330 German Literature and Culture 3

WLC Option II: Languages and Cultures for Professions (LCP)

Under WLC Option II students with a concentration in German must complete a minimum of 30 credits beyond the intermediate (GER 201 - GER 202) level. Students electing the LCP option may count one of the following courses toward the major:

- GER 370 German Studies in English 3-4
- GER 371 The Holocaust in Text, Image, and Memory 3-4
- GER 375 Grimms' Tales 3-4
- GER 378 German Film and Media Studies 3-4

I. Languages and Cultures for Professions (Business)

Students with a primary major in the College of Business may select from one of the following options:

Business Option 1

International Business Secondary Major and German LCP Minor Emphasis (27 credits total)

A. International Business Secondary Major (12 credits from approved list)

B. LCP Minor Emphasis Courses (15 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

- GER 304 German for Business and Professions 3
- GER 305 Conversation: The City in Contemporary Europe 3
- GER 301 Reading: Problems of the Early Twentieth Century 3
- GER 302 Composition 3
- GER 320 Germany Today 3
- GER 499 Internship in German 1-3

Business Option 2

International Business Secondary Major and LCP Major Option (42 credits total)

A. International Business Secondary Major (12 credits from approved list)

B. LCP Second Major (30 credits)

I. LCP Required Core Courses (19 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

- GER 301 Reading: Problems of the Early Twentieth Century 3
- GER 304 German for Business and Professions 3
- GER 305 Conversation: The City in Contemporary Europe 3
- GER 320 Germany Today 3
- GER 476 Topics in German Cultural Studies 3-4
- GER 499 Internship in German 1-3
B. Electives (11 credits)

GER 590C. Special Topics in German: Language Pedagogy.
Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level German

GER 590D. Special Topics in German: Civilization.
Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level German

Greek (Greek)
For courses in Greek literature taught in English, see Classical Studies.

Courses primarily for undergraduate students

GREEK 101. Elementary Ancient Greek I.
(4-0) Cr. 4. F.
Grammar and vocabulary of ancient Greek, within the context of Greek culture; reading knowledge through texts adapted from classical authors.

GREEK 102. Elementary Ancient Greek II.
(4-0) Cr. 4. S. Prereq: GREEK 101
Grammar and vocabulary of ancient Greek, within the context of Greek culture; reading knowledge through texts adapted from classical and later authors. Meets International Perspectives Requirement.

GREEK 201. Intermediate Classical Greek.
Cr. 2. F. Prereq: GREEK 102
Emphasis on grammatical principles, composition and reading classical or Hellenistic texts. Meets International Perspectives Requirement.

GREEK 332. Introduction to Classical Greek Literature.
Cr. arr. S. Prereq: GREEK 201
Readings in ancient Greek Literature with emphasis on critical analysis of style, structure or thought. Meets International Perspectives Requirement.

GREEK 490. Independent Study.
Cr. 1. Prereq: 6 credits in Greek and permission of department chair
Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Greek 490 may be counted toward graduation.

Latin (Latin)
For courses in Latin literature taught in English, see Classical Studies.

Courses primarily for undergraduate students

LATIN 101. Elementary Latin I.
(4-0) Cr. 4. F.
Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

LATIN 102. Elementary Latin II.
(4-0) Cr. 4. S. Prereq: LATIN 101
Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors. Meets International Perspectives Requirement.

LATIN 201. Intermediate Latin.
Cr. arr. F. Prereq: LATIN 102

LATIN 332. Introduction to Latin Literature.
Cr. arr. S. Prereq: LATIN 201
Readings in Latin Literature with emphasis on critical analysis of style, structure or thought. Meets International Perspectives Requirement.

LATIN 490. Independent Study.
Cr. 1. Prereq: 6 credits in Latin and permission of department chair
Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits in Latin 490 may be counted toward graduation.

Russian Studies (Rus)
Minors in Russian Studies are required to complete RUS 201 and RUS 202. The remaining 9 credits must be at the 300 level and above, including at least 3 credits in the Russian curriculum (courses taught in English or Russian).

Russian Studies Minor Option 1: Russian Studies.
9 credits at the 300 level may be selected from the following courses:

RUS 201 Intermediate Russian I 4
RUS 202 Intermediate Russian II 4
9 credits must be at the 300 level and above * 9

RUS 301 Composition and Conversation 4
RUS 304 Russian for Business and Professions 4
RUS 314 Reading Russian Literary and Cultural Texts 4
RUS 370 Russian Studies in English Translation 4
RUS 375 Russia Today 4
RUS 378 Russian Film Studies in English 4
RUS 395 Study Abroad 4
RUS 490 Independent Study 4
RUS 499 Internship in Russian 4
RUS 590 Special Topics in Russian 4
HIST 421 History of Russia I 4
HIST 422 History of Russia II 4
HIST 530 Proseminar in Modern Russian/Soviet History 4
POL S 349 Politics of Russia and the Soviet Successor States 4

* including at least 3 credits in the Russian curriculum (courses taught in English or Russian).

Russian Studies Minor Option 2: Languages and Cultures for Professions

A. Agriculture and Life Sciences, Business, or Engineering Major and Languages and Cultures for Professions Minor Emphasis in Russian Studies (17 credits)

Required Core Courses 11

RUS 201 Intermediate Russian I 4
RUS 202 Intermediate Russian II 4
RUS 304 Russian for Business and Professions 4
Electives 6

RUS 301 Composition and Conversation 4
RUS 314 Reading Russian Literary and Cultural Texts 4
RUS 370 Russian Studies in English Translation 4
RUS 375 Russia Today 4
RUS 378 Russian Film Studies in English 4
RUS 395 Study Abroad 4
RUS 490 Independent Study 4
RUS 499 Internship in Russian 4
RUS 590 Special Topics in Russian 4
HIST 421 History of Russia I 4
HIST 422 History of Russia II 4
HIST 530 Proseminar in Modern Russian/Soviet History 4
POL S 349 Politics of Russia and the Soviet Successor States 4
Courses primarily for undergraduate students

RUS 101. Elementary Russian I. (4-0) Cr. 4. F.
Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

RUS 102. Elementary Russian II. (4-0) Cr. 4. S. Prereq: RUS 101
Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.
Meets International Perspectives Requirement.

RUS 195. Study Abroad. Cr. 1-10. Repeatable. SS.
Supervised intensive instruction in Russian language and culture; formal class instruction at level appropriate to students’ training, augmented by practical living experiences. Consult with department regarding equivalence with Rus 101 and 102. Acceptable for LAS General Education Requirement credit in the II group.

RUS 201. Intermediate Russian I. (4-0) Cr. 4. F. Prereq: RUS 102
Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.
Meets International Perspectives Requirement.

RUS 202. Intermediate Russian II. (4-0) Cr. 4. S. Prereq: RUS 201
Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.
Meets International Perspectives Requirement.

RUS 295. Study Abroad. Cr. 1-10. Repeatable. SS.
Supervised intensive instruction in Russian language and culture; formal class instruction at level appropriate to students’ training, augmented by practical living experiences. Consult with department regarding equivalence with Rus 201 and 202. Acceptable for LAS General Education Requirement credit in the II group.

RUS 301. Composition and Conversation. (3-0) Cr. 3. F. Prereq: RUS 202
Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening. Increased focus on syntax and word formation.
Meets International Perspectives Requirement.

RUS 304. Russian for Business and Professionals. (3-0) Cr. 3. F. Prereq: RUS 102
Communication in business and professional contexts in Russian-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice.
Meets International Perspectives Requirement.

RUS 314. Reading Russian Literary and Cultural Texts. (3-0) Cr. 3. Repeatable. Prereq: RUS 102
Selected readings in Russian literature and culture. Emphasis on techniques of reading and analysis of literary and cultural texts.
Meets International Perspectives Requirement.

RUS 370. Russian Studies in English Translation. (3-0) Cr. 3.
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.
Meets International Perspectives Requirement.

RUS 370R. Russian Studies in English Translation: Russian topics on women or feminism. (Cross-listed with W S). (3-0) Cr. 3. Repeatable.
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.
Meets International Perspectives Requirement.

RUS 375. Russia Today. (3-0) Cr. 3.
A survey of social, political, economic, and cultural topics relevant to contemporary Russia. Readings, discussions and papers in English.
Meets International Perspectives Requirement.

RUS 378. Russian Film Studies in English. (3-0) Cr. 3.
Analysis and interpretation of cinema in Russia and the Soviet Union. Topics vary according to faculty interest. Film directors, genres, movements, historical survey, aesthetics, and cinematography. Readings, discussions and papers in English.
Meets International Perspectives Requirement.

RUS 395. Study Abroad. Cr. 1-6.
Supervised instruction in language and culture of Russia; formal class instruction at level appropriate to student’s training, augmented by practical living experience.
Meets International Perspectives Requirement.

RUS 490. Independent Study. Cr. 1. Prereq: 6 credits in Russian and permission of department chair
Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Rus 490 may be counted toward graduation.

Prereq: 9 credits of Russian at the 300 level; permission of advisor and WLC Internship Coordinator
Work experience using Russian language skills in the public or private sector combined with academic work under faculty supervision. Available only to majors and minors. No more than 3 credits may be applied to the major.

RUS 590. Special Topics in Russian. Cr. 2. Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590A. Special Topics in Russian: Literature or Literary Criticism. Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590B. Special Topics in Russian: Linguistics. Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590C. Special Topics in Russian: Language Pedagogy. Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Russian

RUS 590D. Special Topics in Russian: Civilization. Cr. 2-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Russian

Courses primarily for graduate students, open to qualified undergraduate students

RUS 590. Special Topics in Russian. Cr. 2. Prereq: Permission of instructor; 6 credits of 400 level Russian

Spanish (Span)

World Languages and Cultures majors with a concentration in Spanish have two options:

WLC Option I: Hispanic Studies
Under WLC Option I, students with a concentration in Spanish must complete a minimum of 33 credits beyond the intermediate (SPAN 201 Intermediate Spanish I- SPAN 202 Intermediate Spanish II) level.

A. Hispanic Studies Required Core Courses: (12 cr.)

B. Electives: Students must take at least 15 credits chosen from a, b, and c below (minimum of 3 credits from each section).

a) At least 3 credits of literary studies chosen from the following:
I. Languages and Cultures for Professions (College of Agriculture and Life Sciences)

Students with a primary major in the College of Agriculture and Life Sciences pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

**WLC Option II: Language and Cultures for Professions**

Under WLC Option II students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

A. Required LCP Core Courses: (12 Credits)

- **SPAN 330** Studies in Spanish Literature to 1700 3
- **SPAN 331** Studies in Spanish Literature from 1700 to the Present 3
- **SPAN 332** Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century 3
- **SPAN 333** Studies in Latin American Literature from the Twentieth Century to the Present 3

b) At least 3 credits of cultural studies chosen from the following:

- **SPAN 304** Spanish for Business and Professions 3
- **SPAN 321** Spanish Civilization 3
- **SPAN 322** Latin American Civilization 3
- **SPAN 323** Spain Today 3
- **SPAN 324** Latin America Today 3
- **SPAN 326** Studies in Hispanic Art or Film 3

c) At least 3 credits of applied language and linguistics chosen from the following:

- **SPAN 351** Introduction to Spanish-English Translation 3
- **SPAN 354** Introduction to Spanish-English Interpretation 3
- **SPAN 401** Advanced Composition and Grammar 3
- **SPAN 462** Contrastive Analysis of Spanish/English for Translators 3
- **SPAN 463** Spanish Grammar and Composition: Conversation for a Speaking Country 3
- **SPAN 499** Internship in Spanish 1-3

Students may apply up to 6 credits of SPAN 395 Study Abroad to section a, b, or c above (appropriate section based upon course content and assigned by the WLC adviser).

C. Electives: (6 credits)

Select one course from each of the following two literature categories:

**Category 1:**

- **SPAN 330** Studies in Spanish Literature to 1700 3
- **SPAN 331** Studies in Spanish Literature from 1700 to the Present 3
- **SPAN 332** Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century 3
- **SPAN 333** Studies in Latin American Literature from the Twentieth Century to the Present 3

**Category 2:**

- **SPAN 440** Seminar on the Literature and Cultures of Spain 3
- **SPAN 441** Seminar on Cervantes and the Golden Age 3
- **SPAN 445** Seminar on the Literature and Cultures of Latin America 3

*Additional credit from an approved study abroad program may be applied to the major.

**SPAN 321** Spanish Civilization and SPAN 322 Latin American Civilization may be substituted.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

II. Languages and Cultures for Professions (College of Business)

Students with a primary major in the College of Business pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

**Business LCP: Second Major Option in Spanish (30 credits total).**

A. Required LCP Core Courses (12 credits)

- **SPAN 303B** Spanish Grammar and Conversation: Conversation for Professionals 3
- **SPAN 304** Spanish for Business and Professions 3
- **SPAN 351** Introduction to Spanish-English Translation 3
- **SPAN 499** Internship in Spanish 1-10
- or **SPAN 395** Study Abroad

B. Literature and Culture Courses: (12 credits)

- **SPAN 301** Spanish Grammar and Composition 3
- **SPAN 314** Introduction to Reading Hispanic Texts 3
- **SPAN 323** Spain Today ** 3
- or **SPAN 321** Spanish Civilization 3
- **SPAN 324** Latin America Today 3
- or **SPAN 322** Latin American Civilization 3

(4-0) Cr. 4. F.S. Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement  
Bridge course between 200- and 300-level Spanish courses to prepare students for 300 level courses. Focus on application of advanced grammatical concepts within the context of Hispanic culture. Designed for students who want to continue at the 300 level. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 301. Spanish Grammar and Composition.  
(3-0) Cr. 3. F.S. Prereq: SPAN 202 or placement by departmental exam  
Review and application of grammar concepts in the development of writing skills within the context of Hispanic culture. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 303. Spanish Grammar and Conversation.  
(3-0) Cr. 3. F.S. Prereq: SPAN 202 or placement by departmental exam  
Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 303A. Spanish Grammar and Conversation: Conversation through Culture.  
(3-0) Cr. 3. F.S. Prereq: SPAN 202 or placement by departmental exam  
Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 303B. Spanish Grammar and Conversation: Conversation for Professionals.  
(3-0) Cr. 3. F.S. Prereq: SPAN 202 or placement by departmental exam  
Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 304. Spanish for Business and Professions.  
(3-0) Cr. 3. F.S. Prereq: SPAN 202 or placement by departmental exam (SPAN 301 recommended)  
Introduction to professional communication within a cultural context. Grammar review as needed. Individual projects will focus on special interests. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 314. Introduction to Reading Hispanic Texts.  
(3-0) Cr. 3. F.S. Prereq: SPAN 301  
Critical reading of Hispanic literary and cultural texts. Presentation of techniques and terminology of literary criticism. Study of basic genres such as: narrative, poetry, drama, essay. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 321. Spanish Civilization.  
(3-0) Cr. 3. Prereq: One course at the 300 level  
A survey of the social, political, religious, and cultural history of Spain. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 322. Latin American Civilization.  
(3-0) Cr. 3. Prereq: One course at the 300 level  
A survey of the social, political, religious, and cultural history of Spanish America. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 323. Spain Today.  
(3-0) Cr. 3. Prereq: One course at the 300 level  
A survey of social, political, economic, and cultural topics relevant to contemporary Spain. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 324. Latin America Today.  
(3-0) Cr. 3. Prereq: One course at the 300 level  
A survey of social, political, economic, and cultural topics relevant to contemporary Latin America. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 326. Studies in Hispanic Art or Film.  
(Dual-listed with SPAN 526). (3-0) Cr. 3. Prereq: One course at the 300 level  
Survey of major currents and figures in Spanish and Latin American art and/or film. Taught in Spanish.  
Meets International Perspectives Requirement.

(3-0) Cr. 3. Prereq: SPAN 314  
Introduction to Spanish literature from the earliest times through the Golden Age; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 331. Studies in Spanish Literature from 1700 to the Present.  
(3-0) Cr. 3. Prereq: SPAN 314  
Introduction to Spanish literature from the eighteenth century to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 332. Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century.  
(3-0) Cr. 3. Prereq: SPAN 314  
Introduction to Latin American literature from the earliest times to circa 1900; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 333. Studies in Latin American Literature from the Twentieth Century to the Present.  
(3-0) Cr. 3. Prereq: SPAN 314  
Introduction to Latin American literature from the twentieth century to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 351. Introduction to Spanish-English Translation.  
(3-0) Cr. 3. F.S. Prereq: SPAN 301, SPAN 303 or SPAN 304  
Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 352. Introduction to Spanish Phonology.  
(Cross-listed with LING). (3-0) Cr. 3. F.S. Prereq: SPAN 301, SPAN 303 or SPAN 304  
An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 354. Introduction to Spanish-English Interpretation.  
(Dual-listed with SPAN 554). (Cross-listed with LING). (3-0) Cr. 3. F.S. Prereq: SPAN 351  
Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.  
Meets International Perspectives Requirement.

SPAN 370. Hispanic Topics in English Translation.  
(3-0) Cr. 3.  
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.  
Meets International Perspectives Requirement.

SPAN 370A. Hispanic Topics in English Translation: Agriculture.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Topics vary according to faculty interest. Knowledge and understanding of major cultural, ethical, sociopolitical and economic issues directly related to agriculture and agribusiness in Latin America, Spain, and/or Equatorial Guinea. Readings, discussions, and papers in English. May not be counted as a prerequisite.  
Meets International Perspectives Requirement.

SPAN 370S. Hispanic Topics in English Translation: Hispanic Topics on Women or Feminism.  
(Cross-listed with W S). (3-0) Cr. 3. Repeatable, maximum of 6 credits.  
Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.  
Meets International Perspectives Requirement.

SPAN 395. Study Abroad.  
Cr. 1. Prereq: 2 years university-level Spanish or equivalent  
Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to students' training, enhanced by practical living experience.  
Meets International Perspectives Requirement.
SPAN 401. Advanced Composition and Grammar.
(Dual-listed with SPAN 501). (3-0) Cr. 3. F. Prereq: SPAN 314 and one course at the 320-level or above
Advanced study of Spanish grammar and syntax. Students’ writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 440. Seminar on the Literatures and Cultures of Spain.
(Dual-listed with SPAN 540). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)
Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 441. Seminar on Cervantes and the Golden Age.
(Dual-listed with SPAN 541). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)
Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 445. Seminar on the Literatures and Cultures of Latin America.
(Dual-listed with SPAN 545). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 332 and SPAN 333 recommended)
Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 462. Contrastive Analysis of Spanish/English for Translators.
(Cross-listed with LING). (3-0) Cr. 3. Prereq: SPAN 351
Linguistic study of the major differences between the Spanish and English grammatical systems and their applications in the translation of Spanish to English. Taught in Spanish.

SPAN 463. Hispanic Dialectology.
(Cross-listed with LING). (3-0) Cr. 3. Prereq: SPAN 352
Intensive study of the phonology, morphosyntax and lexicon of the Hispanic dialects of Spain and Latin America in their historical context. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 490. Independent Study.
Cr. 1. Prereq: 6 credits in Spanish and permission of department chair
Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits in Span 490 may be counted toward graduation.

SPAN 499. Internship in Spanish.
Cr. 1. F.S.SS. Prereq: 9 credits of Spanish at the 300 level; permission of advisor and WLC Internship Coordinator
Work experience using Spanish language skills in the public or private sector, combined with academic work under faculty supervision. Up to 3 credits may apply toward the major. Available only to majors and minors.

SPAN 501. Advanced Composition and Grammar.
(Dual-listed with SPAN 401). (3-0) Cr. 3. F. Prereq: SPAN 314 and one course at the 320-level or above
Advanced study of Spanish grammar and syntax. Students’ writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 526. Studies in Hispanic Art or Film.
(Dual-listed with SPAN 326). (3-0) Cr. 3. Prereq: 6 credits in Spanish literature or culture at 400 level
Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540. Seminar on the Literatures and Cultures of Spain.
(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)
Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 541. Seminar on Cervantes and the Golden Age.
(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)
Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 545. Seminar on the Literatures and Cultures of Latin America.
(Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 332 and SPAN 333 recommended)
Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 554. Introduction to Spanish-English Interpretation.
(Dual-listed with SPAN 354), (Cross-listed with LING). (3-0) Cr. 3. F.S. Prereq: SPAN 351
Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 590. Special Topics in Spanish.
Cr. 1. Prereq: Permission of instructor; 6 credits of 400 level Spanish
Meets International Perspectives Requirement.

SPAN 590A. Special Topics in Spanish: Literature or Literary Criticism.
Cr. 1-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590B. Special Topics in Spanish: Linguistics.
Cr. 1-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590C. Special Topics in Spanish: Language Pedagogy.
Cr. 1-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590D. Special Topics in Spanish: Civilization.
Cr. 1-4. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Spanish

Courses primarily for graduate students, open to qualified undergraduate students

SPAN 501. Advanced Composition and Grammar.
(Dual-listed with SPAN 401). (3-0) Cr. 3. F. Prereq: SPAN 314 and one course at the 320-level or above
Advanced study of Spanish grammar and syntax. Students’ writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 526. Studies in Hispanic Art or Film.
(Dual-listed with SPAN 326). (3-0) Cr. 3. Prereq: 6 credits in Spanish literature or culture at 400 level
Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540. Seminar on the Literatures and Cultures of Spain.
(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)
Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.
Meets International Perspectives Requirement.

SPAN 541. Seminar on Cervantes and the Golden Age.
(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)
Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.
Meets International Perspectives Requirement.
SPAN 545. Seminar on the Literatures and Cultures of Latin America. (Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: SPAN 330, SPAN 331, SPAN 332, SPAN or SPAN 333. (SPAN 332 and SPAN 333 recommended) Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 554. Introduction to Spanish-English Interpretation. (Dual-listed with SPAN 354). (Cross-listed with LING). (3-0) Cr. 3. F.S. Prereq: SPAN 351 Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish. Meets International Perspectives Requirement.

SPAN 590. Special Topics in Spanish. Cr. 1. Prereq: Permission of instructor; 6 credits of 400 level Spanish.

Department of Ecology, Evolution, and Organismal Biology

Undergraduate Study

Within the Biological Sciences, studies of ecology, evolution, and organismal biology are essential in understanding the complex relationships of life on Planet Earth. Ecology focuses on the interactions among organisms as well as the interactions between organisms and their physical environments. Evolutionary theory addresses the origins and interrelationships of species. Organismal biology studies both the diversity of biological organisms and the structure and function of individual organisms.

The EEOB Department offers several undergraduate majors with other departments. Students interested in the areas of ecology, evolution, and organismal biology should major in Biology, Environmental Science, or Genetics. The Biology Major is administered and offered jointly by the EEOB and GDCB departments. The faculty of EEOB, together with those in GDCB and BBMB, administer and offer the Genetics Major. Faculty in EEOB, in cooperation with faculty from other departments on campus, administer and offer the Environmental Science Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. Faculty in the EEOB Department also teach undergraduate courses at Iowa Lakeside Laboratory (see the Iowa Lakeside Laboratory listing).

The Biology Major, the Environmental Science Major, and the Genetics Major prepare students for a wide range of careers in biological sciences. Some of these careers include conservation of natural resources and biodiversity, human and veterinary medicine, and life science education. These majors are also excellent preparation for graduate study in systematics, ecology, biological diversity, physiology, and related fields. Faculty members in EEOB contribute to the undergraduate courses listed below. The titles and descriptions of these courses are in the Biology section of the catalog.

Graduate Study

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. EEOB graduate students major in one of several interdepartmental majors including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Environmental Science, Genetics, Interdisciplinary Graduate Studies, Neuroscience, and Toxicology. The EEOB faculty members are active in the interdepartmental graduate majors and teach a wide range of graduate courses. Faculty research programs cover a wide range of specializations including physiology and physiological ecology; microbiology; animal behavior; evolutionary genetics of plants and animals; modeling of evolutionary and ecological processes; plant and animal systematics; neurobiology; developmental biology; aquatic and wetland ecology; functional, population, community, landscape, and ecosystem ecology; and conservation biology. For further information on faculty research interests check the EEOB web site (www.eeob.iastate.edu). Some EEOB faculty teach graduate courses at Iowa Lakeside Laboratory. Field Station courses are also available through the Gulf Coast Marine Laboratory and the Organization for Tropical Studies (see the Biology listing).

Prospective graduate students need a sound background in the physical and biological sciences, as well as in mathematics and English. Interested students should check the Graduate Program link from the EEOB web site for specific admission procedures and updates. The department and majors require submission of Graduate Record Examination (GRE) aptitude test scores. Subject area GRE scores are recommended. International students whose native language is not English should take the Test of English as a Foreign Language (TOEFL).
language is other than English must also submit TOEFL or IELTS scores with their application.

Students who are enrolled in the interdepartmental graduate majors with EEOB affiliation are required to participate in departmental seminars, to participate in research activities, and to show adequate progress and professional development while pursuing their degree. For both the M.S. and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. Requirements and guidelines for study are provided by the Graduate College, the EEOB faculty, and the individual student’s major professor and Program of Study Committee. General information about graduate study requirements can be found at the web site for the Graduate College and requirements for the interdepartmental majors can be found by following the links from the EEOB web site above. Although not a formal requirement, the EEOB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Genetics, Development and Cell Biology

The Department of Genetics, Development and Cell Biology (GDCB) is dedicated to biological discovery and excellence in undergraduate and graduate education. The research and teaching mission of the department is to achieve a greater understanding of fundamental principles of life by focusing on basic cellular and subcellular processes, including genome dynamics, cell structure and function, cellular response to environmental and developmental signals, and molecular mechanisms of development. Recognizing that student education is of paramount importance, GDCB strives for excellence in teaching and research. GDCB plays a leading role in undergraduate and graduate training through a variety of activities including traditional courses, undergraduate internships in research laboratories, and advanced graduate seminar and literature-based courses. Innovative approaches to learning are emphasized throughout the curriculum.

Undergraduate Study

The GDCB Department offers undergraduate majors in conjunction with other departments. Students interested in the areas of genetics, development and cell biology should major in Biology, Genetics or Bioinformatics and Computational Biology (BCBio). The Biology Major is administered and offered jointly by the GDCB and EEOB departments. The GDCB faculty, together with those in EEOB and BBMB, administer and offer the Genetics Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. BCBio is administered by GDCB and the Department of Computer Science and Mathematics, and is available through the College of Liberal Arts and Sciences.

The Biology Major and the Genetics Major prepare students for a wide range of careers in biological sciences. Training in Biology or Genetics may lead to employment in teaching, research, or any of a variety of health-related professions. Some of these careers include biotechnology, human and veterinary medicine, agricultural sciences and life science education. BCBio majors are prepared for careers at the interfaces of biological, informational and computational sciences in the above fields. These majors are also excellent preparation for graduate study in bioinformatics, molecular genetics, cell and developmental biology, neuroscience and related fields. Faculty members in GDCB contribute to the undergraduate courses listed below. The full descriptions of these courses can be found in the Biology, Genetics and BCBio sections of the catalog.

Graduate Study

Understanding the genetic blueprint and the functions of cells is critical to virtually all aspects of biology. The basic mission of the Department of Genetics, Development and Cell Biology is to achieve a greater understanding of fundamental principles of life. The GDCB faculty and students conduct hypothesis-driven research into the biology of animals, plants and microbes. While research in GDCB is often based on discovery and analysis of molecular mechanisms of life processes, a true understanding of living organisms will ultimately require the integration of molecular mechanisms in the context of dynamic structural components of the living cell. Thus, research efforts within GDCB use molecular, genetic, biochemical, computational and imaging techniques to study systems at increasingly complex levels of organization.

GDCB faculty contribute to a broad but integrated array of cutting-edge research topics, implementing interactive and multidisciplinary approaches that bridge conventional boundaries, and incorporating experimental and computational biology as complementary approaches. Examples include using genetics and molecular biology to investigate the cellular basis of development, or combining biochemical and computational approaches to study basic subcellular functions, signal transduction or metabolism.

The faculty in the GDCB department train graduate students in several interdepartmental majors/programs including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Immunobiology, Plant Biology, Interdisciplinary Graduate Studies, Microbiology, Molecular, Cellular and Developmental Biology, Neuroscience and Toxicology. Graduate work leading to a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees are available.

Prospective graduate students need a sound background in the physical and biological sciences, as well as Mathematics and English. Interested students should check the links on the GDCB web site (www.gdcb.iastate.edu/) for specific admissions procedures and the latest information about individual faculty and their research programs. The interdepartmental majors and programs require submission of Graduate Record Examination (GRE) aptitude test scores. Advanced GRE scores are recommended. International students whose native language is other than English must also submit TOEFL scores with their application.

Students who are enrolled in the interdepartmental graduate majors and who have affiliations with GDCB are required to actively participate in seminars, research activities, and to show adequate progress and professional development while pursuing their degree. Completion of either the M.S. or Ph.D. degrees requires that research conducted by the student culminates in the writing and presentation of a thesis or dissertation. The Graduate College, the GDCB Faculty, and the individual student’s major professor and Program of Study Committee provide requirements and guidelines for study. General information about graduate study requirements can be found at the web site for the Graduate College (www.grad-college.iastate.edu) and requirements for the interdepartmental majors can be
found by following the links from the GDCB web site above. Although not a formal requirement, the GDCB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Geological and Atmospheric Sciences

www.ge-at.iastate.edu/

The Department of Geological and Atmospheric Sciences seeks to establish innovative teaching and outstanding research programs that apply fundamental principles of physics, chemistry, biology, and mathematics to cross-disciplinary problems related to the earth sciences. As a basis for this mission, the Department maintains strength in fundamental topics of geology, meteorology, and hydrology that involve investigating the dynamic nature of the structure, composition, and interactive processes of the Earth and its component systems. Study of these systems includes the application of scientific principles to a wide range of environmental, agricultural, and natural-resource problems, so that through its teaching and research activities, the department fosters a global perspective on the geosciences. Individual elements of study, such as atmospheric-circulation patterns, water cycling, geochemical interactions, glacier dynamics, or rock formation, are viewed not only in terms of their own intrinsic value, but also in terms of their role in the evolving earth system. The Department recognizes that many fundamental advances in the geosciences are occurring at the interfaces with other disciplines and between subdisciplines in the field, so department faculty strive to form mutually beneficial research and educational collaborations with other programs at Iowa State University and other institutions around the world by taking a leadership position in solving problems at these interfaces.

Greenlee School of Journalism and Communication

http://www.greenlee.iastate.edu/

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

- Advertising Bachelor of Arts (ADVRT)
- Journalism and Mass Communication Bachelor of Science (JL MC)
- Public Relations Bachelor of Science (P R)

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit has been continuously accredited since 1948. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek a second major or minor in the school. All students are required to take a second major or minor outside the school as an area of expertise. A Designated Area of Concentration (DAC) outside the school may be used in place of a minor or second major with faculty approval.

Undergraduate Study

Students who complete degrees in advertising, journalism and mass communication, or public relations are expected to develop competencies in 12 key areas:

- understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
- demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
- demonstrate an understanding of gender, race, ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
- demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
- understand concepts and apply theories in the use and presentation of images and information;
- demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
- think critically, creatively and independently;
- conduct research and evaluate information by methods appropriate to the communications professions in which they work;
- write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;
- critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
- apply basic numerical and statistical concepts;
- apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

Communication Proficiency Requirement

All majors in the School must earn a grade of C or better in ENGL 150 Critical Thinking and Communication (or be exempt) and ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H). These additional requirements apply:

Advertising majors must earn a C+ or better in:

<table>

African and African American Studies

Interdepartmental Undergraduate Program

Undergraduate Study

African and African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans’ experience and African American contributions to American culture. Students in the program analyze and learn about African American experiences through the study of history, literature, art, religion, and society. They gain knowledge and develop skills and sensitivities to help them function effectively in today’s diverse society.

African and African American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university’s diversity requirement. Students can minor or even design their own Interdisciplinary Studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

A minor in African and African American Studies requires six courses in the program with a minimum of 18 credits, including AF AM 201 Introduction to African American Studies Introduction to African American Studies and AF AM 460 Seminar in African American Culture Seminar in African American Culture. The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Graduate Study

Several courses can be applied to a graduate program as electives.

Air Force Aerospace Studies

Undergraduate Study

The objectives of the Department of Air Force Aerospace Studies (AFAS) are to provide qualified students the opportunity to earn a commission as an active duty
office in the United States Air Force (USAF) and to build better citizens for those not interested in serving in the USAF. Entry into the Air Force Reserve Officer Training Corps (AFROTC) program is not dependent on departmental major or year in the university, and is open to all qualified students.

The curriculum is divided into two basic phases: the general military course (GMC) and the professional officer course (POC). The GMC is introductory and consists of four consecutive one-hour courses normally taken during the freshman and sophomore years.

Selection for the POC is on a competitive basis, and cadets enrolling in this course must meet certain academic, mental, physical, and moral standards. Students who have completed the GMC will compete for an enrollment allocation to participate in Field Training, a four-week summer program which provides a concentrated experience in the Air Force environment. The training program includes officer training, career orientation, expeditionary training, an introduction to typical base functions, and physical training. Prior to entry into the POC, students must successfully complete Field Training.

Upon enrollment and acceptance into the POC, all cadets are required to complete a contractual agreement with the Air Force, which obligates them to a minimum of four years of active duty as an USAF officer. Qualified cadets may compete for selection for rated duty as a pilot, combat systems operator (CSO), remotely-piloted aircraft (RPA) operator, and air battle manager (ABM). Rated duty officers receive additional specialized instruction, requiring an active duty commitment of six years for CSO, RPA, and ABM operators and 10 years for pilots.

AFROTC scholarships are available and provide payment of full tuition and fees. In addition, scholarship cadets receive a $250-$400 monthly subsistence allowance and $600 per year book allowance. Scholarships can be awarded for periods of two, three, or four years, with up to one additional year for qualified applicants in selected majors. Upon acceptance of a scholarship, the student executes a contract with the USAF, and students who fail to observe the contract terms may be called to active duty in an enlisted grade or be required to repay monies received from the Air Force. To determine eligibility and initiate application procedures for the scholarship program, interested students should contact the AFAS department.

The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or more of the ROTC programs. At least six credits must be in courses numbered 300 or above.

### American Indian Studies

#### Interdepartmental Undergraduate Minor

The American Indian Studies Program is a cross-disciplinary program in the College of Liberal Arts and Sciences that emphasizes perspectives from American Indian Studies, Anthropology, art, history, literature, political science and sociology. The primary goal of the American Indian Studies program is to conduct interdisciplinary investigations of the intellectual practices, lived history, values, political status, rights, and responsibilities of tribal nations. Students have the opportunity to learn about the cultural heritage of American Indians, their historical relationship with non-Indians, and their participation in contemporary American society. They analyze the tropes and techniques common to American Indian oral and written literatures; compare and contrast American Indian cultures to mainstream and other world cultures; and, examine the contributions and approaches American Indians make to modern social and environmental issues.

The courses in the American Indian Studies Program provide added background for students whose career interests may include multicultural education, human services, legal services, or public administration. Most American Indian Studies courses meet the university-wide U.S. Diversity requirement.

Students can earn a minor in American Indian Studies or can build an Interdisciplinary Studies major in the College of Liberal Arts and Sciences. The minor in American Indian Studies is 15 credits and includes:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM IN 210</td>
<td>Introduction to American Indian Studies</td>
<td>3</td>
</tr>
<tr>
<td>Two courses chosen from the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>AM IN 310</td>
<td>Topics in American Indian Studies</td>
<td>3</td>
</tr>
<tr>

</tr>
</tbody>
</table>

And 6 additional credits of AM IN coursework.

### Military Science

The Military Science Department does not offer an academic degree and is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program. The mission of the department is derived directly from regulations governing Army Reserve Officers’ Training Corps (AROTC), which are issued by the Army Cadet Command and Army Training and Doctrine Command and cannot be modifiable by this department.

#### Freshmen Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of the Army, Roles and Origins of the Army, Army Customs and Traditions, Branches (Jobs) in the Army and Military Operations and Tactics.

#### Sophomore Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of an Officer, Role of the Officer and Noncommissioned Officer, communications, code of conduct, first aid, principles of war and military operations and tactics.

#### Junior Year Learning Outcomes

The student will have a working knowledge of the following areas: Small Unit Training, Command and Staff Functions, Nuclear, Biological and Chemical Warfare, Law of War, Weapons, Human Behavior, Math Reasoning, Computer Science and Military Operations and Tactics.

#### Senior Year Learning Outcomes

The student will have a working knowledge of the following areas: Transition to Becoming an Officer, Military Justice, Intelligence and Electronic Warfare, Army Personnel Management, Army Logistics, Post and Installation Support and Military Operations and Tactics.

The mission of the Army Reserve Officers’ Training Corps (AROTC) is to commission the future leaders of the United States Army. Since ROTC produces over 65 percent of the Army’s Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of profession/professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the U.S. Army. A commission as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of the method of training, officers in today’s Army can be proud to know that they are doing their share in the defense of the United States of America. The ISU Military Science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 101-290) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is a prerequisite for the advanced program. Financial assistance is available on a competitive basis. Persons interested in Military Science should visit the department located on the second floor of the Armory (east side).

#### Basic Program

These courses are primarily for freshmen and sophomore students and, except for persons with prior military service and basic training graduates, are required for entry into the advanced program. Each scholarship cadet in the Basic Program receives a monthly allowance (freshmen $300; sophomore $350) for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

#### Advanced Program

These courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly allowance (junior $450; senior $500) for up to 10 months. These courses are primarily taught to academic juniors and seniors. Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance.
standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class and laboratory hours in a separate course, M S 150 Army Physical Readiness. Students are encouraged to attend and participate in this class.

Professional Military Science Education (PME) coursework outside of the military science curriculum is also a precondition to commissioning. The PME component consists of Basic Academic proficiency standards. These standards are explained to prospective students as they consider enrollment in the advanced program. Army Uniforms will be worn at least once a week. The 300-level courses are designed to prepare cadets for the Leader Development and Assessment Course, which is a 32 day summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the United States Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above.

**Military Studies**

**Interdepartmental Minor**

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers’ Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire for development in mind and character is instilled in students so they may assume the highest responsibilities of command, citizenship, and government. Finally, students are imbued with the highest ideals of duty, honor, and loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Military Science, Naval Science and Air Force Aerospace departments accomplish this mission through detailed courses of instruction occurring throughout a typical student’s college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the military. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while students in Naval Science develop an appreciation for naval surface and maritime engineering. The Air Force Aerospace Studies curriculum familiarizes students with Air Force structure and doctrine. On a broader scale, all three departments offer courses promoting leadership and sound management practices that investigate the military’s role in American domestic and foreign policy, and can be employed in any career path.

Military Science, Naval Science and Air Force Aerospace courses are offered in the interdepartmental Military Studies program in the following participating departments: Military Science, Naval Science and Air Force Aerospace.

**Undergraduate Study**

Undergraduate study in this program provides the student with an opportunity to develop a minor in Military Studies. The three Iowa State University ROTC programs offer over 64 credits of specialized coursework. The minor in Military Studies is open to any Iowa State University student.

Undergraduate students may minor in Military Studies by taking 15 credits of coursework from a combination of any of the three ROTC programs—regardless of whether or not a commission in the Armed Forces is tendered. At least 6 of the 15 credits must be in courses numbered 300 or above.

**Naval Science**

The Department of Naval Science is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program but does not offer an academic degree. The courses offered by the Department are developed by the Department of the Navy. The Naval Science Department and Naval ROTC (NROTC) Program develop individuals mentally, morally, and physically, and imbue in them the highest ideals of duty and loyalty, in order to commission them upon graduation as Navy and Marine Corps officers. Program graduates possess a basic professional background, are motivated towards careers in the Naval Service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship, and government. Emphasis is placed on the core values of courage, honor and commitment.

Naval Science courses are open to any ISU student who has met the course prerequisites. To participate in the Naval ROTC Program, students must apply through one of two programs: the NROTC Scholarship Program (full scholarship; which includes a book stipend, tuition, laboratory fees, uniforms, and a monthly stipend), or the College Program (non-scholarship, with limited financial assistance). Applicants for the Scholarship Program are selected through a comprehensive nationwide competition. Applicants for the College Program are selected by the Professor of Naval Science from among students already in attendance at, or selected for admission by, the university. The College Program involves limited financial assistance by application for a 2 or 3-year scholarship. Upon application, students choose between the Navy Option and Marine Corps Option, for the purposes of training focus. NROTC students pursue their studies like other university students except that they must meet certain additional requirements that will prepare them to serve as naval officers upon graduation. A Marine Corps Option student incurs a minimum 4-year active duty military obligation as a commissioned officer after graduation; a Navy Option student incurs a minimum 5-year active duty obligation.

Further information is available from the Professor of Naval Science, Iowa State University.

While in the NROTC Program, Scholarship Program students will participate (with pay) in at-sea training cruises during the summer. College Program students will participate in at-sea training during the summer between their Junior and Senior year only. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities also include weekly leadership laboratory periods and opportunities for involvement in several student societies.

**Undergraduate Study**

Naval Science courses are primarily for those students in the NROTC program, however, other university students may also enroll. Students enrolled in the NROTC program must fulfill the following requirements:

<table>

1. In addition to the normal Naval Science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses. The Leadership Lab emphasizes human relations principles, teaches basic military formations, movements, commands, courtesies, and honors, and provides practice in unit leadership. Non NROTC program students enrolled in Naval Science courses are not required to participate in laboratory periods.

2. The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from any of the three ROTC programs offered on campus. At least 6 credits must be in courses numbered 300 or above.

For basic undergraduate curriculum requirements, see Liberal Arts and Sciences, Curriculum; or Engineering, Curricula.

**Officer Education Programs**

Iowa State University offers Reserve Officers Training Corps (ROTC) programs for the professional training of officers for the Army, Air Force, Navy and Marines.

The purpose of these programs is to provide an avenue for interested students to become officer cadre of regular officers in one of the United States military services, and the university regards this training as the foundation for possible careers in the military. The Air Force and the Navy require a period of active duty service
U.S. Latino/a Studies Program

U.S. Latino/a Studies is devoted to the study of Mexican Americans, Puerto Ricans, Cuban Americans and other groups of people living in the United States who trace their ancestry to the Spanish-speaking countries of Latin America, and who comprise the largest and fastest growing ethnic groups in the United States. U.S. Latino/a Studies is to be distinguished from Latin American Studies; the latter focuses on people living in Latin America. The methodologies of study in U.S. Latino/a Studies are cross-disciplinary, drawing from the methods established in psychology, anthropology, sociology, political science, economics, religion, philosophy, history, literary studies, and other fields.

The minor in U.S. Latino/a Studies is an excellent addition to any major. Virtually any professional, in any field, working throughout the United States, can benefit from a greater understanding of the Latino/a communities in our nation.

Students can also build a major in U.S. Latino/a Studies within the Interdisciplinary Studies major administered by the College of Liberal Arts and Sciences.

US Latino/a Studies Minor

The minor in US Latino/a Studies requires a minimum of 15 credit hours. University policy indicates that minors must include at least 9 credits that are not applied to any other degree requirement.

Required course work in core courses (9 credits total):

- **US LS 211** Introduction to U.S. Latino/a Studies 3
- And six credits from the following: 6
  - **US LS 240** Latino/a History
  - **US LS 332** The Latino/Latina Experience in U.S. Society
  - **US LS 342** Religion and U.S. Latino/a Literature
  - **US LS 343** Latin American Government and Politics
  - **US LS 344** U.S. Latino/a Literature
  - **US LS 347** U.S. Latino/a Psychology
  - **US LS 473** Civil Rights and Ethnic Power
  - **US LS 490** Independent Study

**Total Credits** 9

Six (6) additional credits from the following list (if not taken to satisfy area above):

- **US LS 240** Latino/a History 3
- **US LS 332** The Latino/Latina Experience in U.S. Society 3
- **US LS 342** Religion and U.S. Latino/a Literature 3
- **US LS 343** Latin American Government and Politics 3
- **US LS 344** U.S. Latino/a Literature 3
- **US LS 347** U.S. Latino/a Psychology 3
- **US LS 473** Civil Rights and Ethnic Power 3
- **US LS 490** Independent Study 1-3
- **ANTHR 323** Topics in Latin American Anthropology 3
- **HIST 340** History of Latin America I 3
- **HIST 341** History of Latin America II 3
- **SPAN 304** Spanish for Business and Professions 3
- **SPAN 322** Latin American Civilization 3
- **SPAN 324** Latin America Today 3
- **SPAN 445** Seminar on the Literatures and Cultures of Latin America 3

**Notes:**

1. The list of acceptable courses may include courses not currently listed above. Contact the Director of US Latino/a Studies for information on eligible courses.
2. A limit of six (6) credits of approved Spanish courses (304, 322, 324, 445) may be used as supporting courses for the minor. Spanish course credits counted toward the minor may not be applied to any other degree requirement.
3. A maximum of 3 credit hours of US LS 490 (Independent Study) may be applied toward the minor.

Interdisciplinary Studies Major, Track in U.S. Latino/a Studies

Students can work with the US LS program director and the Interdisciplinary Studies adviser to develop an individualized major program. In addition to meeting the general requirements for the Interdisciplinary Studies major, students wishing to complete a track in U.S. Latino/a Studies must complete a minimum of 36 credits in the area of U.S. Latino/a Studies. At least 15 of the 36 credits must be in courses numbered 300 and above and 6 credit hours must be earned at the 400-level. Students must also meet the upper-level communication proficiency requirement by taking English 302 or 314.

Required Courses (36 credits)

Prerequisite for all US LS courses: 3 credit hours:

- **US LS 211** Introduction to U.S. Latino/a Studies 3
- **HIST 340** History of Latin America I 6
- **HIST 341** History of Latin America II 6
- **US LS 332** The Latino/Latina Experience in U.S. Society 3
- **US LS 344** U.S. Latino/a Literature 6
- **US LS 347** U.S. Latino/a Psychology 3
- **ANTHR 323** Topics in Latin American Anthropology 3
- **SPAN 322** Latin American Civilization 3
- **SPAN 324** Latin America Today 3
- **US LS 473** Civil Rights and Ethnic Power 3
- **US LS 490** Independent Study 3

Additional Credits for the Major (if not taken to satisfy areas above; four of the following courses): 12

- **US LS 240** Latino/a History 3
- **US LS 332** The Latino/Latina Experience in U.S. Society 3
- **US LS 342** Religion and U.S. Latino/a Literature 3
- **US LS 343** Latin American Government and Politics 3
- **US LS 344** U.S. Latino/a Literature 3
- **US LS 347** U.S. Latino/a Psychology 3
- **US LS 473** Civil Rights and Ethnic Power 3
- **US LS 490** Independent Study 3
- **ANTHR 323** Topics in Latin American Anthropology 3
- **HIST 340** History of Latin America I 3
- **HIST 341** History of Latin America II 3
- **SPAN 322** Latin American Civilization 3
- **SPAN 324** Latin America Today 3
- **SPAN 445** Seminar on the Literatures and Cultures of Latin America 3

Notes:

1. The list of acceptable courses may include courses not currently listed above. Contact the Director of US Latino/a Studies for information on eligible courses.
2. The student must have an average grade of C in the required courses of the major.
3. Fulfillment of the foreign language requirement with Spanish is strongly recommended, but not required. A limit of six (6) credits of approved Spanish courses (304, 322, 324, 445) may be used as supporting courses.
College of Veterinary Medicine

Lisa K. Nolan, Dean
Claire B. Andreasen, Associate Dean for Academic and Student Affairs
vetmed.iastate.edu/

Departments of the College

- Biomedical Sciences
- Veterinary Clinical Sciences
- Veterinary Diagnostic and Production Animal Medicine
- Veterinary Microbiology and Preventive Medicine
- Veterinary Pathology

Other units of the college include the Lloyd Veterinary Medical Center, Veterinary Diagnostic Laboratory, Veterinary Medical Research Institute, Veterinary Education and Technology Services and Office of Curricular and Student Assessment. The college participates in interdisciplinary graduate programs in genetics; molecular, cellular and developmental biology; toxicology; immunobiology; and neuroscience.

Objectives of the Curriculum

The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care providers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in small animal medicine and surgery, equine medicine and surgery, food animal medicine and surgery, and production animal medicine. Companion animal medicine and surgery are provided within the regionally recognized referral hospital through the community practice unit and veterinary service. The college is located in one of the most intensive livestock producing areas in the United States. Because of this, students engage in extensive food supply veterinary medicine experiences and numerous diagnostic cases.

The professional curriculum is a four-year course of study leading to the doctor of veterinary medicine degree. Each of the first three years of the curriculum consists of two semesters while the fourth year has three semesters. Students are admitted into the professional curriculum after completing a minimum of 60 semester credits of required undergraduate coursework.

A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational program. Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent DVM/MS, DVM/PhD, DVM/MPH and DVM/MBA programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor’s degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

Pre-veterinary Medicine Preparation

Admission Requirements

The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice. Undergraduate students are strongly encouraged to complete a bachelor’s degree before applying to the College of Veterinary Medicine. Because veterinarians have varied career options, when deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may find benefit in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College web site at www.vetmed.iastate.edu.

Applicants for admission to the College of Veterinary Medicine must have attended an accredited college or university, have completed 40 semester credits prior to the deadline for filing an application for admission, and have completed 60 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the end of the fall term in which the applicant applies. However, if necessary, the applicant may complete up to two required science courses after the fall term providing a transcript with the courses and grades listed is postmarked by July 1 of the year the applicant would enter. There is no maximum number of non-science required courses that may be completed but the deadline of having a transcript with these course grades posted by July 1 also applies. The July 1 deadline for transcripts and grades is firm.

Required courses must be completed with a grade of C (2.00) or better. A grade of C- (1.67) does not fulfill the requirement.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

English Composition 6 cr.

One year of composition or writing emphasis courses. May include business or technical writing. Two of the following courses would fulfill the requirement.

<table>

Total Credits |
Organic Chemistry with Laboratory* 7 cr.
One year series with one semester lab.
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
Total Credits 7

Biochemistry* 3 cr.
One semester (no lab required). One of the courses below will fulfill the requirement.
BBMB 301 Survey of Biochemistry 3
BBMB 316 Principles of Biochemistry 3
BBMB 420 Physiological Chemistry 3

General Physics with Laboratory* 4 cr.
First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound.
PHYS 111 General Physics

General Biology with Laboratory* 8 cr.
Two semester series with lab each semester. A Bachelor’s degree in Biology fulfills this requirement.
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
Total Credits 8

Genetics * 3 cr.
Must include Mendelian and molecular genetics. One of the courses below will fulfill the requirement.
BIOL 313 Principles of Genetics 3
GEN 320 Genetics, Agriculture and Biotechnology 3
Total Credits 6

Mammalian Anatomy or Physiology* 3 cr.
Human anatomy or physiology will also fulfill this requirement (no lab required).
One of the courses below will fulfill the requirement
B M S 329 Anatomy and Physiology of Domestic Animals 3
AN S 214 Domestic Animal Physiology 3
BIOL 155 Human Biology 3
BIOL 255 Fundamentals of Human Anatomy 3
BIOL 335 Principles of Human and Other Animal Physiology 4

Humanities or Social Sciences 8 cr.
Electives 8 cr.
Total Credits Required 60 cr.
Courses above marked with an asterisk (*) are the required science courses. The required science course GPA is calculated from these courses.
Credits in the previously specified courses will normally be earned on the traditional four-letter grading system with A as the highest grade and D as the lowest passing grade. All required courses must be completed with a grade of C (2.0) or better. It is generally expected that required courses have been completed within the past eight (8) years. AP or CLEP credits must be documented by original scores submitted to the College of Veterinary Medicine. CLEP credits may be accepted only for arts, humanities and social sciences. Credits in the preceding specified courses will not be accepted if earned under the pass-not pass grading system or similar options.

Curriculum in Veterinary Medicine

Graduation Requirements
To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D while enrolled in the College of Veterinary Medicine, and have at least a 2.0 grade-point average in the veterinary medicine curriculum.

Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students choose one of four options for additional study, including the Small Animal, Equine, Mixed Animal, or Food Animal Options. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

The following rotations are required of all fourth year students in addition to the requirements of the track they choose. A complete listing of track-specific requirements can be found at: http://vetmed.iastate.edu/academics/curriculum:

Application and Admission
Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the VMCAS website (www.aavmc.org) under VMCAS. Those applying through VMCAS also need to complete the ISU Supplemental Application found at the College of Veterinary Medicine website. The Iowa resident deadline for filing the VMCAS application, supplemental application, processing fee, GRE scores, evaluations and transcripts is September 1. The deadline for all other applicants is October 1.

Any student wishing to use international coursework (including study abroad) to fulfill a pre-veterinary requirement must provide a transcript from the foreign institution.

A list of courses in progress at the time of submission and/or scheduled for completion by the end of spring term should accompany the supplemental application. Undergraduate college credits must average at least 2.50 on a 4.00 grading scale for the application to be eligible for review. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. GPA, Graduate Record Exam (GRE) general test score (the GRE for Iowa residents must be received by September 1, for all other applicants, it must be received by October 1), animal and veterinary experience, essays, recommendations and personal development (leadership, citizenship, etc.) are given consideration in the selection of candidates. Final selection of candidates is made after an on-campus interview. Approximately one-half of the positions available are reserved for residents of Iowa. The College of Veterinary Medicine has implemented a Professional Program in Veterinary Medicine with the University of Nebraska-Lincoln for Nebraska residents and contracts with the states of North Dakota, South Dakota and Connecticut. A number of positions are also available to residents of other states. A few highly qualified international students may be accepted and are considered in the non-resident/non-contract applicant pool. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at www.vetmed.iastate.edu and click on APPLY VET MED.

Biomedical Sciences
Professional Program of Study

For professional curriculum in veterinary medicine leading to the degree of doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

A good foundation in anatomy, physiology, and pharmacology of animals is necessary to understand the mechanisms of animal disease processes and their treatment. Study of mammalian anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems relevant to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacology to include pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

Graduate Programs

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit. Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer’s disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nematode ion-channels, Parkinson’s disease, pharmacology of schistosomiasis, pharmacology of salmonellosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells. The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

Veterinary Clinical Sciences

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree of doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The curriculum of veterinary clinical sciences explores the preventive health care, diagnosis and treatment of diseases of companion and competitive athletic animals. Veterinary specialists lead didactic and laboratory based learning in the clinical sciences. Experiential based courses conducted through the Veterinary Medical Center during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge.

Graduate Study

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

World languages and cultures requirements may be established by the student’s program of study committee.

Veterinary Diagnostic and Production Animal Medicine

Program of Study

For the professional curriculum in veterinary medicine leading to the degree of doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

Courses in veterinary diagnostic and production animal medicine provide students with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, welfare, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or small ruminant production medicine. Elective courses may include preceptorships in private practices, at other veterinary schools, in research and disease control laboratories, or in related agribusinesses.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to acquire and use a broad knowledge base to support the health and improve the production and efficiency of the food supply chain.

Graduate Study in Veterinary Preventive Medicine

Veterinary Preventive Medicine is a multidisciplinary program focused on the study of health and disease in populations. The various disciplines represented in the program are unified by a common approach based on the application of epidemiological methods to problem solving in populations. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases.

Graduate study in Veterinary Preventive Medicine will provide valuable skills and experience to persons interested in public health, food safety, emerging infectious diseases, zoo or wildlife health, and livestock health. A degree in Veterinary
Preventive Medicine may be valuable for individuals considering a future in the biological or pharmaceutical industries, government regulatory agencies, public veterinary practice, international service agencies responsible for population health or progressive private practice.

Veterinary Preventive Medicine is an interdepartmental major administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA:ARS) and the National Veterinary Services Laboratories (USDA:APHIS) located in Ames, Iowa.

Both thesis and non-thesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for non-thesis and a final examination.

Program of Study: Master of Science in Veterinary Preventive Medicine (Thesis Option) 30 credits

Graduate Certificate in Veterinary Preventive Medicine

Veterinary Diagnostic and Production Animal Medicine offers a graduate certificate for DVMs, concurrent DVM students and non-DVMs in allied animal industries in Veterinary Preventive Medicine.

Students in this program are able to select courses that focus in areas of animal welfare, diagnostics, food safety, evidence-based medicine, surgery, pathology, microbiology, epidemiology, public health, statistics and production medicine.

The purpose of the graduate certificate in Veterinary Preventive Medicine for industry professionals is to address the continued and advanced needs of animal health professionals. The certificate enables professionals to gain recognition for a skill set that includes epidemiology, risk assessment, production medicine and animal welfare. A graduate certificate may be used to increase knowledge in a new or emerging area of interest to the candidate. As such, it may be used to formally gain recognition for retraining to meet the needs of today’s food production systems.

The graduate certificate for concurrent DVM students is designed to give additional skills to students planning on working with populations of animals. Using a combination of on-line and dual listed graduate level courses, the program is designed to enable DVM students to complete the certificate while studying for their DVM degree. Students enrolled in any US-based DVM program are able to complete a graduate certificate at ISU using a combination of on-line and transfer graduate level courses.

The graduate certificate is an additional qualification awarded by Iowa State University after successful completion of 15 graduate level credits. A graduate certificate is different from continuing education as the certificate includes an academic transcript from Iowa State University. Students complete the same courses graduate students do with the same expectations for all assignments and exams.

The program is available as a strictly on-line (off campus) delivery method or as a combination of classroom-based and on-line course offerings providing maximum flexibility in scheduling.

Total Credits: 16

Veterinary Microbiology and Preventive Medicine

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccinology are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine and food safety are also emphasized.

Graduate Study

The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethical and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology or veterinary preventive medicine. A non-thesis master’s option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs.

Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical
microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Veterinary Pathology

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

Graduate Study

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. The majority of students choose an area of specialization in veterinary anatomic pathology, veterinary clinical pathology, or veterinary parasitology (http://vetmed.iastate.edu/vpath/academics/graduate-program). The master of science degree is available on a thesis or nonthesis basis in the veterinary pathology major with or without an area of specialization.

For the ACVP training track (residency) of the anatomic or clinical pathology graduate program designed to train veterinary pathologists, the student must have a funded position within the Department of Veterinary Pathology. If the student does not have a funded position or is not enrolled in the departmental degree program, enrollment in courses pertaining to the residency program and activities that support the residency program must have the approval of the Department Chair of Veterinary Pathology and the head of the departmental residency training program.

Graduates have a broad understanding of the mechanistic basis of disease pathogenesis. They are able to communicate with clinicians, other scientists, and the general public on pertinent scientific and public health matters, and with the general public on related science policy matters. Graduates are able to address complex problems facing the agricultural and biomedical sciences, and comparative medicine, and are able to make appropriate diagnoses and investigations of animal diseases. They consider ethical, social, legal, and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals.

Collaborative work is recommended in other departments in the College of Veterinary Medicine or departments or programs in other colleges. The department participates in the interdepartmental programs in Immunobiology (www.immunobiology.iastate.edu/), Toxicology (www.toxicology.iastate.edu/), Genetics (www.genetics.iastate.edu/), and Molecular, Cellular, and Developmental Biology (www.mccb.iastate.edu/).

A veterinary degree (doctor of veterinary medicine or equivalent) is required for training in Veterinary Anatomic Pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 paper-based (213 computer-based; 79 internet based) is required on the TOEFL examination for students whose native language is not English. Scores on the standardized Graduate Record Examination (GRE) General Test are required of students not having a veterinary degree from the United States or Canada. The GRE General Test is strongly recommended for all other applicants. A foreign language requirement will be determined by the student’s program of study committee with the approval of the departmental chair. The Graduate English Examination is a graduate college requirement for native English speakers.

The M.S. thesis degree in veterinary pathology, with or without an area of specialization, consists of written and oral components, is comprehensive and not restricted to the content of graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. The department also offers a combined DVM/Ph.D. program designed for completion of courses for the Ph.D. degree in Veterinary Pathology simultaneously with study in the professional curriculum in the College of Veterinary Medicine. Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.

Graduate College

www.grad-college.iastate.edu/

David K. Holger, Dean
William R. Graves, Associate Dean
Craig Ogilvie, Assistant Dean

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for administering students’ graduate programs, and for promoting research support from various governmental, industrial, and private agencies.

The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master’s and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socio-economic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees master of arts, master of science, and doctor of philosophy are research oriented. In many fields master’s degrees are also awarded without a thesis, but a written report of independent study, called a creative component, is
generally required. Coursework only degrees are available for those individuals interested in advanced study directed toward meeting vocational or professional objectives. Information on other types of Master’s degrees can be found in the Graduate College Handbook, Appendix E, (www.grad-college.iastate.edu/publications/gchandbook/homepage.html)

The Graduate College Handbook lists policies and procedures of the Graduate College. It is available at the Graduate College’s Web site: www.grad-college.iastate.edu. 

Graduate Appointments

Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate work and to promote research. Such appointments and research opportunities are available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship (20 hours per week) permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. These students may also be eligible for tuition scholarship awards (50% of in-state tuition for most master’s students and 100% of in-state tuition for most Ph.D. students and certain terminal masters students). Students who are graduates of a regionally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor’s degree are substantially equivalent to those of Iowa State University, who are admitted in the full or provisional admissions status, and who present the requisite undergraduate or graduate preparation, may apply for these appointments.

Students registered on a restricted basis or those placed on academic probation are ineligible for appointments on a term by term basis but are not normally eligible for a graduate tuition scholarship. Students admitted as nondegree students are not eligible for assistantship appointments. Further information may be obtained by contacting the appropriate graduate program.

The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full time study for the master’s degree or five years for the doctorate, the student will not normally be continued on assistantship support (shorter periods may be stipulated by the student’s program or department).

Postdoctoral Study

Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the Dean of the Graduate College.

Graduate Study by Staff Members

Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section, and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

Distance Education

Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at http://www.distance.iastate.edu. 

Other information about graduate requirements is available in the Graduate College Handbook at http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html.

Doctoral Post Prelim (Continuous Registration)

Even when Ph.D. graduate students have completed course work and residency requirements, they are required to register and pay tuition and fees, whether or not university facilities and equipment are used or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major department or program and pay the appropriate graduate tuition and fees.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are not used, the Ph.D. candidate may register for GR ST 680 Doctoral Post Prelim (Continuous) Registration and pay the Doctoral Post Prelim Registration fee.

The Ph.D. candidate must be aware that registration for GR St 680 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and is not sufficient registration for the term the preliminary or final oral examination is taken; and does not defer student loans.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

Auditing

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve all audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audited courses do not appear on the student’s permanent record unless the “Request for Audit(s) to Appear on Transcript” form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College’s web site at www.grad-college.iastate.edu/forms/forms.html, must be filed with the Graduate College, 1137 Pearson Hall.

After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student’s permanent record as a drop. Audits are not acceptable as registration for loan deferments or meeting visa requirements.

Graduate Courses Taken by Undergraduates

Certain graduate level courses listed in the ISU Catalog may be used in the program of study even though they were taken for graduate credit by the student as an undergraduate at Iowa State University.

The following conditions must be met:

1. The POS committee can request approval from the Dean of the Graduate College that up to nine hours of such credit be applied toward meeting advanced degree requirements (these courses must be clearly marked on the POS).
2. Credits earned in these courses must be in addition to those used to meet requirements for the bachelor’s degree and must have grades of B or better.
3. The student must be classified as an undergraduate and not a nondegree undergraduate (credits taken as a nondegree undergraduate student are not allowed).
4. The Graduation Office (10A Enrollment Services Center) should be contacted to determine that the courses were not taken as a nondegree undergraduate student, were not used toward fulfillment of the undergraduate degree program and were graded B or better.

Courses Taken as a Nondegree Undergraduate Student

A person classified as a “nondegree undergraduate” student may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if he/she is to receive graduate credit for courses.

Graduate Majors

A complete list of all graduate majors can be found on the Graduate College website, http://www.grad-college.iastate.edu/academics/gradprograms/phd.php, with links to admission requirements and program websites.

Admission

All degree-seeking graduate students must have graduated with a bachelor’s or master’s degree from a regionally accredited U.S. institution or from a recognized foreign institution where the requirements for the bachelor’s degree...
or its equivalent are similar to those at ISU. Additionally, each applicant must be accepted at ISU by the major program, the Office of Admissions, and the Graduate College. For information concerning graduate study in a particular academic discipline, prospective students should correspond with the chair of the major program in which they wish to study.

Iowa State University has a shared application process, which means certain items are sent (electronically or in print form) to the Office of Admissions and other items are sent to the graduate program to which the prospective student is applying. Detailed instructions are available at http://www.admissions.iastate.edu/graduate/index.php. Students are also encouraged to check the Program Requirements Web page on the Graduate College Web site at http://www.grad-college.iastate.edu/programs/APprograms.php for mailing instructions and deadlines for each program.

The nonrefundable application fee is $40 ($90 for international applicants). An electronic application is required to apply to ISU’s graduate programs; the form and necessary instructions are available at https://www.admissions.iastate.edu/apply/index.php. The application fee is required of all applicants except those who have attended Iowa State as undergraduates. Iowa State requires official academic records and statements of all degrees earned from all institutions attended since secondary school. Faxed, scanned, and notarized copies are not considered official.

Many programs have very early application deadlines. For more details, check program deadlines at www.grad-college.iastate.edu/programs/APprograms.php.

Categories of Graduate Admission

An applicant pursuing an advanced degree must be recommended by the program in which he/she will be pursuing an advanced degree and must be approved by the Dean of the Graduate College. There are three admission categories for students who wish to pursue an advanced degree:

Full Admission status may be granted to an applicant who either has achieved a grade point average (GPA) of 3.0 or greater (on a 4.0 scale).

Provisional admission status may be granted to applicants who meet the requirements for full admission but have academic or prerequisite deficiencies to remedy. Transfer from provisional admission to full admission status requires the completion of the graduate English requirement, completion of the coursework prescribed to remedy the background deficiencies with a grade average of B or better, and the written recommendation of the major professor and approval by the Dean of the Graduate College.

Restricted admission status may be granted to an applicant who does not satisfy the formal university requirements for full admission status and/or lacks undergraduate preparation in a field related to the graduate field of study. Restricted admission may also be granted to graduates of non-English-speaking foreign institutions, even if the student meets the university requirements for full admission status. Advancement from restricted to full admission status requires completion of 9 semester credits of graduate level course work as a graduate student with a cumulative grade average of B or better and satisfaction of the Graduate College English requirement. A recommendation is submitted in writing to the Graduate College by the major professor and must be approved by the Dean of the Graduate College.

Nondegree Graduate Admission

Well-qualified applicants who do not intend to seek an advanced degree from Iowa State University may be considered for nondegree graduate admission. Such students usually include:

1. Those who intend to transfer graduate credit earned at Iowa State University to other institutions.
2. Those who intend to use graduate credits earned for professional certification.
3. Those who enroll for personal satisfaction.
4. Those who enroll occasionally in off-campus graduate courses. The nondegree application form is available from www.admissions.iastate.edu/nondegree.

Applications and schedules for nondegree students are processed directly by the Office of Admissions and the Graduate College office; no program approvals are generally required, unless the non degree applicant has a very low GPA, then departments are contacted about what courses would be appropriate for the student to take.

A nondegree student who subsequently seeks full, provisional, or restricted admission must apply to and be accepted by a graduate program and by the Graduate College for degree study. A new application, the regular application fee, and transcripts from all colleges attended are required.

For those students originally admitted to the Graduate College on a nondegree basis, no more than 9 semester hours of graduate credit earned under the nondegree option may be applied if the student later chooses to undertake a graduate degree program. The student’s program of study committee will recommend to the Graduate College which courses (if any) taken on a nondegree basis may be included in the degree program.

Graduate Admission of International Students

An applicant who is a graduate of a recognized foreign institution is subject to the same criteria for admission as a graduate from an institution in the United States and may be recommended for the same admission categories described above except that of the nondegree option. International applicants for nondegree status may be considered for admission at the discretion of the Graduate College dean. Application and admission deadlines for international students can be obtained from the Admissions web site at www.admissions.iastate.edu/apply.

International students are required to show evidence of financial support and to carry adequate health and accident insurance while in residence.

Admission Examinations

Graduate Record Examination. The Graduate Record Examination (GRE) is not a university-wide requirement for all applicants. However, many programs require or recommend submission of GRE scores; individual program statements at www.grad-college.iastate.edu/programs/APprograms.php should be consulted for this information.

Registration

Graduate students are encouraged to register for courses on the ISU web site (www.iastate.edu) via AccessPlus. Students who are unable or who choose not to register through this system may use a walk-through registration procedure. Students who do not register by the published deadline for initiation of a schedule through the AccessPlus systems must use the walk-through procedure. For complete information on registration, see the ISU Schedule of Classes or the Registration Web site at www.iastate.edu/~registrar/registration.

Credit Limits

Registration is limited to a maximum of 15 credits per semester. Schedules for graduate assistants on one-half time appointments are limited to a maximum of 12 credits. For full-time staff members, the limit is 6 credits. (Different credit limits apply during the summer session; see the Graduate College Handbook at www.grad-college.iastate.edu/common/handbook for more details.)

Interim Registration

Registration for special work between semesters and during certain vacation periods cannot exceed one credit for each week that the student is in residence. For more information, consult the Graduate College Handbook.

Grading

Grades are the permanent official record of a student’s academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)

All courses (even if they are undergraduate courses) taken as a graduate student will be calculated into the graduate GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester’s average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. Creative Component/Research (599 and 699) credits are not used in the calculation of the GPA. In the case of repeated courses, only the grade achieved the last time the course is taken is used in computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student’s GPA.
Pass (P)/Not Pass (NP) Course Credit

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS, nor do P/NP marks contribute to the student’s GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.

Satisfactory/Fail (S/F) Grading

S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a D- grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis.

Grievances about Grades

A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in the Graduate College Handbook.

Probation

If a graduate student does not maintain a cumulative 3.0 grade point average on all course work taken, exclusive of research credit, he or she may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in course work only. New, first-term, degree seeking graduate students who fall below a 3.0 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.0 GPA. These students will receive a warning letter from the Graduate College.

While on academic probation a student will not be admitted to candidacy for a degree and if appointed to a graduate assistantship, the student will not receive a Graduate tuition scholarship unless approval is given by the student’s academic college. If a student is to qualify for a tuition scholarship, he/she must be removed from probation by the tenth class day of the term.

To insure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review his or her record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.0 GPA or greater.

English Requirements for Non-native Speakers

Applicants whose native language is not English and who have not earned a bachelor's or master's in a country where the only official language is English are required to submit Test of English as a Foreign Language (TOEFL) scores as part of the admission process. A minimum score of at least 79 on the TOEFL internet-based test or 550 on the paper-based test is required by the Graduate College. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. Because many programs require higher TOEFL and/or IELTS scores, applicants should check directly with the program to which they desire admission or browse the Graduate College Web site at www.grad-college.iastate.edu/programs/PAprograms.php.

Graduate students whose native language is not English and who did not graduate from a U.S. institution must take an English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English. A student who does not pass this examination is assigned to one or more courses in the English 99 and 101 series. This course work must be completed during the first year of study. (There is a developmental course fee for the English 99 course.). Non-native English speaking ISU graduate students who meet or exceed the TOEFL scores (640 or above on the paper-based test or 105 on the internet-based test) are exempted from taking the English Placement Test. (Self-enrollment in English 099 or 101 courses remains possible.

A graduate student whose native language is not English but did graduate from a U.S. institution, may bring to the Graduate College the “Request for the Graduate College to Approve the Graduate English Requirement for a Student Whose Native Language is NOT English,” form, available from the Graduate College or on the Graduate College’s Web site at www.grad-college.iastate.edu/common/forms/student_forms.php. Two conditions must be met: the student must have received a bachelor’s, master’s, or Ph.D. degree from a U.S. college or university and the language of instruction at that college or university must have been in English.

New teaching assistants whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. The Oral English Certification Tests (OECT) are given before the beginning of each semester. The testing dates are announced on the International Teaching Assistants (ITA) program website. Registration for the test is held on line through links posted on the ITA program homepage, http://www.grad-college.iastate.edu/speakteach/, two to three weeks before the test is administered. TAs and faculty with questions about OECT testing should call 515-294-1958 or 515-294-7996. A prospective teaching assistant who does not pass these tests is required to successfully complete course work and be retested. English 180 is a series of communication courses designed to help new teaching assistants. Students focus upon pronunciation, listening, question-handling, teaching and lecturing skills, and analyze the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go to the ITA Office, 1137 Pearson immediately after they receive the test scores to obtain permission to enter the course by completing a course add slip.

Department/Program Change

Transferring from One Major/Program/Department to Another

Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another department or program. Because graduate students are admitted to particular programs, transfers require the approval of both the receiving program and the Graduate College. Students seeking transfer to another program or department should first discuss their wishes with the new program DOGE (Director of Graduate Education) to determine requirements and interest by the new program. When a student receives a favorable preliminary response from the new program, he or she should fill out the student portion of the form entitled “Request to Transfer from One/Major/Program/Department to Another” and submit this form to his or her current DOGE. The current DOGE will fill out the Current Program Information adding any comments he or she believes the new program should consider and forward the form to the proposed new program. This form is available from the department, the Graduate College, or the Graduate College web page.

The receiving program will generally give the student the same consideration and employ the same admissions standards that are used for original applications for admission and will expect the same application materials (transcripts, letters of recommendation, test scores, etc). During the process, the new and old programs and the Graduate College are authorized and encouraged to seek and disclose information related to the student’s overall fitness for studies in the receiving program. Programs are authorized to inquire into the student’s prior conduct at the university, both with the prior department and with the Dean of Students.

Upon departmental action (acceptance or denial), the request to transfer form must be sent to the Graduate College for approval. All parties will receive a copy of the completed form from the Graduate College.

Students desiring to transfer from a degree-seeking status to a nondegree-seeking status need to fill out the “Request to Transfer from One Major/Program/Department to Nondegree” form and bring it to the Graduate College. Students desiring transfer to another program or department should first discuss their wishes with the new program DOGE (Director of Graduate Education). Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go to the ITA Office, 1137 Pearson immediately after they receive the test scores to obtain permission to enter the course by completing a course add slip.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact the graduate classification officer (1137 Pearson Hall). The classification officer will consult with the student and determine the proper course of action.
Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year previous and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate, must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed “Undergraduate Reentry” form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student’s overall fitness for continued studies including information about the student’s conduct, employment and education since the student’s last enrollment.

Individuals who do not have active graduate status and who first enrolled less than one year previous should first see the classification officer in the Graduate College.

Time Limits. It is expected that work for the master’s degree shall be completed within five years. In special circumstances the student’s POS committee may recommend that the Dean of the Graduate College extend these degree time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student’s POS committee and the Graduate College. The inclusion in the student’s program of study of course work that is beyond the time limits (“over-age” courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Application for Graduation. Students planning to graduate must complete an “Application for Graduation” form through their online AccessPlus system by the end of the third week of the semester (fall or spring) in which he/she expects to receive the degree, or by the last day of spring semester when wishing to graduate during summer.

Before completing this form, a student must have submitted and had approved by the Graduate College a “Recommendation for Committee Appointment” form and a “Program of Study” form. Also the student must have been fully admitted to a program and have met the Graduate English requirement if he/she is a non-native English speaker. Graduation may be delayed if the “Application for Graduation” form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she can go online through AccessPlus and cancel the previously submitted “Application for Graduation” form by the designated deadline. The student must then complete a new form for the next planned term of graduation.

Thesis. A master’s thesis is a scholarly composition that demonstrates the ability of the author to do independent and creative work. A thesis is required in all fields in which a master’s degree is awarded, except where specific provision is made for a nonthesis degree program. A minimum of three research credits is required on every program of study for a thesis master’s degree.

Responsibility for writing and editing of the thesis rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of theses. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the thesis to assure the highest level of quality when the student presents the thesis to the committee for final approval.

Copies of the thesis must be submitted to the members of the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be electronically submitted after the final oral examination is held. Please browse the Graduate College’s website (http://www.grad-college.iastate.edu) for requirements, revised fees, and other pertinent information.

Shortly after the submission of the “Application for Graduation,” a one-time, nonrefundable fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar’s Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College’s cancellation deadline.

Creative Component. Most nonthesis students must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of two credits of such independent work is required on those programs of study for a nonthesis master’s degree. Some programs require more credits. (For more information, contact the individual program or consult the Specific Master’s Degrees section in this catalog.) The element of creative independent study must be explicitly identified on the program of study. The format of the creative component is determined in cooperation with the POS committee. As with a thesis, a creative component should be submitted to members of the POS committee two weeks before the final oral examination. However, no final submission of a creative component is turned in to the Graduate College for review and approval.

Final Oral Examination. Most master’s candidates must pass final oral examinations. The final oral examination must be held by the final examination deadline date for the semester in which the degree is granted. All coursework in the program of study must either be completed or in progress before the final examination can be scheduled. This examination is oral; it may also include a written component if specified by the student’s (POS) committee.

Graduate students must register at Iowa State for the equivalent of two credits, or for the R-credit course if no course work is needed, during the semester in which the final examination is taken. (Graduate students who are not required to take a final oral examination should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.) Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the final oral examination. If the examination is taken during the interim between terms (including the first day of classes), registration can be for either the term before or the term after the examination is held.

The candidate is responsible for initiating the “Request for Final Oral Examination” form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student’s major program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a “Graduate Student Approval Slip for Graduation” form. It is sent to the major professor or program to give to the student after the “Request for Final Examination” form is received and approved by the Graduate College. Signatures are required by the major program, the Graduate College Thesis specialist (for those completing a thesis), and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term’s graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Undergraduate Admission to Concurrent Graduate Degree/Certificate Programs

Several programs provide opportunities for qualified ISU juniors and seniors majoring in those curricula to apply for admission to both a bachelor’s and master’s degree.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For a complete listing of the concurrent degree programs, consult the Graduate College Handbook, “Concurrent Degree Programs” on page 27 of the Handbook, http://www.grad-college.iastate.edu/common/handbook.

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the graduate programs about applying early in their undergraduate careers. Undergraduate students seeking admission to concurrent graduate degree programs in field other than these, plus any student with an interdepartmental major, must submit the appropriate concurrent form completed and a written proposal for an individualized program, co-signed by their advisers, to the Graduate College for review and approval. For more information about the application process and transferring credits, consult the Graduate College Handbook.

Veterinary Medicine Students in Concurrent Graduate Degree/Certificate Programs

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must adhere to the following process:
• Complete a "Concurrent Enrollment for Graduate/Veterinary Medicine Degrees" form available on the web site at www.grad-college.iastate.edu/common/forms/index.php. This is a combination application/concurrent form.
• Submit the "Concurrent Enrollment Request" form to the Graduate College after appropriate signatures are obtained.

Signed approvals on the concurrent form are required from the graduate program, the College of Veterinary Medicine, and the Graduate College. On admittance, the student receives an admission notification from the Office of Admissions. For more information see the Graduate College Handbook.

Graduate Students in Concurrent Undergraduate Programs

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions (100 Enrollment Services Center) to obtain admission information (even if the student has been previously admitted as an undergraduate). An "Application for Graduate Student Wishing to Pursue a Concurrent Undergraduate Degree" form should be obtained from the Graduate College Web site at www.grad-college.iastate.edu/common/forms/index.php and circulated for the appropriate approvals.

• Official enrollment and fee payment will be as a graduate student.
• The graduate degree or graduate certificate will be awarded only at the same time as, or after, the undergraduate degree is conferred.
• Students interested in a research career may be able to apply for a graduate research assistantship while in a concurrent degree or graduate certificate program.
• Students in concurrent degree programs may, subject of Program of Study Committee approval, double count up to 6 ISU credits of major or nonmajor graduate credits courses for both a Bachelor's degree and a certificate or a Master's degree.
• For students pursuing a concurrent undergraduate bachelor's degree and a graduate certificate, at least 12 graduate credits cannot be double counted and a maximum of 6 graduate credits can be double counted for both the bachelor's degree and the graduate certificate (when the graduate certificate requires more than 12 credits).
• A student in a bachelor's and master's concurrent degree program cannot be on a Ph.D. track during the concurrent program.

A complete list of Concurrent Bachelor and Master Programs or Graduate Certificate Programs can be found in the Graduate College Handbook, pages 30-31. http://www.grad-college.iastate.edu/common/handbook

Master’s Degrees

General requirements for all master’s degrees are as follows:

General Requirements

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master’s programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student’s Program of Study (POS) Committee

New graduate students at ISU may be assigned a temporary academic adviser by the major program in the first semester of the student’s residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A thesis master’s POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s master’s research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. A non-thesis master’s degree needs a minimum of one committee member. Programs may establish requirements for more than one member. For more information on duties and makeup of the committee as well as changes to the committee makeup, see the Graduate College Handbook.

Program of Study. The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee and program of study be formed later than the term before the preliminary oral exam for Ph.D. students, and the final oral examination for master’s students.

Residency. There is no on-campus residency requirement for the master’s degree.

Credits. Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master’s programs. At least 22 graduate credits must be earned from Iowa State University.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such credits must have been acceptable toward an advanced degree at the institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student’s responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed the term before the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better. Audits may be listed on the program of study, but do not carry credit.

Major. A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. A student may not minor and major in the same field. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and recorded on the “Application for Graduation” form (diploma slip). A minor cannot be added to a degree that has already been received.

Specific Master’s Degrees

The number of credits in a major for a master’s degree will vary according to various degrees. General credit requirements for all master’s degrees include: a minimum of 30 graduate credits is required for all master’s programs at ISU; at least 22 graduate credits must be earned at ISU; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the POS form. A complete listing of specific master’s degrees can be found in the Graduate Handbook, section E, page 107, http://www.grad-college.iastate.edu/common/handbook/. A complete listing of all master’s degrees can also be found online, http://www.grad-college.iastate.edu/academics/gradprograms/index.php.

Master’s Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master’s degrees and two diplomas are granted at the same time. For double degrees the final project (thesis or creative component)
must integrate subject areas from both departments. One final oral examination must be held covering the combined thesis or creative component. Students planning to pursue double degrees must complete a double degree request form and submit it to the Dean of Graduate College for approval. Just one “Recommendation for Committee Appointment” form and one “Program of Study (POS)” form need to be submitted for the two degrees. However, two “Application for Graduation” forms, one for each degree, will need to be submitted. All forms should show clearly that the student is enrolled in a double-degree program.

Like other master’s programs, three graduate faculty members can constitute a POS committee; however, POS committees for double degrees must include co-major professors from each of the majors. Although specific degree programs may require more, the program of study must include at least 44 hours of non-overlapping credit (22 for each major) in the two degrees.

A complete listing of the Double Degree Programs can be found in the Graduate College Handbook, page 35, http://www.grad-college.iastate.edu/common/handbook/.

If a student outside one of the named areas is interested in an individually-developed double degree program, a written proposal for a double degree to serve those interests and needs must be submitted to the Dean of the Graduate College for review. See the Graduate College Handbook for more information.

**Drake University Law School/Iowa State University Combined Degree**

To provide training in the complementary fields of law, political science, and economics with a minimum amount of academic duplication, special arrangements for combined degree programs have been approved with the Drake University Law School. ISU and Drake offer a combined J.D.-M.A. in political science and J.D.-Ph.D. in economics. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for nonmajor graduate credit. Because of the difference in grading systems, the Law School grades are transferred as passes, provided the student has achieved a grade of C or better in those courses at Drake for the political science program or a grade of B or better for the economics program.

Applicants for either of the combined programs must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

**Doctor of Philosophy**

**General Requirements**

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are:

- high attainment and proficiency of the candidate in his or her chosen field
- development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work
- successful passing of detailed examinations over the field of the candidate’s major work, with a satisfactory showing of preparation in related courses.

General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master’s or Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals for the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

**Appointment of the Student’s Program of Study (POS) Committee**

The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student’s major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

**Changes to POS committee**

Recommendations for changes in the POS committee must have the approval of the student, major professor, DOGE, and all committee members involved in the change (committee members who are on Faculty Professional Development Assignments, retired, or resigned do not have to sign) before seeking approval from the Graduate College. A form to seek approval is available in program offices or on the web at www.grad-college.iastate.edu/forms/forms.html. These changes must be approved by the Dean of the Graduate College before the preliminary or final oral examination is held. For more information on changes to the committee and to the Program of Study, see the Graduate College Handbook.

**Program of Study**

The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

**Credits**

A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. There is no specific university requirement regarding the number of credits to be taken inside or outside the major program.

**Transfer Credits**

At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student’s responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

**Major**

A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed at the end of this section of the bulletin. Opportunities also exist for majoring in more than one area of study (co-major or joint major programs).

**Minor**

Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the “Application for Graduation” form (diploma slip). A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.

**Time Limits**

A student beginning a Ph.D. degree program at Iowa State with a master’s degree from another institution is expected to complete the Ph.D. within five years, while a student beginning a Ph.D. degree program without the master’s degree is expected to complete the program within seven years. If warranted, the Program
of Study (POS) Committee may request by letter that the Dean of the Graduate College extend these time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student’s program of study committee and the Graduate College. The inclusion in the program of study of coursework that is beyond the time limits (“over-age” courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Preliminary Examination

The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student’s knowledge of major, minor, and supporting subject areas as well as the student’s ability to analyze, organize, and present subject matter relevant to the field. A “Request for Preliminary Examination” form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the “Request for Preliminary Examination” form is submitted to the Graduate College: admitted to full admission status in a Ph.D. granting program, approved “Recommendation for Committee Appointment” form, approved POS form, English requirement met, not on probation, time limit not exceeded, qualifying examination (if required by program) passed, and registration for at least the equivalent of 2 credits, or for the R-credit course if no course is needed, during the term in which the preliminary oral examination is taken. (Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the preliminary oral examination.)

A preliminary oral examination will not be scheduled for a student on provisional or restricted admission or on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program’s DDE is approved by the Dean of the Graduate College.

Application for Graduation

Application for graduation should be made by the end of the third week of the semester (fall or spring) in which the student expects to receive the degree, or by the last day of the spring semester if graduation is planned during summer session. To apply for graduation, the student is required to complete an “Application for Graduation” form, available online through the student’s AccessPlus system. Before submitting this form, a student must have submitted and had approved by the Graduate College a “Recommendation for Committee Appointment” form and a “Program of Study” form in the previous semester. Also the student must have been fully admitted to a program and have met the Graduate English requirement. Graduation may be delayed if the “Application for Graduation” filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she can go into AccessPlus and cancel the previously submitted “Application for Graduation” form before the designated deadline. The student must then file a new form for the next planned term of graduation. Late application. A student may file a late Application for Graduation during the fourth and fifth weeks of the semester. Students will be charged a non-refundable $20 late fee for a late application.

Dissertation

A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval.

Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College’s web site (http://www.grad-college.iastate.edu/current/thesis/) for new requirements, revised fees, and other pertinent information.

Shortly after the submission of the “Application for Graduation” form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar’s Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College’s cancellation deadline.

Final Oral Examination

The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To receive the degree at the end of a given semester, the student must hold the final oral examination before the final oral examination deadline for the semester. The candidate is responsible for initiating the “Request for Final Oral Examination” form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student’s program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation

Every candidate for an advanced degree is required to complete a “Graduate Student Approval Slip for Graduation” form. It is sent to the major professor or program to give to the student after the “Request for Final Examination” form is received and approved by the Graduate College. Signatures are required by the major program. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete, non-report, or grades lower than a C that a student receives for the term of graduation will result in removal from that term’s graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Interdisciplinary Programs

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

See individual programs for information regarding admission and academic requirements.

Undergraduate Interdisciplinary Programs

Undergraduate interdisciplinary programs are administered by more than one college and/or more than one department. See the program web sites for information about admission, academic requirements, and enrollment deadlines.

Interdisciplinary Studies

Interdepartmental Undergraduate Major Administered by the College of Liberal Arts and Sciences

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty review board, and an academic adviser design the major. Leading to either the Bachelor of Arts or the Bachelor of Science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more
departments. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College’s cross-disciplinary programs. Areas of interest in Interdisciplinary Studies have included Classical Studies, Criminology and Criminal Justice, International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and U.S. Latino/a Studies.

A student seeking admission to the program in interdisciplinary studies writes a letter of application that explains how the proposed major meets specific educational and learning goals. A faculty review board screens applications. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the review board in the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student’s educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

The interdisciplinary studies major must satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.
3. The courses will be chosen from at least two disciplines.

All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major. To meet the English and communication proficiency requirement, a grade of C or better must be earned in either an advanced English composition course or a course in the major with a significant writing component.

Further information may be obtained from the college office.

### Seed Science

#### Curriculum in Seed Science

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study include: seed production, conditioning, pathology, physiology, quality control, and marketing, as well as seed plant designs.

2 credits from 300-400 level from AGRON, PL P, TSM, or HORT 2

#### Typical Program for the First Year

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

### University Studies

#### Associate Provost for Academic Programs

Certain interdisciplinary courses are offered through university studies, at the discretion of the associate provost for academic programs and upon the advice of the Faculty Senate Curriculum Committee. No major is available in university studies, but credit obtained through university studies offerings may be applied toward a degree in any of the colleges, consistent with the stipulations of the student’s curriculum.

Requests to make use of U ST 290, U ST 490, U ST 590 should be directed to the associate provost for academic programs and should be accompanied by a positive recommendation from the department chairs of the instructor(s) making the request.

### Interdisciplinary Graduate Programs

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and
offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

See individual programs for information regarding admission and academic requirements.

Bioresponsive Chemicals
Administered by the Center for Bioresponsive Chemicals (CBiRC)
The core mission of the NSF Engineering Research Center for Bioresponsive Chemicals (CBiRC) is to transform the chemical industry by integrating biological and chemical catalysis systems to create a generalized framework for producing bioresponsive chemicals. The minor in Bioresponsive Chemicals allows students from a variety of allied disciplines to understand the opportunities for developing bioresponsive chemicals via a combination of biocatalytic and chemical catalysis steps. In addition to coursework in core technical areas, students in the minor get explicit entrepreneurial training, a background in the general issues related to production and processing of bioresponsive resources, exposure to the economic and environmental realities of the chemical industry. Students in the minor are disciplinary experts (in programs such as Chemical Engineering, Chemistry, and Biochemistry, Biophysics, and Molecular Biology) who are interdisciplinary trained to become globally competitive graduates capable of developing integrated chemical/biological processing systems.

Bioinformatics and Computational Biology Graduate Program

Undergraduate Study
Undergraduates seeking a B.S. in Bioinformatics and Computational Biology should enroll in the undergraduate major BCBio, which is described in a separate section of this catalog. See Index, BCBio.

Undergraduates wishing to prepare for graduate study in Bioinformatics and Computational Biology should consider the undergraduate major in BCBio. Alternatively, they should obtain solid undergraduate training in at least one of the foundation disciplines: molecular biology, computer science, mathematics, statistics, and physics. They should also elect courses in basic biology, basic transmission and molecular genetics, chemistry, physics, mathematics at least through calculus, statistics, and computer programming.

Graduate Study
Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Entomology, Genetics, Development and Cell Biology; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu.

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 Graduate Research Rotation. working with three or more different research groups to gain experience in both "wet" (biological) and "dry" (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A course load similar to the following list would be considered acceptable:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 265</td>
<td>4</td>
</tr>
<tr>
<td>STAT 341</td>
<td>3</td>
</tr>
<tr>
<td>COM S 207</td>
<td>3</td>
</tr>
<tr>
<td>COM S 208</td>
<td>3</td>
</tr>
<tr>
<td>COM S 330</td>
<td>3</td>
</tr>
<tr>
<td>CPR E 310</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 163</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 231</td>
<td>3</td>
</tr>
<tr>
<td>BBMB 301</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 313</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 315</td>
<td>3</td>
</tr>
</tbody>
</table>

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BCB 567</td>
<td>3</td>
</tr>
<tr>
<td>BCB 568</td>
<td>3</td>
</tr>
<tr>
<td>BCB 569</td>
<td>3</td>
</tr>
<tr>
<td>BCB 570</td>
<td>3</td>
</tr>
</tbody>
</table>

And also should include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GDCB 511</td>
<td>3</td>
</tr>
<tr>
<td>BCB 690</td>
<td>3</td>
</tr>
<tr>
<td>BCB 691</td>
<td>3</td>
</tr>
<tr>
<td>BCB 593</td>
<td>3</td>
</tr>
</tbody>
</table>

M.S. students take the above background and core courses, take at least 6 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu.)

Biorenewable Resources and Technology

(Interdisciplinary Graduate Program)
Dr. Jacquelyn A. Baughman, BRT Director of Graduate Education (DOGE)

Over 160 ISU faculty affiliated members, 29 departments in all seven colleges and 20 research centers and institutes are involved in this highly interdisciplinary graduate program. A complete and up-to-date listing is maintained at: http://www.biorenew.iastate.edu.

Graduate Study
The graduate program in Biorenewable Resources and Technology (BRT) offers students advanced study in utilizing plant and crop-based resources in the production of biobased products (fuels, chemicals, materials, and energy). The BRT program was the first graduate program in biorenewable resources established in the United States. This multi-disciplinary program offers the degrees of master of science and doctor of philosophy in Biorenewable Resources and Technology, and a minor to students taking major work in other departments. The curriculum is designed to encourage students to obtain co-major degrees in Biorenewable Resources and Technology and a more traditional science or engineering discipline. A thesis is required for the master of science degree.

Prerequisite to major graduate work is a bachelor's degree or prior graduate engineering discipline. A thesis is required for the master of science degree. The core required courses (6 credits min. required) for the Biorenewable Resources and Technology graduate program include:
Dietetics - Graduate Program

Interinstitution Graduate program

Participating institutions: Iowa State University; Colorado State University; Kansas State University; Michigan State University; Montana State University; North Dakota State University; Oklahoma State University; South Dakota State University; University of Kansas Medical Center; University of Nebraska.

Dietetics is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the ten institutions: Iowa State University, Colorado State University, Kansas State University, Michigan State University, Montana State University, North Dakota State University, Oklahoma State University, South Dakota State University: Kendra Kattelman, University of Kansas Medical Center, and University of Nebraska.

At Iowa State University, Dietetics is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-Diet) that consists of 36 credits. This is a non-thesis option and a special project or creative component is required. Students typically complete the program in 6-8 semesters while employed full-time. Admission is limited to those who are Registered Dietitians or Registration-eligible Dietitians. A computer with minimum specifications, web access, and an email address are required for completing the program.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36 credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/business management. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retool for new career opportunities in dietetics practice.

For new career opportunities in dietetics practice.

Eco Nutrition-Online Program

Students must complete "approved" core elective courses from at least three of the four bioeconomic development barrier areas: plant science, production, processing, and utilization. These are selected in consultation with the student's Program of Study (POS) committee. Additionally, students are to complete the determined amount of elective credits required for their degree, and in consultation with their POS committee, as well as research credits.

Graduates of the program will be equipped with skills to design, develop and/or manage cost effective and environmentally attractive technologies and systems for producing fuels, chemicals, materials, foods and energy from biorenewable resources.

Information on application procedures, specific requirements of the major and the online BRT Graduate Certificate can be obtained from the following Internet address: http://www.biorenew.iastate.edu

Ecology and Evolutionary Biology

Interdepartmental Graduate Major

The ecology and evolutionary biology (EEB) interdepartmental major is offered through a faculty in eleven different departments. Faculty from the departments of Agronomy, Anthropology; Ecology; Evolution & Organismal Biology; Entomology; Genetics, Development & Cell Biology; Geological & Atmospheric Sciences; Horticulture; Mathematics; Natural Resource Ecology & Management; Plant Pathology; and Statistics cooperate to offer courses and direct research leading to the MS and PhD degrees in ecology and evolutionary biology.

Applicants should have completed an undergraduate or master of science or arts degree in one of the biological, physical, or mathematical sciences. Applicants also should have taken undergraduate courses in both basic ecology and evolution.

The EEB major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species.

The EEB curriculum includes a core course, seminar courses, and an extended field trip. In addition, offerings are available in the ethics and practice of research in the biological sciences. Cooperating departments provide courses and research opportunities in population, community, and ecosystems ecology; landscape ecology, modeling, and spatial dynamics; systematics, biodiversity, and biogeography; physiological and behavioral ecology; conservation and restoration ecology; agroecology; natural resources ecology and management; evolutionary ecology; population, quantitative, and evolutionary genetics; and environmental statistics, stochastic modeling, and quantitative ecology and evolution.

Students majoring in EEB are trained for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. Graduates have a broad understanding of ecology and evolutionary biology, experience designing and conducting research, writing grant proposals, and communicating effectively with scientific colleagues at meetings and through publications.

Information on application procedures, research interests of the faculty, and specific requirements of the major may be obtained from the EEB web site www.grad-college.iastate.edu/EEB/ or by contacting eeboffice@iastate.edu.

Engineering Management

Engineering Management Master’s Degree Online

The Engineering Management Program focuses on developing an individual’s engineering, science and management skills so that they can succeed in a technology-driven environment. There is a growing need for engineers that can build multi-disciplinary design teams, then lead those teams to solve technical and business challenges. The Iowa State University Master of Engineering in Engineering Management Program is designed to train leaders who can meet both the technical and managerial challenges in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

Unrestricted admission requires (1) a 3.0 grade point average from an ABET accredited undergraduate engineering program, (2) two years of engineering experience or current full-time employment as an engineer, (3) calculus, engineering statistics, and engineering economy. A GRE is not required for this program.

Applicants for admission to the Engineering Management Program apply through the Graduate College at Iowa State University. Each applicant must submit:

• Application and application fee
• Official academic transcripts
• Three letters of recommendation
• Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to 9 credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted.
The Master of Engineering in Engineering Management Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Other focus areas in related disciplines, such as systems engineering, human factors, supply chain management, or manufacturing, may be substituted for supporting courses. A program of study is developed by the student and academic advisor to fit individual needs.

Students working in research and development who are interested in pursuing their research skills may select a creative component option as part of their supporting courses.

Note: Students typically are allowed to transfer up to 6 credit hours of non-ISU graduate credit into their degree program.

Please see the Systems Engineering & Engineering Management Student Handbook for complete information.

**Contact Information**

Engineering Management Program Office  
Phone 515-294-4702  
Email: eng-management@iastate.edu

**Genetics and Genomics**

e-mail: genetics@iastate.edu

**Undergraduate Preparation**

Undergraduates wishing to prepare for graduate study in Genetics and Genomics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, at least one thorough course in basic transmission and molecular genetics, one semester of upper level statistics and one semester of upper level biochemistry. Incoming students who have not completed an upper level statistics course and an upper level biochemistry course prior to beginning in the program will take STAT 401 Statistical Methods for Research Workers and BBMB 404 Biochemistry I during their first year of graduate training. A waiver may be requested for these courses by providing appropriate documentation (catalog description and syllabus) to the curriculum committee showing completion of an upper level statistics and upper level biochemistry course equivalent to STAT 401 Statistical Methods for Research Workers and BBMB 404 Biochemistry I.

See Genetics - Undergraduate for information on a bachelor of science degree in Genetics.

**Graduate Study**

Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics and Genomics in fourteen cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Ecology, Evolution and Organismal Biology; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Materials Science and Engineering; Plant Pathology and Microbiology; Natural Resource Ecology and Management; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The diversity of faculty in the Genetics and Genomics major ensures a broad, well-balanced education from the best instructors, while offering flexibility in choice of research area. Genetics and Genomics faculty have strengths in many areas, from fundamental studies at the molecular, cellular, organismal, and population levels, to research with immediate practical application. Ongoing research projects span all the major areas of theoretical and experimental genetics, including genomics, molecular studies of gene regulation; gene mapping, genetics of disease, transposable element studies, developmental genetics, quantitative and statistical genetics, computational molecular biology, evolutionary genetics, and population genetics.

Students are admitted by the approval of the Chair after review by the Genetics and Genomics Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. First year students participating in rotations with Genetics and Genomics faculty will take GENET 697 Graduate Research Rotation.

All Ph.D. candidates take a core curriculum comprising one course each from the following four categories and attend seminars and workshops as described:

**Transmission Genetics**

**EEOB 540X Evolution of Developmental Processes (experimental course)**

Students will give three research presentations (GENET 690 Graduate Student Seminar in Genetics), attend two genetics and genomics faculty seminar series (GENET 691 Faculty Seminar in Genetics), and participate in two Workshops in Genetics and Genomics (GENET 591 Workshop in Genetics) during their training period. First-year graduate students will also take GENET 692 Conceptual Foundations of Genetics.

Students may elect a computational molecular biology specialty within the genetics major. This requires that the research project be in the field of computational molecular biology. IG majors will be expected to complete all of the courses required for the genetics and genomics major, except that one semester of BCB 690 Student Seminar in Bioinformatics and Computational Biology can be substituted for GENET 690 Graduate Student Seminar in Genetics. Students will be expected to take additional courses in the area of specialization.

M.S. students will take the above core courses and seminars with the following changes: participate in one Workshop in Genetics (GENET 591 Workshop in Genetics) and present their research once (GENET 690 Graduate Student Seminar in Genetics). Additional coursework may be selected to satisfy individual interests or departmental requirements.

The course designator Genet applies to graduate courses taught by the interdepartmental major in Genetics and Genomics.

Students wishing to minor in genetics and genomics must submit a complete application to the graduate program. Requirements for the successful completion of a minor at the Ph.D. or M.S. levels are: completion of three of the four categories of the common-core required lecture courses listed above. One semester of Seminar in Genetics is recommended.

One member of the POS committee must be a Genetics faculty member.

**Student Outcomes:** Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, or government. A few go directly to permanent research positions in industry. Many students awarded master’s degrees continue their training as...
doctrinal students; however, some choose research support positions in academia, industry, or government. A more thorough list of outcomes is available at our website.

Graduate Studies

No major is granted in Graduate Studies. At the recommendation of the major professor and/or the department chair, graduate students may enroll in the Graduate Studies (GR ST) courses to fulfill certain enrollment requirements.

Human Computer Interaction

Interdepartmental Graduate Program

Graduate Study

Human Computer Interaction is an interdepartmental graduate program that seeks to improve the way individuals and groups use computers through an understanding of the social and cognitive aspects of the design and use of computational devices. Students in the program learn about cognitive psychology, graphic design principles, the impacts of technology on society, evaluating system usability, and cutting edge computer programming for computational perception and language parsing.

Student research projects have explored the latest in virtual reality studies, improving natural interaction through touch screens and 3D camera gesture controls, virtual engineering using force feedback devices, and many other projects at the bleeding edge of technological innovation. Graduates of the program have gone to work at many of the largest technology firms in the US and abroad while others have gone on to positions in academia.

Degrees are offered for the Master of Science (MS) and Doctor of Philosophy (PhD) degrees with a major in Human Computer Interaction (HCI). A Graduate Certificate and an Online Master of Science degree in Human Computer Interaction are also offered; these degrees are especially targeted for the benefit of students working in business and industry wanting education in this field. The graduate program in Human Computer Interaction (HCI) welcomes applicants from a diverse collection of technical and creative fields whose unifying characteristic is the desire to develop new ways to bridge the gap between human and machine. The students must demonstrate skill in software development and proficiency in high-level, object-oriented programming. These skills can be acquired after admission to the program. Other entrance requirements will include an undergraduate degree and transcripts, test scores and other indicators that the applicant can be successful at the graduate level. All students admitted to the MS or PhD program on campus must secure a graduate assistantship.

All programs of study for the PhD must include:

1. one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena, which is not part of the student’s Masters program
2. two more courses of their choice from a list of recommended electives
3. four semesters of HCI 591 Seminar in Human Computer Interaction
4. a minimum of nine research credits.

The MS degree calls for 30 credits of course work including appropriate credit for the Master’s thesis. MS students must take one course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena. MS Students must also take two semesters of HCI 591 Seminar in Human Computer Interaction.

The Online HCI MS program is most appropriate for individuals with a bachelor’s degree in a scientific, engineering, business, or artistic discipline, who are pursuing a professional career, and who already have a strong base of information technology skills. Requirements for the Online Master of Science Program include 27 credits of coursework, plus a three-credit capstone course, with a final presentation at the end of the degree program.

Requirements for the HCI Graduate Certificate program include three core HCI courses plus one elective.

Information on applications procedures and specific requirements of the major can be obtained from the following Internet address: http://www.hci.iastate.edu/Academics/index.php.

Immunobiology

Immunobiology Interdepartmental Graduate Program

Program Chair & Director of Graduate Education: Dr. Randy Sacco
Program Coordinator: Katie Blair

Graduate Study in Immunobiology

Work is offered for the master of science and doctor of philosophy degrees with a major in Immunobiology. Faculty are drawn from ten university departments along with researchers from the National Animal Disease Center. Participating departments include: Animal Science; Biochemistry, Biophysics, and Molecular Biology; Biomedical Sciences; Chemical & Biological Engineering; Kinesiology; Natural Resource Ecology & Management; Veterinary Clinical Sciences; Veterinary Diagnostic & Production Animal Medicine; Veterinary Microbiology & Preventative Medicine; and Veterinary Pathology. The diversity of faculty expertise ensures a broad education, while offering flexibility in choice of specialization. Ongoing research projects include areas such as: antibody and cell-mediated immunity; gene expression, immunohemistry, immunogenetics, immunomodulation, immunophysiology, mucosal immunity and nutritional immunology. Additional information about program faculty members is available at: www.immunobiology.iastate.edu.

Students may enter the Immunobiology program in one of two ways: prospective students may apply directly to the major, or current ISU graduate students may be admitted as a co-major or minor in Immunobiology. Ph. D. students admitted into the Interdepartmental Immunobiology major will take IMBIO 697 Graduate Research Rotation, during their first two semesters. From these rotations the student will select a major professor and join a home department. Affiliating with a major professor is done by the end of the second semester.

Before entering the Immunobiology program, prospective students should have a strong background in the biological sciences; typically including work in immunology, genetics and biochemistry. Prior research experience is highly encouraged. The submission of GRE General Test scores is required for admission.

Immunobiology students should include in their program of study a core of courses which will provide a broad coverage of the basic program in immunobiology. Formal courses should include immunology, biochemistry, and statistics. Additional coursework may be selected to satisfy individual interests or departmental requirements. The foreign language and teaching requirements are determined by the student's home department. All students will take a minimum of one seminar course per fall and spring semester.

Graduates of the Immunobiology program will have a broad understanding of the interdisciplinary field of immunobiology and will be able to effectively integrate the principles of immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, legal and environmental issues. They are skilled at carrying out research, communicating research results, and writing persuasive grant proposals.

Curriculum Requirements for Immunobiology

Doctoral Students

Ph.D. candidates majoring in Immunobiology must take at least 72 graduate credits. This 72 credits includes the below core course requirements and applicable research credits earned. Credits taken during a student’s M.S. program in Immunobiology at Iowa State University will count towards their Ph.D. in Immunobiology.

Ph.D. students should take each of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BBMB 405</td>
<td>Biochemistry II</td>
<td>3</td>

</table>
Take at least two courses from the following approved electives:

- BBMB 645 Molecular Signaling 2
- GDCB 528 Advances in Molecular Cell Biology 3
- V MPM 540 Livestock Immunogenetics 2
- V MPM 608 Molecular Virology 3
- V MPM 625 Mechanisms of Bacterial Pathogenesis 4
- V MPM 629 Advanced Topics in Cellular Immunology 2
- V PTH 655 Cellular and Molecular Pathology I 3
- V PTH 656 Cellular and Molecular Pathology II 3

Curriculum Requirements for Immunobiology

Master’s Students

All M.S. students majoring in Immunobiology are required to complete a minimum of 30 graduate credits. These 30 credits include core course requirements and applicable research credits earned. The requirements for M.S. students are the same as that for Ph.D. students with the exception of the elective credits. M.S. students are required to take at least one course from the list of electives as opposed to the two course minimum for Ph.D. students.

Curriculum Requirements for a Minor in Immunobiology at the PhD Level

Graduate students studying at Iowa State University with an interest in completing an Immunobiology minor for their Ph.D. studies are required to take a total of 12 credit hours of coursework including core courses and approved electives. Students must be approved for the minor by the Immunobiology program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in Immunobiology are encouraged to contact the Immunobiology Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to: idgp@iastate.edu.

Immunobiology Minor Curriculum at the Ph.D. Level

Includes:

One course from each of the following two categories:

Category A:
- V MPM 520 Medical Immunology I 4
- V MPM 575 Immunology 3

Category B:
- V MPM 615 Molecular Immunology 3
- V MPM 629 Advanced Topics in Cellular Immunology 2

One enrollment in the following:
- IMBIO 602 Current Topics Workshop in Immunology 1

Minimum of 4 credit hours from any of the following approved electives:

- BBMB 645 Molecular Signaling 2
- GDCB 528 Advances in Molecular Cell Biology 3
- MICRO 554 Virology 1
- V MPM 540 Livestock Immunogenetics 2
- V MPM 608 Molecular Virology 3
- V MPM 625 Mechanisms of Bacterial Pathogenesis 4
- V MPM 629 Advanced Topics in Cellular Immunology 2
- V PTH 655 Cellular and Molecular Pathology I 3
- V PTH 656 Cellular and Molecular Pathology II 3

Information Assurance

Interdepartmental Graduate Major

Iowa State University has been offering courses in information assurance since 1995 and has one of the largest programs in the country. Graduate degrees can be obtained in a traditional on campus setting or as an on-line program. For information on the Engineering-LAS Online Learning program visit www.eol.iastate.edu.

Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia. The program objectives identified as being critical to the accomplishment of this mission are:

1. Impart and enhance knowledge about information infrastructure security
2. Expand and develop the ability to engineer complex systems
3. Instill and nurture social awareness, and the ability to function in a team
4. Instill and nurture a sense of ethics
5. Develop an understanding of strategic and policy issues

We offer 4 different graduate degree options:

1. Masters of Science with thesis
2. Masters of Science without thesis
3. Masters of Engineering (coursework only)
4. Graduate certificate

Master of Science with & without thesis:

The degree Master of Science with a major in information assurance is under a cooperative arrangement with various home departments including Electrical and Computer Engineering, Computer Science, Political Science, Supply Chain and Information Systems, and Mathematics.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component and is intended for students interested in a career in information assurance.

Students interested in the interdepartmental major apply and are admitted to both a home department (the department that is most closely aligned with the students research interest and background) and to the program. The home department sets the admission standards, course requirements, and thesis standards. (Note: Electrical and Computer Engineering is the only home department for off-campus students pursuing the Master of Science in Information Assurance)

The program is broadly based and uses courses in the various departments. The program will consist of 24 course credits with 6 credits of research work for a Master of Science with thesis. A non-thesis Master of Science will consist of 27 credits of courses and 3 credits of creative component. The courses are divided into three categories: core, electives, and thesis research. A student’s Program of Study Committee, in consultation with the student, determines the elective courses to be taken and the acceptability of transfer credits. The major professor will be selected from the discipline where the student is admitted (home department).

The basic prerequisite for admission to this program is a baccalaureate degree in engineering, mathematics, computer science, management information systems, political science, or closely related field. The GRE or GMAT examination may be required based on the standards of the home department. If the GRE or GMAT is not required it will be considered in admissions decisions if offered. Potential students with baccalaureate degrees in the physical sciences, statistics, or other related fields will be considered on an individual basis, possibly with provisional admission.

Master of Engineering:

The Master of Engineering (MENGR) in Information Assurance degree is only offered to off-campus students. This program is designed to assist all individuals who already have a bachelor’s degree in computing or related areas to pursue an in-depth study in information assurance. The Master of Engineering program is based on coursework credits only (a thesis or creative component is not required). Courses are offered via our Engineering-LAS Online Learning streaming media online education program. (Note: Electrical and Computer Engineering is the only home department for the Master of Engineering in Information Assurance)

A coursework only Master of Engineering degree in Information Assurance consists of 30 credits. The courses are divided into three categories: core, electives, and capstone course. (Note: Students pursuing the MENGR do not have a program of study committee and the major professor is the Information Assurance, Director of Graduate Education (DoGE)

Students interested in the MENGR in IA degree apply and are admitted to Information Assurance (InfAs) with ECpE as the home department. The admission requirements for students entering the program without work experience are the same as the admission requirements for the ECpE department. For students with 3 or more years of work experience in a computer related position the GRE and GPA minimum may be waived. Students with an undergraduate degree in a non-computing field that have at least 3 years of work experience in an information technology field may be admitted to the program.

Graduate Certificate:

A graduate certificate in Information Assurance is offered, which consists of four courses (12 credits). The graduate certificate is targeted for off-campus students as a way to either supplement their education or as a way to try out online education
Interdisciplinary Graduate Studies

www.grad-college.iastate.edu/igs/

Interdepartmental Graduate Program

The degree of master of science or master of arts with major in interdisciplinary graduate studies is available to graduate students who wish to have a more diversified program of advanced study than that generally permitted students who specialize in a single subject. Areas of specialization in arts and humanities, biological sciences, international development studies, physical sciences, social sciences, community development (see below) and a general area are designed to broaden and supplement a student’s program. Students must take courses in three different graduate subject matter areas, each subject contributing a minimum of nine credits toward the 35 graduate credits required for the degree. Courses which may be used for credit toward this degree program are selected from those listed in the Graduate College Catalog for graduate credit.

Both thesis and nonthesis options are available except in arts and humanities in which a thesis is required. If the thesis option is chosen, a minimum of three credits of IGS 699 Thesis Research is required and a maximum of five credits of IGS 699 Thesis Research may be counted in the total of 35 required credits. If the nonthesis option is elected, evidence of original creative effort must be presented. This may be in the form of a demonstration of independent creativity such as a written report of laboratory, field, or library research; a project in fine arts; or some other original contribution acceptable to the student’s committee. In the nonthesis option a minimum of three credits of IGS 599 Creative Component is required and a maximum of five credits of IGS 599 Creative Component may be counted toward the total of 35 graduate credits. The student, in consultation with the program of study committee, will decide on the option. The committee also aids the student in planning a program of study and in selecting appropriate courses. Graduates will have experience in designing their own program centered around issues they have identified. Because of the interdisciplinary nature of IGS, students are expected to synthesize knowledge from three different areas of study.

Students who wish to apply for admission to interdisciplinary graduate studies should communicate with the chair of the program, the chair of the supervisory committee or one of its members (see above).

Students in IGS may select a 37-credit area of specialization in Community Development. The Community Development area of specialization, offered in collaboration with five other universities in the Great Plains Interactive Distance Education Alliance, is offered exclusively through courses on the Web.

Molecular, Cellular, and Developmental Biology

MCDB Interdepartmental Graduate Program

Program Chair & Director of Graduate Education: Dr. Clark Coffman
Program Coordinator: Katie Blair
Email: idgp@iastate.edu
Phone: (515) 294-7252

Undergraduate Study

A special program in Molecular, Cellular, and Developmental Biology is not offered for the baccalaureate. Undergraduates wishing to prepare for graduate study in molecular, cellular, and developmental biology should elect courses in biochemistry, biology, genetics, microbiology; and mathematics through calculus; chemistry through organic; and one year of physics.

The following are recommended to undergraduates desiring an introduction to this area:

- BIOL 313 Principles of Genetics 3
- BIOL 313L Genetics Laboratory 1
- BIOL 314 Principles of Molecular Cell Biology 3
- BIOL 423 Developmental Biology 3
- BIOL 423L Developmental Biology Laboratory 1

Graduate Study in MCDB

Work is offered for the master of science and doctor of philosophy degrees with a major in Molecular, Cellular, and Developmental Biology. Faculty are drawn from fifteen university departments along with researchers from the National Animal Disease Center. Participating departments include: Agronomy; Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Chemistry; Chemical & Biological Engineering; Ecology, Evolution, & Organismal Biology; Entomology; Food Science & Human Nutrition; Genetics, Development & Cell Biology; Horticulture; Physics & Astronomy; Plant Pathology; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. Facilities and qualified faculty are available in these departments for conducting fundamental research in the various aspects of molecular, cellular, and developmental biology. Ongoing research projects include molecular and cellular studies of viral, prokaryotic, plant, and animal systems. Additional information about the program and faculty is available at: www.mcdb.iastate.edu.

Prospective students are admitted by the MCDB program following receipt of a complete application and after review by the MCDB Admissions Committee. Students are admitted either to research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and M.S students typically enter via a direct admit. Those students admitted through a rotation admit are required to complete a minimum of three research lab rotations with faculty of interest and take MCDB 697 Graduate Research Rotation, during their first two semesters. At the end of their second semester, students on rotation must select a major professor from the faculty participating in the program. Current ISU graduate students may be admitted as a co-major or minor with MCDB.

Before entering the MCDB program, prospective students should have a strong background in the biological sciences; typically including work in biological sciences (two years), organic chemistry (one year), physics (one year), and mathematics (through one year of calculus). Prior research experience is highly encouraged. The submission of GRE General Test scores is required for admission.

Curriculum Requirements for MCDB

Ph.D. candidates majoring in MCDB must take at least 72 graduate credits. These 72 credits include the core course requirements (below) and applicable research credits earned. Credits taken during a student’s M.S. program in MCDB at Iowa State University may count towards their Ph.D. in MCDB.

Students seeking an M.S. degree must take a total of 30 credits, with not less than 22 credits earned at ISU. M.S. students must take the core curriculum but need to complete only two of the three components in molecular biology, cell biology, or developmental biology.

Additional coursework for both Ph.D. and M.S. degrees may be selected by the student in consultation with his/her Program of Study (POS) Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned at another institution may be transferred at the discretion of the POS Committee and with the approval of the MCDB Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (http://www.grad-college.iastate.edu/common/handbook).

MCDB Core Curriculum requirements include:

- BBMB 404 Biochemistry I 3
- BBMB 405 Biochemistry II 3

Students with a Biochemistry background can elect to take the 500-level sequence:

- BBMB 504 Amino Acids and Proteins 2
- BBMB 505 Bioenergetics and Metabolism 2
All Ph.D. students must take one course from each of the following areas: A) Cellular Biology, B) Developmental Biology, & C) Molecular Biology.

A. Cellular Biology

BBMB 506 Membrane Biochemistry 2
BBMB 507 Biochemistry of Nucleic Acids 2

One course in each of two of the following three areas: A) Cellular Biology, B) Developmental Biology, & C) Molecular Biology.

A. Cellular Biology

GDCB 528 Advances in Molecular Cell Biology 3
GDCB 545 Plant Molecular, Cell and Developmental Biology *See footnote
B M S 575 Cell Biology 3
BBMB 645 Molecular Signaling 2

B. Developmental Biology

GDCB 533 Advances in Developmental Biology 3
GDCB 545 Plant Molecular, Cell and Developmental Biology *See footnote

C. Molecular Biology

MICRO 502 Microbial Genetics and Genomics 3
GDCB 511 Molecular Genetics 3
GDCB 545 Plant Molecular, Cell and Developmental Biology *See footnote
V MPM 608 Molecular Virology 3
BBMB 676 Biochemistry of Gene Expression in Eucaryotes 2

*Footnote: GDCB 545 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.

In addition to the above course requirements, MCDB graduate students are required to take:

1. Two semesters of research seminar every year.
   One of these seminars must be MCDB 698, Seminar in Molecular, Cellular, and Developmental Biology. In seminar, students will make journal and research presentations and attend MCDB seminars. Subject to approval by the POS committee, acceptable alternatives to fulfill the second seminar requirement include 1) a "for credit" research seminar series offered by the student's home department, 2) a workshop comprised of a research seminar series, or 3) another ISU research seminar series.

2. One credit hour of ethics training.
   Not required, but highly recommended for MCDB graduate students:
   BCB 544 Introduction to Bioinformatics 4

   Non-native English speakers must pass the English Requirement as established by the university. Depending on the results of this exam additional courses may be required to meet English proficiency standards.

   MCDB graduate students need to teach one semester as part of their training for an advanced degree. Students whose first language is not English must take and pass the Oral English Proficiency Test (OECT) to be eligible to teach.

Curriculum Requirements for Graduate Students Seeking a MCDB Minor

Graduate students studying at Iowa State University with an interest in completing a MCDB minor for their Ph.D. are required to complete the following curriculum requirements.

Students must be approved for the minor by the MCDB program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in MCDB are encouraged to contact the MCDB Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to idgp@iastate.edu.

MCDB Minor Curriculum at the Ph.D. Level Includes:

BBMB 404 Biochemistry I 3
BBMB 405 Biochemistry II 3

Students with a Biochemistry background can elect to take the 500-level sequence:

BBMB 504 Amino Acids and Proteins 2
BBMB 505 Bioenergetics and Metabolism 2

BBMB 506 Membrane Biochemistry 2
BBMB 507 Biochemistry of Nucleic Acids 2

Not required

2

Footnote: GDCB 545 - Plant Molecular, Cellular, and Developmental Biology may be used to fulfill any one of the required component areas.

In addition to the above course requirements, MCDB graduate minors are required to register once for:

MCDB 698 Seminar in Molecular, Cellular, and Developmental Biology 1-2

Neuroscience

Neuroscience Interdepartmental Graduate Program

Program Chair & Director of Graduate Education: Dr. N. Matthew Ellinwood
Program Coordinator: Katie Blair
Email: idgp@iastate.edu
Phone: (515) 294-7252

Graduate Study in Neuroscience

Work is offered for the master of science and doctor of philosophy degrees with a major in neuroscience. Cooperating departments include Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Ecology and Evolutionary Science; Genetics, Development and Cell Biology; Kinesiology; Psychology; Veterinary Clinical Sciences; Veterinary Diagnostic and Production Animal Medicine; and Veterinary Pathology.

The diversity of faculty in the Interdepartmental Neuroscience program provides students with a variety of research opportunities and reflects the structure of contemporary neuroscience which has become a diverse and interdisciplinary field. Facilities and faculty are committed to research in the following areas: neuronal membrane functions, signal transduction, neuroanatomy, neurodegenerative diseases, neuroendocrinology, neurotoxicology, neuropathology, developmental neurobiology, neurogenetics, computational neuroscience, neural networks, behavioral neuroscience, tissue engineering, and veterinary pathology. Additional information about program faculty members is available at: www.neuroscience.iastate.edu.

An undergraduate or advanced degree in one of the basic or applied sciences is ordinarily a prerequisite for admission to the program. Typical program disciplines include majors in biochemistry, biology, biomedical sciences, human medicine, immunology, neurobiology, physiology, pharmacology, psychology, veterinary medicine, or zoology. Appropriate undergraduate coursework includes mathematics, chemistry, physics, and biological sciences. Prior research experience is highly encouraged. The submission of GRE General Test scores is required for admission.

Prospective students are admitted by the Neuroscience program following an internal application process and after review by the Neuroscience Admissions Committee.
Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. Ph.D. students typically enter via rotation and M.S. students typically enter via a direct admit. Those students entering through a rotation admit are required to complete a minimum of three research lab rotations with faculty of interest. At the end of their second semester students on rotation must select a major professor from the faculty participating in the program.

Curriculum Requirements for Neuroscience Graduate Students

Ph.D. candidates majoring in Neuroscience must take at least 72 graduate credits. These 72 credits includes the below core course requirements and applicable research credits earned. Credits taken during a student’s M.S. program in Neuroscience at Iowa State University will count towards their Ph.D. in Neuroscience.

Students seeking an M.S. degree must take a total of 30 credits, with not less than 22 credits earned at ISU. M.S. students have the same core requirements as Ph.D. students.

Additional coursework for both Ph.D. and M.S. degrees is selected by the student in consultation with his/her POS Committee to meet departmental requirements and to satisfactorily prepare the student for their research project.

Graduate credits of B or better earned at another institution may be transferred at the discretion of the POS Committee and with the approval of the Neuroscience Program and the ISU Graduate College.

Additional information relating to credits required for graduate degrees can be found in the ISU Graduate College Handbook (http://www.grad-college.iastate.edu/common/handbook).

All students majoring in Neuroscience are required to complete a core curriculum consisting of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>

Curriculum Requirements for Graduate Students Seeking a Neuroscience Minor

Graduate students interested in completing a Neuroscience minor are required to select 12 credits, with a minimum of 9 credits being from the list of approved courses (see below) and up to 3 credits of thesis/dissertation research (NEURO 699).

Students must be approved for the minor by the Neuroscience Program and must follow Graduate College guidelines for POS Committee membership.

Graduate students wishing to seek a minor in Neuroscience are encouraged to contact the Neuroscience Interdepartmental Graduate Program Coordinator for further information. Inquiries can be submitted to idgp@iastate.edu.

Nutritional Sciences

Graduate Study

The Interdepartmental Graduate Program in Nutritional Sciences (IGPNS), administered through the Graduate College, under the auspices of the Chairs of Food Science and Human Nutrition (FS HN) and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. M.S. and Ph.D. degrees in Nutritional Sciences will be offered with three specializations: Animal Nutrition, Human Nutrition, or Biochemical & Molecular Nutrition.

The following undergraduate course work is recommended of all applicants who are applying to the IGPNS, but may be modified depending upon the student’s area of emphasis. Recommended course work includes organic chemistry with laboratory, physics, analytical chemistry, a nutrition course that requires biochemistry or organic chemistry as a prerequisite, and a course in biology/physiology or anatomy. Under certain circumstances students can be admitted or provisionally admitted with course work deficiencies. Students with an undergraduate degree will be generally admitted into the M.S. program and upon completion, they can then apply for admission into the Ph.D. program. However, exceptional students with experience can apply directly to the Ph.D. program.

The general requirements of the Nutritional Sciences degree at the MS level, in addition to those of Graduate College, are:

- NUTRS 501 Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients | 4 |
- BBMB 404 Biochemistry I | 3 |
- BBMB 405 Biochemistry II | 3 |
- or BBMB 420 Physiological Chemistry | 4 |
- STAT 401 Statistical Methods for Research Workers | 4 |
- FS HN 580 Orientation to Food Science and Nutrition Research | 1 |
- or AN S 501 Survey of Animal Disciplines | 1 |
- AN S 603 Seminar in Animal Nutrition | 1 |
- or FS HN 682X Seminar Reflection (experimental course) | 1 |
- FS HN 581 Seminar (or AN S equivalent) | 1 |
- FS HN 681 Seminar (or AN S equivalent) | 1 |
- FS HN 590C Special Topics: Teaching | 1-3 |
- or AN S 590L Special Topics: Teaching |

Successful completion and defense of thesis

Students are expected to complete the course work established by the Program of Study (POS) committee based on specialization with a minimum of 30 graduate-level semester credits, not less than 22 of which must be earned at Iowa State University.

The general requirements of the Nutritional Sciences degree at the PhD level, in addition to those of the Graduate College, are:

- Completion of all requirements of the MS degree in Nutritional Sciences
- 3 additional credits of graduate-level biochemistry (6 credits total including those for the M.S.), graduate-level statistics (STAT 402 Statistical Design and the Analysis of Experiments), and physiology (if not taken for the M.S.)
• Additional graduate-level courses in the field of study as deemed appropriate by the POS Committee and specialization, and additional teaching assistant requirements (FS HN 590C Special Topics: Teaching).

Satisfactory completion of a preliminary examination, a written dissertation, seminar presentation of dissertation research, and defense of the dissertation is also required. Overall a minimum of 72 graduate-level semester credits, no less than 36 of which must be earned at Iowa State University

Plant Biology

(Interdepartmental Graduate Major)

The Interdepartmental Plant Biology major (IPB) coordinates graduate education and research in the areas of plant biology including but not limited to plant biochemistry, plant cellular and molecular biology and plant physiology. Graduate study in IPB, leading to the M.S. and Ph.D. Degrees, is offered through eight participating departments: Agronomy, Biochemistry, Biophysics & Molecular Biology, Chemical and Biological Engineering, Chemistry, Ecology, Evolution and Organismal Biology, Genetics Development & Cell Biology, Horticulture, and Plant Pathology.

Research conducted by the faculty and students of the major represents both basic and applied aspects of plant physiology, biochemistry and molecular biology. The experimental approaches represented in the major span the range of complexity from molecular studies, to cellular, organismal and the ecological level (crop monocultures and natural populations). Graduates have a broad understanding of basic, functional plant biology with emphases on fundamental biology, biochemistry, and molecular biology. They are able to address complex research and policy problems in agriculture, biotechnology, and basic plant biology.

All M.S. candidates take a core curriculum comprising courses recommended by their Program of Study (POS) Committee members. A total of 36 credits including a minimum of 16 course credits are required for a directed by their Program of Study (POS) Committee and specialization, and additional teaching assistant requirements (FS HN 590C Special Topics: Teaching). Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

A total of 72 credits including a minimum of 24 course credits are required for a Ph.D.

* enroll each term in the Interdepartmental Plant Biology seminar PLBIO 696 Research Seminar or its listed equivalent. The first seminar must be during the student's first year and is a 20-minute seminar. The last presentation must be an exit seminar.

All Ph.D. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PLBIO 699 Research), annual Loomis Distinguished Lecture in Plant Biology and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

In addition to the required core courses, a wide selection of courses is available to IPB graduate students for broadening their scientific education. Decisions about which courses are taken and when they are taken are made by the student, initially in consultation with his or her temporary advisor, and then with his or her major advisor and eventually with the POS Committee, which also serves as the Thesis or Dissertation Committee.

**Seed Technology and Business**

(Interdepartmental Graduate Major)

The Graduate Program in Seed Technology and Business offers students advanced study in the seed science and technology and business management appropriate for application in the seed sector. The program is offered by nine departments in the Colleges of Business and Agriculture and Life Sciences: Accounting, Agronomy, Finance, Horticulture, Logistics, Operations, and Management Information Systems, Management, Marketing and Plant Pathology. This multidisciplinary program offers a focused online curriculum for a Master of Science in Seed Technology and Business, along with Graduate Certificates in Seed Science and Technology and in Seed Business Management.

**Online Graduate Program in Seed Technology & Business**

The curriculum offers a set of scientific and technical courses that are focused on seed, with a set of basic management courses, similar to those in the core courses of an MBA program. The business courses will use examples drawn from the seed industry. A creative component is required for the Master of Science degree.

Prerequisite for the program is a bachelor’s degree in business, agriculture, other biological discipline, or related degrees. Graduate training in these disciplines will also be considered.

Graduates of the Graduate Program in Seed Technology and Business will be prepared for roles in management and leadership within private and public seed and seed-related organizations.

All of the courses listed below are required for the Master of Science degree. The pace of the course sequence is designed to allow the students with work and other commitments to participate. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student’s work.

Graduates of the Master of Science curriculum will be prepared for roles in management and leadership within seed related organizations, private and public.

Graduate certificate courses may be applied to the Master of Science in Seed Technology and Business. Those interested in these graduate certificates should contact the Program for details.

Information on application procedures and specific requirements of the major can be obtained at our website: http://www.seedgrad.iastate.edu, or by writing to seedgrad@iastate.edu.

**Toxicology**

toxmajor@iastate.edu

(Interdepartmental Graduate Major)

Toxicology is the science of studying the adverse effects of substances on living organisms. Students observe, gather data and predict risks and outcomes in populations. Whole organism research and cellular and molecular approaches are used to determine toxicant exposure and mechanisms. Work is offered for the degrees doctor of philosophy and master of science. Students majoring in toxicology will be affiliated with one of the following cooperating departments: Agricultural and Biosystems Engineering; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemistry; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Geological and Atmospheric Sciences; Natural Resource Ecology and Management; Physics; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The prerequisites for entrance into the graduate toxicology major include an undergraduate degree in a relevant area of study; for example, chemical engineering, biology, biochemistry, chemistry, ecology, entomology, food science and technology, microbiology, nutritional science, zoology, or veterinary medicine. Minimum undergraduate coursework should include the following or their equivalent:

- 1 year of college mathematics, including calculus
- 1 year of inorganic chemistry with quantitative analysis
- 1 course in physics
- 1 year of organic chemistry
- 2 years of biological sciences including 1 course in physiology

Other courses that are considered desirable in undergraduate preparation include: biochemistry, physical chemistry, qualitative analysis, and some specialized courses such as histology or advanced physiology.

Facilities and faculty are available for fundamental research in such areas as agricultural toxicology, drug discovery and prevention, ecotoxicology, environmental fate and effects of chemicals, insect toxicology, aquatic toxicology, food safety, nutritional toxicology, mycotoxins, neurotoxicology, cellular and molecular toxicology, reproductive toxicology, and veterinary toxicology.

Ph.D. and M.S. Students should register for TOX 689X (R) every fall and spring semester during their training.

Students majors in toxicology will be affiliated with a cooperating department. All Ph.D. students take a core curriculum consisting of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOX 501</td>
<td>Principles of Toxicology</td>
<td>3</td>
</tr>
<tr>
<td>TOX 502</td>
<td>Toxicology Methods</td>
<td>3</td>
</tr>
<tr>
<td>TOX 504</td>
<td>Toxicology Seminar (taken twice)</td>
<td>1</td>
</tr>
<tr>
<td>BBMB 404</td>
<td>Biochemistry I</td>
<td>8</td>
</tr>
<tr>
<td>BBMB 405</td>
<td>Biochemistry II</td>
<td>8</td>
</tr>
<tr>
<td>BBMB 420</td>
<td>Physiological Chemistry</td>
<td>7</td>
</tr>
</tbody>
</table>

Students can also take additional approved toxicology courses.
Transportation

(Interdepartmental Graduate Major)

Work is offered for the degree master of science with a major in transportation under a cooperative arrangement with various departments including Civil, Construction and Environmental Engineering (CCCEE), Community and Regional Planning (CRP), and Logistics, Operations and Management Information Systems (LOMIS). Opportunities are afforded for research in such areas as modeling and performance of transportation systems, highway safety and information systems, remote sensing, environmental analysis, techniques for urban and regional transportation system planning, environmental and social policy analysis of transportation systems, transportation policy analysis, analysis of transportation technologies, commodity distribution, public administration of the transportation planning process, regional development and transportation system interrelationships, transportation economics and finance, and planning for logistics management.

Students majoring in transportation will develop a program of study under the guidance of a program of study committee selected by the student in consultation with and approved by the chair of the faculty supervisory committee. For administrative purposes, the student’s home department will be the department originally admitting the student. A major professor may be selected from any of the three participating departments. A student must designate at least one member of the FDS committee from his or her home department, and at least one member from outside the home department.

A student must complete at least 34 credits of acceptable work including preparation of a 6 credit thesis or a 2-3 credit creative component. A structured minor requires 12 credits of approved transportation courses and a thesis or creative component on a transportation related topic.

A required core includes:

- C E 551 Urban Transportation Planning Models
- 3
- TRANS 691 Seminar in Transportation Planning
- 1
- STAT 401 Statistical Methods for Research Workers
- 4
- one course from all three cooperating departments (CRP, CCCEE, and LOMIS)

Detailed requirements are available from the chair of the supervisory committee.

Graduate students pursuing a major in any of the cooperating departments who have an interest in transportation are encouraged to consider a formal declared minor in transportation. Students considering a declared minor should consult with the chair of the supervisory committee about the requirements for it.

Students typically focus their program of study to support a career in one of five areas: transportation consulting, regional and statewide transportation planning, transportation service operations and management, transportation policy and economic analysis, and transportation planning and operation for local and state governments. Graduates will have specific knowledge in one or more of these focus areas and the skills to conduct research and analysis of transportation issues. These skills allow graduates to be productive immediately in positions related to a focus area or to continue in more advanced transportation graduate work.

Wind Energy Science, Engineering and Policy

Graduate Study

Wind Energy Science, Engineering and Policy (WESEP) is an interdisciplinary Ph.D. program that prepares graduates for wind energy related careers in industry, academia, and government institutions. WESEP is a unique integration of engineering, science, and policy-related disciplines that provides students with an opportunity for breadth and depth in their program of study.

Students take a set of 11 courses and participate each semester in a one-credit seminar course. Of the 11 courses, two courses are introductory wind energy courses, eight are core courses, and one is an advanced specialization course in wind energy. The seminar course will address research methods and communications in science and engineering. Students are also required to pass a qualifying examination in the first 18 months of their program, a preliminary examination generally taken by the end of year three, and a final oral defense with written dissertation to complete the program.

Of the eight core courses, students select five courses from a primary thrust area, providing disciplinary depth, and three courses from a secondary thrust area, providing interdisciplinary breadth. Students can take additional courses within the other thrust areas as needed for their research, but this requirement ensures students are research-capable in two thrust areas.

WESEP Thrust areas

- Wind resource characterization and aerodynamics of wind farms
- Wind energy conversion system and grid operations
- Manufacturing, construction, and supply chain
- Turbine reliability & health monitoring
- Economics, policy and public perception

Admission Requirements

Applicants should have an undergraduate GPA of at least 3.0 (B average) and a B.S. degree from a calculus-based undergraduate curriculum. A calculus-based undergraduate curriculum is one in which students take the equivalent of two years of calculus, covering differential and integral calculus, multivariable and vector calculus, and differential equations, and one year of physics, covering mechanics, thermodynamics, electric circuits, electromagnetics, and optics. The GRE is not required. Applicants who do not meet these general standards will be evaluated on an individual basis.
Undergraduate and Graduate Interdisciplinary Programs

Interdisciplinary programs in this section are available for both undergraduate and graduate students. See information with each program for more details concerning courses.

Honors Program

The Honors Program provides a vehicle for highly motivated and able students to pursue an innovative and challenging undergraduate education. Oversight of students’ progress is primarily the responsibility of the undergraduate colleges. The college Honors Program committees approve programs of study and are responsible for program administration. The University Honors Program Committee, which includes the chairs of the college programs, is responsible for the general coordination of the college Honors Programs and the First-Year Honors Program.

Students in the Honors Program are given a variety of academic opportunities to help them benefit fully from their undergraduate education. To enhance their individualized programs of study, students are offered honors courses, seminars, and opportunities for independent research.

Honors courses and honors sections of regular courses are offered by several departments and programs. These courses often have limited enrollment. Most of these courses are listed by department or program. (See for example Economics, Engineering, English, Mathematics, Physics, and Speech Communication.) Specific information about the full range of honors courses and seminars for the current academic year, including the honors courses offered by individual departments and programs, may be obtained from the Honors Program Office, 2130 Jischke Honors Building.

In addition to taking established honors courses, honors students may designate a course as an honors course with the agreement of the course instructor and obtaining approval from the Honors Program director. Most departments offer opportunities for independent study and research under 290 and 490; when designated by an H, these courses also carry honors credit.

Research grants are available to support honors research.

Iowa Lakeside Laboratory

Interinstitutional Program

Iowa Lakeside Laboratory is run cooperatively by the Iowa Lakeside Laboratory Consortium whose members include Drake University, Iowa State University, the University of Northern Iowa, and the University of Iowa. Lakeside courses can be taken for credit through all Consortium members. Students should check with their advisers to determine whether Lakeside courses can be used to satisfy major or minor requirements or college or university general education requirements.

The Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially those of the Iowa Great Lakes region with its numerous lakes, wetlands, and prairies. Its campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside’s mission is to provide undergraduate and graduate students an opportunity to get hands-on experience working with a variety of natural and human environments through its field-oriented summer courses and to provide research facilities and support for graduate students and faculty working on research projects in northwestern Iowa. Each summer, Iowa Lakeside Laboratory offers students a unique educational experience: small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, hydrology, evolution, geology, soils, taxonomy).

All courses meet all day from Monday through Friday. The majority of courses run for 4 weeks. Enrollments in most courses are limited to 8 to 10 students. Courses are taught at the undergraduate (sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class.

One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects. Because some courses are offered intermittently, the current Iowa Lakeside Laboratory summer brochure or the Lakeside Lab Website (www.lakesidelab.org (http://www.lakesidelab.org)) should be consulted for the list of courses being offered in a given summer session. The Lakeside Lab Website (www.lakesidelab.org (http://www.lakesidelab.org)) also contains additional information about the Laboratory and about each course being offered.

Research projects by undergraduates, graduate students and faculty can be done either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Lakeside. Both graduate and students are welcome to use it as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to take full advantage of its educational, professional, and social life.

Financial Aid

Iowa Lakeside Laboratory Scholarships are available to both undergraduates and graduate students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory Scholarships is available on the Website (www.lakesidelab.org (http://www.lakesidelab.org)). Students should also consult the Student Financial Aid Office for other scholarship, work study, and loan programs for which they are eligible.

Registration

Students can only enroll in Iowa Lakeside Lab courses by submitting an Iowa Lakeside Lab Registration and Scholarship form and Housing form to the Iowa Lakeside Laboratory Administrative Office. These forms are found on the Iowa Lakeside Laboratory Website (www.lakesidelab.org (http://www.lakesidelab.org)) where they can be submitted online or downloaded. For further information, contact Iowa Lakeside Laboratory 1838 Highway 86 Milford, IA 51351 Phone: (712) 337-3669 FAX: (712) 337-0361 E-Mail: peter-vanderlinden@uiowa.edu Early registration is advisable. Because enrollment in Lakeside courses is limited, students should register before May 1 for the following summer session. Housing is also limited and students must apply for housing or indicate that they plan to live off campus at the time of registration.

Interdisciplinary Programs-Minor

Interdisciplinary programs are administered by more than one college and/or more than one department.

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

Complex Adaptive Systems

Interdepartmental Graduate Minor

The Complex Adaptive Systems (CAS) minor provides graduate students with an understanding of the interrelationships among the various methodologies often collectively referred to as Artificial Life. Of special import is the program is the interplay of biological principles and computer simulations in various fields including Economics, Engineering, Mathematics, and Biology.

Graduates understand the ways in which artificial life techniques may be applied to their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application.

Work in the CAS minor is offered for students pursuing any graduate degree. The primary cooperating departments are Economics; Computer Science; Electrical and Computer Engineering; Mechanical Engineering; Mathematics; Psychology; Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Each student’s Masters Program of Study (POS) must include at least 9 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 Complex Adaptive Systems Concepts and Techniques. Each student’s Ph.D. POS must include at least 12 CAS relevant courses credits chosen in consultation with the student’s POS committee and
the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 Complex Adaptive Systems Concepts and Techniques. Ph.D. students who also minor in CAS at the master’s level must take one additional CAS relevant course (3 cr.) and two additional credits of CAS seminar. Courses that satisfy CAS requirements may also be used to satisfy major requirements if such “double counting” is acceptable to the major program. Interested students may contact the chairperson of the advisory committee for complete lists of courses and of CAS faculty members.

**Entrepreneurial Studies**

**Interdepartmental Undergraduate Minor**

Entrepreneurial Studies is an interdisciplinary program that provides opportunities to students to learn about entrepreneurship—the process of creating value through recognizing and developing opportunities. It serves to complement the student’s major area of study, in any college, by offering a means of putting theory and science into practice. The goal of the Entrepreneurial Studies program is to provide the knowledge and skills needed to create value through recognizing and developing opportunities. In addition to feasibility analysis and business planning, the program deals with the topics of innovation, opportunity recognition, technology transfer, industry analysis, and competitive strategy. Although the program introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

A minor in entrepreneurial studies is available to all undergraduate students at ISU. Students must follow college specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of the college rules.

A student seeking a minor in entrepreneurial studies must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurial studies program, including:

- MGMT 310 ENTREPRENEURSHIP AND INNOVATION 3
- MGMT 313 FEASIBILITY ANALYSIS AND BUSINESS PLANNING 3
- Or MGMT 410X SOCIAL ENTREPRENEURSHIP (EXPERIMENTAL COURSE) 3
- MGMT 310 ENTREPRENEURSHIP AND INNOVATION is the introductory course and provides an overview of the entire field.
- MGMT 313 FEASIBILITY ANALYSIS AND BUSINESS PLANNING emphasizes developing an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan.

Students take two entrepreneurship-oriented electives (6 cr.) from an approved course list and must also take 3 cr. of experiential learning. Up to six of the 15 credits required for the minor may also be used in the student’s required program of study. Detailed information about the minor and the list of approved electives is available online at http://www.business.iastate.edu.

**Graduate Certificate**

An interdisciplinary graduate certificate in entrepreneurship and innovation is available to postgraduate students from any discipline. The program provides students an opportunity to learn about entrepreneurship, innovation, and the new venture creation process and to develop business skills that can be used to start a business. The program is flexible so that students can design a program that provides core entrepreneurship education through one required business management course as well as discipline-specific training from entrepreneurship courses in other colleges. The certificate program is taught at a distance using computer-based instructional media.

Students seeking this Graduate Certificate must meet minimum university criteria for admission to graduate programs. Students interested in the Entrepreneurship and Innovation Certificate must successfully complete a minimum of 12 credits in courses approved for use in the certificate program, including one required course, MGMT 566 Entrepreneurship and New Business Creation and three entrepreneurship-oriented electives (9 cr.) chosen from an approved course list. MGMT 566 Entrepreneurship and New Business Creation focuses on the essentials of starting and operating a new business. Additional information as well as the list of approved electives can be found on the certificate website.

**Sustainability Minor**

Sustainability is often defined as “meeting the needs of today without compromising the ability of future generations to meet their own needs.” The minor in sustainability at Iowa State University is available to any ISU student who wants to further learn about sustainability issues affecting humans today and in the future.

The interdisciplinary minor in sustainability exposes students to ideas and issues related to a sustainable, balanced and ethical future for the planet and its inhabitants. The minor is at the interplay between environmental, social and economic factors in improving the quality of human life within the capacity of supporting ecosystems.

The minor will help students understand the dynamics of biological population growth and decline in the natural world, predator-prey models, over-exploitation of natural resources, energy balances, and much more. Students also will learn how human behavior affects the natural world and the ability of earth to sustain life.

In addition, students in the minor will understand how the decisions they make as consumers, workers, resource owners, citizens and policymakers affect human welfare in this and future generations. Students also will be able to articulate why some environmental, social and economic profiles are sustainable and others are not.

The minor will provide students knowledge sufficient to apply sustainable practices in their personal and professional lives.

The colleges of Agriculture and Life Sciences, Design, Engineering, and Liberal Arts and Sciences sponsor the minor in sustainability.

**Requirements for the minor in sustainability**

The minor in sustainability may be earned by completing a total of 15 credits including two required courses and nine elective credits from an approved list. Of the nine elective credits, at least six credits must be at the 300 level or higher.

**Required courses:**

- T SC 220 Global Sustainability 3
- ANTHR 230 Globalization and the Human Condition 3

**Emphasis Electives:**

- AGRON 120 Introduction to Renewable Resources 3
- AGRON 342 World Food Issues: Past and Present 3
- AGRON 450 Issues in Sustainable Agriculture 3
- ANTHR 336 Global Development 3
- ARCH 245 Building Science and Technology I 3
- ARTIS 360 Sustainable Design and Fabrication of Furniture 3
- ARTIS 362X Artist and Designers’ Role in Sustainable Development 3
- BIOL 355 Plants and People 3
- BIOL 471 Introductory Conservation Biology 3
- BIOL 484 Ecosystem Ecology 3
- C R P 201 Making the Metropolis 3
- C R P 293 Environmental Planning 3
- C R P 417 Urban Revitalization 3
- C R P 425 Growth Management 3
- C R P 429 Planning in Developing Countries 3
- C R P 445 Transportation Policy and Planning 3
- C R P 484 Sustainable Communities 3
- C R P 491 Environmental Law and Planning 3
- ECON 380 Environmental and Resource Economics 3
- ECON 385 Economic Development 3
- ENGL 355 Literature and the Environment 3
- ENSCI 381 Environmental Systems I: Introduction to Environmental Systems 3-4
- ENSCI 382 Environmental Systems II: Analysis of Environmental Systems 3
- ENV S 324 Energy and the Environment 3
- ENV S 334 Environmental Ethics 3
- GEOL 160 Water Resources of the World 3
- GLOBE 301 Resource Systems of Industrialized Nations 3
- GLOBE 302 Resource Systems of Developing Nations 3
- GLOBE 402 Responses to Global Resource System Challenges 3
- L A 302 Ecological Design at the Regional Scale 6
- M E 433 Alternative Energy 3
- NR 120 Introduction to Renewable Resources 3
NREM 452  Ecosystem Management  3
NREM 471  Agroforestry Systems; Local and Global Perspectives  3
SOC 345  Population and Society  3
SOC 382  Environmental Sociology  3
SOC 411  Social Change in Developing Countries  3
T SC 341  Technology: International, Social, and Human Issues  3
T SC 343  Philosophy of Technology  3

Technology and Social Change

Undergraduate Study
Technology and social change is a cross-disciplinary program examining the relationships between technologies and the social and cultural environments. The program has a national and international perspective, with courses addressing the interrelationships, policies, and impacts created by the international exchange of technologies. Through T SC, students will better understand the institutional and sociocultural consequences of technological change from differing perspectives and will become sensitive to the issues attending the use of technology to improve people’s lives. Work in the program can also serve as preparation for advanced study in this field.

Minor
The program requirement for a minor in technology and social change is a minimum of 15 credits.

T SC 341  Technology: International, Social, and Human Issues  3
3 credits from T SC cross-listed courses  3
9 credits selected from T SC cross-listed courses or from the list of T SC approved courses  9
Total Credits  15

At least 9 of the 15 credits must be in courses numbered 300 or above. Because technology and social change is an interdisciplinary study, minor programs must include coursework in at least two departments. Students seeking a minor should develop a specific program of courses either with the T SC faculty representative in their department or with the T SC coordinator. The student’s minor program must be approved by the T SC program coordinator.

Graduate Study
The graduate minor in technology and social change is a cross-disciplinary program that enables students to study the interactions between technologies and their users, on both societal and individual levels. The minor strengthens the ability of students to apply differing perspectives in understanding the effects of the global exchange of technologies and to heighten their sensitivity to the institutional and sociocultural issues attending the use of technology to improve people’s lives.

Students choosing to minor in technology and social change will pursue a degree program in the major department. In consultation with their major professor, students are to identify a T SC Faculty member to serve on the committee guiding their program of study. This T SC Faculty member must be on the Graduate faculty and must be from a discipline outside the major field of study. With the agreement of the POS committee, the student declaring a minor in T SC will select a group of courses from the list of T SC approved courses available through the program coordinators. For the master’s degree, this group should be at least 9 credits; for a doctoral degree, the group should be at least 15 credits. In either case, T SC 543 Technological Innovation, Social Change, and Development is required. Students may not include in their minor any courses from their own major. All programs of study that include a T SC minor must be approved by the T SC Program coordinator.

Wind Energy
The wind energy minor is primarily intended for students majoring in engineering or atmospheric sciences, but is available to all that meet the prerequisites, Math 166 and Physics 222. The minor is comprised of 15 credits, of which 6 are required of all students obtaining the minor. As per the University Catalog, at least 9 credits cannot be used to satisfy any other degree, program or University requirement.

Importance of Wind Energy Minor
Wind energy is a pivotal component of our nation’s future energy portfolio, particularly given the desire to reduce the carbon footprint through the use of renewables. The Midwest region is among the richest wind regions in the nation, with Iowa being the second leading state in the nation as measured by installed wind capacity of 3670 MW, after Texas. This minor will help provide this industry (planners, manufacturers, developers, utilities, and maintenance providers) with technical students with the knowledge and understanding of the science, engineering and policy of wind energy.

Student Learning Outcomes
The objectives of the proposed Minor are to provide a broad understanding of the wind energy industry from component design and manufacturing, electric generation, transmission, and grid operations, to policy.

- Communicate objectives of a long-term national energy portfolio and how wind energy will contribute to meeting those objectives
- Understand the wind energy systems and design tradeoffs for the large components (e.g., blade, turbine, tower, and foundation)
- Manufacturing and supply chain considerations for economic production.
- Identify problems and potential solutions associated with integrating high wind penetrations into the electric grid.
- Communicate most significant reliability problems for wind turbines and be conversant with related monitoring technologies and maintenance methods to address them.
- Identify effects of existing and potential policies on wind energy growth

Learning outcomes will be assessed using tests, quizzes, homework and term papers.

Required Courses
Course descriptions can be found here (http://www.engineering.iastate.edu/eri/initiatives/strategies/wei/education/wind-energy-minor/wind-energy-minor-course-descriptions). Choose 9 credits.

- ENGR 340  Introduction to Wind Energy: System Design & Delivery  3
- AER E 381  Introduction to Wind Energy  3

Elective Courses
Course descriptions can be found here (http://www.engineering.iastate.edu/eri/initiatives/strategies/wei/education/wind-energy-minor/wind-energy-minor-course-descriptions). Choose 9 credits.

- AER E 422  Vibrations and Aerelasticity  3
- AER E 423  Composite Flight Structures  3
- AER E 481  Advanced Wind Energy: Technology and Design  3
- C E 460  Foundation Engineering  3
- C E 541  Dynamic Analysis of Structures  3
- I E 543  Wind Energy Manufacturing  3
- MAT E 362  Principles of Nondestructive Testing  3
- E E 451  Engineering Acoustics  3
- E M 451  Engineering Acoustics  3
- M E 451  Engineering Acoustics  3
- E E 452  Electrical Machines and Power Electronic Drives  3
- E E 457  Power System Analysis II  3
- E E 459  Electromechanical Wind Energy Conversion and Grid Integration  3
- M E 325  Mechanical Component Design  3
- M E 411  Automatic Controls  3
- M E 417  Advanced Machine Design  3
- M E 421  System Dynamics and Control  4
- MTEOR 405  Environmental Biophysics  3
- MTEOR 407  Mesoscale Meteorology  3
- MTEOR 411  Synoptic Meteorology  3
- MTEOR 417  Mesoscale Forecasting Laboratory  3
- MTEOR 432  Instrumentation and Measurements  3
- MTEOR 454  Dynamic Meteorology II  3

How to Apply
2. Obtain a signature from your academic adviser.
3. Submit the form to Dr. Frank Peters.

For more information contact:
Dr. Frank Peters
Associate Professor – Industrial & Manufacturing Systems Engineering
3004 Black Engineering Bldg. - mailing address
3024 Black Engineering Bldg. - office address

Certificates

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.0 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student’s transcript and a printed certificate will be awarded.

Iowa State University also offers certificates from the Graduate College and certificates via distance education.

Community Leadership and Public Service

(Certificate Only)

Interdisciplinary undergraduate program

This interdisciplinary program utilizes university courses offered in a variety of academic disciplines to provide a strong foundation and appropriate experiences for undergraduate students who plan to become community leaders and engage in public service—regardless of their profession—in the public, nonprofit or private sectors. The certificate is awarded by the College of Liberal Arts and Sciences. Completion of the certificate will be noted on the student’s transcript and a certificate provided by the Registrar.

Objectives

- Demonstrate proficiencies in written and oral communication.
- Demonstrate understanding of key concepts of organizational theories, ethics and decision-making, principles of public service, effective communication, leadership practices in groups and organizations, and diversity issues.
- Develop leadership skills—including written and oral communication, creative thinking, personal management, group and organizational effectiveness, and problem-solving—important to students’ careers, communities and personal development.
- Bring students into contact with faculty members from diverse academic departments, backgrounds and leadership experiences.
- Prepare students to undertake leadership roles in their careers and in service to their community through coursework and co-curricular activities.

Learning outcomes

Upon completion of the Certificate in Community Leadership and Public Service, students will:

- Demonstrate understanding of key concepts of leadership theories and effective practices within diverse groups, organizations and communities.
- Demonstrate understanding of key concepts of organizational theories, ethics and principles of public service.
- Demonstrate proficiencies in written and oral communication.
- Demonstrate awareness of cultural values and diversity issues as they pertain to community leadership and public service.
- Demonstrate engagement as citizens through service to their communities.

Requirements

The Certificate in Community Leadership and Public Service requires 21 credits. At least 9 credits must be taken in courses numbered at the 300-level or above. At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the certificate cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate. The program requires the completion of 21 credit hours through 3, 3-hour required courses in leadership, communication and organizational theory. An additional 12 hours come from approved electives covering 3 hours in communication, 6 hours in leadership, and 3 hours of a capstone experience through a course, internship or study abroad experience. The capstone course should focus on the scholarship of leadership in the student’s field of study whereas an internship or study abroad should provide a leadership-in-practice experience.

fpeters@iastate.edu
Latin American Studies

Interdepartmental undergraduate program

The certificate in Latin American Studies is a cross-disciplinary course of study in the College of Liberal Arts and Sciences and is designed for undergraduates in any major who wish to enhance their degree and employment possibilities by adding expertise in Latin America and competence in the Spanish language.

Objectives

- Provide opportunities for students to develop skills and understanding about issues concerning Latin America by bringing them into contact with faculty members from many different academic backgrounds
- Provide students with an international immersion experience where they gain cultural awareness and sensitivity
- Prepare students for work or advanced study in Latin America, such as in foreign service, journalism, advocacy organizations, scientific or research institutions
- Help students acquire proficiency in one of the principal languages of Latin America (Spanish)
- Guide students in interdisciplinary study leading to an understanding of the multi-faceted picture of the past, present, and future of Latin America

Learning Outcomes

Upon Completion of the Certificate in Latin American Studies, students will be able to:

- Demonstrate understanding of key concepts pertaining to Latin American cultural, historical and political events
- Understand, interpret and articulate the major processes, theories and problems of selected contemporary and historical issues in Latin America
- Demonstrate oral, aural, and written proficiency in Spanish equivalent to the mid-advanced level
- Effectively communicate with persons of Latin American cultures
- Become effective global citizens through knowledge and comparison of the cultures and issues of the United States and Latin American countries
- Be able to read Latin American cultural, literary, and historical texts in the target language with comprehension and analytical insight
- Demonstrate awareness of cultural values, beliefs, and ideologies of the various Latin American countries
- Demonstrate a thorough knowledge of the geography of the Latin American countries

General Requirements

Requirements for the Certificate in Latin American Studies are satisfied through formal language instruction and by completing a minimum of 21 credits at the 300 level or above. Students will take coursework in at least three different disciplines and departments (Spanish, Anthropology, and Political Science) with other possible course offerings in LAS, History, Agriculture, and Agronomy.

Course Requirements

Students will complete 6 credits of core courses:

- SPAN 322 (Latin American Civilization) or SPAN 324 (Latin America Today) 3
- ANTHR 323 (Topics in Latin American Anthropology) 3

Students should consult with their adviser for alternative courses in the event a course is not available.

Other Requirements

Students will complete an additional 15 credits selected from the approved list of courses in Latin American Studies or courses approved by the Latin American Studies Certificate adviser at the 300 level or above.

- No more than 3 credits may be taken as a 490, independent study, and the topic must deal with Latin America.
- A minimum of 9 credits applied toward the Certificate cannot be used to meet any other departmental, college, or university requirement.
- Students may receive credit on a pre-approved basis for internships completed in Latin America. No more than 3 credits from this area may be applied to the Certificate.
- Courses taken for the Certificate may not be taken on a pass not-pass basis.

Capstone Courses: Choose 3 credits of the following for a capstone elective or complete an approved internship or study abroad experience.

- AESHM 421 Developing Global Leadership: Maximizing Human Potential 3
- CL PS/W S 488 Research on Women and Leadership 3
- COMST 404 Research Seminar (404C Small Group Communication and 404D Organizational Communication) 3
- C R P 432 Community Planning Studio 4-6
- ENGL 418 Seminar in Argumentation 3
- ENGR 490L Independent Study 1-3
- HD FS 449 Program Evaluation and Proposal Writing 3
- LAS 490G 1-3
- LAS 491 Service Learning 1-4
- LAS 499 Internship 1-4
- M E/WLC 484 Technology, Globalization and Culture 3
- POL S 475 Management in the Public Sector 3
- PSYCH 450 Industrial Psychology 3
- SOC 464 Strategies for Community Engagement 3
- W S 491 Senior Internship 3

For more information contact the Carrie Chapman Catt Center for Women and Politics, 309 Catt Hall, 515-294-3181, leadprgm@iastate.edu, or visit http://cattcenter.las.iastate.edu/leadership/
• Credits for a Certificate may be used to satisfy the credit requirement for graduation and to meet the credit requirements for courses numbered 300 and above.
• A certificate is not awarded if the baccalaureate degree is not finished.
• For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.
• After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.
• A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.

Language Requirement
• The minimum requirement in formal language instruction is completion of two years or the equivalent of Spanish at the university level. At ISU the completion of Spanish 202 satisfies this requirement.
• Native speakers, or those with in-field experience of another Latin American language with a level equivalent to 202 or higher can have the language requirement waived. Equivalence will normally be assessed by a faculty member/CLEP exam in the Dept. of World Languages and Cultures.
• While students are encouraged to enroll in language instruction courses (i.e., conversation and composition) above the 300 level, no more than 6 credits of language study (301,303, 304) may be applied toward fulfilling language requirements for the Certificate. Students should be aware that all 300-level literature and culture/civilization courses in the Dept. of World Languages and Cultures have prerequisites.

Study Abroad
Students are required to participate in an ISU-approved study abroad program in a Latin American country with a minimum duration of 4 consecutive weeks. The Study Abroad Office has a list of ISU-approved programs. Students may elect to participate in other study abroad programs with the approval of the Latin American Studies Advisory Committee.

Approved courses available toward the Certificate:
The decision as to whether or not a course can be counted toward the certificate is based primarily on course title and description as it appears in the current ISU course catalog. Courses which deal primarily with Hispanic or Latina/o cultures in the U.S. will not count towards credit for the Certificate in Latin American Studies. Courses which primarily deal with Spain or Portugal and their cultures also do not count toward the certificate. When in doubt students should consult with the adviser for the Latin American Studies Undergraduate Certificate program.

The undergraduate certificate in Occupational Safety is designed to meet the needs of the vast majority of professionals who find themselves with...
Plan of Study-4 year plans

Four Year Graduation Program

Iowa State University’s Soar in 4: Four-Year Graduation Program provides the opportunity for students to take a proactive approach towards completing their undergraduate degree in four years (or eight semesters). Through careful planning with their academic advisers, students can complement their undergraduate degree with experiences such as study abroad, internship, and service learning. By graduating in four years, students can reduce their tuition costs and accelerate their entry into the job market or advanced education compared to students who take more than eight semesters to graduate. The program encourages students to work collaboratively with their academic adviser to make strategic academic decisions about which courses to take each semester.

Students participating in the Soar in 4: Four-Year Graduation Program are expected to:

- Keep in close contact with their Iowa State academic adviser, who will guide students’ academic decisions and keep students up-to-date with university policies and procedures.
- Take required courses at the times they are available.
- Maintain student registration at ISU during off-campus experiences.
- Register for classes promptly and monitor academic progress on a regular basis by reviewing the degree audit and with his/her adviser.

Iowa State University will provide the academic advising services and degree-audit mechanisms to assist students in accurately monitoring progress toward graduation. ISU is also responsible for providing class space in the courses required for the student’s respective major in order to complete a bachelor’s degree within eight consecutive semesters.

Four-year (eight-semester) templates for ISU programs of study

Iowa State University offers over 100 majors in six undergraduate colleges. All but two programs, architecture and landscape architecture, may be completed in four years. ISU’s bachelor degree programs require from 121 to 144 credits; therefore, students must average between 15 and 18 credits per semester. To assist students in creating their own personal four-year academic plans, eight-semester templates are provided for all programs of studies covered by the Soar in 4 program.

To participate in the program

Students can sign up to participate in Soar in 4: Four-Year Graduation Program after consulting with their academic adviser either during orientation or their first-year at Iowa State. A student’s decision on whether to participate is often based on a variety of factors including academic preparation, academic interests, and outside of class commitments. Additional information and the Soar in 4 Four-Year Graduation Plan application form are available from:

http://www.provost.iastate.edu/what-we-do/undergrad-initiatives/soarin4

Total Credits: 131-132

* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.

** In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

---

* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.

*** In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

It is critical that students take A ECL 371 fall semester of the junior year and A ECL 451 fall semester of the senior year.

**Sophomore**

| Credits | Spring | Credits | |
|---------|--------|---------| |
| Fall | | | |
| AN S 211 | 1 | 1 | |

Total Credits: 123.5-120.5

Students should meet with a Biology Program Adviser to determine the proper plans for chemistry, math and physics before selecting those options above. Students must have 120 credits minimum to graduate students are required to take 21 credits in advanced biology of which 9 credits must be from the Biology Program (BIOL), and 2 advanced BIOL courses must have a lab or field component.
Dairy Science, B.S. - pre-veterinary medicine option

MATH 140, 150, 160, 165, or 181 3
Social Science - elective list 1
Total Credits: 12-132

Important: is only one of many equally-sound schedule sequences.

Note: Free electives and specified group electives are often chosen to complement the student’s career focus. The student’s academic advisor assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in AN S 110 and through appointments with the student’s advisor in Dairy Science. Typical career areas include Advanced Degree in Dairy Science, Business and Finance, Agriculture Promotion and Information, Dairy Food Industry, Agricultural Sales and Marketing, International Agriculture, Animal Production and General Agribusiness and Pre-Veterinary Medicine.
